

Feedback from Art and Sciences Professors  
Submitted January 28, 2008  
Alesa Mansfield

1. Sustainability issues are addressed (to varying degrees) in several Arts and Sciences courses.

For example :

Geology courses

Biology - Environmental Science

Chemistry - Chemistry and Society

Geography - World, Regional and Economic Geography

Sociology - Social Problems: Population and the Environment

2. Several professors expressed an interest in integrating sustainability issues throughout the curriculum

- One common suggestion: Create an interdisciplinary/ interdepartmental Sustainability Program

3. Student Environmental Group

- Led by Jeff Richardson

4. Other comments and concerns by professors

- Increase the number of smart classrooms

-Paper consumption and recycling

-Use of Blackboard

-several professors use Blackboard to reduce paper consumption

- Balancing paper consumption with academic needs
