The official Columbus State Community College Catalog is maintained online at www.csc.edu. The 2009-2010 College Catalog contains current information regarding the school calendar, admissions, degree requirements, fees, regulations, and course offerings. Columbus State reserves the right to make changes in the online catalog or in the printed catalog, as deemed necessary.

For specific information on any changes, please contact Columbus State at (614) 287-2453 or 1-800-621-6407.

**Nondiscrimination Policy**

It is the established policy of Columbus State Community College not to discriminate against any individual or group of individuals for reasons of race, color, sex, religion, ancestry, national origin, disability or veteran status. The college is fully committed to providing equal opportunities in all employment-related activities, educational programs, and other activities of the college. Columbus State promotes equal opportunities through a positive and continuing Affirmative Action Program. Columbus State Community College will fully comply with all federal, state, and local laws and regulations to guarantee equal opportunities.

**Reasonable Accommodations**

It is the Columbus State Community College policy to provide reasonable accommodation to students with disabilities. If you would like to request such accommodations because of a physical, mental, or learning disability, please contact the Department of Disability Services, Eibling Hall, Room 101.

**Accreditation**

Columbus State Community College is accredited by the North Central Association of Colleges and Schools. (North Central Association of Colleges & Schools, 30 N. LaSalle Street - Suite 2400, Chicago, Illinois 60602-2504, [312] 263-0456 or [800] 621-7440.)
Dear Columbus State Student:

Welcome to Columbus State Community College!

Whether you are just beginning your academic career or are returning to college to update your skills, change professions, or obtain a degree, your experience here should be a rewarding one. The faculty and staff at Columbus State are dedicated to providing you with the best educational preparation possible. Many of our faculty and staff are recognized statewide and nationally for their professional expertise. Our classes are small, and students receive personal attention from faculty, making for a very nurturing learning environment.

As a community college, we are dedicated to providing access to higher education to everyone in our community. We also work hard to meet the job training needs and workplace skills demanded by employers in central Ohio.

Columbus State stands ready to help you—and every student—learn for the present and learn for a lifetime. I hope you take full advantage of everything this exceptional college community has to offer.

Columbus State. It really is where the world is going!

Sincerely,

Val Moeller
President

Columbus State Community College reserves the right to change this calendar as necessary.
Columbus State In Brief

For more than 40 years, Columbus State Community College has been meeting the diverse educational needs of the community. The college is proud to be an important contributor to the growth and progress of central Ohio.

In 1963, the Columbus Board of Education created the Columbus Area Technician School, and the board designated an area of Central High School to house this new school for two-year, post-secondary technical programs.

Rapid growth in enrollment during the initial two years caused the Board of Education to purchase the Columbus Aquinas Parochial High School property and move the Technician School to a permanent campus. May 25, 1965, the Ohio Board of Regents gave approval to a proposal from the Columbus Board of Education to create the Columbus Technical Institute District, and the Columbus Technical Institute was granted a charter effective July 1, 1967.

As a state-assisted college, Columbus Technical Institute provided technical programs that prepared students for immediate employment. From the first graduating class in 1965 through today, more than 30,000 students have earned associate degrees in 50+ technical fields and transfer programs. The success of the College is reflected in the many accomplishments of these graduates and the many other students who have completed courses to improve and enhance their skills.

On July 1, 1987, Columbus Technical Institute was re-chartered as Columbus State Community College by action of the Ohio Board of Regents. This significant change was a result of careful study of the educational needs of Columbus and central Ohio. The resulting findings supported the establishment of a comprehensive community college to provide additional educational opportunities to area residents.

As a comprehensive community college, Columbus State has a strong commitment to students seeking career and technical education leading to employment and to those students who want to pursue an Arts and Sciences curriculum leading to an associate degree and undergraduate degree. Our Career and Technical Division offers certificates and associate degree programs in five major areas: business, information technology, health, human and public services, and engineering, construction and mechanical technologies. Columbus State also offers Associate of Arts and Associate of Science degree programs whose coursework fulfills the freshman and sophomore year requirements for bachelor’s degree programs offered by four-year colleges and universities throughout the state. Specific transfer agreements with 40 colleges and universities are in place at Columbus State, and new partnership degree programs are being developed all the time. The college’s Center for Workforce Development Division also offers skills enhancement, customized training and business consulting for area industries and employers.

Columbus State’s Downtown Campus is centrally located on approximately 85 acres near downtown Columbus. The campus consists of 23 buildings that house classrooms, laboratories, and offices of the college. Also part of the Downtown Campus is the Educational Resources Center, which provides materials and resources for students. In addition, the college operates a facility for Aviation Maintenance Technology at Bolton Field Airport and a nine-hole golf course and driving range, open to the public, on Agler Road.

As a convenient alternative to downtown studies, Columbus State offers classes at 10 off-campus locations throughout central Ohio. At several of these suburban centers, a wide range of student services are available and students can even complete an associate degree. In July 2008, the college broke ground on a second campus to be located in Delaware, Ohio. This campus is scheduled to open Autumn Quarter of 2010.

Columbus State Community College serves Franklin, Delaware, Madison, and Union counties. A nine-member board of trustees is appointed by the governor. Columbus State is accredited by the North Central Association of Colleges and Schools, and many of the college’s degree programs are accredited by professional associations and agencies.

Campus Tours

Campus tours are led by Columbus State students and give prospective/future students, their families, and new applicants an opportunity to explore and learn more about the campus. To view the schedule and make a reservation, click the “Prospective/Future Students” and “Tours” links at www.csc.edu. To arrange a campus visit and/or tour for a group of five or more, contact the Admissions Office in the lower level of Madison Hall or call (614) 287-5689.

Admissions

New students are invited to begin the enrollment process in the Admissions Office, located on the lower level of Madison Hall. International Admissions/Enrollment Services is also located in this area. Admissions advisors assist new students with the application and admission process and provide information on programs of study and next steps for enrollment, including new student orientation, placement testing, and applying for financial aid. Admissions advisors also provide information about the many services and resources available to help students succeed at Columbus State and the wide variety of opportunities to get involved in campus activities and organizations. For more information, contact the Admissions Office at (614) 287-2669 or view our online resources at www.csc.edu (click on the “Prospective/Future Students” link).

Downtown Campus

Columbus, Ohio 43215
Phone: (614) 287-5353.
Off-Campus Programs
Susan Norris-Berry, Administrator
(614) 287-5083

Columbus State’s off-campus centers, located throughout the college’s four-county service district and in Pickaway County, provide educational opportunities for more than 15,000 students each year with day, evening and weekend classes. Suburban centers offer courses in general education, computer skills and technical areas, and most are equipped for telecourse and distance learning delivery. In addition, the Associate of Arts and the Associate of Applied Science degree in Business Management are available at the Dublin and Westerville centers. Academic Advising, COMPASS™ placement testing, Distance Learning testing, and other academic support services are provided at some off-campus centers. Students may also pay fees (credit card payments only) at the Dublin, Southeast and Westerville centers during designated hours; please contact these centers for current hours.

Enrollment Services

Admission Policy

Columbus State Community College is committed to the principle of providing each student access to quality educational programs and lifelong learning. An application for admission is required for all applicants pursuing enrollment in academic credit courses. This application is not required for students enrolled exclusively in noncredit courses. Information provided on the Columbus State Community College admissions application is used to determine initial admission status. Additional documentation is required for certain applicant categories, such as international, felony, underage, and transfer students. Specific information about each category is maintained in the Admissions Office. Applicants not meeting established procedures will be denied admission. Admission procedures, including changes in conditions of admission status, will be adopted and implemented by the college.

Admission to a specific program of study for the purpose of earning a degree or certificate shall be according to requirements and procedures established for the specific program of study and adopted by the college. Admission to the college does not ensure admission to a particular program of study. Many technologies, including Nursing, have established additional requirements that must be fulfilled prior to acceptance. All prospective applicants are encouraged to contact the Admissions Office for specific information.

To be eligible for financial assistance, applicants who are not high school/home school graduates and who do not have their GED (General Education Diploma), must demonstrate the ability to benefit from college programs by achieving the required scores on the college’s placement test. For some students, prerequisite coursework in science, reading, mathematics and English may be needed prior to enrolling in certain courses and programs. While most degree programs can be completed in two years of full-time study, it may take longer for some students, including those who need developmental courses and those attending on a part-time basis.

For more information, contact the Admissions Office in the lower level of Madison Hall, (614) 287-2669. See below for additional application and enrollment procedures.

Application/Enrollment Procedures

Prospective students can learn more about the application and enrollment process at Columbus State by visiting the Columbus State web site at www.cscc.edu and clicking on the “Prospective/Future Students” link. This site includes a complete step-by-step guide to enrollment with links to additional information and resources for each step of the process.

Identification Number

An identification number is assigned to each student upon admission to the college. Social Security Numbers are not used as identifiers for student records. Student-determined passwords allow access to CougarWeb functions.

(Please refer to the statement on Family Educational Rights and Privacy Act found on pages 29-30 for information on the release of student records.)

High School Transcript /GED scores

If required for admission to their chosen program of study, or if needed to verify a science course prerequisite has been met, students should submit a final official copy of their high school transcript and/or an official copy of their GED scores. Please check the Specific Program Admissions Information in the Programs of Study section of this catalog to determine if your high school transcript/GED scores are required for admission to a particular program of study.

The official high school transcript and/or copy of official GED scores should be mailed to Columbus State Community College, Records and Registration Dept. - MA 201, 550 East Spring St., P.O. Box 1609 Columbus, Ohio 43216-1609. All information submitted to the college relative to admission and academic status becomes and remains the property of the College.

Previous College Transcript

An official college transcript is requested of applicants who have attended other colleges or universities. An official transcript from each college attended is required of all who are seeking transfer credit or who have completed prerequisite coursework at another institution. An official transcript is one that is in a sealed envelope bearing the other institution’s official letterhead and/or logo; is printed on official, secure paper that has been signed and sealed by the other college or university; and has not been opened prior to being submitted to Columbus State Community College. The transcript should be mailed from the other college(s) to Columbus State Community College, Records and Registration Department, Madison Hall 201, 550 East Spring Street, P.O. Box 1609 Columbus, Ohio 43216-1609, before the student’s second quarter of attendance has elapsed. All student education record information, documentation and material submitted to Columbus State Community College, including official transcripts from other colleges and universities, becomes and remains the property of the college.

Health Record

If you are accepted to, or take courses in, the following technologies or programs, you must submit a health record prior to registering for or attending technical classes: Dental Hygiene, Dietetic Technician, Early Childhood Development, Emergency Medical
Services Technology, Health Information Management Technology, Histology, Medical Assisting Technology, Medical Laboratory Technology, Multi-Competency Health, Nuclear Medicine, Nursing, Phlebotomy, Radiography, Respiratory Care, Sport and Exercise Studies, Surgical Technology, and Veterinary Technology. A health record form will be provided by your department. Specific requirements vary by technology but could include a physician’s examination, immunizations, and screenings.

Applicant Information

Applicants who are transferring to Columbus State from another college and applicants who are transient students (students attending another college who plan to enroll at Columbus State for one or two quarters and transfer the credits back to the other college) should obtain a copy of their transcript or other documentation of completed courses to use when working with an academic advisor to assist them in recommending appropriate courses and next steps in the enrollment process. Students with transfer credit in college-level composition and algebra may not need to complete the entire placement test. Students dismissed from another institution may be required to submit additional documentation to determine their admission status and conditions of enrollment at Columbus State Community College.

Applicants who are Immigrants (Permanent Residents, Refugees, Asylees) must submit a photocopy of their immigration documents verifying their status. Additional documents may be requested by Columbus State before final admission is granted.

Applicants who are Non-Immigrants (Visa holders other than F-1 status) must submit a photocopy of the visa stamp in their passport and both sides of their I-94 card. They must also submit original or certified photocopies of secondary school records showing graduation in the original language and translated into English, if required for admission to their chosen program of study. Additional documents may be requested by Columbus State before final admission is granted. For complete application procedures and deadline dates, please view the Columbus State International Student Web page at: www.cscc.edu/Students/International/index.htm or contact International Enrollment Services in the Admissions Office in the lower level of Madison Hall, 614-287-2074.

Applicants who are F-1 Status Visa Holders (International Applicants) must submit secondary school records verifying graduation, college records if applicable, proof of English proficiency, a financial bank statement and affidavit of support. Additional documents may be requested by Columbus State before final admission is granted. For complete application procedures and deadline dates, English proficiency requirements, and financial documentation, please view the Columbus State International Student Web page at: www.cscc.edu/Students/International/index.htm or contact International Enrollment Services in the Admissions Office in the lower level of Madison Hall, 614-287-2074.

Applicants who are F-1 Transient Student Applicants must submit a photocopy of the following: their visa stamp, both sides of their I-94 card, and the front and back of their current I-20. They must also submit their International Student Advisor Report and their college transcript(s) showing successful completion of college-level English or English proficiency. Additional documents may be requested by Columbus State before final admission is granted. For complete application procedures and deadline dates and English proficiency requirements, please view the Columbus State International Student Web page at: www.cscc.edu/Students/International/index.htm or contact International Enrollment Services in the Admissions Office in the lower level of Madison Hall, 614-287-2074.

Applicants who are high school students interested in the Post Secondary Enrollment Options (PSEO) program (concurrent enrollment in college classes while still in high school) must complete the application for admission to Columbus State. A supplemental Post Secondary Enrollment Options program (PSEO) packet is available online at www.cscc.edu/USE/PSEO1.htm. Applicants must complete the student section and submit the application to their high school counselor. The high school counselor will complete the rest of the PSEO application and will send it to Columbus State Community College, K-12 Initiatives Office, Attn: PSEO, with the high school transcript. Students meeting preliminary criteria must complete placement testing; students meeting the placement test score requirements and additional entrance requirements will be offered admission into the PSEO program, and must attend a PSEO orientation session. Students will talk with an academic advisor in Advising Services to review test results, explore programs, and select appropriate courses to schedule. Contact the K-12 Initiatives Office at 614-287-5961 to speak with an Underage Enrollment Advisor about the PSEO program or self-pay options for underage students at Columbus State.

Senior Citizens “Good as Gold” Educational Program

As a community service, Columbus State Community College offers senior citizens who are 60 years old or older the opportunity to enroll in credit courses for self-enrichment tuition free, on a space-available basis, for audit “R” only. To register for credit courses, senior citizens, who are 60 years old or older and who have been certified as eligible for the “Good as Gold” Educational Program, pay the one-time, nonrefundable $50 matriculation fee, which covers the cost of enrolling at the college, including application and permanent record maintenance and a student identification card. The matriculation fee will appear and be due for the academic quarter in which the student initially registers for a course, even if the class is dropped by the student or cancelled by Columbus State. “Good as Gold” participants are responsible for payment of lab fees, books, instructional supplies, parking permits and any additional educational expenses required of other students. Student rates to concerts and activities are available to “Good as Gold” students. Financial aid is not available for “Good as Gold” registration (courses are taken for audit “R” only), and students cannot enroll for courses granting academic credit and audited “Good as Gold” courses during the same term.

For information regarding the “Good as Gold” Educational Program and to make an appointment, call (614) 287-5538.

Felony Reporting

All applicants to the college and all current and returning students must report any un-expunged felony convictions to the Admissions
Office in the lower level of Madison Hall. Documentation, including an arrest record, personal statement, and letter of reference, will be required to determine admission and enrollment status and conditions of enrollment. An Admissions Review Committee will review the information and will notify students in writing of their next steps. Depending on their situation, they may be granted regular admission and enrollment status, or may be required to appear before the Committee for a personal interview to determine their status and conditions of enrollment. They will remain in a pending admission and enrollment status until the review process is complete. Contact the Admissions Office for more information.

New Student Orientation
Columbus State offers a variety of options to help new students get oriented to the college and get off to a good start. All new students, including those transferring from another institution, must complete the orientation process, which includes:

• Getting Started 101 Orientation—Learn about the key steps in the enrollment process, including what documents are needed, how to apply for financial aid, how to prepare for placement testing, when to meet with an academic advisor, what services and resources are available to help you be successful, and what opportunities Columbus State offers to get involved in activities and organizations. The Getting Started 101 Orientation is offered online in a self-paced format or in person at a one-hour session offered several times per week. This orientation should be completed prior to placement testing, academic advising, and course registration. For more information and to make a reservation for an in-person session, click on the “Prospective/Future Students” and “Orientation” links at www.cscc.edu or contact the Admissions Office in the lower level of Madison Hall, (614) 287-2669.

• CougarWeb Orientation (CWO)—Learn how to utilize Columbus State’s many online tools and resources in this 30-minute, hands-on, interactive session. Set up your user name and password, access your student e-mail and BlackBoard, learn how to register for classes and pay your fees online, and more. These sessions are offered several times per day in the Student Assistance Center in Madison Hall 225. An online manual is also available. Reservations are not needed. For more information, click on the “Prospective/Future Students” and “Orientation” links at www.cscc.edu or contact the Student Assistance Center in Madison Hall 225, (614) 287-5353.

Placement Testing
The Testing Center offers the COMPASS/ESL placement test, a computerized assessment for new students, used to identify the appropriate starting level for reading, writing, math, and English as a Second Language (ESL) courses. Developmental education, English as a second language, and/or noncredit basic English courses may be required to maximize the student’s opportunity for academic and personal success. After completing the COMPASS/ESL test, students meet with an academic advisor in Advising Services for an interpretation of their test results and assistance selecting appropriate courses for their first quarter.

Placement testing is required for the following students:

• All students who plan to register for a course with established reading, writing, or math prerequisites.

• All students who register for 12 or more credit hours during their initial quarter at the College.

• All part-time students who will register for their 12th accumulative credit hour.

• All high school students intending to take classes.

Students with transfer credit in college-level composition and algebra from an accredited institution may not need to complete the entire placement test. These students should contact an academic advisor in Advising Services, Aquinas Hall, Room 116, (614) 287-2668, for course selection and registration information.

COMPASS/ESL testing is done on a walk-in basis; appointments are not needed. Please note that students must report for testing no later than two hours prior to the Testing Center closing time; placement tests are not administered after this time. Testing must also be completed by closing time and no extension will be given, so please plan sufficient time for testing. A photo ID is required. In an effort to provide a distraction-free testing environment, children, food, beverages, and cell phones are not permitted in the Testing Center. Testing is offered on the Columbus campus and at some off-campus centers on particular days/times. For more information, contact the Testing Center in Aquinas Hall, Room 002, (614) 287-2478, or visit our Web site at www.cscc.edu. Sample test items and resources for review are available on this web site.

For information about placement testing for noncredit Basic English courses, contact the Language Institute in the Center for Workforce Development, 315 Cleveland Avenue, Room 1090, (614) 287-5858.

Returning Students
Students who have not taken classes at Columbus State for more than two years, and would like to return to the college, should contact the Records and Registration Department at least one week before the quarter begins to update their academic records. The student should also request that official transcripts from any other college they attended during their absence from Columbus State be forwarded to the Records and Registration Department. An official transcript is one that is in a sealed envelope bearing the other institution’s official letterhead and/or logo; is printed on official, secure paper which has been signed and sealed by the other college or university; and has not been opened prior to being submitted to Columbus State Community College.

Registering For Classes
Students can register for classes via the Web at www.cscc.edu, via CATS (Computer Automated Touchtone System) at (614) 287-2287, with a Telephone Information Center representative at (614) 287-5353, in person with the Records and Registration Department, or at one of the off-campus centers. Course additions or section changes after the start of the quarter will be permitted only with the instructor’s approval. Please check the Online Schedule for pertinent deadlines.

Students who wish to register for 22 or more credit hours in a quarter must have the permission of their academic advisor.
Cross-Registration at Other Institutions

The Higher Education Council of Columbus (HECC) is an association of colleges and universities in central Ohio established to develop programs that benefit its member institutions and the community at large.

As a service to students, HECC member institutions have approved a system of cross-registration for regularly enrolled, full-time undergraduate students at the following colleges and universities:
- Capital University
- Central Ohio Technical College
- Columbus College of Art and Design
- Columbus State Community College
- DeVry University
- Franklin University
- Mount Carmel College of Nursing
- Ohio Dominican University
- Ohio State University
- Otterbein College
- Pontifical College Josephinum

Cross-registration is limited to one course per term (Autumn, Winter and/or Spring only), with a maximum of three cross-registered courses during a student’s academic experience. The course taken must be an enrichment class to the student’s program of study at Columbus State. To participate in cross-registration, a Columbus State Community College student must be in good academic standing and maintain full-time status during the quarter he or she is requesting permission to participate in cross-registration. The course section requested for cross-registration must have space available as determined by the host institution. The Columbus State student does not pay tuition to the host institution but may be charged other enrollment-related fees, such as laboratory or parking fees. A grade for the course taken at a host institution will be posted only on the student’s Columbus State transcript.

A Columbus State student interested in cross-registering for a course must obtain approval from their academic advisor and the Office of the Registrar and from the host institution’s Registrar. It is the student’s responsibility to make certain that the host institution’s calendar, course schedule, course content, and credit are compatible with his or her goals and Columbus State Community College requirements. Each institution has established cross-registration deadlines, which must be met to participate. For more information, please contact the Office of the Registrar.

Selective Service System Registration

Under the provisions of Section 3345.32 of the Ohio Revised Code, a male student born after December 31, 1959, who is at least 18 years of age and who is classified as an Ohio resident for fee purposes by the state-assisted college or university he is attending, is required to be registered with the Selective Service System or be charged a tuition surcharge equal to that charged a nonresident student. Such a student is required to provide his Selective Service number on the Columbus State Community College admissions application if he is between the ages of 18 and 26. If said student turns 18 after completing an admissions application, he is required to provide the Selective Service number within 30 days of his 18th birthday to the Records and Registration Department. If he does not submit his Selective Service number, the student will be billed a surcharge equivalent to the nonresident tuition rates. This surcharge will be billed until the Selective Service number is provided.

Students are exempt from registration with the Selective Service System on the basis of one of the following criteria:
- Female
- Under 18 years of age
- 26 years of age or older
- Currently on active duty in the Armed Forces of the United States. Note: Training in a Reserve or National Guard unit does not constitute active duty.
- A nonimmigrant alien lawfully in the United States in accordance with Section 101 (a) (15) of the Immigration and Nationality Act, U.S.C. 1101, as amended, or
- A permanent resident of the Federated States of Micronesia, the Marshall Islands, or the Republic of Palau.

Note that Selective Service System registration compliance must take place before disbursement of any federal financial aid funds, or the Ohio Instructional Grant, or before the institutional section of a Guaranteed Student Loan or PLUS application will be certified.

*If you are a male who is within 30 days of becoming 18 years of age or between 18 and 26 years of age and have never applied for a Selective Service number, registration may be processed online at www.sss.gov or through a local post office. You may also contact the Selective Service System at (847) 688-6888 to retrieve your Selective Service number. When you receive your Selective Service number, please report your number to the Telephone Information Center at (614) 287-5353.

Change of Name, Address, Phone Number, Program of Study

Any change in a student’s name, address, phone number, or program of study must be reported to the Records and Registration Department so the academic record may be updated.

Name changes require that official documentation such as a marriage certificate, court decree, etc., must be submitted to the Records and Registration Department.

Address and telephone number changes may be made by calling the Telephone Information Center at (614) 287-5353 as well as in the Records and Registration Department. Each student is responsible for complying with any official communication sent to the last reported address.
Program of study changes may be made in the Records and Registration Department. Students may also call the Telephone Information Center, (614) 287-5353, to change their program of study if the new program of study does not have a separate application procedure, such as many of the health related fields.

Student Assistance Center

The Student Assistance Center, located in Madison Hall, Room 225, is a place where students can resolve registration, fee payment and financial aid issues. Student Assistance Center services include:

• Assisting students with CougarWeb registration
• Assisting students with navigating CougarWeb
• Conducting Free Application for Federal Student Aid (FAFSA) Workshops
• Assisting students with completing various online financial aid processes such as Entrance Interviews and Master Promissory Notes
• Conducting CougarWeb Orientations (see Orientation section for details)

CougarWeb Orientation (CWO) is where students learn how to utilize Columbus State’s many online tools and resources in this 30-minute, hands-on, interactive session. Set up your user name and password, access your student e-mail, learn how to register for classes and pay your fees online and more. These sessions are offered several times per day in the Student Assistance Center. Reservations are not needed. For more information and session times, click on the “Prospective/Future Students” and “Orientation” links at www.cscc.edu or contact the Student Assistance Center (614) 287-5538.

Hours of operation
Monday–Thursday, 8:00 a.m.–7:30 p.m.
Friday, 9:30 a.m.–4:30 p.m.
Saturday, 9:00 a.m.–12:00 p.m.

Writing Center

The English Department invites all students to use the Writing Center, located in Franklin Hall, Room 245, Monday–Saturday. Students are encouraged to bring a copy of their composition assignment and pre-writing materials with them. Call (614) 287-5717 to schedule an appointment.

Speech Rehearsal Lab

The Speech Lab offers tutoring to students requiring critiques of their oral presentations. The lab is located in Nestor Hall, Room 017, and is open Monday–Friday. Please call (614) 287-5391 for an appointment.

Army Reserve Officers Training Corps (ROTC)

Qualified students interested in obtaining an officer’s commission in the United States Army, Ohio National Guard, or Army Reserve may enroll in Army ROTC classes through a contracted agreement between Columbus State Community College and the United States Army. Training consists of a combination of classroom and outdoor instruction. Freshman and sophomore students may enroll in the four-year program consisting of the two-year general military course and the two-year professional officer course. There is no military obligation for students in the first two years of the program.

Students with a minimum 2.50 cumulative grade point average may apply for Army ROTC scholarships. Applications for scholarships are normally made during the fall term and must be completed by January 30. Additional information may be obtained by contacting the Program Chairperson for Military Science, (614) 236-7114.

Financial Aid

Financial aid is available in several forms: grants, scholarships, loans, and part-time employment. In general, the amount of assistance that a student may receive depends upon the established financial need of the student. This need is determined through the U.S. Department of Education and is based on the information submitted in the Free Application for Federal Student Aid (FAFSA). Financial aid is to be used for tuition, fees, room, board, books, and commuting expenses. For more information please see the High Finance publication, available from the Financial Aid Office, or online at www.cscc.edu.

For all federal financial aid programs, regular admission status to the college and U.S. citizenship or permanent residence status is required. Only those who have declared their intent to pursue a degree and are taking related courses are eligible. Persons with bachelor’s degrees are not eligible for grants but may apply for loans and work study.

Application Procedures

Students can apply for financial aid electronically via the Internet at www.fafsa.ed.gov. Students who prefer to submit a paper copy of the FAFSA may print a the form at the same Web site or request a paper FAFSA by calling the Federal Student Aid Information Center at 1-800-4-FED-AID (1-800-433-3243) or 1-319-337-5665. If you are hearing impaired, please contact the TTY line at 1-800-730-8913. Students may also request information by calling (614) 287-2648. You must apply for financial aid each academic year. New FAFSA applications may be submitted after January 1 each year and are throughout the academic year. Campus-based funding is awarded on a first-come, first-awarded basis.

To ensure that your financial aid application materials can be processed in a timely fashion, Columbus State has established priority deadlines for completing the appropriate application materials. These dates are available on the Financial Aid Web page at www.cscc.edu.
How Do I Apply?

1. Make application for admission to Columbus State Community College.
2. Apply online at www.fafsa.ed.gov or complete and submit the Free Application for Federal Student Aid (FAFSA) paper application to the U.S. Department of Education. Computers in the Student Assistance Center or in any computer lab at CSCC may be used for submission of the FAFSA.
   a. If you are a first time FAFSA filer, apply for a Personal Identification Number (PIN) from the U.S. Department of Education at www.pin.ed.gov.
   b. Be sure to list Columbus State as the school you plan to attend by denoting school code 006867 in step 6 of the FAFSA.
   c. If you complete your FAFSA online, use your PIN to sign the application. If you do not have a PIN, be sure to print the signature page. You must sign the signature page and mail it to the address listed on the page.
3. Approximately four weeks after your FAFSA has been received and processed by the U.S. Department of Education, you will receive a Student Aid Report (SAR). Review these results. If corrections to your FAFSA are necessary, you may submit them electronically at www.fafsa.ed.gov, or you may bring the appropriate materials to the Financial Aid Office and have those corrections submitted electronically by personnel in the Financial Aid Office.
4. When the Financial Aid Office has received your FAFSA results, we will review your file. Once it is determined that your file is complete, you will be sent an official Financial Aid Award letter, explaining the types of financial aid you are eligible to receive.

Basic Eligibility Requirements

Eligibility for most federal student aid programs is based on financial need. In addition, the federal student aid programs require that the student recipient:

- Be a United States citizen, eligible noncitizen, U.S. National, or permanent resident.
- Have a valid Social Security Number.
- Have a high school diploma, GED, or recognized equivalent.

Proof of passing GED scores must be on file with the Records and Registration Department before your application can be processed. Students without a high school diploma or GED may establish eligibility under the Ability-to-Benefit regulations by passing a test approved by the U.S. Department of Education. The COMPASS™ placement test is the approved test available at Columbus State through the Testing Center in Aquinas Hall 002. To qualify for consideration students must have the following minimum scores: Writing Skills: 32; Reading: 62; Math (Pre-Algebra): 25.
- Have complied with current Selective Service registration regulations. For more information on Selective Service requirements, contact the Financial Aid Office or our Web page: www.cscc.edu.
- Be a regularly admitted student, enrolled in an eligible program, working toward a degree or certificate.
- Maintain satisfactory academic progress as defined by the Financial Aid Standards of Academic Progress Policy. Students who already hold a bachelor’s degree are not eligible for grants, but may be eligible for loans and work study. Students may not be in a default or overpayment status on any type of federal financial aid.

Verification

Verification is the process through which the federal government requires confirmation of the accuracy of the information reported on the Free Application for Federal Student Aid (FAFSA). If you are selected for verification, you must provide clear evidence that the information you reported on your FAFSA is true and correct. The Financial Aid Office will contact you regarding specific requirements pertaining to your application if you are selected. Signed copies of IRS income tax returns, Verification Worksheets, and documentation of untaxed income are generally required for completion of verification. If other documents are needed the Financial Aid Office will notify the student.

Satisfactory Academic Progress

Federal regulations require that Columbus State Community College monitor the academic progress of students who apply for and/or receive federal financial aid. These regulations apply to each financial aid applicant, regardless of whether a student has ever previously applied for or received federal financial aid. To receive any form of federal financial aid, students must maintain satisfactory academic progress toward a degree or certificate. For additional information refer to the High Finance publication available from the Financial Aid Office or the Web page, www.cscc.edu. Failure to maintain satisfactory academic progress will result in funds either being terminated or withheld until eligibility is regained.

Scholarships

A scholarship is financial assistance awarded primarily on the basis of scholastic achievement. As with grants, they generally do not have to be repaid. The college itself offers hundreds of scholarships, of varying types and amounts, designed for recent high school graduates, as well as for new students age 25 and older. Contact the Financial Aid Office in Rhodes Hall (287-2648), your academic advisor, or www.cscc.edu (click on “Financial Aid” and then “Scholarships”) for additional information related to scholarships.

The Columbus State Community College Development Foundation also coordinates a large number of scholarships established by private donors, areas businesses and professional organizations. Scholarships vary in availability from year to year, and eligibility for each scholarship program also varies. In general, these scholarships are based on criteria including, but not limited to, field of study, financial need, credit hours earned, academic and individual achievement, and/or recent high school graduation.

Students may apply for these scholarships by completing the Application for Development Foundation Scholarships, available in the Financial Aid Office during open application periods. Typically, there are two application periods: one in June/July for the upcoming academic year and one in January/February for spring
Veterans Services

Columbus State Community College is proud to serve the training needs of veterans and other eligible persons. Students eligible to receive VA educational benefits must register with the Veterans Services Office in order to receive their benefits.

To apply for VA educational benefits, students must have completed the college admissions application and paid the application fee. Students should contact the VA to begin the application process at least six weeks prior to the beginning of the quarter they plan to attend. Each applicant will be provided with a copy of the Standards of Satisfactory Academic Progress for VA Recipients, current VA guidelines, and pay scales.

To request an application or to receive more information about VA benefits, contact the VA Coordinator at (614) 287-2644.

Information and Services

The Financial Aid Office is located in Rhodes Hall, Lower Level. Customer Service Representatives are available in person or over the phone to answer questions and direct students to the appropriate resources. Financial Aid Customer Service is located on the lower level of Rhodes Hall or by calling (614) 287-2648.

Telephone Numbers
Financial Aid Representative ....................... (614) 287-2648

and summer quarters. Information and scholarship listings will be available in the Financial Aid Office and online at www.cscc.edu (click on “Financial Aid” and then “Scholarships”) during application periods.

If you have been awarded a scholarship from an outside agency or organization, you are responsible for notifying the Financial Aid Office of this award. The organizations from which the award was made will need to provide, in writing, verification of what school-related expenses may be covered and/or any requirements for the scholarship. This information is required prior to the release of any scholarship award.

Freeze Dates
CSCC uses a freeze date each quarter to determine a student’s enrollment status for disbursing financial aid. The number of credit hours in which a student is enrolled on the freeze date is used to calculate the amount of financial aid he/she will receive. This means that if a student adds or drops classes before the freeze date, the amount of financial aid he/she is eligible for will be affected. If classes are added or dropped after the freeze date, the financial aid award will not change.

The freeze date coincides with the close of the 100% tuition refund period each quarter. Please refer to the Online Class Schedule for the 100% refund dates for full-term, first-term, 4-week term, eight-week term, and flex-term classes.

Refund Policy
Students who withdraw from classes are refunded their instructional and general fees according to the procedure established by the college.

If a financial aid program has paid for a student’s tuition and fees, the refund is made to the program and not to the student. In the case of Federal Stafford Loan or Federal PLUS Loan, the refund is made directly to the lending institution.

Students who receive financial aid over and above the cost of tuition and fees (i.e., a cash disbursement) and withdraw from classes during the refund period may be required to return all or part of the cash disbursement.

OIG recipients dropping below 12 credit hours during the 100% refund period will be required to repay the entire amount of the grant. OIG or OCOG recipients dropping below 12 credit hours during the 50% or 25% refund period will be required to repay a percentage of the grant.

Return of Unearned Title IV Funds Policy
Financial aid students who completely withdraw from all classes during a given quarter may be subject to repayment of federal and state funds back to the Department of Education. The policy states that a student must attend through the 60 percent point of the quarter in order to earn his/her federal financial aid. For more information on this policy, please refer to the High Finance publication that is available in the Financial Aid Office or the Financial Aid Office Web page, www.cscc.edu.
One-Time Fee

Matriculation Fee (nonrefundable) ........................................ $50

Matriculation Fee

The one-time, nonrefundable, $50 matriculation fee covers the cost of enrolling at the college, including application and permanent record maintenance and a student identification card. The matriculation fee will appear and be due for payment on the schedule and fee statement for the academic quarter in which the student initially registers for a class, even if the class is dropped or cancelled.

Instructional and General Fees

The resident credit hour fee of $79.00 is based on a $70.00 instructional fee and a $9 general fee. The general fee defrays the cost of registration, student activities services, and student support services of a noninstructional nature. Fees for non-Ohio residents and international students reflect a similar prorated instructional and general fee amount. All fees are subject to change.

Quarterly Academic Fees

Ohio Residents
Ohio residents are charged a combined instructional and general fee of $79.00 per credit hour. This fee includes a $70.00 instructional fee and a $9.00 general fee.

Non-Ohio, U.S. Residents
Non-Ohio, U.S. residents are charged a combined instructional and general fee of $175.00 per credit hour. This fee includes a $159.00 instructional fee and a $16.00 general fee.

International Students
International students are charged a fee of $210.00 per credit hour. This fee includes a $189.00 instructional fee and a $21.00 general fee.

Lab Fees

Lab fees are charged to cover the cost of consumable materials used by the student. The cost of student liability insurance, required in certain health technologies, will be included in the lab fee.

Fee Payment

Students can access their class schedule under “My Schedule” and the charges under “Make-A-Payment” online via the Web at www.csc.edu. Fee payment deadlines are listed in the Enrollment Guide at the above Web site.

Late Payment of Fees

Fees not paid by the published quarterly deadline dates will result in the student’s schedule being dropped. If a student is dropped for nonpayment, when they re-register, there will be a $75 re-registration fee. After any deadline date, any class registered should be paid the same day to avoid being subsequently dropped or restricted from future registrations or transcript requests.

NOTE: Financial aid does not automatically pay fees for courses added after the fee payment deadline. You may contact the Financial Aid Office for fee payment options. Additionally, financial aid will not be available to pay for full-term or first-term classes added after the 100% refund period.

Student Health Insurance

Columbus State Community College offers low-cost, group accident and sickness insurance. All full-time students are eligible for the plan. Coverage is worldwide, 24 hours a day, at home, at school or while traveling. The fee provides coverage for the entire 12-month period. Extended coverage for family and dependents is also available at an additional cost. For more details, request a student insurance program brochure from the Cashier’s Office in Rhodes Hall or the Local Representative, Wells Fargo Insurance Services, P.O. Box 276, Columbus, OH 43216-0276, 1-800-228-6868, at http://wfis.wellsfargo.com/colleges.

Prior Learning Assessment Fee

Students with life experience that has provided learning similar to academic course outcomes may request a review of that experience by the appropriate academic department chairperson. A nonrefundable $50 fee is charged to review the information and/or portfolio.

Proficiency Examination Fee

Students who believe they possess the knowledge contained in a course may request of the academic department to take a proficiency examination. A nonrefundable $50 fee is charged for each proficiency examination to be taken and is payable to the Cashier’s Office prior to taking the exam. Information concerning proficiency examinations may be obtained by contacting the chairperson of the department offering the course for which the exam is to be taken.
Transient Student Fees

Transient students (those who are taking one or more courses to transfer back to another college or university) complete the same application and follow the same registration process as other students taking courses for credit. The instructional, general, lab and appropriate residency status fees shall be charged for courses taken. The one-time, nonrefundable $50 matriculation fee covers the cost of enrolling at the college, including application and permanent record maintenance, and a student identification card. The matriculation fee will appear and be due for payment on the schedule and fee statement for the academic quarter in which the student initially registers for a class, whether the class is dropped or cancelled. It is recommended that transient students receive approval from their home institution to take specific Columbus State Community College courses to ensure transferability and applicability of the credit at their home institution.

Release of Records and Transcripts

Columbus State Community College, in all good faith, will not release nondirectory information to individuals and organizations outside of the college without the student’s written permission, except when required by law. Students may request that an official Columbus State transcript be sent to organizations and individuals outside of the college by completing the Transcript Request Form available via the Web at www.cscc.edu. A photo ID is required for the student or individual picking up the transcript in person. Transcripts will not be released to an individual other than the student without detailed written permission signed by the student specifying the name of the person picking up the transcript. If a balance is owed to the college, Columbus State will not release a transcript for or to a student until the balance is paid in full.

The Family Educational Rights and Privacy Act of 1974, as amended, governs the maintenance and release of records. A copy of the regulations is available in the Records and Registration Department, or by sending a written request, including the student’s signature to that department (see pages 29-30 for a summary of the Act).

Refunds

The quarterly instructional, general and lab fees are refundable for student-initiated drops in accordance with the following guidelines:

Instructional and general fee refunds are based upon the percentage of time elapsed in each course. If the course is dropped with 10% of the time elapsed in the course, a 100% refund of instructional and general fees will be issued. If the course is dropped with 20% of the time elapsed in the course, a 50% refund of instructional and general fees will be issued. If the course is dropped with 30% of the time elapsed in the course, a 25% refund of instructional and general fees will be issued. Lab fees may be refundable based upon the same percent of refund issued for instructional and general fees. No refunds are given beyond 30% of the term.

Please check the Web at www.cscc.edu for the refund dead-
lines.

A total refund of quarterly fees is made when a program is can-
celled or closed and the student does not elect, or is not permitted, to enroll in another program.

If there are extenuating circumstances that have prevented the student from dropping his or her class(es) within the 100%, 50%, or 25% refund periods and warrant exception to the refund procedure, the student must complete the tuition refund request form. All tuition refund requests submitted with the statement of explanation, written and signed by the student, and supporting third party documentation by the deadline are reviewed and approved or denied by a committee. All requestors are notified of the committee’s decision via USPS mail. Refund requests submitted after the following dates will not be considered:

Summer Quarter – November 15th of the same year
Autumn Quarter – February 15th of the following year
Winter Quarter – May 15th of the same year
Spring Quarter – August 15th of the same year

The Tuition Refund Request form is available via the Web at www.cscc.edu.

Resident, Non-Resident, and International Student Status for Tuition Purposes

A resident of Ohio “for all other legal purposes” shall mean any person who maintains a 12-month place or places of residence in Ohio, prior to applying to the college, who is qualified as a resident to vote in Ohio and receive state welfare benefits, and who may be subjected to tax liability; provided such person has not, within the time prescribed by this rule, declared himself or herself to be, or allowed himself or herself to remain, a resident of any other state or nation for any of these or other purposes.

In determining whether an enrolled student is an Ohio resident, the college shall make a determination of fact in accordance with the above standards.

General Residency for Tuition Surcharge Purposes

The following persons will be classified as residents of the State of Ohio for tuition surcharge purposes:

A. Dependent students, at least one of whose parents or legal guardians has been a resident of Ohio for 12 consecutive months or more immediately preceding the enrollment of such student in an institution of higher education;
B. Persons who have resided in Ohio for all other legal purposes for at least 12 consecutive months immediately preceding their enrollment in an institution of higher education and who are not receiving and have not directly or indirectly received in the preceding 12 consecutive months, financial support from persons or entities who are not residents of Ohio for all other legal purposes.

C. A dependent child of a parent or legal guardian, or the spouse of a person who, as of the first day of a term of enrollment, has accepted full-time employment and established domicile in Ohio for reasons other than gaining the benefit of favorable tuition rates. Documentation of full-time employment and domicile shall include, but is not limited to, both of the following:
   1) A sworn statement from the employer or the employer’s representative on the letterhead of the employer or the employer’s representative certifying that the parent or spouse of the student is employed full-time in Ohio.
   2) A copy of the lease under which the parent or spouse is the lessee and occupant of rented residential property in the state; a copy of the closing statement on residential real property located in Ohio of which the parent or spouse is the owner and occupant; or if the parent or spouse is the not the lessee or owner of the residence in which he or she has established domicile, a letter from the owner of the residence certifying that the parent or spouse resides at that residence.

D. People who live and are gainfully employed full-time or part-time and self-sustaining in Ohio and who are pursuing a part-time program of instruction at an institution of higher education.

Residency Exceptions and Circumstances

1. A person on active duty status in the United States military service who is stationed and resides in Ohio and his or her dependents will be considered residents of Ohio for these purposes.

2. A person who enters and currently remains upon active duty status in the United States military service while a resident of Ohio for all other legal purposes and his or her dependents shall be considered residents of Ohio for these purposes as long as Ohio remains the state of such person’s domicile.

3. Any alien holding an immigration visa or classified as a political refugee shall be considered a resident of the state of Ohio for state subsidy and tuition surcharge purposes (see C1 and C2 above).

4. No one holding a student or other temporary visa shall be eligible for Ohio residency for these purposes.

5. A dependent person classified as a resident of Ohio for these purposes shall continue to be considered a resident during continuous full-time enrollment and until his or her completion of one academic degree program.

6. In determining residency of a dependent student, removal of the student’s parents or legal guardian from Ohio shall not, during a period of 12 months following such removal, constitute relinquishment of Ohio residency status otherwise established under item (C).

7. Any person once classified as a nonresident, upon the completion of 12 consecutive months of residency in Ohio for all other legal purposes, may request reclassification as a resident of Ohio for these purposes. Should such person present clear and convincing proof that no part of his or her financial support is, or in the preceding 12 consecutive months has been, provided directly or indirectly by persons or entities who are not residents of Ohio, for all other legal purposes, such person shall be reclassified as a resident (exceptions: non-immigrants). Evidentiary determinations under this rule shall be made by the college, which may require, among other things, the submission of information regarding the sources of a student’s actual financial support to that end.

8. Any reclassification of a person who was once classified as a nonresident for these purposes shall have prospective application only from the date of such reclassification.

9. A person who is transferred by his employer beyond the territorial limits of the 50 states of the United States and the District of Columbia while a resident of Ohio for all other legal purposes and his or her dependents shall be considered residents of Ohio for these purposes as long as Ohio remains the state of such person’s domicile.

10. A person who has been employed as a migrant worker in Ohio (and his or her dependents) shall be considered a resident for these purposes provided such person has worked in Ohio at least four months during each of the three years preceding the proposed enrollment.

A change in residency status is never automatic, and must be initiated by an application for such change by the person seeking it. For further information on residency for tuition purposes, please contact the Residency Officer in the Records and Registration Department.

Parking Permits

All motor vehicles, including motorcycles, parked on campus must have a current Columbus State parking permit. Permits can be purchased online or from the Cashier’s Office located on the second floor of Rhodes Hall. Call (614) 287-2525 for more information.

To purchase a permit, student must have paid tuition fees. Parking fee for one vehicle is $25.00 per quarter, and everyone is limited to one parking permit. A new permit must be purchased each quarter.

Lost or stolen permits will be replaced at a cost of $25.00. All parking permits are registered to the student or employee who was issued the permit and are nontransferable.

Temporary permits are available from the Public Safety Department at no cost. They are issued to those individuals who need to park a vehicle that does not have a parking permit. The temporary permit will be issued providing verification of the purchase of a regular permit. Temporary permits may also be issued for special needs such as temporary handicap parking (limit 30 days) with a doctor’s letter.
For important instructions on affixing parking permits, see the Public Safety section, page 38, under Additional Services to Students, or go online at www.cscc.edu and click on the “Public Safety” link.

Note: Parking meters are for visitors only. Unauthorized and illegally parked vehicles are subject to being cited and towed at the owner’s expense. Columbus State Community College disclaims all responsibility from losses from or damages to vehicles parked on Columbus State property. Columbus State Community College is not responsible for losses from or damages to any vehicle towed from campus.

More information on parking regulations, fines, and the appeals process can be found at www.cscc.edu; click on the “Public Safety” link.
Grading and Academic Procedures

Grades

At the end of each quarter and upon the completion of course requirements, the instructor reports a letter grade indicating the quality of a student’s work. Points for each quarter hour of credit attempted are assigned according to the following system:

<table>
<thead>
<tr>
<th>Grade Definitions</th>
<th>Grade Notation</th>
<th>Grade Points per Academic Credit Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>High Achievement</td>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>Good Achievement</td>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>Satisfactory Achievement</td>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>Below Satisfactory</td>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>Failing</td>
<td>E</td>
<td>0</td>
</tr>
<tr>
<td>Satisfactory</td>
<td>S</td>
<td>0</td>
</tr>
<tr>
<td>Unsatisfactory</td>
<td>U</td>
<td>0</td>
</tr>
</tbody>
</table>

An “I” (Incomplete) may be recorded until the final grade is established. An Incomplete is indicated only when the student has arranged for that grade with the faculty member and specific arrangements have been made for fulfilling the course requirements. Coursework must be completed within six weeks after the beginning of the next quarter. If a new grade is not submitted by the faculty member by that time, a grade of “E” is automatically recorded.

Transfer Credit (K/KD): To receive credit for a course taken at another college or university, a student must request that an official copy of the transcript from each previous institution attended be mailed to the Records and Registration Department before the student’s second quarter of attendance has elapsed. An official transcript is one that is in a sealed envelope bearing the other institution’s official letterhead and/or logo; is printed on official, secure paper that has been signed and sealed by the other college or university; and has not been opened prior to being submitted to Columbus State Community College. The official transcript copy becomes and remains the property of the college. Please see the information on the Ohio Transfer Policy in this Catalog. Transfer credit does not apply to meeting residency credit hour requirements. Approved nontraditional credit is posted to the transcript after the student has completed one course at CSCC.

Audit (R): A student may audit a course for informational instruction only and with the understanding that credit may not be granted or later claimed as a result for the audited course. The course may be taken at a later date for credit. Neither proficiency nor nontraditional, transfer, or waiver credit will be given for a course that has been audited. Audit status cannot be declared after the fifteenth calendar day of the quarter. Once the audit status for a course is declared, the status cannot be changed back to a credit status during the quarter or after the quarter has ended. Any student wishing to audit a course is required to register for the course in the same manner as all other students and pay regular fees. The instructor will record a grade of “R” for the audited course.

Nontraditional Credit (N): Nontraditional credit through Prior Learning Assessment (PLA) may be awarded by the appropriate department chairperson for a student’s documented life experiences that provide evidence of knowledge equivalent to that of a required course. If a portfolio is required, a fee of $50 will be charged for portfolio evaluation. Nontraditional credit does not apply to meeting residency hour requirements. Approved nontraditional credit is posted to the transcript after the student has completed one course at CSCC.

Withdrawal (W): A course must be dropped before 20% of the course has elapsed to avoid a “W” appearing on the academic transcript. Withdrawals after 20% and before 61% of the course has elapsed is recorded as a “W” on the academic transcript. The course may be taken at a later date for credit. Neither proficiency nor nontraditional, transfer, or waiver credit will be granted or later claimed as a result for the audited course.

Incorrect Grade Reported: A blank space indicates that the instructor did not report a grade. The instructor must report a grade within six weeks after the beginning of the next quarter, otherwise a final grade of “E” is automatically recorded. A student receiving a ( ) should contact his/her instructor.

Incomplete (I): When circumstances beyond the control of a student or a faculty member prevent the completion of course requirements during the course, an “I” (Incomplete) may be recorded until the final grade is established. An Incomplete is indicated only when the student has arranged for that grade with the faculty member and specific arrangements have been made for fulfilling the course requirements. Coursework must be completed within six weeks after the beginning of the next quarter. If a new grade is not submitted by the faculty member by that time, a grade of “E” is automatically recorded.

Definitions Notation  Credit Hour

High Achievement   A  4  Yes
Good Achievement   B  3  Yes
Satisfactory Achievement  C  2  Yes
Below Satisfactory D  1  Yes
Failing            E  0  No
Satisfactory       S  0  Yes
 Unsatisfactory    U  0  No
submit a Grade Change Form/Request for Updated Transcript to the Records and Registration Department to update the student’s transcript.

Grade Report

Grades are issued by the instructor via the Web. Once grades are issued by the instructor, the student can view the grades via a secure site on the Web at www.csc.edu. An individual who is not enrolled in a course at the time of grade reporting is not eligible to register for the course and receive a grade after the course ends.

Calculating Grade Point Average

The basis for determining scholastic standing is the cumulative grade point average (GPA). The college uses a 4.0 scale (A=4.0, B=3.0, C=2.0, D=1.0, E=0.0). The grade point average is calculated by first multiplying credit hours for each course by the grade point value earned for the course. See the example in the chart below (credit hours × grade point value = total grade points earned for a course). Divide the total grade points earned for all courses attempted by the total credit hours for all courses attempted to determine cumulative grade point average.

**EXAMPLE**

Academic Standing

Each active student’s record is reviewed at the close of each quarter. If a student’s academic record (all courses attempted with a grade received) does not meet the Standards of Satisfactory Academic Performance, the student is subject to being placed on academic warning, academic probation, or academic dismissal. The entire record, including each grade in each credit course attempted, is used to determine academic standing. Please see the Standards of Satisfactory Academic Performance below.

Dean’s List

To recognize outstanding scholastic achievement, a Dean’s List is compiled each quarter. To qualify for the Dean’s List, a student must complete a minimum of 6 credit hours and earn a grade point average of 3.5 or higher in that quarter. All credits must be in courses included in the calculation of the GPA. No student is eligible for the Dean’s List who has a grade of “I.”

Class Attendance

Students are expected to attend all classes. A student who has excessive unexcused absences during the quarter and has not officially dropped the course will receive an “E” in that course. Additional attendance policies may be defined by each technology chairperson, department coordinator, or instructor.

Satisfactory Academic Progress

Satisfactory Academic Progress is defined as progress in credit courses taken at the college that result in the credit hour to grade point average ratio as specified by the Standards of Satisfactory Academic Performance. For the purpose of graduation, a candidate for an Associate of Arts or Associate of Science degree must have a minimum 2.000 cumulative grade point average. A candidate for an Associate of Applied Science or Associate of Technical Studies degree must have a minimum 2.000 cumulative grade point average in all required technical course work and a minimum 2.000 cumulative grade point average (GPA) in all nontechnical course work.

Academic Standing

Academic Warning

For any quarter in which a student’s grade point average for the term drops below 2.000, he/she will be placed on Academic Warning and “WARNING” is printed on the student’s grade report and transcript.

Academic Warning, First Term Only Rule

A student who is enrolled in his/her first term and is placed on academic warning will be restricted from registering for classes until he/she meets with an academic advisor in Advising Services. This restriction also applies to first-term students on academic warning who have already registered for the next quarter and attempt to add or drop a class. During the meeting, an Academic Warning Form will be completed to designate what difficulties led the student to be placed on academic warning, to provide recommendations for improved grades the next quarter, and to promote academic success at the College.
Academic Warning and Students beyond the First Term
Students who are beyond their first term of enrollment and receive a grade point average of less than 2.000 for any term will be strongly recommended to meet with an academic advisor or counselor.

Academic Probation
A student who is beyond his/her first term is placed on academic probation when his/her cumulative grade point average is below that designated by the Standards of Satisfactory Academic Performance.

The student will be restricted from registering for classes until he/she meets with an academic advisor in Advising Services for academic intervention. This restriction also applies to students on academic probation who have already registered for classes for the next quarter and attempt to add or drop a class. During the meeting an Academic Probation Form will be completed to designate what difficulties led the student to be placed on academic probation, to provide recommendations for improved grades for the next quarter, and to promote academic success at the college. A student who has been placed on academic probation will have 24 additional attempted credit hours (over 2 or more terms) to raise his/her cumulative grade point average to that designated by the Standards of Satisfactory Academic Performance.

Academic Dismissal
A student will be academically dismissed from the college if, after being placed on academic probation and registering for 24 additional credit hours (over 2 or more quarters), the student’s cumulative grade point average remains less than that designated by the Standards of Satisfactory Academic Performance.

A student who is academically dismissed will be sent notification of his/her dismissal status that includes the procedure for readmission. A student who is academically dismissed from the college will not be permitted to enroll the following quarter. If the student has already registered for the next quarter, his/her courses will be dropped and the student will not be permitted to attend.

Readmission after Dismissal
Petition for Readmission (First Dismissal)
Any student petitioning for readmission must submit a Petition for Academic Readmission Form, approved by at least two college reviewers, at least one of whom is in Advising Services (to determine conditions under which the student may return). The second reviewer is either the Director of Advising Services or the student’s academic department chairperson. If both college reviewers do not grant approval, the Registrar will determine final disposition. The entire readmission process must be completed 30 calendar days prior to the beginning of the quarter for which the student seeks readmission. If a student is readmitted to the college, the student is then able to schedule classes and pay fees. The readmitted student must make satisfactory progress in accordance with the Standards of Satisfactory Academic Performance and meet the conditions as specified on the Petition for Academic Readmission form, including receiving a 2.000 term grade point average, in order to be eligible for continued enrollment.

Petition for Academic Review (Second or Subsequent Dismissal)
Upon a second or any subsequent dismissal, the student who does not meet conditions must appeal to the Academic Review Board for readmission. The student must submit a Petition for Academic Review Form to the Director of Advising Services. The entire readmission process must be completed 30 calendar days prior to the beginning of the quarter for which the student seeks readmission. Petition for Academic Review Forms will be available from the Records and Registration Department and from Advising Services. The Director of Advising Services will chair and convene a board comprised of six members in addition to herself/himself. This Academic Review Board will review the petition, as well as supporting documentation and the student’s verbal explanation. Following its review and consideration of this information, the board will determine whether another readmission is warranted. The decision of the Academic Review Board will be final. Meeting with the Academic Review Board does not guarantee readmission.

Readmission Deadline for Academic Dismissal and Academic Review
- Autumn Quarter 2009: July 27, 2009
- Winter Quarter 2010: October 26, 2009
- Spring Quarter 2010: February 1, 2010
- Summer Quarter 2010: April 26, 2010

Prior Learning Assessment
Columbus State Community College has a comprehensive policy that allows students to apply previous learning from a variety of sources toward completion of a college degree. However, it is important that students understand that the college grants credit for demonstrated learning, not merely for previous experience or employment. In order to obtain credit, the student must be able to provide sufficient documentation to verify the prior learning experiences, along with providing evidence that he/she has mastered the competencies included in that learning experience. Prior learning experiences that can be considered for college credit are:

Transfer Credit: Previous college coursework from an accredited college or university can be applied for credit toward a comparable course at CSCC.

Standardized Testing: Mastery of knowledge or skills measured by a nationally accepted standardized examination (such as CLEP, licensing and certification examinations).

Articulation Credit/Advanced Placement Agreements: College-level learning achieved and documented while participating in a program in which the college has made previous arrangements to accept the coursework for credit, if specific curriculum and performance outcomes standards have been met. (See additional information on *AP Credit below.)

Formal Training: College-level noncredit training experiences that, singly or in combination, cover the competencies of one or more college courses (such as continuing education courses, company training programs, professional seminars).
Military Training: College-level learning obtained while a member of the U.S. Armed Forces that directly relates to knowledge and skills included in existing coursework can be granted in accordance with the American Council on Education (A.C.E.) guidelines.

Life Experience Learning: College-level learning from sources other than those listed above that can be documented/demonstrated (such as self-study and work experience).

*AP/Advanced Placement Credit: The state of Ohio, working through the University System of Ohio, has initiated policies to facilitate the ease of transition from high school to college as well as between and among Ohio’s public colleges and universities.

Beginning in the Fall term 2009:
1. Students obtaining an Advanced Placement (AP) exam score of 3 or above will be awarded the aligned course(s) and credits for the AP exam area(s) successfully completed.
2. General Education courses and credits received will be applied towards graduation and will satisfy a general education requirement if the course(s) to which the AP area is equivalent fulfill a requirement.
3. If an equivalent course is not available for the AP exam area completed, elective or area credit will be awarded in the appropriate academic discipline and will be applied towards graduation where such elective credit options exist within the academic major.
4. Additional courses or credits may be available when a score of 4 or 5 is obtained. Award of credit for higher score values varies depending on the institution and academic discipline.
5. In academic disciplines containing highly dependent sequences (Sciences, Technology, Engineering and Mathematics—STEM), students are strongly encouraged to confer with college/university advising staff to ensure they have the appropriate foundation to be successful in advanced coursework within the sequence. (Ohio Board of Regents)

Because course content and technology may change rapidly, departments may determine a time that can lapse between the acquisition of learning and when the credit is being sought. This may vary depending upon the course.

Students who wish to request nontraditional credit through prior learning assessment must complete the Request for Nontraditional Credit Form and meet with the chairpersons of the department offering the course for which nontraditional credit is requested for a preliminary interview.

Fresh Start Rule

The Fresh Start Rule is intended to help students who were unsuccessful in their previous academic attempts and who voluntarily left Columbus State Community College and returned after a substantial period of time. In general, a student with courses in which grades of “D,” “E” or “U” were earned, may be eligible to have the grades expunged from the student’s record; the course(s) remain on the transcript. A student may use the rule one time. An information sheet providing the complete requirements for the Fresh Start Rule and petition are available in the Records and Registration Department and via the Web at www.cscc.edu.

Course Drop/Withdrawal Procedure

Students may drop a course before 61% of the course has elapsed. Please see the Records and Registration Department for the specific deadlines. To drop a class, it is the responsibility of the student to initiate the process with the college by using the Web, www.cscc.edu, CATS (Computer Automated Touchtone System) registration at (614) 287-2287; calling the Telephone Information Center, (614) 287-5353; or submitting a completed Registration Add/Drop Form to the Records and Registration Department or an Off-Campus Center during business hours. Failure on the part of a student to follow drop procedures will result in an “E” (failing grade) being recorded for the course or courses on the grade report.

Administrative Withdrawal

A student, as the result of documentable extenuating circumstances that prevented the student from following academic withdrawal procedures, may be eligible to petition to for an administrative withdrawal from courses and have those grades changed to “AW.” Students must provide adequate third-party documentation that explains the extenuating circumstances. More information is available from the Records and Registration Department.

Repeating Courses

A student may repeat a course. Only the repeated course grade received will be used to compute the overall grade point average. However, both grades shall remain a part of the student’s permanent record. Veterans and other financial aid recipients should check with the Financial Aid Office before repeating a course for which credit has been earned.

Program of Study Change

Students may request a Program of Study change in the Records and Registration Department. Students may also call the Telephone Information Center, at (614) 287-5353, to change their program of study if the new program of study does not have a separate application procedure (such as many of the health related fields). Students transferring from one technology program to another shall not be required to carry the technical grade point average of the previous technical courses as a part of the technical grade
point average of the new technical program. However, the grade point average of all courses taken will remain part of the official transcript record. Only those courses comprising the curriculum of the new technology will be considered when calculating the technical and nontechnical grade point averages for determining eligibility to graduate.

**Degree Audit Report**

The Degree Audit Report System (DARS) is an important advising tool that helps students determine progress toward completion of their program or of degree requirements. DARS provides a written report of courses in progress, courses completed, and courses remaining for completion of program or degree requirements. It also reflects technical and nontechnical grade point averages (for technical programs) and the overall grade point average (all programs). An academic advisor can help the student interpret this report. Regular use of the DARS report will assist the student in making prudent course selections. Students may view or request copies of their DARS report on the Web at www.cscc.edu.

**Student Status**

Students are considered first-year status when they have successfully completed 47 or fewer credit hours as recognized by the college. A student shall be considered second-year after having satisfactorily completed a minimum of 48 credit hours of coursework as recognized by the college.

A full-time student is one who is registered for 12 or more credit hours during a quarter. A part-time student is one who is registered for 11 or fewer credit hours during a quarter.

**Petition to Graduate**

Each student who wishes to graduate must obtain a Petition to Graduate Form from the Records and Registration Department or via the Web at www.cscc.edu at the beginning of the quarter prior to the one in which the student intends to graduate. The student must meet with his or her academic advisor or faculty advisor, for the evaluation of all course work completed, review of cumulative grade point averages, and review of courses for which he or she is registered the current quarter to determine eligibility for graduation. The petition to graduate form must be filed with the Records and Registration Department by the published deadline date for the intended quarter of graduation. The student will be notified of graduation eligibility.

**Petition to Graduate Deadline Dates**

- Autumn Quarter 2009: October 2, 2009 before 4:30 p.m.
- Winter Quarter 2010: January 15, 2010 before 4:30 p.m.
- Spring Quarter 2010: April 9, 2010 before 4:30 p.m.
- Summer Quarter 2010: July 9, 2010 before 4:30 p.m.

**Graduation Requirements**

Graduation requirements for technical and transfer programs are listed in the “Programs of Study” section in this catalog.

**Graduation Honors**

Grade calculations through the quarter of graduation determine the appropriateness of posting “Honors” on the graduate’s transcript and Summa Cum Laude, Magna Cum Laude, or Cum Laude on the diploma. Verification of the completion of graduation requirements will be done after grades have been issued. Please allow ten weeks for delivery of the diploma via mail. Graduates’ grade point averages and honors designations printed in the graduation program are based on calculations of all grades through the quarter prior to their graduation quarter. Honors categories are as follows:

- *** Summa Cum Laude (with greatest praise) 4.000 GPA
- ** Magna Cum Laude (with great praise) 3.999-3.850 GPA
- * Cum Laude (with praise) 3.849-3.500 GPA

**Commencement**

A formal graduation ceremony is held at the end of each quarter. All students who have petitioned to graduate for the current quarter are invited to attend the ceremony. Diplomas are not distributed during the ceremony. Diplomas will be issued after the verification of graduation requirements is complete. Please allow ten weeks for delivery of the diploma via mail. Caps and gowns, furnished by the college, are standard attire for the ceremony. Students graduating with honors are distinguished by wearing gold honor cords. Summa Cum Laude graduates are further distinguished by wearing engraved honor medallions. Class remarks are offered by the graduate attending the ceremony who has maintained a 4.0 cumulative grade point average (GPA) with the largest number of credit hours completed at Columbus State Community College. The 4.0 graduate attending the ceremony with the second largest number of credit hours completed at Columbus State Community College leads the pledge of allegiance.

**Replacement Diplomas**

To obtain a replacement diploma, submit an Official Request for Replacement Diploma Form, available at [www.cscc.edu](http://www.cscc.edu) or in the Office of the Registrar. Send the form along with a $15 replacement fee to: Cashier’s Office, 550 E. Spring Street, Columbus, Ohio 43215. The replacement diploma will be sent to your current address via certified mail. Please allow 12 weeks for delivery.
Student Rights under the Family Educational Rights and Privacy Act of 1974 as Amended

1. Definition of Education Record
   Under the Act, “education records” mean, with certain exemptions as listed below, those records, files, documents, and other materials that contain information directly related to a student and are maintained by any unit of the college. The following categories of information are exempted and are not considered to be “education records”:
   a. Records made by college personnel that are in the sole possession of the maker and are not accessible or revealed to any other person.
   b. Records maintained by the college Public Safety Department.
   c. Medical and counseling records used solely for treatment. Medical records may be personally reviewed by a physician of the student’s choice.

2. Right to Inspect and Review
   Each student is granted the right to inspect and review all his or her education records except the following:
   a. Financial records of parents.
   b. Confidential letters and statements of recommendations for admission, employment or honorary recognition placed in education records after January 1, 1975, for which a student has signed a waiver of his or her right of access recorded by the Act.

3. Waiver of Rights of Access
   A student may waive his or her right of access to confidential letters and statements of recommendation. If the student signs a waiver, he or she shall be notified, upon request, of the names of all persons making confidential recommendations. Waivers are valid only so long as they are made for the purposes stated in Paragraph 2b. The college may not require a student to waive his or her right of access accorded by the Act for receipt of college benefits or services.

4. Location of Education Records
   Columbus State Community College does not maintain education records in any one central office. Academic education records are maintained in the Admissions Office, Financial Aid Office, and the Records and Registration Department. Other college departments maintain education records (e.g. Disability Services, Advising Services). Questions regarding the location of individual student records should be directed to the Records and Registration Department.

5. Procedures for Inspection and Review
   a. Requests to review records must be made in writing separately to each office maintaining records.
   b. If any material or document in the education record of a student includes information on more than one student, the right extends to inspect and review only such part of such material or document as relates to such student or to be informed of the specific information contained in such part of such material.

6. Right to Challenge Information in Records
   Students have the right to challenge the content of their records on the grounds the information contained therein is inaccurate, misleading, inappropriate, or in violation of their privacy or other rights. The hearing process includes an opportunity for the correction or deletion of such information and to insert into such records written explanations by the student regarding the content of such records.

   Note: The right to challenge grades does not apply under the Act unless the grade assigned was inaccurately recorded.

7. Procedures for Hearings to Challenge Records
   Students challenging information in their records must submit in writing a request for a hearing to the appropriate office maintaining the records, listing the specific information in question and the reasons for the challenge. Hearings shall be conducted, with a decision rendered in writing, within a reasonable period of time after the challenge is filed.

Hearings will be conducted and a decision rendered by a college official who does not have a direct interest in the outcome of the hearing. Students shall be afforded a full and fair opportunity to present evidence relevant to the reasons for the challenge as referenced in paragraph 6. It shall be the responsibility of the office maintaining the record in question to ensure the hearing is conducted in accordance with the provisions of the Act and within applicable Columbus State Community College procedures. Students may appeal the decision of the hearing officer. Appeals shall be in writing and submitted to the Dean of Enrollment Services within 10 days of the student’s notification of the decision of the hearing officer. The appeal shall be heard and decided, with a decision rendered in writing within a reasonable period of time.

8. Consent for Release
   Written consent must be obtained from students for the release of education records or information that makes it possible to identify the student with reasonable certainty. The consent statement shall specify which records are to be released, the reasons for release, for how long, and to whom the records will be released. Written consent must be obtained from each department. An informed consent form is kept on file in each department from which the record was requested. A copy of the informed consent form shall be made available to the student if he or she requests. Columbus State Community College, in all good faith, will not release nondirectory information to individuals and organizations outside of the College without...
the student’s written permission, except when required by law.

The requirement for written consent does not apply to the following:

a. Requests from officials of Columbus State Community College (faculty, staff, administrators and designated agents of the college) who have a legitimate educational interest on a “need-to-know” basis.

b. Requests in compliance with a lawful subpoena or judicial order. Students shall be notified of all such subpoenas or orders in advance of compliance.

c. Requests in connection with a student’s application for, or receipt of, financial aid.

d. Request by state or federal authorities and agencies specifically exempted from the prior consent requirements by the Act—organizations conducting studies on behalf of the college if such studies do not permit the personal identification of students to any persons other than to representatives of such organizations and if the personal identification is destroyed when no longer needed.

e. Information submitted to accrediting organizations.

f. In the case of emergencies, the college may release information from education records to appropriate persons in connection with an emergency if the knowledge of such information is necessary to protect the health or safety of a student or other persons.

g. Requests from officials of another school, school system or institution of postsecondary education where the student seeks or intends to enroll.

h. Requests for “directory information.” (See item 9)

Note: The college will not unilaterally send student records to other educational institutions. Students transferring from the college or making application to other educational institutions must notify the Records and Registration Department in writing and pay the appropriate fee to release official transcripts to other institutions. A student may request official transcripts for his or her own use, issued to student, by completing the form available from the Records and Registration Department or via the Web at www.cscc.edu.

9. Directory Information

Columbus State Community College, in accordance with the Act, has designated the following categories of information about students as public information:

a. Name
b. Address (home/present)
c. Telephone Number (home)
d. Program of study/technology
e. Participation in officially recognized activities and sports
f. Weight and height of members of athletic teams
g. Enrollment status (less than half-time, half-time, part-time, full-time, over full-time, inclusive dates and quarters of enrollment)
h. Degrees, certificates, transfer module and awards received (including Dean’s List and other honors)

i. Most recent previous educational agency or institution attended

Note: Students have the right to have this directory information withheld from the public if they so desire. Each student who desires that directory information be withheld shall so indicate by completing a form available in the Records and Registration Department.

10. Inquiries Outside Columbus State Community College

The college receives many inquiries for directory information from a variety of sources, including friends, spouses, parents, other relatives, prospective employers, institutions of higher education, honor societies, licensing agencies, government agencies, and the news media. Each student is advised to carefully consider the consequences of a decision to withhold directory information. Columbus State Community College, in all good faith, will not release nondirectory information to individuals and organizations outside of the college without the student’s written permission, except when required by law.

11. Record of Access

a. Each office maintaining and releasing student records shall maintain a record, kept with the education records of each student, which will indicate all parties, other than those specified in paragraph 8 above, who have requested or obtained access to the education records and specifically the legitimate interest that each such party has in obtaining this information.

b. Columbus State Community College, in all good faith, will not release personal information about students except on the condition the party to which the information is being transferred will not permit access by a third party without the consent of the student, except when required by law.

12. Complaints

Any student who has reason to believe the college is not complying with the Act should inform the Dean of Enrollment Services and the U.S. Department of Education in writing. The Dean of Enrollment Services shall promptly review all such allegations.

13. Questions

Students should direct questions concerning their understanding of the Act to the Registrar.
Additional Services to Students

Advising Services

Advising Services offers the following services and programs to assist Columbus State learners:

- New student academic advising, including post-COMPASS™ placement test advising
- General academic advising and planning
- Transfer advising, including the annual College Transfer Fair, and opportunities to meet with admissions representatives and academic advisors from other institutions
- Educational workshops and programs
- Student resources such as The Adult Learner Connection newsletter
- Advising and assistance for students having academic difficulty (academic warning, academic probation, academic dismissal, and academic review)
- Petitions to graduate for Associate of Arts and Associate of Science students

Academic Advising at Columbus State

After students apply to Columbus State, academic advisors in Advising Services provide guidance on first quarter classes, either after students have taken the COMPASS™ placement test or after students' official transcripts from previous institutions have been evaluated. Students with transfer credit from another college should have official transcripts sent to the college and have an unofficial copy in hand when they meet with an advisor.

In the first quarter, advisors also review the specific requirements for completion of the student’s academic program. Programs of Study for all degrees and certificates are in the Columbus State catalog or on the Web at www.cscc.edu. Academic advisors can help students with academic planning throughout their studies at Columbus State. Helpful Tools and Forms can be found at http://cscc.edu/Counseling/academic/advisor.html.

Advising Services provides academic advising and planning for the following students:

- **Transfer students** pursuing the Associate of Arts (A.A.) or Associate of Science (A.S.) degrees
- **Transient students** from other institutions taking classes at Columbus State
- **Undecided students** who are still exploring their educational and career goals
- **Technical program students** in Business or Engineering two-year programs through their first quarter of classes (Note: These students are assigned a faculty advisor during their second quarter.)
- **Technical program students** in one of the Health, Human or Public Services programs, including pre-Nursing, who have not yet been accepted into the program (Note: These students are assigned a faculty advisor when they are accepted into their respective programs.)
- **Associate of Technical Studies (A.T.S.) program students** (Note: These students begin the preliminary application process with an academic advisor then work with the appropriate departments in Career and Technical Programs.)
- **Any students** experiencing academic difficulty

To locate an academic advisor, go to the Columbus State Web site at www.cscc.edu and click on “Current Students” and then on “Academic Advisor Directory,” or call (614) 287-2668/1-800-621-6407 ext. 2668.

**Why is academic advising important?** Academic advisors can help students select the correct courses for their major or career goal, and they can help develop a quarter-by-quarter plan for students' academic programs. Advising Services offers a wide range of educational and career-related information, including transfer opportunities, transfer guides, and visiting advisors from area four-year colleges who can help students with their planning for, and transition to, bachelor’s degree programs. Students can access much of this information directly by exploring the Advising Services pages on the college Web site: www.cscc.edu.

Educational Workshops Online

Advising Services provides educational workshops online for many different topics designed to enhance the social, educational and personal well-being of students. Topics include stress/time management, choosing a major, career/life planning, test-taking, test anxiety, study skills, self-esteem, wellness and body image, and many others. These virtual “Web shops” and related resources can be found at http://cscc.edu/Counseling/workshops.htm.

Contact Us

Advising Services is located on the first floor of Aquinas Hall, Room 116. Students are seen primarily by appointment. For more information on any of our services or to schedule an appointment, please stop by or call (614) 287-2668. Phone and e-mail advising services are convenient options for distance learners. To e-mail an advisor, go to www.cscc.edu, click on “Current Students,” “Get Help,” and then “Academic Advisor Directory.”

**Hours of Operation**

Monday – Thursday: 8:00 a.m. – 7:30 p.m.*
Friday: 9:30 a.m. – 4:30 p.m.*
Saturday: 9:00 a.m. – 1:00 p.m.*

*Appointment times vary; students are seen up to 30 minutes before closing.

Academic advisors are also available at the Dublin site (614) 287-7050, the Southeast site (614) 287-7200, and the Westerville site (614) 287-7000. Call ahead for walk-in hours at the off-campus sites, or access them on the Web at www.cscc.edu.
Bookstore: The Discovery Exchange
Bookstore, Café and Barista, Copy and Print Shop, and Convenience Store

The Discovery Exchange, located at the corner of Cleveland and Mt. Vernon avenues, houses the Columbus State Community College bookstore and so much more. Inside the DX, customers will find the Bookstore, Café, Copy and Print Shop, and Convenience Store.

The Columbus State Bookstore
The Bookstore offers textbooks for classes as well as best sellers, magazines, gifts, apparel, art and office supplies, electronics, computer software and accessories. Services available at the DX include daily textbook buyback, used calculator buyback, international faxing, stamps, money orders and distribution of caps and gowns for graduating students.

DX Café and Barista
The Café is a coffee and food service bar that serves made-to-order lattes, mochas, and other coffee and tea drinks (served hot, frozen, or on ice). The Café boasts a selection of fresh fruit, bagels, pastries, soups, salads, and sandwiches, many of which will satisfy the palates of the health-conscious and vegan patrons.

The Copy and Print Shop
The Copy and Print shop provides full-service copy and printing services at competitive rates. On the first floor of the DX, self-service copying, full-service copying (b/w or color), design services, scanning, lamination, graduation announcements and binding are available, as well as postage, courier service and notary service (by appointment). Larger print jobs are coordinated through the Print Shop, located on the lower level. Call (614) 287-5652.

The Convenience Store
The Convenience Store (C-Store) provides a wide variety of items to make everyday life a little easier. “Grab and Go” items include sandwiches, snacks, candy, fountain drinks, nachos and cheese, hot popcorn, frozen treats, coffee and pizza.

The Discovery Exchange is open Monday through Thursday, 7:30 a.m. – 8:00 p.m.; Friday, 7:30 a.m. – 6:00 p.m.; and Saturday, 8:00 a.m. – 2:00 p.m. Contact the DX at 614-287-2427 or http://bookstore.cscc.edu for more information.

Shopping online at the DX is truly convenient. The DX offers competitive pricing and free pickup at multiple locations. The DX staff works hard to assure that each customer receives the correct course materials coupled with super-fast, super-smooth service. Order online at http://bookstore.cscc.edu or by phone at (614) 287-5353. Visa, MasterCard, and Discover credit cards are accepted. Three delivery options are available: 1) UPS, which incurs a shipping/handling fee; 2) Self-Pickup at the DX within two business days of order, no charge; or 3) Self-Pickup at Columbus State’s Dublin Center, Southeast Center, Southwest Center at Bolton Field, or Westerville Center within four business days of order, no charge. A valid student ID, driver’s license, or state ID is required for pickup.

Career Assistance Center – Acloché
Through a partnership with Acloché, a regional leader in Staffing and Human Resources Solutions, Columbus State Community College students and alumni have access to a full range of career assistance services, including:
- Career fairs
- Resume workshops
- Interviewing tips
- Connections with career opportunities and area employers
- Short-term, long-term, part-time and full-time employment
- Internships and co-ops

To access career placement and career resources available through Acloché Career Assistance Center, Columbus State students and alumni can visit Nestor Hall, Room 119, or call (614) 287-5279. Regular office hours are 9 a.m.– 6 p.m. Monday and Tuesday, 8 a.m.– 5 p.m. Wednesday and Thursday, and 7:30 a.m.– 4 p.m. Friday. The Web site is www.cscc.edu/docs/PACS/placement.htm.

Cashier’s Office
The Cashier’s Office is located on the second floor of Rhodes Hall. Hours of operation are Monday through Thursday, 8 a.m.– 6 p.m.; Friday, 9:30 a.m.– 4:30 p.m.; closed Saturdays; with extended hours during fee payment rush periods each quarter. The Cashier’s Office handles all fee payments, including parking permits ($25) and replacement identification cards ($4). Bus passes, and postage stamps also can be purchased at the Cashier’s Office. For more information, contact the Cashier’s Office at (614) 287-2414.

Child Development Center
The Columbus State Child Development Center is a year-round facility providing care and education to the children of Columbus State students, staff and faculty as well as the downtown community. The Center also serves as a field site for students in the Early Childhood Education Department. Adjacent to the Center for Workforce Development, the Child Development Center’s address is 315 Cleveland Ave., but the entrance is at the southeast corner of Grant and Grove streets. Children served range from six months to five years of age. The Center is licensed through the Ohio Department of Job and Family Services and partners with the Early Learning Initiative, a school readiness program for preschoolers.

The Child Development Center is open Monday through Friday 7:30 a.m.– 6:00 p.m. Tuition subsidy (for eligible parents) is available through contracts with the Ohio Department of Job and Family Services, Champion of Children, and ELI. For more information, visit www.cscc.edu/cdc, or for a tour, call (614) 287-3600.
Counseling Services

Personal Counseling
Counseling Services offers personal and career counseling, alcohol and drug counseling and prevention, crisis intervention, consultation and referral services to any enrolled student. Issues include, but are not limited to, stress/time management, college adjustment, family concerns, substance abuse, and other personal or mental health concerns. Presentations, workshops, programs and printed materials about mental health, alcohol, and other drug prevention and abuse are also offered.

Counseling Services also provides self-development groups and educational workshops each quarter on a variety of important and relevant topics, such as overcoming test anxiety, study skills, stress and time management, juggling roles, anger management, self-esteem, and others. Confidential counseling is provided on an individual, short-term basis, with referral to community resources for additional services, if needed.

Services for faculty and staff such as consultation, in-class workshops on specific mental health topics, and information about community resources are also available.

Career Counseling
Counseling Services also offers career counseling for students, including assistance with career decision-making, choosing a major, redirecting educational plans and/or planning for a career change. In addition, career services include assessing skills and interests and subsequently relating them to college majors and/or careers and assisting students in creating a career exploration plan (i.e., developing a career portfolio, guidance on conducting an informational interview, and exposure to relevant career development Web resources). Referrals may also be made to the Acloché Career Assistance Center on campus for job placement information, resume writing, and other career related topics.

Computer assessments include the Discover Career Planning System. This computer-based career planning system can be accessed in Aquinas Hall Room 116, or on the top floor of the ERC (library) located in Columbus Hall. For more information, visit the Counseling Services Web page, www.cscc.edu/counselingservices/index.htm.

All counseling services are free and available by appointment. Call (614) 287-2668, 287-5416, 287-5638, 287-5414, or stop by Aquinas Hall 116 to schedule an appointment.

Hours of Operation:
Monday/Wednesday/Thursday: 8 a.m. – 5:30 p.m.
Tuesday: 8 a.m. – 6 p.m.
Friday: 9:30 a.m. – 4:30 p.m.

Disability Services
Columbus State Community College offers a wide range of support services to encourage the enrollment of people with disabilities. Through the Disability Services Department, support services are made available to qualified students with a documented disability. Determination of eligibility for support services is based on disability documentation received by Disability Services from appropriate medical, educational, and psychological sources. These support services include, but are not limited to, adapted testing procedures, production of print materials in alternate media, note taker notebooks, real-time captioning, and counseling. In addition, sign language interpreters and assistive listening devices are available for students who are deaf or hard of hearing. Adaptive equipment and software is also available on campus for student training and use in completing course requirements. Students may also meet with department counselors to develop an individual plan for support services. The department consults with students, consumers and professionals in the field of rehabilitation and education, as well as state and federal resources in the continued development of program accessibility.

For further information or to arrange for support services, please call (614) 287-2570 (VOICE/TTY). Disability Services is located on the first floor of Eibling Hall. Enter through Room 101. More information is available on the Web at www.cscc.edu/disability. You can also e-mail the department at disability@cscc.edu.

Diversity, Study Abroad, TRiO Programs

The Diversity, Study Abroad and TRiO Programs Department leads Columbus State’s efforts, programs, and activities to increase the access and retention of students from diverse backgrounds. Within the established policies and procedures of the college, the Diversity, Study Abroad, and TRiO Programs Department works with Columbus State offices and departments to:

- Implement orientation and professional development programs related to diversity for college administrative, instructional, professional, and support personnel.
- Promote and market diverse activities, programs, and services that will result in increased retention and graduation rates of multicultural, international and nontraditional students.
- Market Columbus State as an attractive institution of higher education for myriad students to pursue career goals. Implement consistent, well-organized heritage and awareness month programming for the community throughout the year.
- Serve as the liaison and support to faculty, college departments, staff and community regarding all of Columbus State’s global perspectives.
- Develop and implement programs and long range plans for Columbus State’s international students, visitors, exchange students and scholars, and curriculum.
- Coordinate consistent, well-organized Study Abroad initiatives while promoting and marketing Study Abroad to increase student participation.

The accomplishment of these goals is pursued in collaboration with appropriate offices and departments of the college. The department is active in the Columbus community and has established working relationships with middle and high school principals, counselors and teachers, as well as with local religious, civic, and community
leaders. The Diversity, Study Abroad, and TRiO Programs Office develops and presents programming to promote awareness of multicultural issues and the value of a diverse educational community. Through such activities as campus visits and college credit articulation programs, potential students gain exposure to the college and discover its advantages.

This department also facilitates the Global Initiatives Committee and works closely with the Provost’s Office to internationalize the curriculum. Additionally, the department works closely with community service agencies, business and industry, professional organizations and other institutions on matters related to community outreach, and it aids in the planning and implementation of service learning projects. For information on the Diversity, Study Abroad and TRiO Programs Department, located in Franklin Hall 223, call (614) 287-5707.

TRiO Programs

To be eligible for a TRiO program, applicant must be a first-generation college student (neither parent has a four-year college degree), and/or economically disadvantaged or limited income, according to the federal standards (Federal TRiO Programs) and/or an individual with a disability, a learning or physical disadvantage and academic need (determined by project guidelines). Call 287-5648 for more information.

Educational Talent Search

Educational Talent Search is a pre-collegiate program for middle school, high school, and GED students. It is designed to motivate students to develop the skills and persistence necessary for success in education beyond high school. Educational Talent Search is part of the federally funded TRiO Program Department, which consists of eight programs providing opportunities for individuals to access higher education by helping them overcome a variety of barriers.

Student Support Services

Student Support Services (SSS) is a federally funded grant program that provides comprehensive academic support services that enhance students’ productivity and academic success. Eligible students receive quality one-on-one advising on a regular basis, tutorial assistance, related academic support services and, in some cases, financial aid assistance. The SSS Program may also provide grant aid to currently enrolled participants who are receiving Federal Pell Grants for the current award year.

SSS offers supplemental instruction in developmental courses, personal counseling, exploration of career options, and personal career counseling and mentoring programs involving faculty, staff, and/or peers. Participants also will have access, as availability permits, to book and laptop loan programs. SSS will provide assistance and support with overall adjustment to community college life.

Upward Bound

Upward Bound (UB) is a federally funded pre-college grant program designed to increase the academic skills and motivation of program participants to ensure their high school graduation and success in a post-secondary educational program. The expected outcome of the program is that participants will be in a position to successfully choose and complete a college preparatory curriculum leading to enrollment and achievement in a college, university or other post-secondary institution. This will be accomplished through a well-rounded, yearlong program designed to address the multiple needs of program participants. To that end, UB has both summer and academic year components.

During the Academic Year:

- Weekly academic enrichment and tutoring sessions assist students in basic academic areas of math, science, writing and reading. UB also provides individual academic, career and personal advising.
- Monthly Saturday Seminars: Guest speakers are invited to discuss special topics, students participate in team-building and leadership activities, and special events are planned.

During the Summer Component:

- A six-week nonresidential academic program is offered. Participants attend UB academic enrichment classes five days per week on the campus of Columbus State. Students also participate in cultural, social and recreational activities.

Educational Resources Center (Library)

The Educational Resources Center in Columbus Hall houses the Library and Media Services, providing a multimedia environment to support a wide range of learning experiences. The library’s collection includes print, audio-visual, and electronic materials. In addition to the collection in the main stacks, there are collections of reference, reserve materials, periodicals (magazines and journals), microforms, newspapers, and selected video-based courses. The library catalog can be accessed through the ERC’s Web page, www.cscc.edu/library, which serves as a gateway to its electronic resources. Through Columbus State’s membership in the OhioLINK network, library users have access to materials that may be requested online from the libraries of more than 80 Ohio colleges and universities. You need an active CougarID to access these resources.

In addition to the library’s collection of over 500 print periodical titles, users may search over 100 online research databases available through ERC subscriptions on OhioLINK. Many of these databases provide links to full-text articles and may be accessed from home computers. Also available through the ERC Web site, the Electronic Journal Center provides access to over six million full-text articles from scholarly journals. Reference assistance is available on the main floor of the ERC, and students are encouraged to ask for help in starting their research or in using a particular resource.

In the ERC, there are 56 computer workstations as well as copiers, and typewriters. Students with an active CougarID can check out a laptop computer on loan from the Circulation Desk. The Production Division of Media Services provides assistance in converting media from one type to another. Additionally, this division is available to record campus-related events and manages usage of the Video and Audio Studio located on the ground level of the ERC.
There are three art galleries located on the Main and Ground levels of the ERC. The galleries highlight exhibitions by CSCC students and artists residing in the Columbus area. Gallery shows are rotated in and out of the various galleries on a monthly schedule. For more information about the ERC, call the Circulation Desk at (614) 287-2465, Reference Services at (614) 287-2460, or Media Production Services at (614) 287-2472.

E-Mail

Columbus State Community College offers a free, individual e-mail account (Student Mail) to each currently enrolled student. Student Mail is accessible at the Web site: http://student.cscc.edu/.

All currently enrolled first-quarter students will receive a letter in the mail notifying them of their account and instructions. Information and instruction booklets are available at the IT Learner Support Center and at the Student Mail Web site. Individual e-mail user name and password can also be used to access Blackboard courses and login to campus labs.

The IT Learner Support Center, (614) 287-5050, is on the ground floor of the ERC/Library in Columbus Hall. Lab assistants are available in computer labs to answer questions regarding your Student Mail account.

Food Service

Located in Delaware Hall, the cafeteria is open Monday through Thursday 7 a.m.–7 p.m., Friday 7 a.m.–2 p.m., and Saturday 8 a.m.–1 p.m. (Hours during breaks may vary.) Breakfast foods are served each day of operation until 10:15 a.m. For lunch and dinner, the cafeteria offers customers a wide choice of foods each day, including two entrées and a hot sandwich station. The grill features combo meals comprised of a hot sandwich, fries and a beverage. The cafeteria also maintains a station featuring healthy food items and provides nutritional information about them. In addition, customers can purchase salads, soups, fruit and various beverages. Takeout food such as pizza and subs are available, too. Call (614) 287-2483 for more information.

For quick, casual service, a coffee cart is offered in Nestor Hall Lounge from 7 a.m. until 1 p.m. Coffee and light snacks are available.

Bridgeview Golf Course and Driving Range

Columbus State’s Bridgeview Golf Course is a nine-hole course that offers a combination of challenging and forgiving holes ideal for players of all skill levels. The Driving Range provides complete practice facilities including target fairways and greens, putting and chipping greens, and natural-grass tees. Heated and sheltered tees allow for practice in any weather, and upper-level tees allow practice even when water is standing on other courses.

Columbus State Bridgeview is open March–November and also offers a pro shop, as well as food and beverage service. Discounts on golf rounds are available throughout the season for Columbus State students, faculty and staff.

The official course of The First Tee of Columbus Chapter, Columbus State Bridgeview is dedicated to helping develop golfing and life skills in youths ages 7-17 who may not otherwise be exposed to the game. In addition, the course works in partnership with the college to provide field experience for students taking golf classes.

Columbus State Bridgeview is located at 2738 Agler Road, at the intersection of Agler and Sunbury Roads, just five minutes from Easton or the airport and 10 minutes from downtown. More information, tee times and current specials can be found at www.cscc.edu/bridgeview or by calling (614) 471-1565.

Housing

Columbus State does not provide campus housing, but the Student Activities Office (Nestor Hall 116) does disseminate information it receives on off-campus housing opportunities. This information includes postings for apartments or homes to share and for roommates. Stop by the office or call (614) 287-3656 for more information.

IT Support Services

Students, faculty and staff can get help with college-owned computer problems or Clean Access wireless issues by calling (614) 287-5050 between 7 a.m. and midnight, seven days a week.

Intercollegiate Athletics

Columbus State currently fields teams, and offers athletic scholarships, in the following Division II intercollegiate sports:

Men’s Basketball  Women’s Basketball
Golf  Women’s Volleyball

The college also boasts an award-winning, co-ed cheerleading squad. All students are welcome to try out for athletic teams and the cheerleading squad. Tryouts are typically held during autumn quarter, with the exception of women’s volleyball, which holds tryouts during summer quarter.

To participate in athletics, a student must be a high school graduate or have earned a General Education Diploma (GED). Student athletes must carry a minimum of 12 credit hours per quarter and maintain the required GPA to be eligible for competition and/or athletic scholarships. (Some part-time students may be eligible to play).

The college adheres to the guidelines established by, and is a member of, the National Junior College Athletic Association (NJCAA). Columbus State is also a member of the Ohio Community College Athletic Conference (OCCAC). This conference status allows Cougar student-athletes to compete against athletes at other two-year colleges as well as those at some four-year institutions. For more information about athletic programs, tryouts and/or athletic
Intramural Sports

The intramural sports program is an integral part of campus life. Intramural activities provide the campus community the opportunity to compete in athletic events without the time commitment of intercollegiate athletics. All students, as well as faculty and staff, with a valid Columbus State ID are eligible to compete. Intramural offerings include basketball, bowling, volleyball, softball, soccer, floor hockey, wiffle ball, and flag football. For more information, call (614) 287-3656 or stop by the Athletics Office in Delaware Hall, Room 134.

K–12 Initiatives

The mission of the K-12 Initiatives Department is to enhance the educational opportunities for youth in Columbus State’s service area while fostering the development of lifelong learning. This department is directly responsible for the following programs:

Underage Student Population Enrollment Options
This program allows students between the ages of 14 and 18, with or without a high school diploma, to enroll in college credit coursework. Students may be enrolled in public, private or home school institutions and are considered self-pay students. The coursework they complete may apply toward high school graduation requirements, as established by the secondary institution they are attending.

Post Secondary Enrollment Options Program
PSEO allows students in high school to attend college and apply the college credit to their high school graduation requirements.

Secondary to Post Secondary Articulation
Columbus State Career and Technical Programs have worked with area high school career and technical programs to create the opportunity for students in approved programs to articulate into two-year associate degree programs with credit for the work they completed while in high school. Additionally, agreements exist for students completing Adult Education and Workforce programs with the same secondary school districts.

College Tech Prep Program
Through this initiative, current high school tech prep students can enter into articulated two-year associate degree technical programs with advance placement.

Cougar Crew Reading Literacy Tutor Program
Columbus State students and employees serve as reading literacy tutors in area elementary schools during and after school.

Enrichment Programs
These initiatives reach out to individuals and families with activities providing academic enrichment. Programs include Kids In College, Youth In College, Summer Youth, The First Tee of Columbus and Literacy Festivals.

Linkages for Primary and Secondary Education
These provide opportunities for training and development to enhance knowledge, experiences, and practice regarding college and lifelong learning options for professionals and their students.

Information about K–12 Initiatives can be found at www.csc.edu/k-12.
Laurie Johns, Administrator, (614) 287-5961

Peer Tutoring Program

The campus-wide Peer Tutoring Program offers individual or group tutoring to eligible learners through the Developmental Education Department. The purpose of the program is to supplement the learner’s academic performance. Tutoring service is based on tutor availability; therefore, learners are not guaranteed a peer tutor. Walk-in service is available for students who need minimal assistance. Learners are encouraged to request a tutor the second or third week of classes. For more information, call (614) 287-2474.

Tutoring Services

Learning Skills Centers (LSC)
Two Learning Skills Centers offer tutorial assistance from professional tutors in the Developmental Education Department. Tutoring is provided for developmental mathematics and for reading and writing courses. The Learning Skills Centers also house computers for student use and offer VCRs for students who wish to view lecture tapes after classes. Learners are encouraged to visit the centers to enhance their academic studies. Both centers are located in Aquinas Hall: Mathematics in Room 213 and Reading/Writing in Room 214. For more information, call (614) 287-5193.

Math Tutors
Faculty tutors are available on a walk-in basis for most math courses, beginning with MATH 102 through MATH 104 and other selected courses, in Room 313, Davidson Hall. For more information, call (614) 287-5313.

Biological Sciences and Physical Sciences Tutors
Faculty tutors are available for most Biological Sciences and Physical Science courses in Nestor Hall, Room 023. For more information, call (614) 287-2522.

English as a Second Language Tutors
Faculty tutors are available to ESL students in Franklin Hall, Room 245. For information, call (614) 287-5400
Public Safety
Police, Safety-Security, Special Services and Parking

The college’s police officers are commissioned by the Ohio Attorney General’s Office, Ohio Peace Officers Training Council and have full arrest authority. The officers provide the following services:
- Patrol of campus lots and buildings
- Investigation of crimes, threats, harassment, disruptive or offensive actions and disorder
- Investigation of forced entry, theft or vandalism, and other criminal activity
- Security escort service
- First aid to injured or ill people
- Enforcement of local, state, federal laws and college policy and rules

The department works closely with the Columbus Police Department and other public safety agencies in the central Ohio area. The Department of Public Safety serves the Columbus State community 24 hours a day, 7 days a week. The Public Safety Office is located on the lower level of Delaware Hall, Room 047, and can be reached by telephone at (614) 287-2525.

More information, including emergency guidelines, the Department of Public Safety’s Annual Report, Clery crime statistics and crime logs, can be found at www.cscc.edu. Click on the “Public Safety” link. All crimes committed or suspected of having been committed on Columbus State property should be reported to the Department of Public Safety.

Campus is generally open to students and visitors at 7:00 a.m. Some department hours can vary. The campus closes at 11:00 p.m. or at the conclusion of the last class or special event to allow for buildings to be secured and maintained. Buildings generally close at 6:00 p.m. on weekends, except for special events or classes.

Children, fourteen years of age and under, must be accompanied and attended by an adult while on the campus. Adults who bring children with them to campus may be asked to control the actions of the children or remove them from the campus if they create a disturbance to the orderly functioning of the college. Children are not to be taken to classrooms, laboratories, or clinic sessions unless they are to take part in the educational program. Children left unattended while the parent is in class are not allowed. Children will not be left unattended in automobiles.

Recreational Facilities

A study lounge and a recreation lounge are located in Nestor Hall. In the recreation lounge, there is a large-screen monitor, and students can enjoy watching a movie (changes weekly) Monday–Friday, from 9 a.m.–3:30 p.m. There is also a gymnasium in Delaware Hall 134. Open gym is Monday through Friday from 9 a.m.–12 noon.

The college’s newly renovated and expanded Fitness Center is open to all Columbus State students, faculty and staff (with a valid college ID) from 8 a.m. to 8 p.m., Monday – Thursday and from 8 a.m. to 6 p.m. on Fridays. The Fitness Center, located on the lower level of Delaware Hall, offers cardio and multipurpose strength equipment as well as free weights. Men’s and Women’s locker rooms are adjacent to the Fitness Center, making it easier for individuals to workout before and after classes or during lunchtime. Call (614) 287-5918 for more information.

See page 36 for information on Columbus State’s Bridgeview Golf Course and Driving Range.

Student Activities and Athletics

The Department of Student Activities and Athletics (Student Activities Office, Nestor Hall 116 and Athletics Office, Delaware Hall 134) offers a variety of co-curricular activities that enhance students’ educational experience and aid in the development of lifelong skills. Students are also offered a wide range of opportunities to improve their general leadership skills while on campus. For information, call (614) 287-3656 or visit the Student Activities and Athletics Web site, www.cscc.edu/

Student Ambassador Program

The Student Ambassador Program was developed to give students the opportunity to participate in various public relations and recruiting activities at Columbus State. The primary objectives of the program are to provide students with basic leadership training and to allow students the opportunity to work in a number of departments on campus. Community outreach and community service is also a component of the Student Ambassador Program. Applications for the Student Ambassador Program are available during spring quarter.

Special Events and Activities

The Department of Student Activities and Athletics offers a number of special events and activities such as Welcome Back (Autumn), Spirit Week (Winter), Spring Fling (Spring), and Jazz in July (Summer). In addition, Black History Month, Women’s History Month, Asian-Pacific American Awareness Month, and other special interest activities are celebrated.

For more information about Student Activities and Athletics, call (614) 287-3656.

Student Organizations

In order to be recognized by Columbus State Community College and be eligible for benefits of that recognition, student clubs and organizations must register as a new club or organization and annually renew the registration of an existing club or organization with Student Activities and Athletics, Nestor Hall Room 116, (614) 287-3656. Registration signifies that the club or organization will comply with the rules, regulations, and guidelines of the college.
Each year new clubs and organizations are added to enhance campus diversity. At the time of catalog publication, active clubs at Columbus State included:

- ASL Connection
- Black Student Union
- College Democrats
- Columbus State Landscape Association
- Columbus State Student Nurses Association
- Construction Specification Institute (CSI) Student Chapter
- Cougar Pride (GLBT)
- CSCC Respect for Life
- CSCC Tae Kwon Do and Martial Arts Club
- International Student Association
- Korean Student Association
- Massage Therapy Student Association
- Phi Theta Kappa, Rho Epsilon Chapter
- Pre-Law Society
- Respiratory Therapy Student Organization
- Senior Nursing Class Organization
- Sport and Exercise Studies Club
- Student American Dental Hygienist Association (SADHA)
- Student Government Association
- Table Top Gaming Association
- Veterinary Technicians

Please note that the active status of some of these groups varies from year to year. To learn if the group you are interested in is currently active, please check out the organization list on the Student Activities and Athletics Web page. To learn more about Columbus State clubs and organizations, or to start your own group, stop by the Student Activities Office, Nestor Hall 116, or call (614) 287-3656.

Student Rights and Responsibilities

Student Conduct
The aim of Columbus State Community College student conduct policies and procedures is to educate students on their rights and responsibilities as college community members and to promote a college environment that is conducive to student success. Students are expected to perform all work honestly, maintain prescribed academic standards, pay all debts to the college, and respect the property and rights of others. This includes any activity, on or off campus that negatively impacts the college or its students or staff.

Any student violating Columbus State Community College policies or rules may be placed on disciplinary probation or be dismissed. Concerns involving allegations or violations of civil rights, including but not limited to sexual harassment, sexual misconduct with students, and/or harassment, are addressed by the college’s EEO officer in the Human Resources Department. In technologies that include internship employment or clinical experiences, good standing with the cooperating employer or clinical affiliate is expected and is essential to continuation in the program. A copy of the Student Conduct Policy, the Academic Conduct Policy, the Student Code of Conduct and related procedures is published in the Student Handbook (see below). For more information, please contact the office of the Dean of Student Life Office (Eibling Hall 201) 287-5299.

Student Handbook
The Student Handbook is a useful guide to many of the college resources available to students. The handbook provides information on student rights and responsibilities, policies, procedures, activities, services, and extracurricular opportunities at Columbus State. The Student Handbook is available through many student services offices including Advising Services (Aquinas Hall 116), Counseling Services (Aquinas Hall 116), and Student Activities and Athletics (Nestor Hall 116). It also can be found on the college Web site, www.cscc.edu.

Sexual Harassment and Sexual Assault Policy
Columbus State Community College believes that all employees and students should be able to work and learn in an environment free of all discrimination and any form of sexual harassment or assault. To help ensure that employees and students are not subjected to illegal harassment or assault, and in order to create a comfortable work and learning environment, the college strongly opposes and prohibits any offensive physical, written, spoken or nonverbal conduct as defined and otherwise prohibited by state and federal law. In addition, sexual assault involving physical contact, sexual battery, and rape are felony crimes in Ohio. In cases where the student is the perpetrator, college policy defines sexual harassment and sexual assault as an example of general student misconduct, which may result in penalties up to and including dismissal from the college. For more information, or if you or someone you know is being sexually harassed, contact the college’s EEO officer in the Human Resources Department, Rhodes Hall lower level, (614) 287-2408. In emergency cases or after business hours, and in all cases of sexual assault or rape, immediately contact the Public Safety Department, Delaware Hall 047, (614) 287-2525, 24/7. In all cases of sexual harassment or sexual assault, confidential personal counseling and support for students is available in Counseling Services, Aquinas Hall 116. Please call any of the following counselor phone numbers: (614) 287-5414, (614) 287-5638, or (614) 287-5416. For more information you may also contact the office of the Dean of Student Life (Eibling Hall 201), 287-5299.

Student Problem Resolution
A student problem resolution procedure has been established to help students resolve nonacademic and nondisciplinary problems they may encounter in college. A copy of the Columbus State Community College Student Problem Resolution Procedure is published in the Columbus State Student Handbook or the Columbus State Policy and Procedures Manual. The Student Handbook is available through many student services offices including Advising Services (Aquinas Hall 116), Counseling Services (Aquinas Hall 116), and Student Activities and Athletics (Nestor Hall 116); it is also on the college Web site, www.cscc.edu.

Student Right to Know
Under the terms of the Student Right to Know Act, the college must maintain and report statistics on the number of students receiving aid related to athletics, reported by race and gender; the graduation rate for athletes participating in specific sports, reported by race and gender; the graduation rate for students in general, reported
by race and gender; and other relevant statistics. To obtain copies of these reports, contact the Student Life Office, Aquinas 116H, or access www.cscc.edu.

Crime Awareness and Campus Security Act
Federal legislation requires Columbus State Community College to maintain data on the types and number of crimes on college property as well as policies dealing with campus security. To obtain additional information, contact the Public Safety Department, Delaware Hall 047, (614) 287-2525 or access www.cscc.edu.

Tech Prep/Heart of Ohio Consortium
Administered by Learning Systems, Columbus State houses the Tech Prep/Heart of Ohio Consortium’s central office and acts as fiscal agent. Columbus State is a founding member of the Heart of Ohio Tech Prep Consortium. Since 1992, the college and its consortium partners–50 high schools, Central Ohio Technical College, the Electrical Trades Center, two regional campuses of Ohio University, and central and southern Ohio business, industry and labor organizations–have worked together to offer high-quality college tech prep programs.

Students who choose college Tech Prep in 11th grade enter a seamless curriculum for two years of high school, moving directly into a related associate degree program at Columbus State. Tech Prep college programs are currently available in accounting, architecture, automotive, business management, civil engineering, computer information, construction management, electro-mechanical engineering, electronic engineering, emergency medical services, environmental science, safety and health, finance, fire science, digital design and graphics, interactive media, law enforcement, mechanical engineering, multi-competency health, nursing, radiography, sport and exercise studies, and supply chain management.

Claude Graves, Director, (614) 287-2542

Testing Center
College Testing Services
The mission of the Testing Center is to meet the testing needs of the campus community. The Testing Center provides a facility in which tests can be administered accurately and securely according to instructor and department guidelines. The center offers COMPASS™ Placement testing, Distance Learning, departmentalized testing, and classroom make-ups. After a student completes the COMPASS Placement test, an advisor in Advising Services will interpret the test results and make recommendations for appropriate courses. The center also provides a community outreach proctoring service for non-Columbus State academic examinations. There is a service fee of $25 per non-Columbus State exam. The proctoring service is available to anyone in the community; however, the Testing Center reserves the right to deny a proctor request at any given time. The Testing Center maintains a partnership among learners, faculty, the community and the center’s staff.

Tests may be taken anytime between the opening and closing times of the Testing Center. However, academic tests will not be administered one hour prior to closing. COMPASS Placement testing does not start two hours prior to closing. No extension of time will be given; therefore, participants should plan sufficient time for taking tests. Students currently enrolled in classes or who may need to take the COMPASS Placement tests can report to select off-campus sites. Please call ahead for days and times.

The Testing Center is located in Aquinas Hall, Lower Level, Room 002. A picture ID is required. In an effort to provide a distraction-free testing environment, children, food, beverages and cell phones are not permitted in the Testing Center. For more information, call (614) 287-2478.

Wellness Program
The Department of Student Activities and Athletics sponsors a wellness program for students, faculty, and staff of the college. Individual wellness consists of five components: physical, social, emotional, mental, and spiritual. The activities offered through the wellness program attempt to balance the five components through lectures, hands-on demonstrations, and seminars. Typical wellness offerings include Zumba, Pilates, tae kwon do, tai chi, women’s self-defense, and yoga. For more information, call (614) 287-3656.
Center for Workforce Development at Columbus State

Dr. Jane Schaefer, Dean, Community Education and Workforce Development
(614) 287-2511

The Center for Workforce Development at Columbus State is a full-service resource center for individuals and businesses. The Center partners with the community to address workforce and economic development needs through innovative approaches to ongoing education, career counseling, talent development, customized training, organizational performance, and business consulting. The staff has expertise in 21st century, cutting-edge applications which make the CWD the resource of choice for new and established enterprises, as well as for individuals seeking career growth and lifelong learning.

Each year, the Center for Workforce Development at Columbus State delivers thousands of skill ability and behavioral assessments and offers more than 50 professional development seminars. Through the CWD, individuals can take advantage of language instruction, academic enrichment, technology training, job training, and continuing education, in traditional and nontraditional settings—including jobsite presentations. Employees wanting to move ahead in their careers also can complete professional and industry-recognized certifications.

New and struggling entrepreneurs can tap the Small Business Development Center, an affiliate of the Center for Workforce Development, for its business expertise. The SBDC offers one-on-one consulting, networking programs, business-related classes and a familiarity with funding resources.

The Center for Workforce Development is housed in a new, 13,000 square foot Conference Center which is equipped with state-of-the-art technology and comfortable furnishings. Conference Center facilities, which meet most training, conference and workshop needs, are often available for rent by clients outside the college.

The Center for Workforce Development is comprised of the Business and Industry Division and the Transitional Workforce Division. Cheryl Hay, (614) 587-2415, directs Business and Industry activities while Nancy Case, (614) 287-3911, oversees the efforts of Transitional Workforce. The Center’s e-mail address is www.cscc.edu/workforce.

Professional Development Seminars

Professional Development Seminars are one-day, noncredit courses meeting from 8:30 a.m.– 4:30 p.m. For information, dates and locations, or to register, call (614) 287-5000 or visit our Web site at www.cscc.edu/workforce. The following descriptions, titles and fees are current at publication time but are subject to change.
Computer Skills Seminars

BICPT 101 Introduction to Windows Vista
Windows Vista is designed to improve the computing experience of every kind of PC user—from people simply browsing the Web at home to business employees who must organize and act on large volumes of data. This seminar will help participants understand this system and use it efficiently and effectively.

BICPT 402 Internet Research
Finding information on the World Wide Web can seem deceptively easy, but finding an excess of information is often easier than finding the right information. This seminar will give participants the techniques and strategies to effectively locate the information they are seeking.

BICPT 501 Introduction to Microsoft Word 2003
BICPT 901 Introduction to Microsoft Word 2007
During this seminar, participants will learn how to create, edit, open, save and print documents; format characters and paragraphs; create and format tables; set margins; create headers and footers; and check spelling.

BICPT 511 Intermediate Word 2003
BICPT 911 Intermediate Word 2007
Students will learn intermediate skills such as creating multiple columns; applying borders and shading to tables; utilizing styles and templates to automate formatting; inserting and formatting graphics and drawings; and printing envelopes and labels.

BICPT 521 Advanced Word 2003
BICPT 921 Advanced Word 2007
Word users will learn to maximize productivity with advanced tools and techniques such as forms, form letters, mail merges, macros, and revision marking.

BICPT 502 Introduction to Microsoft Excel 2003
BICPT 902 Introduction to Microsoft Excel 2007
In this seminar, participants will learn how to create, edit, open, save and print workbooks; enter data, formulas, and functions; use absolute and relative references; format cells, and insert charts.

BICPT 512 Intermediate Excel 2003
BICPT 912 Intermediate Excel 2007
In this course, Excel users will enhance their skills, learning to work with lists; link and consolidate worksheets; create combination charts; sort and filter; and use advanced formatting.

BICPT 522 Advanced Excel 2003
BICPT 922 Advanced Excel 2007
Participants will be introduced to advanced Excel tools and techniques such as pivot tables, pivot charts, goal seek, macros, database functions, and external database queries.

BICPT 503 Introduction to PowerPoint 2003
BICPT 903 Introduction to PowerPoint 2007
During this seminar, participants will learn how to create, edit, open, save, and print presentations; format text; add, rearrange, and delete slides; use templates; utilize slide masters; insert tables, charts, and clip art; check spelling; and deliver presentations.

BICPT 523 Advanced PowerPoint 2003
BICPT 923 Advanced PowerPoint 2007
Participants will learn to use advanced PowerPoint tools and techniques such as custom presentations, animations, special effects, multimedia, and integration with other Microsoft Office applications.

BICPT 913 PowerPoint Beyond Bullet Points
The Beyond Bullet Points approach opens dramatic new possibilities for treating the PowerPoint screen as a canvas to promote dialog and collaboration. Slides work as visual triggers to increase the presenter’s confidence and engagement with the audience. The resulting multimedia experience balances visual and verbal elements, allowing for more effective message communication.

BICPT 504 Introduction to Microsoft Access 2003
BICPT 904 Introduction to Microsoft Access 2007
In this course, participants will learn basic database concepts: how to plan, design, and create a database; work with fields and records; create and execute queries; create and use forms; and create and use reports.

BICPT 514 Intermediate Access 2003
BICPT 914 Intermediate Access 2007
Access users will add to their skills in this intermediate seminar, learning how to normalize and implement referential integrity. In addition, participants will learn how to relate tables, create advanced queries, add graphics and calculations to forms and reports, and add charts.

BICPT 524 Advanced Access 2004
BICPT 924 Advanced Access 2007
Access users will master advanced tools and techniques such as pivot tables, pivot charts, advanced forms, macros, Access SQL, and Internet integration.

BICPT 423 Microsoft FrontPage
2-Day Seminar
In this introductory course, participants will learn how to create a basic Web site. Topics include selecting themes, creating new Web pages, formatting characters and paragraphs, creating lists, adding graphics, inserting tables, creating links to other pages, and creating navigation aids. (This seminar meets for two sessions.)

BICPT 205 Microsoft Outlook
Many people have e-mail at home or work but don’t know how to manage its capabilities. This seminar is designed to provide those individuals with the skills to create and customize a message, work with attachments, use the mail management tools, and work with the electronic calendar.

BICPT 601 Introduction to Microsoft Project
This seminar gives participants the skills necessary to organize the tasks involved in the completion of a project, monitor the progress of projects, and make the best use of allotted time, money and resources. NOTE: In addition to the basic tools and techniques of MS Project; this course will reinforce theories and topics presented in the Project Planning and Management Fundamentals seminar.
BICPT 621 Advanced Project
Productivity will soar as participants learn to use advanced tools and techniques such as baselines, hyperlinks, drawing tools, reports, consolidating multiple projects, and sharing resources across projects.
NOTE: In addition to the basic tools and techniques of MS Project, this course will reinforce theories and topics presented in the Project Planning and Management Fundamentals seminar.

BICPT 404 Dreamweaver CS4
2-Day Seminar
Dreamweaver is a powerful Web-authoring package and is the choice of Web development professionals and others who want to go beyond the basic capabilities of tools like FrontPage. This two-day seminar will help students get started with Dreamweaver to create a basic Web site complete with links, images, formatting, style sheets, and tables.
Prerequisites: It is recommended that participants have a basic knowledge of HTML markup, including structure and formatting tags, and an understanding of file management, particularly directory trees.

BICPT 703 QuickBooks Pro
Participants will learn how to navigate this software that can share data with more than 60 programs. QuickBooks Pro offers a full set of accounting features including payroll, credit card authorization, and inventory capabilities.

BICPT 405 Flash CS4 Professional
2-Day Seminar
Flash CS4 Professional is used to create interactive Web sites, digital experiences and mobile content. This two-day seminar will teach attendees to use color and shapes creatively as well as to manipulate images and modify layers. Participants also will learn how to create forms, simple animations, integrate sound and video, create interactive content and publish and test movies on the Web.

BICPT 801 Adobe Acrobat Professional 7.0
Attendees will learn to convert and combine proposals, presentations, images, and other documents into one compact PDF file using Adobe Acrobat. Skills introduced include annotation, linking, and bookmarking to create notes, as well as learning to use dynamic date-time stamps, file viewing and navigation aids.

BICPT 802 Adobe Photoshop CS4
2-Day Seminar
To be successful in this course, attendees should have a knowledge and/or understanding of the following: color palettes and color models such as RGB and CMYK; the differences between raster formats such as GIF or JPG and vector formats such as EPS; and prior experience with draw tools including stroke, fill, and Bezier curves.

Business Writing Skills Seminars

BIBUS 111 Report and Proposal Writing
Attendees will learn to analyze report and proposal requirements and prepare reports that address the requestor’s needs regarding content and writing style.

BIBUS 110 Technical and Procedural Writing
In this course, participants will learn basic techniques used in technical writing, including how to incorporate the elements of style and usage in step-by-step writing, how to assemble material, and how to write a technical report. Participants will learn how to convey a complex message with a minimum number of words and images.

BIBUS 105 Grants: Research and Writing
This course presents an overview of the grants writing process. Participants will be introduced to the entire process, from visioning through proposal submission. Additionally, this course will help those attending to locate and identify grant opportunities, analyze submission guidelines, and prepare a winning proposal.

BIBUS 108 Proofreading and Editing Techniques
This hands-on seminar presents effective proofreading and editing techniques. Course details proofreader’s marks used to indicate text and layout changes and covers basic grammar, including punctuation, sentence structure, and style.

BIBUS 101 Grammar for the Work Place
Who or Whom? Who, Which, or That? Which word is correct in the context of a certain sentence? This course covers the basics of grammar: parts of speech, sentence structure, punctuation, capitalization, and correct usage.

BIBUS 109 Writing for Business: Level 1
Participants learn to communicate more effectively using clear, concise language and writing techniques appropriate for a variety of business communications. Other topics covered include active vs. passive voice and writing effective memos.

BIBUS 112 Writing for Business: Level 2
Building on the skills gained in the prerequisite course, Writing for Business Level 1, students will develop additional skills in proofreading, editing, memo organization and audience analysis.

BIBUS 120 Flub-Proof Business Writing
After learning about common mistakes, participants will learn how to write in a clear, organized, error-free manner. In this seminar, the basics of good writing, from organization to mechanics, are broken down into 50 simple, easy-to-follow, “flub-proof” rules. These rules lead, step-by-step, to better workplace communications.

Organization and Project Management

BIBUS 107 Project Planning and Management
Focusing on effective project management, this introductory course will provide participants with the tools to define, plan, implement, and evaluate projects.
In addition to basic project management tools and techniques, this course will reinforce skills and topics presented in the Microsoft Project seminars.

**BISFT 106 Problem Solving and Decision Making**
Participants will learn how to identify different problem-solving styles that address the big picture, not just the task at hand. This course helps develop creativity, efficiency, and critical thinking that can be applied in solving everyday problems.

**BIPDV 301 Goal Setting**
The ability to set goals is critical to success. This seminar will teach participants how to set both personal and career goals.

**BIBUS 106 Office Organization Skills**
Organizing the workspace makes work easier and more efficient. Techniques taught in this seminar will help participants conquer the endless flow of paperwork.

**BIPDV 302 Time Mastery Profile**
In today’s fast-moving workplace, it’s crucial to make the most of every day. The Time Mastery Profile® is a complete assessment tool that helps individuals set priorities and manage time more efficiently by evaluating their effectiveness in 12 critical areas: Attitudes, Goals, Priorities, Analyzing, Planning, Scheduling, Interruptions, Meetings, Written Communication, Delegation, Procrastination, and Team Time. NOTE: The assessment is sent as pre-work, to be completed online prior to training.

**Human Dynamics Seminars**

**BILNG 601 Discovering Diversity Profile**
The Discovering Diversity Profile® provides a safe, confidential way for employees to explore critical and complex diversity issues. Attendees will identify existing attitudes so as to understand how their viewpoints and behaviors affect others. Participants will also learn how to limit the influence of stereotypes, reduce conflict and embrace diversity as a source of organizational strength. NOTE: The assessment is sent as pre-work, to be completed online prior to training.

**BIPDV 303 Stress Management**
Participants will learn to cope with stress in their lives by identifying stress initiators and turning them into powerful drivers for change and accomplishment.

**BISFT 105 Managing Relationships at Work**
Anyone interested in learning how to work more effectively with people will find this seminar valuable. Using the information presented, participants can improve relationships with supervisors, coworkers and customers.

**BIPDV 201 Emotional Intelligence: EQ**
Emotional Intelligence is an alternative kind of intelligence that impacts our everyday functioning. Self-management, control, self-motivation and managing emotions in the workplace are just a few of the topics that will be covered in this course.

**BISFT 108 Working with Difficult People**
This course will teach participants how to use a behavioral style model to build the skills needed to deal with difficult people.

**BIPDV 801 Conflict Management: A DiSC-Based Approach**
Organizations can promote a well-balanced work environment by helping employees understand their own and others’ behavior in conflict, and by providing them with the problem-solving skills needed to manage adversity in the workplace. By incorporating validated research-based assessment data, the class personalizes the learning experience. Participants walk away with the skills, knowledge, and tools they need to deal with conflict, resulting in more productive teams, higher satisfaction, and less turnover. NOTE: An assessment is sent as pre-work, to be completed online prior to training.

**BIPDV 802 DiSC® Classic**
Organizations worldwide have embraced the language of DiSC®, pioneered by Inscape Publishing over 30 years ago. Millions of people have gained insight about themselves and others through DiSC-based learning instruments which provide nonjudgmental language for exploring behavioral issues across four primary dimensions: Dominance, Influence, Steadiness and Conscientiousness. Detailed, personalized information helps people apply DiSC learning to specific and recurring business situations. NOTE: The assessment is sent as pre-work, to be completed online prior to training.

**BILING 602 Generational Differences: M.E.E.T. for Respect in the Workplace**
With workers from four generations now active in the workforce, the potential for misunderstanding, frustration and conflict is multiplied. This seminar applies the M.E.E.T. approach (M–make time to discuss; E–explore differences; E–encourage respect; T–take responsibility) to the complexities of working in and/or managing a multigenerational workforce. Employees and managers gain insights, strategies and skills that help minimize generational conflict, strengthen collaboration and improve productivity.

**Management Best Practices Seminars**

**BIBUS 501 Frontline Management: Leveraging the Strengths of Your Style**
This seminar provides managers with the tools to coach and develop competent, motivated employees by gaining a deeper understanding of individual strengths and challenges. Participants learn to maximize their communication skills and capitalize on their people skills, knowledge and management effectiveness. Their organizations will benefit as a result of higher employee satisfaction, lower turnover, and stronger employee-manager relationships. NOTE: The assessment is sent as pre-work, to be completed online prior to training.

**BIBUS 502 Capitalizing on Team Talents**
This seminar provides organizations with the key to building and maintaining peak performing teams. Course helps individuals identify their strengths and limitations, and it addresses how team members can work together more productively by tapping those
individual strengths for the betterment of the team. By incorporating proven, research-based assessments, Capitalizing on Team Talents™ personalizes the learning experience while video content and group activities generate opportunities for each participant to learn about team assets and stumbling blocks. NOTE: The assessment is sent as pre-work, to be completed online prior to training.

**BIBUS 503 Collaborative Skills for Teams**

This seminar provides organizations with the key to building collaborative, effective teams. Participants learn of the need for different team roles and for exploring how various roles communicate, manage time, and manage priorities. Attendees will discover four distinct team roles, identify which team role they are most comfortable using, and learn the four stages of team projects. Relevant video and experiential learning activities provide strategies for maximizing individual contributions, resulting in highly productive, efficient, and cohesive teams, greater employee satisfaction and decreased employee turnover. NOTE: The assessment is sent as pre-work to be completed online prior to training.

**Fundamental Fiscal Skills Seminars**

**BIBUS 101 Accounting and Bookkeeping**

This course covers common accounting functions and practices such as fixed asset accounting, cost accounting, accounting transactions and internal accounting controls.

**BIBUS 202 Best Practices in Accounts Payable**

What a company doesn’t know about accounts payable can cost it thousands of dollars annually. This seminar explains the best practices surrounding accounts payable. Class will explore three kinds of fraud, the master vendor file, invoices, POs, receiving documents, discounts, courtesy calls, approvals/authorizations, limiting rush checks, minimizing duplicate payments, using procurement cards, 1099s, travel and entertainment expenses, and technology.

**Influencing and Sales Skills**

**BISFT 102 How to Excel at Customer Service**

Participants will learn to recognize and anticipate customer expectations, identify elements of emotional response that interfere with customer service, and develop communication skills that defuse complaints.

**BISFT 104 Improving Your Listening Skills**

This seminar provides individuals with an understanding of effective listening techniques. By incorporating proven, research-based assessment data, this class personalizes the learning experience for each participant. Learners will discover the five approaches to listening and will identify their most natural ones. Video and hands-on, experiential learning activities help participants learn to communicate better with others by modifying their listening styles with team members and customers. NOTE: The assessment is sent as pre-work, to be completed online prior to training.

**BIBUS 103 Effective Presentations**

This seminar will help participants overcome the No. 1 fear of American adults (public speaking) by teaching them how to make successful group presentations in formal or informal settings. At the conclusion of this seminar, attendees will know how to plan, prepare, and deliver a presentation and how to raise their level of self-confidence in public speaking. Opportunity to practice making a presentation is provided.

**BIBUS 401 DiSC-Powered Selling**

During this seminar, salespeople will discover the four approaches to selling and how to determine a customer’s buying style. By adapting their natural selling style(s) to customers with different styles, salespeople of all levels can maximize their potential for closing sales. Individualized workbooks, filled with research-based assessment data, provide each participant with a personalized learning experience. Hands-on, video and group activities help participants learn to maximize their sales performance, resulting in increased customer satisfaction and additional revenue for their companies. NOTE: The assessment is sent as pre-work to be completed online prior to training.

**BISFT 107 Train-the-Trainer (Critical Events for Training Success)**

This seminar will introduce tools and techniques to help participants conduct effective training for customers, co-workers or suppliers.

**Advanced Manufacturing Skills**

The Integrated Systems Technology (IST) program brings together industry and academia to offer manufacturers, or those interested in a career in manufacturing, an excellent means of obtaining general knowledge and the technical skills necessary to function and progress in the advanced manufacturing field. The training program is delivered in modular format and focuses heavily on hands-on, real-world applications, preparing individuals to make an immediate impact in the workplace. A combination of instructor-led, self-paced, and lab experiences ensure that all learning styles are accommodated.

IST program participants:

- Learn industry-driven skills
- Complete an intense training program
- Demonstrate troubleshooting skills on industry-standard equipment

IST offers customized training programs in:

- Electrical
- Electronic
- Mechanical
- Automation
- Process controls
Pharmacy Technician Training Program

The purpose of this noncredit course is to prepare the student to enter the pharmacy field in hospitals, home infusion pharmacies, community pharmacies, and mail-order pharmacies, as an ancillary working under the supervision of a registered pharmacist. The course is taught by registered pharmacists practicing in Columbus. Course will prepare students for the National Pharmacy Technician Certification Exam. Topics include:

• Medical terminology specific to the pharmaceutical industry
• Reading and interpreting prescriptions
• Defining drugs by generic and brand names
• Dosage calculations
• IV flow rates
• Drug compounding
• Dose conversions
• Dispensing of prescriptions
• Unit dose
• Inventory control
• Billing and reimbursement

The Ohio Small Business Development Center at Columbus State Community College
(614) 287-5294

The Ohio Small Business Development Center at Columbus State Community College is a business partner and so much more. SBDC provides entrepreneurial development assistance and high end business consulting to start-up and emerging business owners. The SBDC regional office is located on the campus of Columbus State Community College in the Center for Workforce Development. The SBDC provides consulting and training throughout nine counties in central Ohio. Consulting services are offered at “no cost” to the client and all services are provided on a nondiscriminatory basis.

2007-2008 Statistics
• One-on-one consulting to 961 businesses
• Created more than 165 new jobs
• Facilitated more than $12.8 million in financing.
• Offered 90 educational networking programs and classes to 1,800 attendees

For more information on any SBDC activity, call (614) 287-5294 or visit www.SBDC.cscc.edu.

International Trade Assistance Center

The International Trade Assistance Center (ITAC) provides consulting and advising in international trade and international business and logistics. Specific services include developing export strategies; preparing products or services for export; international legal considerations; product shipping; pricing, quotation and terms; methods of payment; financing export transactions; business travel abroad, and selling overseas.

Manufacturing and Technology Small Business Development Center

The Manufacturing and Technology Small Business Development Center (MTSBDC) provides specialized assistance and high end business consulting to manufacturers, technology-based companies like R&D or testing firms, as well as individual inventors. In addition to core SBDC services, some MTSBDC specialized services include product design, prototype development, intellectual property strategies and research, market research, focus group sessions, licensing, and manufacturer partnering. The program utilizes experts and facilities from Columbus State Community College, all of Ohio’s colleges and universities, as well as all of the nation’s federal research facilities.

Continuing Education Courses

With the rapid changes in technology and work methods, many employers and employees seek continuing education classes to stay current in careers and job skills. Continuing Education courses are offered for many types of open enrollment courses: Computer Skills, Human Resources, Personal Development, including the Lifelong Learning Institute, Safety and a variety of online learning opportunities.

For information about continuing education open enrollment courses, please call (614) 287-5000.

Computer Skills

Contact person for the following technical and computer courses is David Watts, (614) 287-5787 or dwatts@cscc.edu.

CISCO Academy

The Cisco Academy for CCNA (Cisco Certified Network Assistant) consists of a four-course curriculum designed to teach the student the basics of computer network systems, and to prepare them to sit for the Cisco Certification Exam for CCNA status. At the completion of the Academy, the student will be able to assist network engineers in the design, development, installation, and implementation of a variety of network systems. Each class is 70 clock hours in length for a total of 280 clock hours of a combination of lecture and lab. The curriculum is available for either credit or noncredit.

Course Objectives

The CCNA certification indicates knowledge of networking for the small office/home office (SOHO) market and the ability to work in small businesses or organizations whose networks have fewer than 100 nodes. A CCNA certified individual can:

• Install and configure Cisco switches and routers in multi-protocol internetworks using LAN and WAN interfaces
• Provide Level 1 troubleshooting service
• Improve network performance and security
• Perform entry-level tasks in the planning, design, installation, operation and troubleshooting of Ethernet, TCP/IP Networks.

CPECPT 210 Cisco CCNA 1: Networking for Home and Small Businesses
CCNA 1: Networking for Home and Small Businesses teaches students the skills needed to obtain entry-level home network installer jobs. It also helps students develop some of the skills needed to become network technicians, computer technicians, cable installers and help desk technicians. It provides a hands-on introduction to networking and the Internet using tools and hardware commonly found in home and small business environments. Labs include PC installation, Internet connectivity, wireless connectivity, file and print sharing, and the installation of game consoles, scanner and cameras.

CPECPT 211 Cisco CCNA 2: Working at a Small-to-Medium Business or ISP
CCNA 2: Working at a Small-to-Medium Business or ISP prepares students for jobs as network technicians and helps them develop additional skills required for computer technicians and help desk technicians. It provides a basic overview of routing and remote access, addressing and security. It also familiarizes students with servers that provide e-mail services, Web space, and authenticated access. Students learn about the soft skills required for help desk and customer service positions. Network monitoring and basic troubleshooting skills are taught in context.

CPECPT 212/213 Cisco CCNA 3 and 4: Introducing Routing and Switching in the Enterprise
CCNA 3: Introducing Routing and Switching in the Enterprise familiarizes students with the equipment applications and protocols installed in enterprise networks, with a focus on switched networks, IP Telephony requirements, and security. It also introduces advanced routing protocols such as Enhanced Interior Gateway Protocol (EIGRP) and Open Shortest Path First (OSPF) Protocol. Hands-on exercises, including configuration, installation and troubleshooting reinforce student learning.

CCNA 4: Designing and Supporting Computer Networks introduces students to network design processes using two examples; a large stadium enterprise network and a medium-sized film company network. Students follow a standard design process to expand and upgrade each network, which includes requirements gathering, proof-of-concept and project management. Lifecycle services, including upgrades, competitive analyses, and system integration, are presented in the context of pre-sale support. In addition to the Packet Tracer and lab exercises found in the previous courses, there are many pen-and-paper and role playing exercises that students complete while developing their network upgrade proposals.

CPT-214 CCNP 1: Building Scalable Internetworks
Cisco Certified Network Professional (CCNP) designation. CCNP: Building Scalable Internetworks introduces Cisco Networking Academy Program students to scalable IP networks. Students will learn how to create an efficient and expandable enterprise network by installing, configuring, monitoring, and troubleshooting network infrastructure equipment (especially routers such as Cisco ISRs) according to the Campus Infrastructure module in the Enterprise Composite Network model. Topics include how to configure EIGRP, OSPF, IS-IS, and BGP routing protocols and how to manipulate and optimize routing updates between these routing protocols. Other topics include multicast routing, IPv6, and DHCP configuration.

Course Objectives
The CCNP certification indicates knowledge of networking for the small-office, home-office (SOHO) market and enterprise markets and the ability to work in businesses or organizations whose networks have between 100 and 500 nodes. A CCNP certified individual should be able to:
• Implement appropriate technologies to build a scalable routed network
• Build campus networks using multilayer switching technologies
• Improve traffic flow, reliability, redundancy, and performance for campus LANs, routed and switched WANs, and remote access networks
• Create and deploy a global intranet
• Troubleshoot an environment that uses Cisco routers and switches for multiprotocol client hosts and services
• Perform entry-level tasks in the planning, design, installation, operation and troubleshooting of Ethernet, TCP/IP networks.

CCNP 1: Building Scalable Internetworks is an integral step towards achieving CCNP Certification. Upon completion of this course, students will have performed tasks related to:
• Internetwork scalability
• Routing protocol operation, configuration, and troubleshooting
• EIGRP, OSPF, IS-IS, BGP
• Route optimization
• IP Multicast
• IPv6

CPT-215 CCNP 2: Implementing Secure Converged Wide-Area Networks
CCNP: Implementing Secure Converged Wide-Area Networks is one of four courses leading to the Cisco Certified Network Professional (CCNP) designation. CCNP: Implementing Secure Converged Wide-area Networks introduces Cisco Networking Academy Program students to providing secure enterprise-class network service for teleworkers and branch sites. Students will learn how to secure and expand the reach of an enterprise network with focus on VPN configuration and securing network access.

Topics include teleworker configuration and access, frame-mode MPLS, site-to-site IPSEC VPN, Cisco EZVPN, strategies used to mitigate network attacks, Cisco device hardening and IOS firewall features.

Course Objectives
The CCNP certification indicates knowledge of networking for the small-office, home-office (SOHO) market and enterprise markets. Following is a list of claims relevant to the ISCW certification that a CCNP certified individual will be able to do:
• Implement basic teleworker services.
• Implement Frame-Mode MPLS.
• Implement a site-to-site IPSec VPN.
CPT-216 CCNP 3: Building Multilayer Switched Networks

CCNP: Building Multilayer Switched Networks is one of four courses leading to the Cisco Certified Network Professional (CCNP) designation. Multilayer Switching teaches students about the deployment of state-of-the-art campus LANs. The course focuses on the selection and implementation of the appropriate Cisco IOS services to build reliable, scalable multilayer-switched LANs. Students will develop skills in the following areas:

- Introduction to Campus Networks
- Virtual Local Area Networks (VLANs)
- Spanning Tree Protocol
- Inter-VLAN Routing
- High Availability in a Campus Environment
- Wireless Client Access
- Minimizing Service Loss and Data Theft in a Campus Network
- Configuring Campus Switches to Support Voice

This hands-on, lab-oriented course stresses the design, implementation, operation, and troubleshooting of multilayer switched networks.

Course Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Describe the Campus Infrastructure module of the ECNM
- Define VLANs to segment network traffic and manage network utilization
- Explain the procedure for configuring both 802.1Q and ISL trunking between two switches so that VLANs that span the switches can connect
- Describe how VLAN configuration of switches in a single management domain can be automated with the Cisco proprietary VTP
- Implement high availability technologies and techniques using multilayer switches in a campus environment
- Understand Wireless LANs
- Describe and configure switch infrastructure to support voice
- Describe and implement security features in a switched network

CPT-217 CCNP 4: Optimizing Converged Networks

CCNP: Optimizing Converged Networks is one of four courses leading to the Cisco Certified Network Professional (CCNP) designation. CCNP: Optimizing Converged networks introduces Cisco Networking Academy Program students to optimizing and providing effective QoS techniques in converged networks operating voice, wireless and security applications.

Topics include implementing a VOIP network, implementing QoS on converged networks, specific IP QoS mechanisms for implementing the DiffServ QoS model, AutoQoS, wireless security and basic wireless management.

Course Objectives

The CCNP certification indicates knowledge of networking for the small-office, home office (SOHO) market and enterprise markets. Following is a list of claims relevant to the ONT certification that a CCNP certified individual will be able to do:

- Describe Cisco VoIP implementations.
- Describe QoS considerations.
- Describe DiffServ QoS implementations.
- Implement AutoQoS.
- Implement WLAN security and management.

CCNP: Optimizing Converged Networks is an integral step towards achieving CCNP Certification.

Upon completion of this course, students will have performed tasks related to:

- Explaining the Cisco hierarchical network model as it pertains to an end-to-end enterprise network
- Describing specific requirements for implementing a VOIP network
- Describing the need to implement QoS and the methods for implementing QoS on a converged network using Cisco’s routers and Catalyst Switches
- Explaining the key IP QoS mechanisms used to implement the DiffServ QoS model
- Configuring Auto QoS for Enterprise
- Describing and configuring wireless security and basic wireless management

CPECPT 234 Cisco IT Essentials I–A+

Target Certifications: PC Hardware and Software V4.0 helps to prepare students for the CompTIA A+ certification exams (http://www.comptia.org). The fundamentals part of the course, chapters 1-10, prepares students for the required CompTIA A+ Essentials exam. The advanced part of the course, chapters 11-16, prepares students for the CompTIA’s three job-environment certification exams:

IT (field) Technician (220-602)
Remote support technician (220-603)
Bench technician (220-604)

This course also aligns to the objectives in the first three modules of the EUCIP IT Administrator certification (http://www.eucip.org): Module 1 PC Hardware, Module 2 Operation Systems, and Module 3 Local Area Networks and Network Services.

This course covers the fundamentals of computer hardware and software as well as advanced concepts. Students who complete this course will be able to describe the internal components of a computer, assemble and configure a computer, install an operating system, and troubleshoot using system tools and diagnostic tools.
software. Students will also be able to connect to the Internet and share resources in a network environment. New topics included in this version include laptops and portable devices, wireless connectivity, security, safety and environmental issues, and communication skills.

CPECPT 107 and 108 Cisco Network Security 1 and 2
Network Security is designed to prepare students for certification in this field. This course combines hands-on experience, instructor-led lectures and a Web-based curriculum for students. This 140-hour, two-part course is an introduction to network security and overall security processes.

The first component of the course, Network Security 1 (NS1), focuses on the overall security processes in a network with an emphasis on the following areas:

- Security policy design and management
- Security technologies, products, and solutions
- Firewall and secure router design, installation, configuration and maintenance
- AAA implementation using routers and firewalls
- Securing the network at Layers 2 and 3

Network Security 2 (NS2) builds on the topics introduced in NS1 with additional emphasis on the following areas:

- Intrusion prevention implementation using routers and firewalls
- VPN implementations using routers and firewalls

CPECPT 109 Cisco Fundamentals of Wireless LANs
Fundamentals of Wireless LANs teaches students to develop, implement, and troubleshoot wireless networks. This 70-hour, hands-on, skills-based course focuses on the design, planning, implementation, operation, and troubleshooting of wireless networks. In includes a comprehensive overview of technologies, security and design best practices.

CPECPT 101 Security+ Certification Training
This course teaches material which maps to all skill and knowledge objectives for the CompTIA Security+ certification exam (SY0-101). Skills covered include identifying access control and authentication methods, identifying services provided by encryption, and managing a Public Key Infrastructure (PKI). Following this course, students will better understand common types of network-based attacks and how to respond to them.

Students also will learn how to harden operating systems, secure remote access and ensure physical security. In addition to teaching firewall and intrusion-detection technologies, this course teaches critical incident response and system forensics concepts. This course also addresses essential auditing and documentation practices that help measure significant gaps between security policy and actual practice. Finally, students will learn the essentials of a disaster recovery plan, how to ensure business continuity, and how to create and manage a security policy. Throughout this course, students will review case studies to help ensure that best practices are employed throughout a network using the latest technologies, including wireless implementations.

Req. Text (PROVIDED): Security+ Certification (Published by ComputerPREP, Inc.)

Certifications: To earn Security+ certification, students must pass the Security+ exam.

CPECPT 151 Information Systems Risk Analysis
The Operationally Critical Threat, Asset, and Vulnerability Evaluation SM (OCTAVE) Training Workshop is a three-day workshop. It is designed for interdisciplinary analysis teams that will lead and perform information security risk evaluations for large organizations.

OCTAVE is a self-directed risk evaluation that provides an organization with control over security risks; balances critical information assets, business needs, threats, and vulnerabilities; and benchmarks the organization against known or accepted best practices for security. This workshop covers the OCTAVE approach, OCTAVE Method, and OCTAVE-S; preparation for implementing the methods; and guidelines for tailoring the methods.

The OCTAVE Training Workshop will help:

- Manage and control enterprise-wide information security risk evaluations
- Develop appropriate protection strategies by considering policy, management, administrative, technological, and other organizational issues to form a comprehensive view of the security state of your organization
- Perform information security assessments and act as a focal point for security improvement efforts
- Improve effectiveness at communicating business and security needs both internally and externally

Course Objectives
The three-day OCTAVE Training Workshop will help attendees:

- Understand the purpose of the OCTAVE approach and key characteristics of the methods
- Be ready to use OCTAVE implementation guides and do an evaluation
- Understand how to get started and when to tailor the process and artifacts to meet unique organizational needs

Course Topics:
- Introduction to the OCTAVE approach, the OCTAVE Method, and OCTAVE-S
- Preparation for OCTAVE
- Review of OCTAVE processes
- Identifying critical assets and threats to those assets
- Identifying vulnerabilities that expose those threats
- Developing an appropriate protection strategy for the organization’s mission and priorities
- Tailoring OCTAVE to meet an organization’s needs

Prerequisites: Workshop attendees should represent business, mission, and/or IT perspectives.

Human Resources

HRM 100 PHR/SPHR Certification Exam Preparation
This course provides a comprehensive review of the entire body of HR knowledge. Using the SHRM Learning System, the most widely used tool available to prepare for the certification exam.
This intensive, fast-paced program helps participants focus their review in an instructor-led classroom environment. The program and related tasks are designed to help attendees review a great deal of information quickly, refresh areas they may not currently be practicing, as well as have an opportunity to brush-up on test-taking skills by answering multiple-choice questions.

HRM 101 Essentials in HR Management
This introductory course in human resource management provides a broad overview of the human resource function. This program is designed to help frontline managers, supervisors and junior-level HR staff to effectively handle issues related to performance management, recruiting, retention, and employment law. This cost-effective course is offered in partnership with SHRM.

Personal Development
CPEPDV 173 Retirement Planning Today
This course addresses financial issues that pertain to the self-employed as well as employees of corporations and government agencies. The course is designed to teach you how to build wealth and align your money with your values to accomplish your goals in life. Whether you plan to retire 20 years from now or have just recently retired, the information you learn in this class can deliver rewards throughout your lifetime.

Safety
CPESAF 130 High Rise Safety Training
The goal of this training program is to provide protection for occupants and to reduce damage or destruction to the building and its contents. Participants will receive instruction in the development of fire safety plans, evacuation plans, safety control teams, fire prevention programs, and WMD protection plans.

Online Learning
CPE/Ed2Go Online Instructor-Facilitated Courses
- Expert Instructors
- 24-Hour Access
- Online Discussion Areas
- 6 Weeks of Instruction
- Certificate of Successful Completion
- Courses Starting at $95

CPE has partnered with Ed2Go to provide noncredit, instructor-facilitated online courses which are informative, fun, convenient, and highly interactive. Ed2Go instructors are famous for their ability to create warm and supportive communities of learners.

All courses run for six weeks (with a two-week grace period at the end). Courses are project-oriented and include lessons, quizzes, hands-on assignments, discussion areas, supplementary links, and more. Any course can be completed entirely from home or office, any time of the day or night. New course sessions begin on the third Wednesday of each month and new courses are added monthly. Visit the Online Instruction Center at [www.ed2go.com/cpe](http://www.ed2go.com/cpe) for start dates and course description (more than 300 to choose from) in the following categories:

- The Internet
- Web Page Design
- Web Graphics and Multimedia
- Database Management and Programming
- Certification Prep
- Languages
- Writing and Publishing
- Entertainment Industry
- Grant Writing and Nonprofit Management
- Start Your Own Business
- Sales and Marketing
- Business Administration
- Test Preparation
- Personal Development
- Personal Finance and Wealth Building
- Health Care, Nutrition, and Fitness
- Personal Enrichment
- Art, History, Psychology, and Literature
- Math, Philosophy, and Science
- Law and Legal Careers
- Health Care Continuing Education
- Courses for Teaching Professionals
- Certificate Program

All courses require Internet access, e-mail, Netscape Navigator, or Microsoft Internet Explorer Web browser. Some courses may have additional requirements.

To Enroll:
1. Visit the Online Instruction Center at [www.ed2go.com/cpe](http://www.ed2go.com/cpe).
2. Click the Courses link, choose the department and course title you are interested in, and select the Enroll Now button.
3. Follow the instructions to enroll and pay for the course. Then enter your e-mail and choose a password that will grant you access to the Classroom.
4. When your course starts, return to our Online Instruction Center and click the Classroom link. To begin your studies, simply log in with your e-mail and the password you selected during enrollment.
The Lifelong Learning Institute (LLI)

The mission of Columbus State’s Lifelong Learning Institute is to provide educational opportunities for mature learners in central Ohio so that they can broaden and extend their knowledge, share life experiences, become more attuned to community resources, and interact with other “lifelong learners.” Peer-led and membership-driven, the LLI offers courses and special events that focus on the arts, literature, philosophy, science, languages, technology, spirituality, economics, and local, national and world affairs. Launched in July 2004, the Institute offers a year-round menu of two-, three- and four-week courses in September, January, April and July. “Coffee and Conversation” events and symposia are offered in other months (except October) in partnership with several central Ohio locations, including senior residence facilities and arts organizations. LLI membership is open to all who are interested. The annual membership fee provides access to any or all scheduled offerings from September 1 to August 31. Individual courses or events are open to nonmembers for a per-event fee. For information on the LLI, call (614) 287-5006.

Transitional Workforce at the Center for Workforce Development
(614) 287-5858

The Transitional Workforce Division provides courses for a variety of students who want to gain the skills needed to enter, re-enter, or advance in the workforce. These include individuals who want to pursue initial career and educational goals via noncredit courses and those who are not yet eligible or ready for credit classes.

Columbus State ACT/SkillsMax Center at the Center for Workforce Development

The ACT/SkillsMax Center offers many opportunities to the community Columbus State serves using distance training, assessment and testing to assist customers of the center to meet their personal or professional goals. Distance training is available featuring the following subject areas:

- Adult Literacy
- Computer Basics
- Information Technology (Intermediate and Advanced Computer Skills)
- Industrial Technology Safety Skills
- Management/Leadership
- Personal Development

Users of online training can access courses through the Columbus State Web site. Instructions for purchasing courses are on the ACT Web site.

Server-based courses are provided at the Columbus State ACT/SkillsMax Center and can be delivered to the individual or on an instructor-facilitated basis.

Assessments that are offered include WorkKeys, Discover, DISC, and SHR. These assessments can be given either by individual appointment or on a contract basis at the ACT/SkillsMax Center or onsite, depending on the assessment tool requested. The center is a VUE, PROMETRIC and ETS testing site for various skill certifications such as CISCO, MOUS, MCSE, NET+, etc., and offers proficiency testing for CLEP. These tests are given by appointment. The ACT high school assessment currently is not offered.

Costs for these courses and services vary. Contact the Columbus State ACT/SkillsMax Center at the Center for Workforce Development at (614) 287-2281 (ACT1) or e-mail the center at act1@csecc.edu.

Orientation to Trade and Apprenticeship Programs (OTAP)

This intense 10-week, job training program is designed to prepare students for employment in the trades, gain acceptance in apprenticeships, or obtain skills to enter other career training programs. OTAP has been in existence since 1987 and has very high placement and retention rates among graduates.

Students will have the opportunity to acquire skills, participate in hands-on labs, and be introduced to the trades by exposure to such areas as: construction trades, basic electricity, mechanical reasoning, carpentry, blue print reading, welding, plumbing, masonry, roofing and siding, applied technologies, hand and power tool usage, employability and career development skills (resume writing, job interviewing) as well as emerging “green” sustainability construction and techniques. In addition, students can obtain a 10-hour safety training certification, will receive intensive applied math instruction and gain knowledge taking entry-level exams for employment and training in trades’ related fields.

For further information or to apply, call the Noncredit Registration Office at 287-5858. This program is funded by COWIC, Franklin County Job and Family Services, and The Limited Brands.

OTAP for Youth

This creative, after-school training program for Franklin County youth 16–18 years of age teaches students the skills needed to become employed or accepted into the trades upon graduation from high school. This program provides the same hands-on training as the adult OTAP program but in a modified format. The program runs eight weeks, two days per week, from 4:30–7:00 p.m. Students may earn credits or community service hours toward their high school graduation. A hot meal is provided, bus passes are available to ensure transportation, and incentives are given for attendance and completion. This program is funded by Franklin County Job and Family Services, and The Limited Brands.
County Job and Family Services, Ingram White Castle Corporation, The Columbus Foundation, Harry C. Moores Foundation, and The Siemer Foundation.

For further information or to apply, contact the Noncredit Registration Office at 287-5858.

Academic Enrichment Program

Classes in the Academic Enrichment Program are designed for students who want to improve their English language and/or mathematical skills in order to increase career and/or educational opportunities.

Ten-week language arts classes provide instruction in reading, writing, grammar, spelling, and vocabulary. Ten-week math classes are designed to build skill in number functions, multi-step word problems, and beginning algebra and geometry.

Five-week accelerated classes in language arts and math review these subjects at the high school level for the purpose of improving college placement test scores or as preparation for the Ohio General Education Development (GED) test which leads to the Ohio High School Equivalent Diploma.

Classroom instruction is supported by two types of software. PLATO courseware offers more than 2,000 hours of basic-to-advanced level instruction in reading, writing, math, science, social studies, life and work skills as well as preparation for the NET test. Steck-Vaughn instructional software also includes extensive practice for the GED test.

TWBSC 101 Language Arts 1
TWBSC 201 Language Arts 2
TWBSC 301 Advanced Language Arts
TWBSC 102 Fundamental Math 1
TWBSC 202 Fundamental Math 2
TWBSC 302 Advanced Math

Contact (614) 287-5858 for Academic Enrichment Program/GED preparation information.

Language Institute

Central Ohio’s growing immigrant population and its increasing international connections have brought new attention to the importance of language instruction. In response to the growing need for focused language programming, the Language Institute provides Basic English as a Second Language for individuals, companies, and organizations. It also acts as a point of coordination for Basic English or introductory language courses through open enrollment and by contract. Courses in language and cultural topics can be customized to meet client needs for a particular industry or cultural focus. Further course information on other noncredit language courses can be found under the Continuing Professional Education Department section.

For information on the Language Institute, contact Tara L. Narcross, Ph.D., (614) 287-5448.

Basic English Program

LILNG 100 Basic English 1
In Basic English 1, students will be introduced to English pronunciation, the alphabet, numbers and basic literacy (reading and writing), as well as American culture as it relates to life skills.

LILNG 200 Basic English 2
Using present and past tenses, students will expand their abilities and knowledge in written and spoken vocabulary, questions and answers, and descriptions. The course also includes a secondary emphasis on life skills, culture, and reading comprehension.

LILNG 300 Basic English 3
Basic English 3 is designed to improve vocabulary skills as well as reading comprehension and writing ability. Students will build on previous knowledge and pave the way for further learning.

LILNG 400 Basic English 4
In Basic English 4, students will work to improve vocabulary, writing skills, grammar competency, and reading comprehension.

LILNG 450 Basic English 5
This course is designed to further improve the reading, writing, grammar and vocabulary skills of students seeking to improve their ability in English. Mastery of Basic English 4 and 5 is especially important for those students who plan to continue toward credit coursework through the College, the Academic Enrichment Program, and/or preparation toward the GED.

LILNG 500 Intensive Basic English
The Intensive Basic English course presents the curriculum of Basic English 2 and Basic English 3 in a single intensive course, putting the student on the fast track to knowledge of the language.

Optional Basic English Courses

LIBSC 100 Basic Communication 1
LIBSC 150 Basic Communication 2
These courses focus on oral communication for students. They can be taken alone or with other Basic English courses.

LILNG 460 Basic Writing 1
LILNG 470 Basic Writing 2
The emphasis in these courses is on improving students’ writing ability in sentences and paragraphs. Students learn to plan, draft, edit and revise their writing.

LILNG 480 Basic Reading 1
LILNG 490 Basic Reading 2
These courses are designed to help students read with greater comprehension, retention and speed; the classes will also help improve their passive and active vocabulary skills.
**LICPT 100 Introduction to Computers for ESL Speakers**
In this course, students who are unfamiliar with computers can learn the basics of using a computer, including using a word processor, saving and printing documents, entering data on a spreadsheet, using e-mail, and finding information on the Internet.

**Career Counseling**

The Transitional Workforce Division offers career counseling for students who are enrolled in programs at the Center for Workforce Development and credit students who are receiving services from the Workforce Investment Act and/or the North American Free Trade Act. For more information, contact Lora Eberhard at (614) 287-5316.
Distance Learning at Columbus State
Columbus State’s Distance Learning Global Campus is a unique alternative to traditional on-campus learning. Distance Learning allows students from around the city or around the globe to learn, using the latest interactive Web and video technologies, without the limits of time and place. “Global Campus” is the term used at Columbus State to describe the college’s distance learning Web site, courses and programs.

At the Global Campus Web site, global.cscc.edu, students can find information on getting started with distance learning, current courses and programs being offered, free program downloads, free online training and much more. Many students save the Global Campus Web site as a favorite.

Go the Distance and Get the Degree
The Global Campus Web site can assist students in finding individual online courses offered at Columbus State as well as with information on the following associate degrees and certificates being offered through Distance Learning (DL) instruction.

Please contact individual departments for details on your program of interest. Certain programs may require some face-to-face learning experience. Look for new certificates and majors in the near future.

Distance Learning Degree Programs
Associate of the Arts
Associate of Applied Science in Business Management
Associate of Applied Science in Geographic Information Systems (GIS)
Associate of Applied Science in Health Information Management Technology
Associate of Applied Science in Marketing
Associate of Applied Science in Medical Laboratory Technology
Associate of Applied Science in Nursing
Associate of Applied Science in Sport and Exercise Studies (Sport Management Major)
Associate of Applied Science in Supply Chain Management

Distance Learning Certificates:
Bookkeeping Certificate
Desktop Publishing Certificate
Digital Design Certificate
Digital Photography Certificate
Direct Marketing Certificate
Electronic Marketing Certificate
Entrepreneurship Certificate
Geographic Information Systems Certificate (GIS)
Health Care Management Certificate
Histology Certificate
International Business Certificate
International Commerce Certificate
Medical Coding Certificate
Nonprofit Management Certificate
Photoshop for Photographers Certificate
Pre-MBA Certificate (See Business and Marketing)
Public Administration Certificate
Registered Nurse First Assistant Certificate
Sleep Studies Certificate
Strategic Procurement Certificate
Supply Chain Management Certificate
Sustainable Building Certificate
3D Visualization Certificate

Types of Distance Learning Courses
Web-Based
Web-based courses use a variety of new Web technologies and software to provide a stimulating and interactive learning experience. An Internet-ready computer with a minimum of Internet Explorer 6.0 is required for students to log onto courses daily. Communication and course materials or assignments, as well as interaction with classmates, all occur within the course management system called Blackboard. When proctored testing is required, testing can be completed in the vicinity of the student.

Video-Based
Video-based courses are televised on the Educational Access Channel or can be viewed on rented tapes from the library. Students can access broadcasting schedules as well as course information on their Blackboard course site or at http://global.cscc.edu. Telecourses may require students to mail in assignments and/or meet throughout the quarter. When proctored testing is required, testing can be completed in the vicinity of the student.

Videoconferencing
Videoconferencing courses are offered using state-of-the-art videoconferencing equipment. The instructor is located at one site, and the course is broadcast to additional classrooms. This technology is highly interactive so that students have the opportunity to ask questions of the instructor and classmates at any site.

Blended
A blended course is comprised of multiple distance learning modalities, such as Web and video-based content, to offer an exciting way to learn. When proctored testing is required, testing can be completed in the vicinity of the student.

Hybrid
A hybrid course is one in which all the instructional and laboratory/clinical sessions are completed in a combination of traditional classes and at a distance. Students attend regularly scheduled sessions on campus. Because those on-campus meeting dates may be limited, please consult the academic department for specific information.

Getting Started in Distance Learning:
http://global.cscc.edu
• Check out the latest opportunities, programs, and courses.
• Go through “Distance Learning Getting Started” to learn what skills are needed to be a successful Distance Learner.
Ohio Learning Network
The Ohio Learning Network is a collaboration of Ohio colleges and universities using technology and innovation to enhance distance-learning opportunities statewide. OLN offers access to a variety of distance education opportunities as outlined in the OhioLEARNS catalog, which can be found online at www.oln.org.

Baccalaureate Degree Completion Programs via Distance Learning
These programs allow students who have completed their associate degree at Columbus State, to complete related bachelor’s and master’s degrees via distance learning from the following universities:

University of Cincinnati
Bachelor’s in Liberal Arts and Social Sciences-Addiction Studies
Bachelor of Science in Clinical Laboratory Science
Bachelor of Science in Health Information Management
Bachelor of Science in Early Childhood Education
Bachelor of Science in Fire Science Technology

Franklin University
Bachelor of Science in Business Administration
Bachelor of Science in Technical Administration
Bachelor of Science in Computer Science
Bachelor of Science in Management of Information Systems
Bachelor of Science in Health Services Administration
Bachelor of Science in Marketing and Communication

Miami University
Bachelor of Applied Science/Major Electro-Mechanical Engineering

Ohio University
Bachelor of Specialized Studies
Lifelong Learning Correspondence Course

University of Akron
Master of Applied Politics

University of Toledo
Bachelor of Science in Electronic Engineering and Computer Science
Bachelor of Arts program in Liberal Studies
Bachelor of Science in Health Informatics and Information Management

DeVry University
Bachelor of Science in Business Administration
Bachelor of Science in Computer Information Systems
Bachelor of Science in Health Information Management
Bachelor’s in Game and Simulation Programming
Bachelor’s in Network and Communication Management
Bachelor’s in Technical Management

Mount Vernon Nazarene College
Bachelor of Science in Business Administration

Bowling Green State University
Bachelor of Science in Advanced Technological Education
Bachelor of Liberal Studies
Bachelor of Science in Nursing

Ohio Dominican University
Bachelor of Arts in Criminal Justice

Florida International University
Bachelor of Science in Sport Management Studies: Wellness and Fitness Track

California University of Pennsylvania
Bachelor of Science in Sport Management Studies: Wellness and Fitness Track

United States Sports Academy
Bachelor of Science in Sport Management
Bachelor of Science in Sport Coaching

General Education Goals

Central to the mission of Columbus State Community College is the provision of General Education studies for all degree programs. General Education comprises the measurable knowledge and skills that serve as the foundation for success in society and in one’s discipline, vocation, and life. Columbus State Community College’s General Education Goals are an integral part of the curriculum and central to the mission of the college. The faculty at Columbus State Community College has determined that these goals include the following competencies:

1. Critical Thinking
   Critical thinking involves recognizing, analyzing, and defining problems, drawing logical well-supported conclusions and testing them against relevant criteria and standards. Critical thinking also includes examining issues by identifying and challenging assumptions (including one’s own), developing alternative solutions or strategies, and evaluating practical and ethical implications.

2. Effective Communication
   Effective communication involves writing, speaking, or communicating using language appropriate to the audience, technology, and purpose. Effective communication also includes receiving information/listening actively with understanding, demonstrating college-level reading comprehension, and writing in Standard English.

3. Community and Civic Responsibility
   Community and civic responsibility involves collaborating and interacting effectively with others and identifying individual and group roles. Community and civic responsibility also includes recognizing social responsibilities, ethics, and individual rights in a democratic society. Other elements include recognizing social diversity, including contributions, traditions, cultures, lifestyles, and/or values of others.

4. Quantitative Literacy
   Quantitative literacy involves performing mathematical computations using appropriate methods to arrive at accurate results. Quantitative literacy also includes analyzing, interpreting, and explaining the results of computations, including graphs, charts, tables, or statistical data.

5. Scientific and Technological Effectiveness
   Scientific and technological effectiveness involves differentiating between scientific and non-scientific methods of inquiry and using scientific knowledge in the analysis of civic and environmental issues. Scientific and technological effectiveness also includes integrating technology appropriate to one’s vocation or discipline. Other elements include recognizing the impact of science and technology on society and how scientific and technological principles are built and used in the modern world.

6. Information Literacy
   Information literacy involves defining the information needed to accomplish a specific purpose and accessing, analyzing, synthesizing, and incorporating selected information effectively. Information literacy also includes evaluating information critically and drawing from a variety of perspectives and sources. Other elements include the ethical and legal use of information.

Career and Technical Programs

Associate of Applied Science
Associate of Technical Studies
Certificate Programs

Technical degree programs are designed to prepare students for immediate employment upon graduation. Programs of Study usually can be completed within two years for students enrolled full time. Baccalaureate degree completion agreements have been made with Ashland University, Capital University, DeVry University, Franklin University, Kaplan University, Ohio Dominican University, Otterbein College, Shawnee State University, the University of Akron, the University of Phoenix, and Wilberforce University that enable technology students to complete baccalaureate degrees in General Studies areas such as business management within two years of full-time study at those institutions. Technology Specific 2+2 Agreements for the Associate of Applied Science to B.A./B.S. degrees have been developed with Bethel College, Ohio Christian College, DeVry University, Embry-Riddle Aeronautical University, Florida International University, Miami University of Ohio, Mount Carmel College of Nursing, Mount St. Joseph College, Ohio University, Sullivan University, The Ohio State University, Tiffin University, The United States Sports Academy, the University of Cincinnati, and the University of Toledo. Columbus State also has 3+1 degree completion agreements with Franklin University for a B.A. or B.S. degree and with Ohio University for a Bachelor of Applied and Technical Studies degree, or a Bachelor’s in Criminal Justice. Baccalaureate degree completion information is available from the academic departments and Advising Services.

Within many of the technologies, short-term certificate programs are offered which qualified students can complete in less than two years.

Arts and Sciences/Transfer Programs

Associate of Arts
Associate of Science
The Ohio Transfer Module

The Associate of Arts and Associate of Science degrees are specifically designed to allow for the transfer and application of all credits earned at Columbus State to the bachelor’s degree requirements of most colleges and universities. The Associate of Science
Graduation Requirements:
Associate of Arts and
Associate of Science Degrees

1. All students must satisfactorily complete at least 92 credit hours of approved courses, a minimum of 35 hours of which must be completed at Columbus State. Approved courses are designated below. Satisfactory completion requires a final grade of A, B, C, or D. Transfer credit may be awarded for courses in which a “C” or better has been earned at other accredited institutions, or a “D” or better from public Ohio institutions, if the course level equivalencies have been approved by the Dean of Arts and Sciences. Courses listed in the “Transfer Module” or “Transfer Assurance Guides” of an Ohio college, have been pre-approved for credit toward a Columbus State degree. Credits by examination, proficiency credit, nontraditional credit, and transfer credit do not apply toward meeting residency credit hour requirements.

2. All students must attain an overall grade point average of 2.0 or better for all credit courses at the 100 level or above taken at Columbus State. Grade point averages are calculated on the following scale: A=4, B=3, C=2, D=1, E=0. Number equivalencies are not assigned for grades other than these.

3. All students must complete the following General Education Requirements for the Associate of Arts and the Associate of Science degrees.

4. All students must file a “Petition to Graduate” during the quarter preceding their graduation quarter. Refer to page 28 of this catalog for complete details.

I. General Education Core Requirements: 45 hours

ASC 190 Freshman Seminar (2 hours) or ASC 150 Individual Learning and Motivation (5 hours) required for all new degree seeking students or students new to Columbus State with less than 15 applicable hours of transfer credit from their previous college. Students are to take this course in conjunction with ENGL 101 or ENGL 111.

English Composition: 10–11 hours

College Composition (5–6 hours required)

ENGL 101 Beginning Composition (3 hours) and
ENGL 102 Essay and Research (3 hours) or
ENGL 111 English Composition (5 hours)

(Students who place into ENGL 111 may take ENGL 111 instead of ENGL 101 and ENGL 102.)

Intermediate Composition (5 hours required)

Additional courses in this category may not be taken as elective hours.

ENGL 250 Writing About the Amer. Exp. (5 hours)
ENGL 251 The American Identity (5 hours)
ENGL 252 Images of Men and Women in Amer. (5 hours)
ENGL 253 American Regional Writing (5 hours)

Mathematics, Statistics, and Formal Logic: 5 hours Mathematics

MATH 116 Mathematics for the Liberal Arts (5 hours)
MATH 130 Mathematical Analysis for Business (5 hours)

Graduation Requirements: Catalog Rights

In order for a student to be considered a candidate for an associate degree, he/she must have completed all the requirements for that degree as described in the College Catalog in effect at the time the student enrolled in the program leading to that degree. If the requirements for the degree change while the student is enrolled in a degree program, the original requirements will apply to the student until he/she earns the degree or for a period of twelve quarters from the time the student initially enrolled in the program. If the student does not receive a degree within twelve consecutive quarters of initial enrollment, and there is a change in the degree requirements, the Provost for Learning Systems shall decide what requirements the student shall meet in order to be awarded a degree. These catalog rights are also applicable to the Ohio Transfer Module and Ohio Transfer Assurance Guides.
MATH 131 Business Calculus I (5 hours)
MATH 132 Business Calculus II (5 hours)
MATH 148 College Calculus (5 hours)
MATH 150 Precalculus (5 hours)
MATH 151 Calculus and Analytical Geometry I (5 hrs)
MATH 152 Calculus and Analytical Geometry II (5 hrs)
MATH 153 Calculus and Analytical Geometry III (5 hrs)
MATH 254 Multivariable Calculus (5 hrs)
MATH 255 Elementary Differential Equations I (5 hrs)
MATH 266 Discrete Mathematical Structures (5 hrs)
MATH 268 Elementary Linear Algebra (5 hours)
MATH 285 Ordinary and Partial Differential Equations (6 hrs)

Biological and Physical Sciences: 10 hours
Choose two courses from the approved lists. At least one course must contain a laboratory component. Courses which include a laboratory are designated with an L.

*Note: Students may not use ANTH 200 to satisfy both Biological Science and Social Science requirements.

Social and Behavioral Sciences: 10 hours
Choose two courses from two of the content areas listed.

Economics/Geography
ECON 200 Principles of Microeconomics (5 hours)
ECON 240 Principles of Macroeconomics (5 hours)
GEOG 200 World Regional Geography (5 hours)
SSCI 104 World Economic Geography (5 hours)

Political Science
POLS 100 Introduction to Comparative Politics (5 hours)
POLS 101 Introduction to American Government (5 hours)
POLS 165 Introduction to Politics (5 hours)

Psychology
PSY 100 Introduction to Psychology (5 hours)

Sociology/Anthropology
ANTH 200 Introduction to Physical Anthropology (5 hours)*
ANTH 201 World Prehistory (5 hours)
ANTH 202 Introduction to Cultural Anthropology (5 hours)
SOC 101 Introduction to Sociology (5 hours)
SOC 210 Sociology of Deviance (5 hours)

SOC 280 American Race and Ethnic Relations (5 hours)

*Note: Students may not use ANTH 200 to satisfy both Biological Science and Social Science requirements.

Arts and Humanities: 10 hours
Choose one course from each group.

Historical Study options
HUM 111 Civilization I (5 hours)
HUM 112 Civilization II (5 hours)
HUM 113 Civilization III (5 hours)
HUM 151 American Civilization to 1877 (5 hours)
HUM 152 American Civilization Since 1877 (5 hours)
HUM 224 African-American History from Emancipation (5 hours)

Literature, Culture, and Performing Arts options
ART 101 History of Western Art (5 hours)
THEA 230 Introduction to Dramatic Literature (5 hours)
ENGL 235 Introduction to Poetry (5 hours)
ENGL 261 Survey of British Literature I (5 hours)
ENGL 262 Survey of British Literature II (5 hours)
ENGL 264 Introduction to Shakespeare (5 hours)
ENGL 270 African-American Writers (5 hours)
ENGL 272 Introduction to Folklore (5 hours)
ENGL 274 Introduction to Non-Western Literature (5 hours)
ENGL 278 The English Bible as Literature (5 hours)
HUM 222 Classical Mythology (5 hours)
HUM 245 Music and Art since 1945 (5 hours)
HUM 254 Introduction to African Literature (5 hours)
HUM 270 Comparative Religions (5 hours)
MUS 101 History of Western Music (5 hours)
PHIL 101 Introduction to Philosophy (5 hours)
PHIL 130 Ethics (5 hours)
PHIL 270 Philosophy of Religion (5 hours)
THEA 100 Introduction to the Theater (5 hours)

II. Additional Requirements: 45 hours
An additional 15 hours is required from a combination of courses in the Arts and Humanities and the Social and Behavioral Sciences. These hours must include 5 hours of Historical Study, 5 hours of Literature, Culture, and the Performing Arts, and 5 hours of Social Sciences. These courses may be chosen from the above lists or the Transfer Module.

An additional 30 hours is required from any combination of courses in Arts and Humanities, Social and Behavioral Sciences, Biological and Physical Sciences, and Mathematics. These courses may be chosen from the above General Education Core, or the lists below, or the Transfer Module. Students should choose their additional courses based on their intended major at a four-year institution and in consultation with an academic advisor.

Arts and Humanities
Historical Study
HUM 131 Chinese Civilization (5 hours)
HUM 132 Japanese Civilization (5 hours)
HUM 181 World Civilization I: Non-Western,
All students must satisfactorily complete at least 92 credit hours of approved courses. Approval of courses may be chosen from pre-approved lists available at an Ohio college, have been pre-approved for credit toward a "Transfer Module" or "Transfer Assurance Guides" of a four-year institution listed at www.cscc.edu. The "Arts and Sciences" home page, "Transfer Information," and then "u.select." is available at www.cscc.edu. Students should consult a specific college transfer guide, Transfer Assurance Guide or University Parallel Guide available from Advising Services. Online transfer advising support is available at www.cscc.edu. Go to the "Arts and Sciences" home page, "Transfer Information," and then "u.select."

- PHIL 130 Ethics (5 hours)
- PHIL 270 Philosophy of Religion (5 hours)
- THEA 100 Introduction to the Theater (5 hours)

II. **Additional Requirements: 45 hours**

Completion of Math 152 or Math 132.

Additional hours chosen from the list of approved general education Biological and Physical Science courses, the Transfer Module, or any advanced course which would be appropriate for the student’s intended major at a four-year institution listed under BIOLOGY, CHEMISTRY, MATH, or PHYSICS.

Other elective options may be chosen from pre-approved lists available from Advising Services. Careful selection of Columbus State elective courses can ensure the greatest applicability of Columbus State credits to the requirements for a baccalaureate degree. Students should consult a specific college transfer guide, Transfer Assurance Guide or University Parallel Guide available from Advising Services. Online transfer advising support is available at [www.cscc.edu](http://www.cscc.edu). Go to the “Arts and Sciences” home page, “Transfer Information,” and then “u.select.”

**Ohio Transfer Policy**

**Institutional Transfer**
The Ohio Board of Regents in 1990, following a directive of the 119th Ohio General Assembly, developed the Ohio Articulation and Transfer Policy to facilitate students’ ability to transfer credits from one Ohio public college or university to another in order to avoid duplication of course requirements. A subsequent policy review and recommendations produced by the Articulation and Transfer Advisory Council in 2004, together with mandates from the 125th Ohio General Assembly in the form of Amended Substitute House Bill 95, have prompted improvements of the original policy. While all state-assisted colleges and universities are required to follow the Ohio Articulation and Transfer Policy, independent colleges and universities in Ohio may or may not participate in the transfer policy. Therefore, students interested in transferring to independent institutions are encouraged to check with the college or university of their choice regarding transfer agreements. In support of improved articulation and transfer processes, the Ohio Board of Regents will establish a transfer clearinghouse to receive, annotate, and convey transcripts among state-assisted colleges and universities. This system is designed to provide standardized information and help colleges and universities reduce undesirable variability in the transfer credit evaluation process.

**Transfer Module**
The Ohio Board of Regents’ Transfer and Articulation Policy established the Transfer Module, which is a subset or entire set of a college or university’s General Education curriculum in A.A., A.S., and baccalaureate degree programs. Students in applied associate degree programs may complete some individual transfer module courses within their degree program or continue beyond the degree program to complete the entire transfer module. The
Transfer Module contains 54-60 quarter hours or 36-40 semester hours of course credit in English composition (minimum 5-6 quarter hours or 3 semester hours); mathematics, statistics and formal/symbolic logic (minimum of 3 quarter hours or 3 semester hours); arts/humanities (minimum 9 quarter hours or 6 semester hours); social and behavioral sciences (minimum of 9 quarter hours or 6 semester hours); and natural sciences (minimum 9 quarter hours or 6 semester hours). Oral communication and interdisciplinary areas may be included as additional options. Additional elective hours from among these areas make up the total hours for a completed Transfer Module.

Courses for the Transfer Module should be 100- and 200-level general education courses commonly completed in the first two years of a student’s course of study. Each state-assisted university, technical and community college is required to establish and maintain an approved Transfer Module.

Transfer Module course(s) or the full module completed at one college or university will automatically meet the requirements of individual Transfer Module course(s) or the full Transfer Module at another college or university once the student is admitted. Students may be required, however, to meet additional general education requirements at the institution to which they transfer. For example, a student who completes the Transfer Module at Institution S (sending institution) and then transfers to Institution R (receiving institution) is said to have completed the Transfer Module portion of Institution R’s general education program. Institution R, however, may have general education courses that go beyond its Transfer Module. State policy initially required that all courses in the Transfer Module be completed to receive its benefit in transfer. However, subsequent policy revisions have extended this benefit to the completion of individual Transfer Module courses on a course-by-course basis.

Transfer Assurance Guides (TAGs) comprise Transfer Module courses and additional courses required for an academic major. A TAG is an advising tool to assist Ohio university, community and technical college students planning specific majors to make course selections that will ensure comparable, compatible, and equivalent learning experiences across the state’s higher-education system. A number of area-specific TAG pathways in the arts, humanities, business, communication, education, health, mathematics, science, engineering, engineering technologies, and the social sciences have been developed by faculty teams.

TAGs empower students to make informed course selection decisions and plans for their future transfer. Advisors at the institution to which a student wishes to transfer should also be consulted during the transfer process. Students may elect to complete the full TAG or any subset of courses from the TAG. Because of specific major requirements, early identification of a student’s intended major is encouraged.

Students who complete Columbus State’s degree requirements in Communication Skills, Mathematics, Humanities, Biological and Physical Sciences, and Social and Behavioral Sciences will automatically have completed the Transfer Module.

### Conditions for Transfer Admission

1. Ohio residents with associate degrees from state-assisted institutions and a completed, approved Transfer Module shall be admitted to a state institution of higher education in Ohio, provided their cumulative grade point average is at least 2.0 for all previous college-level courses. Further, these students shall have admission priority over out-of-state associate degree graduates and transfer students.

2. When students have earned associate degrees but have not completed a Transfer Module, they will be eligible for preferential consideration for admission as transfer students if they have grade point averages of at least 2.0 for all previous college-level courses.

3. In order to encourage completion of the baccalaureate degree, students who are not enrolled in an A.A. or A.S. degree program but have earned 60 semester hours or 90 quarter hours of credit toward a baccalaureate degree with a grade point average of at least 2.0 for all previous college-level courses will be eligible for preferential consideration for admission as transfer students.

4. Students who have not earned an A.A. or A.S. degree or who have not earned 60 semester hours or 90 quarter hours of credit with a grade point average of at least 2.0 for all previous college level courses are eligible for admission as transfer students on a competitive basis.

5. Incoming transfer students admitted to a college or university shall compete for admission to selective programs, majors, and units on an equal basis with students native to the receiving institution.

Admission to a given institution, however, does not guarantee that a transfer student will be automatically admitted to all majors, minors, or fields of concentration at the institution. Once admitted, transfer students shall be subject to the same regulations governing applicability of catalog requirements as native students. Furthermore, transfer students shall have admission priority over out-of-state associate degree graduates and transfer students.

### Acceptance of Transfer Credit

To recognize courses appropriately and provide equity in the treatment of incoming transfer students and students native to the receiving institution, transfer credit will be accepted for all successfully completed college-level courses completed in and after Fall 2005 from Ohio state-assisted institutions of higher education. Students who successfully completed A.A. or A.S. degrees prior to Fall 2005 with a 2.0 or better overall grade point average would also receive credit for all college-level course they have passed. (See Ohio Articulation and Transfer Policy, Definition of Passing Grade and Appendix D.) While this reflects the baseline policy requirement, individual institutions may set equitable institutional policies that are more accepting. Pass/fail courses, credit by examination courses, experiential learning courses, and other nontraditional credit courses that meet these conditions will also be accepted and posted to the student record.
Responsibility of Students
In order to facilitate transfer with maximum applicability of
transfer credit, prospective transfer students should plan a course
of study that will meet the requirements of a degree program at
the receiving institution. Students should use the Transfer Module,
Transfer Assurance Guides, and Course Applicability System for
guidance in planning the transfer process. Specifically, students
should identify early in their collegiate studies an institution and
major to which they desire to transfer. Furthermore, students should
determine if there are language requirements or any special course
requirements that can be met during the freshman or sophomore
year. This will enable students to plan and pursue a course of study
that will articulate with the receiving institution’s major. Students
are encouraged to seek further information regarding transfer from
both their advisor and the college or university to which they plan
to transfer.

Appeals Process
Following the evaluation of a student transcript from another
institution, the receiving institution shall provide the student with
a statement of transfer credit applicability. At the same time, the
institution must inform the student of the institution’s appeals
process. The process should be multi-level and responses should
be issued within 30 days of the receipt of the appeal.

The Columbus State Community College appeals process begins
after the student with previous college credit receives an e-mail,
which indicates that some previous coursework may not be ap-
plicable to the student’s new degree. The e-mail explains the pro-
cedure for requesting a second evaluation of the transcript. If the
re-evaluation is not satisfactory to the student, the student may then
appeal by asking the Registrar to initiate the next step in the appeals
process, which consists of a review of the transcript and supporting
documentation by the department housing the academic discipline
of the course(s) in question. Appeals denied at the department level
will automatically be forwarded to the Dean of Arts and Sciences
for a final decision on behalf of the college. If the appeal is denied
at this level, the student will be advised in writing of the reasons
for the denial and how to appeal to the state level.

Fulfillment of the Associate of Arts or Associate of Science
degree requirements assures fulfillment of Transfer Module
requirements.

Graduation Requirements  
Associate of Applied Science Degree

Requirements of All Graduates  
1. The satisfactory completion of 90-110 quarter credit hours as required by the particular program.
2. The attainment of a “C” (2.00) average in all technical courses and a “C” (2.00) average in all nontechnical courses.
3. The completion of no fewer than 35 of the required credit hours, including no fewer than 20 credit hours in technical courses approved by the department chairperson, while in attendance at Columbus State Community College. Credits by examination/proficiency, nontraditional credit, and transfer credit do not apply toward meeting residency credit hour requirements.
4. All students must file a completed “Petition to Graduate” with Records and Registration by the published deadline date of their intended quarter of graduation. Refer to page 28 of this catalog for complete details.

General Education Requirements  
1. 12 credit hours in English/Communication Skills: ENGL 101, ENGL 102 (students placing into ENGL 111 can take ENGL 111 instead of ENGL 101 AND ENGL 102), COMM 105, COMM 110 or COMM 115 (depending on the technology requirement), and one of the following three courses: COMM 200, COMM 202, or COMM 204.
2. Five credit hours in Humanities: HUM 111, HUM 112, HUM 113, HUM 151, HUM 152, or HUM 224.
3. Five credit hours in Social and Behavioral Sciences for students in Engineering and Health and Human Services degree programs: SSCI 100, SSCI 101, SSCI 102, SSCI 104, or SSCI 105.
4. Five credit hours in Biological and Physical Sciences for students in the Business and Public Services degree programs: NSCI 101 or BIO 104 and 105.

Following are exceptions to this requirement:

a. Mental Health/Chemical Dependency/Mental Retardation students must take BIO 112 to fulfill the requirement.
b. Early Childhood Development and Interpreting/Translating students must take NSCI 101 or BIO 104 and 105 to fulfill the requirement.
c. Computer Information Technology, Dietetic Technician
Major, and Medical Office Administration students must take SSCI 100, SSCI 101, SSCI 102, SSCI 104 or SSCI 105 to fulfill the requirements.

Basic Studies Requirements
Each technical program requires completion of at least 21 credit hours in Basic Studies. Basic Studies are those that provide students with the scientific and theoretical foundations of their technology, or those that provide students with an understanding of the legal, social, economic, or political environments within which they will practice their technology. Courses that fulfill the Basic Studies requirements vary from program to program. They are listed in the following section, with the listings of technical program requirements.

Technical Studies Requirements
Each technical program requires completion of 45–67 credit hours in courses clearly identifiable with the technical skills, proficiency, and knowledge required for career competency. Technical studies requirements also vary from program to program; they are also listed in the following section by program.

Students need to work closely with an assigned advisor to assure they meet all requirements for graduation. The student is responsible for meeting all requirements.

Graduation Requirements for the Associate of Technical Studies Degree

"Designing Your Own Degree"

Application Procedures
The Associate of Technical Studies degree program enables a student to design an individualized program of study to fulfill a unique career goal that cannot be met through the completion of any one of the college’s technical programs. This is accomplished by selecting courses from up to four different technical disciplines, thereby fashioning a coherent technical program. In order to be considered for admission to this program, an applicant must:

1. Demonstrate a level of maturity and motivation which gives promise of successfully handling the responsibilities inherent in this program.
2. Satisfy the general admission requirements of Columbus State Community College.
3. Prepare and submit the Associate of Technical Studies (A.T.S.) application, which includes the proposed program of study.

To prepare and submit the A.T.S. application, applicants should first call Advising Services to set up an appointment with an academic advisor, (614) 287-2668. The advisor will then provide the student with an application. Next, the student should submit the application draft, which includes a personal statement and rationale for the ATS program.

The application will then be reviewed and the degree content will be developed by the Office of the Dean of Career and Technical Programs. Upon final approval, the Dean’s Office will identify the faculty advisor(s) or others with whom the student will work for his/her A.T.S. program.

Columbus State reserves the right not to approve any A.T.S. request that, in the opinion of the appropriate department chair or dean, does not contain depth, rigor, and coherence at levels comparable with existing career and technical degree programs.

Graduation Requirements of all A.T.S. Graduates
1. The satisfactory completion of 90–110 credit hours.
2. The attainment of a C (2.00) average in all technical courses and a C (2.00) average in all nontechnical courses.
3. The completion of no fewer than 35 of the required credit hours, including no fewer than 20 credit hours in technical courses approved by the department chairperson(s), while in attendance at Columbus State Community College. Credit by examination/proficiency, nontraditional credit, and transfer credit do not apply toward meeting residency credit hour requirements.
4. All students must file a completed “Petition to Graduate” with Records and Registration by the published deadline date of their intended quarter of graduation. Refer to page 28 of this catalog for complete details.

Honors Program
Columbus State offers an honors program for eligible students. Honor courses offer students more challenging, faster-paced coursework. Courses in English, Humanities, and Social Sciences will be open to students who have completed or placed into ENGL 111 and have received permission from the Director of the Honors Program. Please see the quarterly list of course offerings for the complete listing of honors courses. For more information on the honors program, call (614) 287-2512.

**Specific Program Requirements**
In the next section of the catalog, the requirements for Columbus State’s Programs of Study are listed alphabetically. Students can locate a program of interest and read through the listing of required courses. The first three or four alpha identifiers of each course number indicate which department offers the course. A chart in the Course Description Section shows all the departments and their corresponding identifiers.

Accounting

Accounting Associate Degree
Certificate of Accounting Concentration (CPA Exam Preparation)
Certificate of Fraud Examination
Certificate of Internal Auditing (Bookkeeping Certificate: See Business Office Applications)
CPA Exam Review (courses only; no certificate)

Accountants, and the theoretical principles they use in their work, stand at the very center of our financial and economic activities. Economists, investors, business executives, labor leaders, bankers, and government officials all rely upon financial statements and other reports prepared by accountants to summarize and interpret the multitude of financial transactions that comprise day-to-day economic activity. The true value of an accountant is measured by his or her ability to develop and present understandable, reliable analyses of financial positions and the results of operations upon which business decisions are based.

The Accounting Associate Degree program prepares graduates for employment as accountants in business, industry, and government. Many experienced accountants become owners/operators of their own public accounting firms. The program emphasizes the use of personal computers along with manual procedures of accounting. The Accounting Associate Degree program is ideally suited to the needs of those who wish to take the Ohio CPA Examination with qualifying examinations upon graduation.

Certificate of Accounting Concentration (CPA Exam Preparation)
The Certificate of Accounting Concentration is intended for individuals who possess a bachelor’s, a master’s, or a doctoral degree in an area other than accounting and want to qualify under Ohio law to sit for the Ohio CPA exam. The 62 hours of course work recommended would provide candidates with the broadest possible knowledge of all four parts of the Ohio exam.

Certificate of Fraud Examination
The Certificate of Fraud Examination will develop the skills required to be successful in the challenging and interesting field of fraud examination. Students will learn how to prevent fraud, detect fraud, and investigate fraud within a company or government agency. Fraud examiners find employment in internal audit departments, private practice, and various governmental and regulatory agencies. Fraud examiners also serve as expert witnesses in both criminal and civil cases.

Certificate of Internal Auditing
The Certificate of Internal Audit program develops the competencies required for today’s internal auditor or the business professional involved with, or responsible for, related issues. The topics covered in this certificate program include Sarbanes-Oxley compliance, internal auditing, operational auditing, fraud control, and fraud prevention. These topics will be covered in eight 5-week courses. Courses meet one evening per week, making them convenient for the working professional. This certificate can be obtained easily in a year, taking one course at a time.

Traditional Classes and Distance Learning Choices at Columbus State
The Accounting program offers both traditional and distance learning (DL) options for students. The traditional learning experience provides students with high quality instruction in small classes at the downtown campus and off-campus locations. Accounting also offers distance learning courses, which provide the same high quality learning as traditional instruction and provide the flexibility of completing course work online or through video based instruction.

Upon completion of the Associate of Applied Science degree in Accounting, the graduate will be able to:

- Apply generally accepted accounting principles to measure, process, and communicate financial information about a business entity.
- Use accounting computer software to maintain accounting records and prepare financial statements.
- Prepare system flowcharts and evaluate the internal control of an accounting system.
- Apply theory and practical applications to budgeting, break-even analysis, product costing, profit planning, and cost analysis for decision making purposes.
- Compare and use financial statements for decision-making purposes.
- Explain the purpose and standards for an independent audit, as well as the procedures used in applying auditing standards while conducting an independent audit.
- Prepare budgets and forecasts for financial decisions.
- Identify and describe each of the rules contained in the AICPA Code of Professional Conduct.
- Apply the rules from the Internal Revenue Code and various state and local governing authorities in the calculation and reporting of taxable income and income tax liabilities for individuals and diverse business and not-for-profit entities, as well as in the preparation of payroll and other tax returns. Additionally, the student will understand the nature of the federal tax system and research tax issues.

Applied Technologies

Apprenticeship Partnership Degree Programs

Associate of Technical Studies Degree in Construction Trades

Introduction to the Construction Industry
Facilities Maintenance Associate Degree
Facilities Maintenance Certificate

The mission of Applied Technologies is to develop and implement partnership programs with area employers that include the use of college coursework as a part of their employee career preparation programs. The department collaborates with local industry partners to custom build certificate and/or degree programs that will best meet their educational and training needs. These programs can include employer-specific courses as well as integration of their employees into mainstream college coursework.

The goal of this initiative is to meet all of the educational and training needs of employers at all levels within their organization. These partnerships actively involve local employers in the educational process, including recruiting, selection, curriculum development, related work experience, and final placement.

Upon completion of the associate degree in Applied Technologies, the graduate will be able to:
- Understand the role and function of the skilled trades in the construction industry.
- Discriminate the work they perform and how it interrelates with the other trades in the overall scope of a construction project.
- Apply underlying theories and principles that are foundational to the trade that they have chosen.
- Demonstrate skills and proper work practices in all building, renovation, or repair activities.
- Be qualified and prepared to become a lead worker and/or mentor to others on construction and maintenance job sites.
- Read, interpret, and follow construction drawings.
- Apply current industry-specific building codes in the planning and execution of work.
- Demonstrate the use of proper safety procedures in all activities.

For more information about Applied Technologies programs, contact J.D. White, Program Coordinator, at (614) 287-5211, e-mail: jwhite02@cscc.edu.

Apprenticeship Partnership Degree Programs

These Applied Technologies degree programs are part of partnerships between area skilled trades apprenticeship programs and the college. Participation in these programs is limited to students who are currently enrolled in the full-time apprenticeship programs offered by the college’s industry partner trades organizations.

Students in the Applied Technologies degree programs combine apprenticeship courses, advanced technical coursework, and basic and general education courses to earn an Associate of Applied Science degree in Applied Technologies. Electrician, carpentry, millwright, sheet metal and operating engineer majors are currently available. For further information, please contact (614) 287-5211.

Associate of Technical Studies Degree in Construction Trades

In partnership with several central Ohio skilled trades apprenticeship programs, the college offers apprentices the opportunity to earn college credit in their apprenticeship programs. Students are awarded college credit for technical courses taken during each year of the apprenticeship, leading to a certificate in the program upon successful completion of their apprenticeship. Students who wish to continue their education can apply the credits they have earned toward an Associate of Technical Studies in Construction Trades with a technical minor in their trade and a major in construction management. All Applied Technology partnership programs have restricted enrollment, requiring that participants are accepted into their respective trade apprenticeship programs.

Introduction to the Construction Industry

Applied Technologies has developed a series of courses to provide foundational information about the construction industry. These courses are intended to address the needs of everyone from the casual observer who simply wants to gain a better understanding of the construction industry to those who are seriously considering a career in construction. The courses provide information about career opportunities in the construction industry, ranging from the skilled trades to architecture, design, and management. They explore the skills and knowledge needed to be successful in each of these career paths. Finally, they help students who are interested in a career in construction to prepare to be better candidates to enter into a formal program of study to attain their career goals.

Facilities Maintenance Associate Degree

The Applied Technologies – Facilities Maintenance major degree program prepares individuals for careers in technical jobs supporting the maintenance, upkeep, and light repair of residential, commercial, industrial, and multi-family properties. Facilities maintenance requires that employees have a broad range of knowledge and skills across multiple trades. The technical coursework in this program provides education and training in five technical skill areas: welding, carpentry, electricity, plumbing, and heating/air conditioning. In addition, to the technical theoretical knowledge coursework, students will study nontechnical coursework needed to provide the necessary support of this technical degree.

Area facilities managers have been consulted and involved in the development of this program. Its goal is to prepare entry-level workers and to provide opportunities for developmental training of current employees within this growing industry. Upon completion of the program, students earn an Associate of Applied Science degree in Applied Technologies – Facilities Maintenance major. The
Facilities Maintenance Associate Degree

This short-term certificate program prepares students for employment as entry-level maintenance workers. The program can be completed in as little as three quarters. Since the certificate shares coursework with the associate degree program, graduates have the option of immediately entering the workforce, continuing on at Columbus State to complete the Associate Degree in Facilities Maintenance, or doing both, now or in the future.

Appraisal

Appraisal Associate Degree

The associate degree program in Real Estate Appraisal coursework meets the standards of professionalism of the appraisal industry and the educational requirements for appraisal registration, licensure, and certification in the State of Ohio. The program provides the knowledge and skills necessary to prepare individuals for entry into the real estate appraisal and allied real estate professions. Licensed appraisers will find that the program provides training to upgrade their professional competence and to meet future education requirements. For students who plan to continue their education beyond the associate degree, it offers credit courses that may transfer to four-year colleges and universities.

Upon completion of the associate degree in Appraisal, the graduate will be able to:

- Think critically and solve problems
- Communicate effectively
- Recognize the value of human diversity
• Demonstrate interpersonal and life management skills
• Determine the best method to arrive at real property value
• Complete various standard appraisal forms and reports
• Demonstrate market analysis techniques and applications
• Complete appraisals for all real property including, but not limited to, residential, commercial, business and agricultural
• Apply appropriate technology as needed within the appraisal profession
• Continue appraisal education.

Architecture

Architecture Associate Degree

Architecture Transfer Option
Architectural CAD Drafting Certificate
3D Visualization Certificate

Architecture graduates assist architects and others in preparing plans and specifications. Many also work for builders and contractors, land developers, remodelers, facility and property managers, and with building product manufacturers and retailers. The Columbus job market for architecture graduates is remaining strong as Columbus continues to grow.

Columbus State’s associate degree program in Architecture teaches manual and CAD drafting, product selection and specification, and code evaluation skills used daily in the occupation. Students in the program share common courses in materials, structures, blueprint reading and co-op work experiences with other programs in the Construction Sciences Department. This provides architecture students with a strong foundation of technical skills and a sense of the teamwork required in the construction industry.

The Architecture program provides students with a solid educational background in communication skills, math, computer literacy and operations, and humanities and behavioral sciences.

Upon completion of the associate degree in Architecture, the graduate will be able to:
• Use traditional manual drafting and drawing methods to express relevant ideas graphically. These include orthographic projection, one-point and two-point perspective, isometric and axonometric drawing generation.
• Use current CAD (Computer Aided Drafting) and 3D modeling software to prepare architectural drawings and other applicable graphics.
• Understand, interpret, organize, and generate architectural drawings.
• Understand and be familiar with the relationship and coordination implications between architectural and engineering drawings (site, structural, electrical, lighting, mechanical and plumbing).
• Research materials, consult with industry experts, and use CSI (Construction Specification Institute) standards relevant to the preparation of architectural drawings and specifications.
• Use applicable building and zoning codes relevant to the preparation of architectural drawings and specifications.
• Understand the basic principals of detailing building structures utilizing wood, steel, and concrete manuals and handbooks.
• Understand and be familiar with project coordination, total project development, and professional practice.
• Understand and be familiar with the basic principles & materials of sustainable architecture, the primary organizations that are promoting and encouraging sustainability in architecture, and LEED standards and scoring.
• Understand and demonstrate an ability to work with the building design process as a problem solving approach to devise a building to meet client needs.

Architecture Transfer Option
This plan of study should be considered in order to enhance a student’s opportunity for transferring to a four-year institution with a major in architecture. This transfer option contains additional course requirements in mathematics and the physical sciences and fewer architecture courses than the basic Architecture program. The student interested in this track should consult with an academic advisor in the department at the start of the program. The transfer option provides the student with the same degree as the regular program option in Architecture, an Associate of Applied Science degree.

Architectural CAD Drafting Certificate
Over the past couple of decades CAD drafting has become a necessary tool for architects, engineers and other related professions. The courses in this certificate will provide students with training in the two most popular CAD programs in use today, AutoCAD and Microstation. Upon completion of these courses the student will have a functional understanding of how to use each program.

However, it should be emphasized that if the student wishes to have a greater understanding of architecture or engineering, then additional coursework in the desired field should be pursued. A greater understanding of what one is drafting will be necessary for those seeking CAD drafting positions in today’s job market. Therefore, this certificate is best suited for those individuals who already have an understanding of manual drafting or already have experience in a related field of work.

The ARCH 110 manual drafting prerequisite may be waived for those individuals with prior manual drafting or other related work experience. Please see an Architecture advisor for permission to waive the manual drafting prerequisite.

3D Visualization Certificate
This post-associate certificate program will provide students with advanced coursework in 3D modeling, rendering and animation. Two separate tracks of study are available. One track concentrates upon the use of form*Z while the other track concentrates upon the use of Autodesk 3ds MAX. The student may choose to pursue one track or the other or may choose to do both.

This certificate is geared towards professionals and students with prior experience in architecture, interior design, graphic design, or other related field. Prerequisites for entering this certificate program: associate degree or higher in a related field of study; completion of 50 or more credit hours within a related field of study; or permission from a faculty member.

Automotive Technology

Automotive Technology Associate Degree
Automotive Service Management Major
Ford ASSET Program
Maintenance and Light Repair Certificate
Toyota T-TEN
YAATC
Vocational Education Transfer Option with The Ohio State University College of Education

Graduates of the associate degree program in Automotive Technology are qualified for entry-level positions as automotive service technicians, service advisors, and entry-level managers. Many persons already employed in the field use the program to progress to advanced technical or management positions, and to prepare for Automotive Service Excellence (ASE) certification examinations.

Automotive Technology Associate Degree
The Automotive Technology program prepares students for successful careers as service technicians in the rapidly growing automotive repair industry. By providing students with exposure and hands-on experience on a variety of domestic and import vehicles, this broad-based curriculum prepares graduates for a wide range of job opportunities in new car dealerships, independent repair shops, or fleet repair facilities.
The Automotive Technology program at Columbus State offers courses designed for a variety of individuals ranging from the beginner to those with advanced skills and years of experience. Students may earn an associate degree, obtain ASE certification, or take individual courses to meet their educational goals. The associate degree program in Automotive Technology provides instruction in all aspects of the automobile, including the latest electronic systems. Students master the skills needed to diagnose and repair automobiles while working in the college’s well-equipped auto lab. The experienced faculty work closely with students to prepare them for a career and to become certified A.S.E. (National Institute for Automotive Service Excellence) Master Automotive Technicians.

Columbus State’s automotive program was the nation’s first college automotive program to be certified by A.S.E. to train Master Automotive Technicians. To receive this certification, the program is evaluated against industry standards of quality every five years by a team of external evaluators. The certification process ensures that the curriculum includes all of the appropriate competencies needed to properly prepare entry-level technicians and is delivered by A.S.E. certified faculty, on current technology equipment and vehicles. All automotive faculty are A.S.E. Master Certified technicians with extensive industry repair experience. The program was recently re-evaluated and granted accreditation until 2009.

Upon completion of the Associate of Applied Science degree in Automotive Technology, the graduate will be able to:

- Solve automotive problems in a systematic, logical, and efficient manner.
- Diagnose and repair engine performance concerns on a wide range of early to current car models.
- Diagnose and repair simple and complex electrical problems.
- Diagnose and repair engine mechanical problems.
- Diagnose and repair automatic transmissions and transaxles, including total rebuilding of units.
- Diagnose and repair manual transmissions and transaxles, as well as other driveline components (driveshafts, drive axles, transfer cases and differentials).
- Precisely measure engine and other automotive parts using the appropriate measuring instruments.
- Diagnose brake system problems and perform complete brake service and repairs (including necessary machining).
- Diagnose and repair steering and suspension problems and properly align the suspension of all types of automobiles and light trucks, using either two-or four-wheel alignment machines.
- Diagnose and repair automotive heating and air-conditioning systems.
- Demonstrate an understanding of the principles and operation of new technologies as they become incorporated into automobile designs.
- Prepare repair estimates and complete the necessary paperwork for customer service and warranty repairs.
- Apply basic business practices, including cultivation of good customer and employee relations.

**TechLINK: Cooperative Work Experience**

The Automotive Technology Department firmly believes that the best way to learn to become a highly skilled automotive technician is through a combination of on-campus learning and real-life work. Columbus State works closely with students to help those interested in finding paid cooperative work experience placements in local shops. Students who are actively working in cooperative work placements in area dealerships and independent repair shops follow the same curriculum as the general Automotive Technology Program. However, since students are working in the automotive repair industry as well as taking coursework on campus, the scheduling of courses is arranged to coordinate with the students’ work schedule. Contact Bill Warner (614) 287-2675, the department cooperative work experience advisor, for further information on cooperative placement opportunities.

In addition to meeting all of the objectives of the general Automotive Technology program, participation in cooperative education is designed to:

- Fill the local shortage of qualified, entry-level technicians needed by area automotive repair shops.
- Provide participating students with paid industry work experience to enhance the learning experience and to enable them to successfully transition from the classroom to the workplace.
- Provide a course of study that will enable successful graduates to have the knowledge and skills necessary to develop an upward career path in automotive repair.

Maintenance and Light Repair Certificate Program

Students whose needs demand a short-term career track program can choose the Light Maintenance and Repair Certificate program. This program can be completed in six to nine months and gives students the knowledge and skills necessary to enter the automotive repair industry quickly.

Upon completion of this program, graduates are employable at local auto repair companies performing automotive maintenance services. Since this program is part of the Automotive Technology program, certificate completers can continue their education in the college degree program at any time to expand their knowledge and skills and work toward A.S.E. Master Technician certification.

**Toyota T-TEN**

T-TEN is designed exclusively for the student who is seeking a career as a service technician at a Toyota dealership. The T-TEN curriculum is produced by the University of Toyota. It prepares the student for a career with Toyota by providing Toyota’s core certification courses that are needed for advancement at a Toyota dealership.

T-TEN is a partnership of our Automotive Technology program with Toyota Motor Company and Central Ohio Toyota and Lexus dealers. Together, we provide state-of-the-art automotive training in both a classroom and dealership setting. As a T-TEN student, you will learn and earn in a supportive environment while receiving instruction from factory-trained teachers and guidance from dealership mentors. You will graduate from the program with the confidence, skills, and certifications needed to launch yourself on a challenging and profitable career.

T-TEN is not a one-size-fits-all program. It offers several different program choices, ranging from a two-quarter accelerated certificate option for the experienced Toyota or Lexus technician to a two-year associate degree. Students can select the program that best fits their lifestyle and career goals:

- **Associate Degree**: In this program, students earn a comprehensive Associate of Applied Science degree in Automotive Technology. They do so by blending general education and general automotive coursework along with a specialization in Toyota/Lexus technology by completing the T-TEN courses.

- **T-TEN Certificate Program**: This is a 42-credit hour certificate program that can be taken as a stand-alone program or as an additional “specialty certificate” for current or returning students interested in preparing themselves for entry into Toyota and Lexus dealerships.

- **T-TEN Professional Certificate**: This is a two-quarter (14 credit hour) accelerated program designed specifically to assist experienced Toyota and Lexus technicians to obtain T-TEN credentials in the shortest time.

**T-TEN Certificate Program**

YAATC
The Youth and Adult Automotive Training Center (YAATC) is designed for disadvantaged, at-risk individuals who have a desire to gain technical knowledge in automotive repair as well as increased self-sufficiency. This program allows a student to build a new perspective on life and on a career. YAATC prepares each dedicated student to graduate with the technical knowledge to perform automotive maintenance and light repairs and the opportunity to begin an extremely rewarding career in the automotive industry. YAATC helps create a more diverse workforce in the automotive industry and helps fill the void of qualified automotive technicians. It provides basic skills training, case management services, community agency referrals, job readiness instruction, intensive automotive technical instruction, co-op experiences, and permanent job placements in the automotive repair industry. For more information, contact (614) 287-5504.

Vocational Education Transfer Option with The Ohio State University College of Education
The Automotive Technology program at Columbus State has completed an articulation agreement with the Technical Education and Training Program of The Ohio State University College of Education. This agreement allows automotive students to complete an associate degree at Columbus State, transfer their credits to Ohio State, and complete a baccalaureate degree in Technical Education Training. Students completing the program at OSU are eligible for certification by the Ohio Department of Education to teach in related high school vocational programs throughout the State of Ohio. Interested students should contact their Columbus State department chairperson for curriculum requirements and additional details. Note: Course requirements for this transfer option may differ from the standard plan of study published in the catalog. For more information, contact (614) 287-5504.

Aviation Maintenance Technology
Aviation Maintenance Technology Associate Degree
Aviation Maintenance Technician Certificate
Aviation Maintenance Technicians are a vital component of the fast-paced and exciting aviation industry. Aerospace industry growth creates a continual demand for newly trained AMTs and interesting job locations abound. Due to the unique skills of the aviation maintenance technician, there are many career opportunities within the aviation maintenance field as well as in non-aviation industries.

Students in the Aviation Maintenance Technology program may pursue technical training for the Airframe and Powerplant Certificate or the Associate of Applied Science degree. The Airframe and Powerplant Certificate program covers all the essential subject areas necessary for successful completion of the Federal Aviation Administration (FAA) certification process for the mechanic ratings. Students who complete the certificate program may take additional course work in English, mathematics, physics, and other electives to receive an Associate of Applied Science degree. The certificate and associate degree can be completed in eight quarters.

The Aviation Maintenance facility is located at the Columbus State Southwest Center at Bolton Field Airport (KTZR), southwest of Columbus. The 10,000 square foot hangar houses the college’s fleet of single and multi-engine, reciprocating, and turbine-powered aircraft. Well-equipped classrooms and laboratories provide students with an enjoyable setting for learning and a unique hands-on experience in an airport environment.

The Aviation Maintenance Technology program is approved by the Federal Aviation Administration (FAA Certificate No. DL9T090R) and meets the requirements of FAA Regulation Part 147. Students successfully completing the appropriate technical studies are qualified to take the exams for the FAA Airframe and Powerplant certificate rating.

Upon completion of the Aviation Maintenance Technology curriculum, the graduate will be able to:

• Service, inspect, and complete repairs and alterations on airframes, engines, propellers, and associated systems (including environmental, electrical, fuel, hydraulic, and pneumatic systems).
• Utilize the regulations and technical manuals to safely complete inspections, repairs and alterations of aircraft, and complete the required maintenance entries after completion.
• Properly use precision measuring equipment for the accuracy demanded by the aviation industry.
• Understand blueprints used for the repair and alteration of aircraft and utilize them to affect the repair or alteration.
• Identify aircraft materials and hardware and their structural properties. Correctly identify corrosion and the proper treatment and prevention methods and techniques.
• Identify and use nondestructive testing methods used in the Aviation Industry.
- Meet FAA certification requirements for the Airframe and Powerplant Certificates.

Business Management

Associate of Applied Science Degree
Business Management Major
Entrepreneurship Major
Public Administration Track
Basic Project Manager Certificate
Entrepreneurship Certificate
Leadership Skills Development Certificate
Managing Interpersonal Skills Certificate
Nonprofit Management Certificate
Pre-MBA Certificate
Project Management Team Certificate
Public Administration Certificate
Vocational Education Transfer Option with The Ohio State University College of Education

In order to compete effectively in the 21st century, successful managers and entrepreneurs need strong interpersonal, communication, analytical, and decision-making skills. Columbus State’s Business Management curriculum focuses on meeting these requirements for students who wish to attain an Associate Degree in Business Management or who wish to upgrade current job performance skills. The emphasis in the program is on skill applications through the latest teaching techniques and technologies.

The Basic Project Manager Certificate is comprised of five (5) courses totalling 18 credit hours. This certificate can become the platform to accelerate PMI or other recognized professional certifications or will provide substantial value in itself. Students will develop a personal project management methodology which will enhance their resume. Potential employers, with or without project management knowledge, will easily be able to see the value of this document. Note: Completion of the Project Management Associate Certificate is required prior to commencing work on the Basic Project Manager Certificate.

The Entrepreneurship Certificate provides the developing small business student/entrepreneur an expedient opportunity to gain specific knowledge of small business operations. This certificate is composed of (2) courses in basic business development and operations, three (3) business finance related courses, (bookkeeping basics, personal finance, and an accounting software program), a basic marketing course, and a course that addresses the legal environment of business.

NOTE: For those Entrepreneurship students whose work schedules make it difficult to attend the traditional classroom instruction, all of these certificate courses are offered via distance learning (DL). All seven (7) courses may be applied toward a degree program.

The Leadership Skills Development Certificate teaches an awareness of current trends in leadership and develops the skills necessary for leaders to face today’s organizational challenges. Students learn to identify and acquire fundamental skill sets that serve to strengthen their leadership potential, including conflict resolution, communication skills, creative thinking, and managing diversity. This four (4) course certificate program is available to both degree, as well as non-degree seeking students interested in improving their leadership skills.

The Managing Interpersonal Skills Certificate provides students with the knowledge and skills necessary to develop and maintain effective interpersonal relationships, both professionally and personally. Since more than two-thirds of the competencies desired of the average employee are interpersonal rather than technical in nature, this set of knowledge and skills is essential for effective job performance. This sequence of innovative, highly interactive courses provides students with the opportunity to learn about themselves as well as others. This four (4) course certificate program is available to degree and nondegree-seeking students.

Business Management also offers a Certificate in Nonprofit Management. This four course sequence prepares individuals for leadership roles in a variety of nonprofit organizations, including those in the fields of adult human service, health care, cultural arts, the environment, youth service, faith-based, and professional/ trade. The program is dynamic, interactive, and practical and yields insights and skills immediately applicable to the workplace.

The MBA (Master of Business Administration) is one of the most sought-after professional degrees not only by those currently working in business but also by many other professionals (such as physicians, attorneys, public-sector managers, and entrepreneurs) who are increasingly in need of these types of skills. The Pre-MBA Certificate is designed for individuals who have already completed a baccalaureate degree and wish to pursue an MBA, or for professionals in various fields who wish a basic grounding in business principles through an introduction to the basic business disciplines. All of the courses in this certificate can be completed online. NOTE: We strongly recommend that you meet with an advisor from your target MBA college prior to beginning this certificate program, since admission requirements vary greatly.

The Project Management Associate Certificate is comprised of five (5) courses which total 18 credit hours. This certificate provides students with an understanding of the fundamental concepts of project management. Students will obtain the needed tools to improve project-related employee work performance while adding value to their organization. Note: Completion of the Project Management Associate Certificate is required prior to commencing work on the Basic Project Manager Certificate.

The Certificate in Public Administration is a short term program for those professionals who wish to increase their skills and training to enter or advance careers in government or nonprofit positions. This certificate program will assist those college graduates who have earned a degree but require further training in public administration. The program seeks to provide an understanding and appreciation of public administration in a representative democracy.
Columbus State Community College’s Business Management program is accredited by the Association of Collegiate Business Schools and Programs (ACBSP).

Vocational Education Transfer Option with The Ohio State University College of Education.

The Business Management program at Columbus State has completed an articulation agreement with the Technical Education and Training Program of The Ohio State University College of Education.

This agreement allows Business Management students to complete their associate degree at Columbus State, transfer their credits to Ohio State, and complete a baccalaureate degree in Technical Education and Training. Students completing the Ohio State program may be eligible for certification by the Ohio Department of Education to teach in related high school career and technical education programs throughout the State of Ohio.

Interested students should contact their assigned faculty advisor for curriculum requirements and additional details. Please note that course requirements for this transfer option may differ from the standard plan of study published in the catalog.

Traditional Classes and Distance Learning Choices at Columbus State

The Business Management program offers traditional and distance learning (DL) options for our students. The traditional classroom experience continues to provide students with quality instruction in a small classroom setting at the downtown campus and off-campus locations. The Business Management program also offers distance learning courses that provide the same high quality learning as traditional instruction, yet with the added flexibility of being able to complete course work online.

Business Management Major

Upon completion of the program for an associate degree in Business Management with a Business Management major, the graduate will be able to:

- Demonstrate knowledge of the management functions and skills within an organizational system as they interact in a dynamic and diverse global environment.
- Demonstrate a working knowledge of current legal, ethical, social, financial, and economic environmental factors as they apply to business.
- Prepare and present effective written and oral business related reports.
- Work effectively as a member of a team.
- Use appropriate technology and other resources to research, analyze and integrate both quantitative and qualitative data to solve business problems.
- Appropriately apply the management functions both departmentally and to the organization as a whole.
- Assess and develop individual communication, leadership and team building styles.
- Recognize and adapt to the communication, leadership and team building styles of others.

Business Office Applications
(formerly Office Administration)

Associate of Applied Science Degree
Administrative Assistant Major
Administrative Assistant Legal Cognate
Administrative Assistant Medical Cognate
Office Skills Certificate
Office Specialist Certificate
Bookkeeping Certificate

The Occupational Outlook Handbook, published by the United States Department of Labor, has forecast that this occupation is expected to be among those with the largest number of new jobs. This handbook indicates that opportunities should be best for applicants with extensive knowledge of business software applications. Administrative assistants today perform fewer clerical tasks and are increasingly taking on the roles of information and communication managers. The Business Office Applications Technology offers an associate degree in Business Office Applications with an Administrative Assistant major that will enable students to acquire advanced software and keyboarding skills as well as management and team-building skills. Students will participate in office simulations and an office internship that will prepare them to become an integral part of any office management team. These skills will enable a graduate to assume responsibility without direct supervision, display initiative, exercise judgment, and prepare business communications documents.

The Legal Cognate prepares students to work in law offices, various courts, or the legal departments of corporations by providing specialized knowledge of legal procedures and court structure.

The Medical Cognate prepares students to work in medical settings such as hospitals, medical offices, clinics, dental offices, and insurance companies.

Three certificates are also available. The Office Skills Certificate program prepares students for entry-level office positions. Students develop skills and business application knowledge in word processing, electronic spreadsheets, database management systems, presentation graphics, information management, keyboarding, and bookkeeping.

Columbus State’s Office Specialist Certificate program prepares students for the globally-recognized Microsoft® Business Applications Specialist certification. In today’s workplace, more employers require that office workers be knowledgeable in all areas of Microsoft Office software applications. Students develop skills in word processing, electronic spreadsheets, presentation graphics, database management, and desktop management. These skills prepare students to be more productive while using the most up-to-date technologies. This certificate is available as a distance learning (DL) option.

The Bookkeeping Certificate prepares students for a career in office bookkeeping. This bookkeeping certificate includes preparatory courses enabling students to sit for a nationally recognized Bookkeeping certification exam. This certificate program may be completed in three quarters and provides a solid foundation of accounting and bookkeeping principles, electronic spreadsheets, and computerized accounting software packages. This certificate is also available as a distance learning (DL) option.

Columbus State Community College’s business degree programs are accredited by the Association of Collegiate Business Schools and Programs (ACBSP).

Upon completion of the associate degree in Business Office Applications, the graduate will be able to:

• Develop and maintain electronic and manual filing systems.
• Compose or draft responses to business correspondence, use correct grammar, and use punctuation rules accurately.
• Perform bookkeeping tasks using spreadsheet software.
• Prepare written and oral presentations using presentation graphics software.
• Demonstrate knowledge of management theory, functions, and skills.
• Demonstrate a working knowledge of current legal, ethical, social, financial, and economic environmental factors as they apply to business.
• Use appropriate business office applications technology and other resources to research, analyze, and integrate data to solve business problems.
• Work effectively as a member of a team.

Administrative Assistant Major
In addition to the general Business Office Applications competencies, a graduate in the Administrative Assistant major will be able to:

• Use operating systems and desktop features and functions to organize and manage files and documents effectively to increase productivity.
• Prepare presentation graphics and present information.
• Research information using a variety of resources including the Internet.
• Use computers to integrate business office applications and graphics into documents.
• Transcribe a variety of documents accurately and at an acceptable production rate.

Administrative Assistant Legal Cognate
In addition to the general competencies, a graduate choosing the Legal Cognate will be able to:

• Demonstrate a basic knowledge of court structure and court proceedings at the federal, state, and local levels.
• Demonstrate an ability to use law office and management procedures.
• Demonstrate an understanding of the rules and documents involved in litigation practice and procedures.
• Demonstrate an understanding of criminal law or the basics of legal research, depending on which additional class the student chooses.

Administrative Assistant Medical Cognate
In addition to the general competencies, a graduate choosing the Medical Cognate will be able to:

• Demonstrate an understanding of the structure and organization of current health care systems.
- Demonstrate the ability to spell, pronounce, and define basic medical terminology.

The Associate of Applied Science Degree in Civil Engineering Technology provides a basis for entry-level careers in all phases of the construction continuum: planning, design, construction and operations. The Associate of Applied Science is designed as a terminal degree providing those skills necessary for immediate employment. Program graduates are prepared to work for either private or governmental segments of the construction industry requiring civil engineering technicians. Specific employment positions include manual or computer assisted (CAD) construction drawing and contract document preparation for commercial, heavy and industrial/institutional projects, construction inspection, survey crew operations, and construction material quality control and quality assurance.

In addition to providing entry-level positions, the degree provides opportunities for individuals seeking career changes, continuing education, and skills enhancement. The Civil Engineering Technology degree is preparation for immediate, productive employment.

Upon completion of the associate degree in Civil Engineering Technology, the graduate will be able to:

- Prepare engineering drawings for public and private work projects utilizing computer aided drafting (CAD).
- Apply appropriate proportioning, mixing, placing, curing and admixtures to ensure quality structural concrete structures.
- Perform appropriate testing of soils, aggregates, asphalt and portland cement concrete, masonry, steel, and wood in accordance with American Society of Testing Methods (ASTM) procedures.
- Apply regulatory and industry standards to design storm water management systems.
- Apply regulatory and industry standards to design sanitary wastewater collection systems.
- Perform all field operations to determine preliminary route alignment, prepare centerline, offset staking notes, and stake a proposed project for finish grade complete with cut sheet.
- Apply Ohio Department of Transportation (ODOT), Federal Highway Administration (FHWA), and industry design standards to plan, design, and detail a simulated highway including drainage structures.
- Apply subdivision regulations and surveying laws in the preparation of preliminary sketch, preliminary plat, and final plat for a major private platted land subdivision.
- Perform preliminary site investigations, research infrastructure records, secure appropriate codes and regulations, and prepare a set of preliminary drawings of an urban redevelopment site.
- Perform quantity takeoffs and estimates for heavy construction projects.
- Apply an integrated system of digital levels, total stations, data collectors/controllers, global positioning system equipment, and associated software in surveying and construction related problem-solving applications.

The Civil Engineering Technology Surveying Certificate is a one-year, three-quarter program, which provides a basis for entry-level careers in survey field and office operations. The one-year certificate is a directed focus program, which empowers students with those skills necessary for construction layout of buildings and roadways and, working under the direction of a Registered Surveyor, in land surveying and subdivision of land. Specific employment positions include instrument person, field crew chief, and drafter/designer.

The Surveying Certificate encompasses those surveying courses, which, when coupled with a Bachelor of Science in Civil Engineering, fulfill the State of Ohio Board of Registration for Engineers and Surveyors Education Requirements toward registration as a Professional Surveyor.

Computer Information Technology

Computer Information Technology
Associate of Applied Science Degree
Network Administrator Track
Software Developer Track
Web Developer Track
MIS/Project Management Track
Game Developer Track
Cisco Certified Network Administrator (CCNA)
Discovery Certificate
Computer Literacy Certificate
Database Specialist Certificate
Information Security Certificate
Network Administrator Certificate
Software Developer Certificate
System Z Foundations Certificate

The Computer Information Technology curriculum provides graduates with a foundation of logic, programming, operating systems, applications, systems analysis, and networking through a core set of courses. Learners may choose to specialize in Network Administrator, Software Developer, User Support, or Web Developer. CIT offers a number of industry subject-specific certificates in database, networking, hardware/software, and applications.

Upon completion of the associate degree in Computer Information Technology, Network Administrator Track, the graduate will be able to:
• Participate in collaborative projects utilizing the Systems Development Life Cycle (SDLC).
• Determine project requirements.
• Develop project documentation using PC-based applications software.
• Develop applications using Web programming languages.
• Create a multiple page, multiple presentation Web site.
• Integrate project requirements for an e-commerce Web site using current database and networking technology.
• Complete a series of exercises to prepare for a popular vendor certification program.
• Apply operating systems fundamentals for effective disk management.

Upon completion of the associate degree in Computer Information Technology, MIS/Project Management, the graduate will be able to:
• Participate in collaborative projects utilizing the Systems Development Life Cycle (SDLC).
• Determine project requirements of a computer Network System.
• Create documentation using PC-based applications software.
• Define project goals clearly.
• Design and produce a UML requirement model.
• Implement a UML design in IT Project.
• Determine task dependencies and schedules.
• Assign and optimize resources.
• Produce the implementation plan.
• Manage and respond to change.
• Measure and present results effectively.
• Apply practical aspects learned in the classroom by managing or assisting in managing IT projects.

Upon completion of the associate degree in Computer Information Technology, Game Developer, the graduate will be able to:
• Demonstrate an understanding of the history, current industry and occupations that constitute the video game industry.
• Develop a broad understanding of the components of a successful video game by working collaboratively with students in the design area.
• Apply creative thinking and problem solving skills through the completion of a collaborative major capstone project.
• Understand the roles and responsibilities of team members and their collaboration in all phases of design, development and implementation.
• Demonstrate appropriate software and programming skills that directly support video game development processes.
• Be able to work as part of a larger technical/design team to complete tasks on time and on budget.
• Possess the necessary depth of understanding of complex principles and details and know how to apply these fundamentals and details by undertaking open-ended technical and creative projects.
• Understand the fundamentals of game development for both Windows and specific consoles such as Xbox.
• Develop a comprehensive professional portfolio to be used in pursuing jobs and/or internship opportunities.

In addition to many of the Computer Information Technology competencies, a graduate with a Certificate in the Software Developer Track will be able to:
• Demonstrate techniques of object analysis and object design.
• Design and code programs in C++ and Visual Basic.NET.
• Debug a C# or Visual Basic.NET program.
• Develop Web front-end applications.
• Utilize a database for a Web application.
In addition to many of the Computer Information Technology competencies, a graduate with a Certificate in Information Security will be able to:

- Describe and analyze security threats.
- Protect and organization’s system and data.
- Design disaster recovery strategies for the enterprise.
- Design and implement computer forensics strategies.
- Assess network vulnerabilities.
- Recognize and respond to security threats.
- Design and develop security audits for an organization.
- Understand the ethical issues related to network security.
- Design and implement wireless networks.
- Work with VPNs and firewalls.
- Protect Internet connections and intranets as well as critical data from attacks.
- Learn how to carry out and implement secure communications across unsecured networks.

In addition to many of the Computer Information Technology competencies, a graduate with a Certificate in Network Administration will be able to:

- Describe the various types of distributed processing systems and operating systems.
- Design, create, and operate a distributed DBMS.
- Use at least one major LAN operating system.
- Complete an industry standard network system examination.
- Design, create, and implement a distributed processing system to support the information processing requirements for a large information management organization to include installing a DBMS.

In working toward the Computer Literacy Certificate, the student will learn the fundamental components and terminology of personal computer hardware and software basic concepts. This certificate is designed for beginning computer users to develop computer literacy skills. Upon completion of the Computer Literacy Certificate, the student will be able to:

- Use the Windows operating system to manage files and folders, including creating, renaming, copying, deleting, and moving.
- Demonstrate proficiency within the Blackboard environment.
- Navigate and explore the Internet and the World Wide Web utilizing Microsoft Internet Explorer.
- Utilize the Internet as an effective research tool.
- Describe the basic elements and terminology of the Windows operating system.
- Create and edit Word documents including a research paper, a resume, and a business letter.
- Create and format an Excel worksheet with embedded charts, formulas, and functions.
- Perform a What-if Analysis in Excel.
- Create and use an Access database including tables, queries, and reports.
- Create a slide show in PowerPoint.
- Integrate Office 2003 Applications and the WWW.

The Cisco CCNA Discovery Certificate is a curriculum that provides foundational networking knowledge, practical experience, and soft-skills development to prepare students for entry-level careers in IT and networking. The curriculum focuses on networking for simple home or small office networks to complex enterprise networks. Students are introduced to advanced technologies such as voice, video, wireless and security and gain hands-on experience with switches, routers, cables and other networking technologies. The Cisco Discovery Certificate curriculum prepares students for two different Cisco certification exams, Cisco Certified Entry Network Technician (CCENT), and Cisco Certified Network Associate (CCNA).

The System Z Foundations Certificate was developed to address industry’s continuing need for skilled professionals with mainframe skills. This certificate was designed by area companies and IBM Corporation, which will provide access to hardware/software, course materials/speaker notes, student textbooks, etc. The System Z Foundations certificate is a 4-course sequence focused on the basics of enterprise networking. This certificate is designed for individuals with significant working experience in IT or current students with the permission of the instructor.

Note: Some courses may require prerequisites, please ensure to fulfill required prerequisites or meet with your program advisor to discuss.

Specific Certificate Admissions Information
Listed below are additional requirements for admission to the Certificate programs.

Database Specialist Certificate
- Complete MATH 102 and faculty advisor approval

Information Security Certificate
- CIT 151 Networking 1

Network Administrator Certificate
- Complete CIT 151 Networking 1

Software Developer Certificate
- MATH 104 Intermediate Algebra
- Work experience approved by the Department Chair

Vocational Education Transfer Option with The Ohio State University College of Education

The Computer Information Technology, Web Developer program at Columbus State has completed an articulation agreement with the Technical Education and Training Program of the Ohio State University College of Education. This agreement allows Computer Information Technology, Web Developer students to complete their associate degree at Columbus State, transfer their credits to Ohio State, and complete a baccalaureate degree in Technical Education and Training. Students completing the Ohio State program may be eligible for certification by the Ohio Department of Education to teach in related high school career and technical education programs throughout the State of Ohio. Interested students should contact their Columbus State department chairperson for curriculum requirements and additional details. Please note that course requirements for this transfer option may differ from the standard plan of study published in the catalog.

# Construction Management

## Associate of Applied Science Degree

- **Field Supervision Certificate**
- **Estimating/Bidding Certificate**
- **Construction Project Management Assistant Certificate**
- **Residential Construction Management Certificate**

There are 2+2 and formal articulation agreements in place for many Ohio and U.S. colleges and universities. Contact the program advisor for details.

The Construction Management program prepares graduates for entry-level employment with all types of construction companies. Inside positions include work assignments in marketing, sales, estimating, and purchasing; field assignments include those in scheduling, cost control, quality assurance, assisting field superintendents, and monitoring safety programs. The local job market for graduates is expected to continue to grow as the Columbus construction industry steadily expands.

In addition to technical and management courses taught at the college, associate degree students have the opportunity to work directly with employers through a summer quarter cooperative job program that fulfills part of the degree program requirements. Students in the program share a course core curriculum with other programs in the Construction Sciences Department. This core provides students with a strong foundation of technical skills as well as a sense of the teamwork needed in the construction field. Students also complete courses in communication skills, technical math, and computer literacy.

Upon completion of the associate degree in Construction Management, the graduate will be able to:

- Analyze and interpret all types of construction drawings and documents.
- Develop conceptual programs and detail in order to calculate quantities of material, labor, and equipment needed for a project.
- Analyze financial data relative to cost budget data of construction work in the field and office.
- Apply data analysis to identify construction problems, specify goals, and execute projects including understanding risk management and safety loss prevention.
- Utilize the critical path and Gantt bar chart methods to organize, track and update construction projects as necessary.
- Identify, understand and apply the elements in construction employee relations and contract law.
- Utilize industry standard software for estimating, planning, scheduling and cost control.
- Understand the processes of construction disputes, claims and project documentation.
- Obtain working knowledge of safety, health and environmental issues.

Vocational Education Transfer Option with Ohio State University College of Education

The Construction Management Program at Columbus State has completed an articulation agreement with the Technical Education and Training Program of the Ohio State University College of Education. This agreement allows Construction Management students to complete their associate degree at Columbus State, transfer their credits to Ohio State, and complete a baccalaureate degree in Technical Education and Training. Students completing the Ohio State program may be eligible for certification by the Ohio Department of Education to teach in related high school career and technical education programs throughout the State of Ohio.

2 + 2 Program: A.A.S. in Construction Management to a B.S. Agriculture in Construction Systems Management from The Ohio State University
Baccalaureate degree in Construction Management from Bowling Green State University and more than 90 other colleges and universities around North America

Baccalaureate degree in Construction Engineering and Construction Management from the University of Cincinnati and 96 other colleges and universities around North America

Interested students should contact the Construction Management Program coordinators for curriculum requirements and additional details. Please note that course requirements for this option may differ from the standard plan of study published in the catalog.

Dental Hygiene
Dental Hygiene Associate Degree

The Dental Hygiene program at Columbus State Community College is designed to prepare graduates for successful entry into the oral health profession. The dental hygienist is a member of the dental health team and provides a variety of quality oral hygiene services including health education, prevention, and treatment of oral disease to a wide variety of patients. The Columbus State dental hygiene program emphasizes the didactic and clinical skills required to meet ever-changing oral health care needs. Admission to the program is both limited and selective. Graduates of the program will be eligible to sit for the state, regional, and national examinations for licensure. The Ohio State Dental Board requires all dental hygiene programs to be approved by the American Dental Association’s Commission on Dental Accreditation. The commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611.

This program is fully accredited by the American Dental Association’s Commission on Dental Accreditation. The commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611.

Upon completion of the associate of applied science degree in Dental Hygiene, the graduate will:

- Possess the skills and knowledge to manage the ethical and professional issues of dental hygiene practice.
- Be able to acquire and analyze information in a scientific and effective manner using critical thinking skills.
- Be able to demonstrate written comprehension, critical thinking, and skills for the application of assessment, dental hygiene diagnosis, planning, implementation, and evaluation related to the provision of optimal preventive, therapeutic, and educational dental hygiene services to individuals of diverse populations.
- Be able to demonstrate knowledge of safe and effective patient care by adherence to proper infection control, HIPAA requirements, and emergency protocol during the provision of client care.
- Be able to initiate and assume responsibility for general health promotion and oral disease prevention through participation in community activities using appropriate interpersonal communication and educational strategies.
- Be able to apply self-assessment skills in preparation for lifelong learning.

Specific Program Admissions Information

Listed below are additional requirements for admission to the Dental Hygiene program. The annual application deadline is March 30. The last mandatory information session is held by the end of February each year. Students are advised to attend an information session before the end of February. Applications to the Dental Hygiene program are provided only at the information session.

Acceptance is conditional on submission and clearance of student background history by the Columbus State Community College Public Safety Department, and drug screening clearance by the Columbus State Community College Health Records Office.

Students may obtain additional information by visiting the Dental Hygiene website at www.cscc.edu/dentalhygiene or by contacting Leslie Washington at (614) 287-3655 or at lwashi01@cscc.edu.

Admissions Requirements

- Attend one mandatory Dental Hygiene Information Session within 12 months before applying to the program to obtain current admission information and application.
- Achievement of a minimum overall GPA of 2.95 on a 4-point scale based upon the completion of courses at the college most recently attended or Columbus State Community College.
- Students must complete all General Education (G) and Basic-related (B) courses with a grade of “C” or better.
- Placement into MATH 148 or completion of MATH 104
- Placement into ENGL 101 or ENGL 111 or completion of ENGL 100 or ESL 100
- Placement into “No Reading Required” or completion of DEV 044
- BIO 261 Human Anatomy with grade “C” or better
- BIO 262 Human Physiology with grade “C” or better
- Mandatory observation (20 hours) of a dental hygienist working in a dental office, clinic, or other dental hygiene setting. Further specific information is given during the information sessions.
- Students applying to the Dental Hygiene program must submit official high school and college transcripts to Columbus State Community College, Records and Registration Office, by January 20 of the year of application so that transcripts may be evaluated and posted.
- International students or students who have international transcripts must submit official transcripts to an official
transcript evaluation agency by November 30. Further information is given during the information session. Records and Registration may have further requirements for international students, thus international students should contact them before November 30.

- ALL admission criteria MUST be met by March 30 of the application year.

**Statement Regarding Infectious Diseases**

Students in any of the Health, Dental, and Veterinary Programs, including Dental Hygiene, perform their clinical work on real people. Columbus State does not discriminate against students, faculty, or patients in any way, or based on color, creed, national origin, gender, disability or sexual preference. The patient populations with whom we work come from all walks of life, and students may therefore be exposed to many types of communicable diseases. These are not limited to but may include Hepatitis (A, B, C or D), HIV/AIDS, herpes, tuberculosis, measles, mumps, rubella, etc.

All students are required to have appropriate immunizations after being admitted to the program (information is given to all admitted students). Additionally, although all precautions are taken to minimize exposure and risk, there is always a slight possibility that precautions may fail or that a student may accidentally expose him/herself. All students entering the Dental Hygiene program must be aware of this slight, but real, potential. Students are required to maintain personal health insurance while enrolled in the seven-quarter program.

**Dental Laboratory Technology**

**Dental Laboratory Technology/Small Business Management (Associate of Technical Studies Degree)**

**Dental Laboratory Technology Certificate**

Dental laboratory technicians are skilled artisans and small business managers. They create the appliances that restore or replace oral tissues or structures. They fabricate complete dentures, removable partial dentures, crowns, and bridges and may become owners and/or managers of a dental laboratory facility.

The Dental Laboratory Technology four-quarter (one year) Certificate program provides students with experience in fabricating a wide variety of dental appliances using state-of-the-art materials and equipment. The program develops skill, not only in proper construction, but also in attractive appearance and accuracy of fit for patient comfort. Because workers in the dental lab area may be exposed to infectious materials and communicable diseases, the program emphasizes safety and infection control. The Dental Laboratory Technology/Small Business Management seven quarter Associate of Technical Studies Degree program provides knowledge and skills of small business management that will enable a graduate to own and/or manage a dental laboratory, as well as providing all the competencies of the certificate program.
New students enter the program in Autumn Quarter, but applications to the program may be submitted at anytime.

Upon completion of the Certificate in Dental Laboratory Technology, the graduate will be able to:
- Design and fabricate complete dentures, removable partial dentures, crowns and bridges to a clinically acceptable degree.
- Apply learned theories to problem cases involving all dental laboratory procedures.
- Identify acceptable dental impressions submitted from clients.
- Read and accurately interpret dental laboratory prescriptions.
- Select and safely use the proper materials and equipment for a given case.
- Recognize specific landmarks of the oral cavity associated with a given case.
- Install, adjust, and store equipment and supplies.
- Demonstrate the attitude, abilities, and professionalism essential for the welfare of the patient.
- Practice safety and health regulations as established by the state and federal government.

In addition to the Certificate program competencies, the graduate of the Dental Laboratory Technology/Small Business Management A.T.S. program will be able to:
- Identify the fundamentals in planning and executing the start up of a new small business.
- Describe the necessary competence in managing a small business enterprise, including effective operation of an established business, strategic planning, market analysis, pricing, inventory control, and credit collection.
- Demonstrate knowledge of basic accounting principles used to operate a small business.
- Describe marketing principles as they apply to small business.

Specific Program Admissions Information
Listed below are additional requirements for admission to the Dental Laboratory Technology Certificate and A.T.S. programs:
- High school graduate or GED equivalency
- Contact with Dental Laboratory Technology personnel for an information packet or to schedule an interview. Call Cathi Brownfield, (614) 287-2547, or Leslie Washington, (614) 287-3655, or e-mail them at cbrownfi@cscc.edu or lwash01@cscc.edu.

TOTAL CERTIFICATE CREDIT HOURS ................................................................43

All Dental Lab classes are held in the mornings from 8:00 a.m. until 1:00 p.m. New classes start each autumn quarter.
Digital Design and Graphics

Digital Design and Graphics Associate Degree
Desktop Publishing Certificate
Digital Design Certificate
Photoshop for Illustration and Design Certificate

Digital Design and Graphics incorporates all of the processes and industries that create, develop, produce or disseminate ideas, concepts, and information utilizing words or images. Digital Design and Graphics is the interaction of advertising, graphic design, publishing, package design, marketing, interactive media and photography.

This program will prepare the student for various positions in the expanding field of visual communications or for transfer to a four-year institution. Students will prepare a portfolio that will show the work they created in this program, develop a strong visual and verbal resume, and practice the skills needed to effectively present their portfolio to prospective employers.

Upon completion of the associate degree in Digital Design and Graphics, the graduate will be able to:

• Understand the Digital Design and Graphics business and be able to interact with clients, marketing, copy writers, Web designers, photographers and printing companies.
• Be able to utilize the most widely used industry software programs: Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Corel Painter X and be introduced to Fireworks, Dreamweaver and Flash.
• Understand the management of color for print media, photography, and interactive media.
• Understand digital photography and how it works with other creative areas.
• Understand how an advertising agency works on projects for clients.
• Work in a creative environment as an individual and as a team member.
• Effectively prepare and present a creative portfolio.
• Understand the importance of good verbal and written communications.

Certificates in Desktop Publishing and Digital Design combine design and typography basics with focused instruction on industry-standard page layout, image manipulation, and computer illustration software. These certificates are designed for working professionals with significant experience in digital design and graphics.

The Digital Media Certificate is a multi-disciplinary certificate combining the fields of branding, design and graphics, digital audio/video production, e-Commerce, interactive media, photography, and marketing communications. This certificate prepares students for employment in the advertising industry.

Software/Hardware Requirements
Students taking courses in this curriculum may need to own or have access to hardware or software to pursue this degree. This is particularly important for students who are enrolled in distance learning-based sections of a particular course. Check with the program advisor to discuss specific course needs and options.

**Digital Photography (FOTO) Digital Photography Associate Degree**

**Photography Certificate**

**Photoshop for Photographers Certificate**

The Digital Photography Program has been created to satisfy the growing need for qualified digital photographers by providing graduates the benefits of a comprehensive college education while building a strong foundation in digital design, marketing, communications and web design. This multi-disciplinary approach reflects the needs of the professional digital photography industry. This digital evolution has lowered the barriers to professional entry, forcing existing film photographers to switch to digital while allowing many new people in related fields to pursue the craft of digital photography.

Graduates of this program will be prepared for careers in a variety of digital photography, digital services and imaging-related fields, be able to pursue self-employment options, or be prepared to continue their education at a four-year institution. The majority of the digital photography curriculum will revolve around digital capture, digital workflow, and digital image management. Students will develop a balance of technical and aesthetic skills that relate to digital photography, equipment, and related software that is complemented by coursework in digital design, Web site design, interactive video/audio, and marketing/branding on the Web.

Upon completion of the associate degree in Digital Photography the graduate will be able to:

- Demonstrate an understanding of the principles associated with the craft, scholarly theory, and profession of digital photography.
Students will need to own class-specific equipment to pursue this degree. For example, FOTO 111 and 150 require a student-provided, film-based SLR camera. A Digital SLR (DSLR) with a minimum of 8 megapixel capture will be needed to enter any 200 level course that is focused on digital capture. Medium and large format film cameras will be provided for in-class projects and use. Check with the photography advisor to discuss specific course needs and options.

The Photography Certificate is designed to prepare students for employment as photography assistants in the photography industry. This program focuses on the development of skills and competencies in the use of traditional and digital cameras, advanced black and white and color photography, and studio photography. A course on how to develop and manage a successful photography business is also included.

Students should request a program plan of study from their faculty advisor.
Early Childhood Development

Early Childhood Development Associate Degree
Preschool Education Certificate
Child Development Associate (CDA) Credential Preparation

Family needs and increased focus on appropriate early education for all young children continues to drive the demand for qualified professionals in early childhood education. Early childhood educators are responsible for planning daily routines and curriculum, utilizing community resources to enrich programs and support the needs of children and their families. The ECD graduate is employed as a pre-kindergarten teacher, Head Start teacher, preschool/childcare administrator, nanny, infant/toddler caregiver, or family childcare provider.

The Early Childhood Development (ECD) program is approved by the Ohio Department of Education to offer the Pre-Kindergarten Associate Teaching license. This license qualifies holders for pre-kindergarten positions in a variety of early childhood settings, including Head Start, public school preschool, inclusive settings for children with special needs, as well as part-day and full-day child care programs. The Early Childhood course of study exceeds the requirements for staff as outlined in the revised Ohio Child Day Care Licensing Rules.

Specific Program Admissions Information
Listed below are additional requirements for formal admission to Early Childhood Development.
- High school graduate or GED equivalency
- Placement out of or completion of DEV 044
- Placement into ENGL 101 Beginning Composition
- Completion of the following six courses with a grade of “C” or above:
  - ECD 101 Introduction to Early Childhood Development
  - ECD 105 Self Concept
  - ECD 106 Observing and Recording
  - ECD 107 Curriculum Planning
  - ECD 108 Creative Curriculum
  - PSY 261 Introduction to Child Development

Upon completion of the associate degree in Early Childhood Development, the graduate will be able to:
- Demonstrate knowledge of theories of human growth, development, and learning related to children, birth to age eight.
- Plan appropriate learning experiences for individuals, as well as groups of young children, in inclusive settings.
- Demonstrate a competent, respectful, nurturing teaching style to meet children’s needs.
- Develop appropriate educational practices for young children that foster the growth of skills in problem solving, decision-making, critical thinking, communication, and emerging literacy.
- Use appropriate teaching strategies to address individual differences in developmental levels, culture, and learning styles.
- Recognize and respect unique characteristics of families and demonstrate appropriate strategies to support and address family needs.
- Demonstrate a variety of strategies to evaluate children’s growth and development in cooperation with parents and related professionals.
- Design a physically safe environment to facilitate children’s independence and competence through constructive experiences.
- Demonstrate knowledge of content areas and familiarity with Ohio Department of Education pre-kindergarten standards and K-3 benchmarks.
- Reflect and evaluate one’s professional, interdisciplinary role as teacher, team member, lifelong learner, and advocate for children and families.

**Electro-Mechanical Engineering Technology Associate Degree**

The Electro-Mechanical program is a marriage of Columbus State’s Mechanical Engineering Technology and Electronics Engineering Technology programs. The skills electro-mechanical technicians possess are used in virtually every industry—from manufacturing, to environmental control, to food and pharmaceutical production, to power plants. Electro-mechanical technicians are immediately able to contribute to the companies that hire them.

Electro-mechanical technicians are in great demand. Any industry that uses electrical components and/or has any level of automation and process control needs and will always need EMEC technicians. Electro-mechanical engineering technicians perform both preventive and corrective maintenance on electro-mechanical systems as well as aiding in the design of such systems. The most rewarding part of this field is the variety and creativity it affords. EMEC technicians use their knowledge and skills to solve problems and come up with creative solutions daily.

Electro-Mechanical Engineering Technology also shares related courses with the Electronic Engineering Technology, Mechanical Engineering Technology and Quality Assurance Technology. For additional information refer to those sections of the College Catalog.

Electronic Engineering Technology

Electronic Engineering Technology
Associate Degree

Computer Electronics Major
Technology Systems Technician (TST)

Columbus State’s six-quarter associate degree program in Electronic Engineering Technology prepares students to assemble, troubleshoot, and repair electronic systems, to read and interpret complex instructions, engineering and schematic drawings, technical literature, and to solve a variety of problems. Students will learn to use the language of electronics to communicate clearly with engineers, scientists, and other technicians. Coursework includes basic electronic systems, basic digital systems, advanced programmable digital systems, electronic switching systems, data acquisition systems, instrumentation and control systems, human machine interface systems, distributed control systems and embedded microcontroller systems. Each topic is enhanced with corresponding hands-on labs. Students may also qualify for work-study cooperative experiences with local industry, when available.

Electronic engineering technologists are in demand in a variety of fields ranging from biomedicine to automated manufacturing. They also are involved in an impressive array of activities—from computer repair to telecommunications, and from fiber optics to robotics. Graduates become eligible for more than just a well-paying job; they also take satisfaction from knowing that their work provides products or services which improve others’ quality of life.

Columbus State’s Electronic Engineering Technology program is accredited by the Technology Accreditation Commission of the Accreditation Board for Engineering and Technology (TAC of ABET). For further information regarding accreditation, contact: Accreditation Director for Engineering Technology, Accreditation Board for Engineering and Technology, 111 Market Place, Suite 1050, Baltimore, MD 21202.

Graduates who wish to continue their education may transfer their associate degree credits to a number of four-year institutions that offer baccalaureate degrees in Engineering Technology, including Miami University’s (Ohio) bachelor degree completion program offered via distance learning entirely on Columbus State’s campus.

Electronic Engineering Technology shares related coursework with the Electro-Mechanical Engineering Technology degree. For additional information, refer to that section of the catalog.

Computer Electronics Major

Students interested in combining electronics with computer technology systems should consider the Computer Electronics major. This program prepares the student to enter career fields related to computer technology systems and support.

Career fields associated with this Program Major are:
- Information Technology Technician
- Field PC Technician
- Enterprise Technician
- IT Support
- PC Support Specialist
- Computer Technician
- Information Technology Administrator
- Help Desk Technician
- Remote Support Technician
- Service Desk Technician
- Call Center Technician
- Depot Technician
- Bench Technician

The Program Major’s focus includes:
- Preparing the student for the CompTIA A+ Certification Exam, CompTIA Network + and Linux +
- Preparing the student for the CISCO CCNA Certification
Emergency Medical Services Technology

Emergency Medical Services Associate Degree
EMT–Basic Certificate

Emergency Medical Technician (EMT) work under the direction of a physician to act as the primary pre-hospital care provider in the health care system. They must first make a comprehensive evaluation of the patient’s condition and the overall situation. They may then need to provide immediate life-saving care. Technicians must demonstrate a high degree of technical skill, calmness, and professionalism, even under the most adverse conditions.

Columbus State’s associate degree program in Emergency Medical Services exposes students to a wide variety of victim care situations, including direct patient care in local hospitals and on emergency vehicles. Instructors are highly experienced and active in the field of emergency medicine.

In addition to the associate degree, the Emergency Medical Services program offers the EMT–Basic Certificate and the EMT–Paramedic Certificate accredited by the Ohio Department of Public Safety, Division of EMS (certificate # 311). The EMT-
Demonstrate knowledge of the legal aspects of emergency medical services. For information on additional certificates, see the Emergency Medical Services Technology Coordinator.

Students in the EMT–Basic Certificate program must first complete the EMT–Basic course, and then pass the State/National EMT-B Certification written and practical exams. By state law, a student must be a certified EMT–Basic before enrolling in the EMT–Paramedic Certificate program. In addition to the above, to be eligible for admission into the Paramedic Certificate program students must also complete a prerequisite course EMS 201 (Paramedic Preparation Course) and a pre-testing process, which includes the Health Occupations Basic Entrance Test (HOBET).

Good mental and physical health is critical in emergency medical services. Students must have a physical examination and must meet program health requirements before they may participate in clinical laboratory experiences. Because students and workers in the health care field may be exposed to infectious materials and communicable diseases, the program emphasizes safety and prevention. In addition, all students must be covered by EMT-student liability insurance while enrolled in the certificate courses. To meet clinical affiliation agreement requirements, students in the Paramedic Certificate program must successfully complete a BCI&I background check and a SAM-5 drug screen.

Upon completion of the associate degree requirements in Emergency Medical Services Technology, the graduate will be able to:

- Perform all of the duties included in EMT–Basic and EMT–Paramedic training, after successfully completing State of Ohio/National certification exams in these two areas.
- Demonstrate knowledge of the legal aspects of emergency medical service.
- Prepare for and deal with disasters, including those involving hazardous materials.
- Explain the complexity of emergency medical service.

**EMT–Basic Certificate**

Students completing the EMT–Basic Certificate will be able to:

- Meet State of Ohio/National requirements to take the EMT–Basic certification examination.
- Evaluate the nature and seriousness of a patient’s condition or the state of the patient’s injuries and assess requirements for emergency care.
- Administer appropriate emergency care to stabilize the patient’s condition, including tracheal intubation and automated external defibrillation.
- Lift, move, position, and otherwise handle the patient in such a way as to minimize discomfort and further injury.

**EMT–Paramedic Certificate**

Students completing the EMT–Paramedic Certificate will be able to:

- Meet State of Ohio/National requirements to take the EMT–Paramedic certification examination.
- Perform all duties of the EMT–Basic.
- Initiate appropriate intravenous procedures as specifically authorized by medical authority.
- Initiate and continue emergency medical care under medical control, including recognizing presenting conditions and initiating appropriate invasive and noninvasive therapies (e.g., surgical and medical emergencies, airway and respiratory problems, cardiac dysrhythmias, cardio pulmonary arrest, and psychological crisis), and assessing the response of the patient to that therapy.

For information on additional certificates, see the Emergency Medical Services Technology Coordinator.

---

**Specific Program Admissions Information**

Listed below are additional requirements for admission to the Emergency Medical Services Technology.

- High school graduate or GED equivalency
- 18 years of age or older (contact EMS Coordinator)
- Completed health record required PRIOR TO registration
- COMPASS™ placement into ENG 100 OR completion of equivalent course as verified on CSCC transcript.
- E-mail ems@cscc.edu for Information Session dates or to make an appointment with department advisors.

### Associate of Technical Studies degree

**Emergency Medical Service/Fire Science**

In many areas, emergency medical services are provided through the fire service agencies. This unique Associate of Technical Studies degree provides the student with the opportunity to combine these two programs into a degree with specific preparation for entering or advancing in such agencies.

The Associate of Technical Studies degree offers the EMT–Basic Certificate and the EMT–Paramedic Certificate accredited by the Ohio Department of Public Safety, Division of EMS (certificate # 311). The EMT–Paramedic Certificate is also nationally accredited through the Committee on Accreditation of Educational Programs for the EMS Professions. (CoAEMSP # 600009)

Students must first complete the EMT–Basic course and then pass the State/National EMT–B Certificate written and practical exams. By state law a student must be certified as an Ohio EMT–Basic before enrolling in the EMT–Paramedic Certificate program. In addition to EMT–Basic certification as above, students must also complete EMS 201 (Paramedic Preparation Course) as a prerequisite, and a pretesting process, which includes the Health Occupations Basic Entrance Test (HOBET).

Good mental and physical health is critical in emergency services; therefore students must have a physical examination, meet the program health requirements and be covered by the EMT-student liability insurance. To meet clinical affiliation agreement requirements, students in the Paramedic courses must successfully complete a Bureau of Criminal Investigation & Identification background check and SAM-5 drug screen.

Upon completion of the Associate of Technical Studies in Emergency Medical/Fire Science, the graduate will be able to:

- Demonstrate effective communication and interpersonal skills with supervisors, peers and the public.
- Perform all duties and responsibilities of the EMT–Basic and EMT–Paramedic, after successfully achieving certification in these areas.
- Explain the history and basic principles of the fire service.
- Recognize and respond to changing fire conditions and potential for collapse in structures.
- Demonstrate the duties and responsibilities of Incident Command.
- Demonstrate knowledge of the legal aspects of the fire service and emergency medical service.
- Demonstrate necessary proficiencies with extinguishment hydraulics and fire protection systems.
- Demonstrate a working knowledge of fire investigation principles.

For student outcomes for EMT–Basic Certificate and EMT–Paramedic Certificate, see Emergency Medical Services.

NOTE: If you currently have EMT–Basic, Paramedic, Firefight
er I and II and/or Apprenticeship certification, you may qualify for nontraditional credit which may apply toward the degree. Contact EMS or Fire Science Technology faculty (e-mail: ems@cscc.edu) to determine your individual status.

- FIRE 117 Firefighter I and II 4
- FIRE 151 Fire Inspector II: Fire Prevention Codes 4
- FIRE 153 Fire Hydraulics 4
- FIRE 156 Building Construction/Collapse: Basic Concepts 4
- FIRE 160 Legal Issues for Public Safety Personnel 3
- FIRE 200 Building Construction/Collapse for Experienced FF 4
- FIRE 202 Hazardous Materials II 4
- FIRE 204 Fire Service Rating System: Fire Insurance 2
- FIRE 205 Fire Service Company Officer 3
- FIRE 206 Administration of a Fire Department 3
- FIRE 207 Customer Services for the Fire Services 3
- FIRE 209 Firefighting Problems 3
- FIRE 211 Incident Command for Experienced Firefighters 4
- CMGT 121 Building Construction Drawings 3
- EMS 201 Paramedic Preparation 4
- EMS 295 Public Safety Services Instructor 6

NOTE: PRIOR TO ENROLLING in any Fire Science courses, you must have completed ONE of the following: FIRE 100 or FIRE 117 or have documented Firefighter I and II certification.
Engineering Technologies

*Individual technology degree programs are listed alphabetically in the Programs of Study section. See:

Aviation Maintenance Technology
Electro-Mechanical Engineering Technology
Electronic Engineering Technology
Mechanical Engineering Technology
Quality Assurance Technology

Certificate Programs
Engineering Assembly Technician
Engineering Technician
Manufacturing Maintenance Technician
Computer Aided Drafting Technician

Engineering Technologies offers four focused certificates (see above) that lead to employment opportunities in technology areas. The certificate coursework and preparation means that the student can be gainfully employed earlier, and, in many instances, with companies that offer tuition reimbursement. These certificates can be combined and count toward an associate degree.

Engineering Assembly Technician Certificate

Assemblers and fabricators play an important role in the manufacturing process. They are responsible for putting together finished and semi-finished goods, assembling the pieces of components of a product and then joining the components into a whole product.

Assemblers begin by reading detailed schematics or blueprints that show how to assemble complex machines. After determining how parts should connect, they often need to use hand or power tools to trim, shim, cut, and make other adjustments to make components fit together and align properly. Once the parts are properly aligned, they connect parts with bolts and screws or by welding or soldering pieces together. Careful quality control is important throughout the assembly process, so assemblers look for both mistakes in the assembly process and faulty components. They try to help fix problems before more defective products are produced.

Changes in technology have transformed the manufacturing and assembly process. Automated manufacturing systems now use robots, computers, programmable motion control devices, and various sensing technologies. These systems change the way in which goods are made and affect the jobs of those who make them. The more advanced assemblers must be able to work with these new technologies and be comfortable using them to produce goods.

Engineering Technician Certificate

Engineering technicians use application-oriented principles of science, engineering, and mathematics to solve technical problems in research, development, and manufacturing. Their work is more limited in scope than that of scientists and engineers. Many engineering technicians assist engineers and scientists, especially in research and development. Others work in quality control, inspecting products and processes, conducting tests, or collecting data. In manufacturing, they may assist in product design, development, or production. Although many workers who repair or maintain various types of electrical, electronic, or mechanical equipment are called technicians, those interested in repair and maintenance should pursue the Manufacturing Maintenance Technician Certificate.

Manufacturing Maintenance Technician Certificate

Electrical equipment and electronic equipment are two distinct types of industrial equipment, although much equipment contains both electrical and electronic components. In general, electrical portions provide the power for the equipment, while electronic components control the device, although many types of equipment still are controlled with electronic devices. Electronic sensors monitor the equipment and the manufacturing process, providing feedback to the programmable logic control (PLC), which controls the equipment. The PLC processes the information provided by the sensors and makes adjustments to optimize output. To adjust the output, the PLC sends signals to the electrical, hydraulic, and pneumatic devices that power the machine—changing feed rates, pressures, and other variables in the manufacturing process. Many installers and repairers, known as field technicians, travel
to factories (or other locations) to repair equipment or to perform preventative maintenance on a regular basis. Bench technicians work in repair shops located in factories and service centers, fixing components that cannot be repaired on the factory floor.

### Computer Aided Drafting Technician Certificate

Drafters prepare technical drawings and plans used by production workers to build manufactured products. Drafters’ drawings provide visual guidelines, show the technical details of the products, and specify dimensions, materials, and procedures. Drafters fill in technical details using drawings, rough sketches, specifications, codes, and calculations previously made by engineers or scientists. Some use their knowledge of engineering and manufacturing theory and standards to draw the parts of a machine to determine design elements, such as the numbers and kinds of fasteners needed to assemble the machine. Drafters use technical handbooks, tables, calculators, and computers to complete their work.

Traditionally, drafters sat at drawing boards and used pencils, pens, compasses, protractors, triangles, and other drafting devices to prepare a drawing manually. Most drafters now use Computer Aided Drafting and Design (CADD) systems to prepare drawings. Consequently, some drafters may be referred to as CADD operators. CADD systems employ computers to create and store drawings electronically that can then be viewed, printed, or programmed directly into automated manufacturing systems. These systems also permit drafters to prepare variations of a design quickly. Although drafters use CADD extensively, it is only a tool. Persons who produce technical drawings with CADD still function as drafters and need the knowledge of traditional drafters, in addition to CADD skills. Despite the nearly universal use of CADD systems, manual drafting and sketching still are used in certain applications.

### Engineering Technologies Courses

#### ENGT 100 Introduction to Engineering Technology (AU, SP, SU, W) 4 credits
This course is designed to introduce the beginning student to the Engineering Technology Department at Columbus State. The student will complete exploratory assignments in Mechanical Engineering Technology, Electro-Mechanical Engineering Technology, and Electronic Engineering Technology as well as get a broad overview of the jobs that engineering technologists and technicians have and the industries in which they work. Students will participate in engineer interviews and plant tours. Additional topics covered include the industrial revolution, manufacturing and electronics in today’s global market, the future of manufacturing and electronics, and Steven Covey’s book, “Seven Habits of Highly Effective People.”

Lecture: 3 hours – Lab: 3 hours
Lab fee: $10.00

#### ENGT 131 Hydraulics and Pneumatics (WI, SU) 4 credits
This course is designed to give students a basic understanding of hydraulics and pneumatics. Students will learn about the components and functions of both systems and connect and troubleshoot both systems to meet a given set of criteria. Students will also be exposed to solenoid operated valves and their use in electrically controlling hydraulic and pneumatic systems. This course is required of Electro-Mechanical students and is an optional elective in the Mechanical program.

Lecture: 2 hours – Lab: 4 hours
Environmental Science, Safety and Health

Environmental Science, Safety and Health
Associate Degree
Health and Safety Training for Hazardous Waste Operations Certificate
Water/Wastewater Technology Certificate
Occupational Health and Safety Certificate
Sustainable Building Certificate

Environmental, Science, Safety and Health technicians work in a wide variety of entry-level positions for environmental engineering consulting firms, environmental laboratories, wastewater and water treatment facilities, lead and asbestos abatement contractors, manufacturing facilities, governmental agencies, and other organizations requiring individuals to work in environmental or safety related positions. The demand for technicians capable of performing tasks such as sample collection, monitoring, data management, and instrumentation calibration, operation, and maintenance continues to increase. According to recent surveys and job placement rates, the job market for environmental and safety technicians in central Ohio is very strong.

Columbus State’s associate degree program in Environmental Science, Safety and Health has a diverse curriculum, which includes many basic science courses, as well as courses offered by other engineering technologies. This curriculum provides students with a strong foundation of technical skills necessary for careers in the environmental industry. An internship program also offers students hands-on experience in a real work setting.

In addition to providing environmental technicians with entry-level training, the degree provides opportunities for individuals seeking career changes, continuing education, and skills enhancement.

The Water/Wastewater Technology Certificate is designed to serve the educational needs of employees that work in water and/or wastewater treatment, such as those who work for municipalities or industry. This certificate will also provide a strong educational foundation for those students who have an interest in entering an occupation in water or wastewater treatment. Individuals who complete the coursework in this program will be much better prepared to take the state water or wastewater treatment operator exams. Most courses in this certificate will also apply towards the Associate of Applied Science degree in either Environmental Science, Safety and Health or Civil Engineering Technology.

The Occupational Health and Safety Certificate is designed to provide basic supervisory and regulatory skills to those who have, or may wish to have, a job responsible for the health and safety of the employees in the workplace.

The Sustainable Building Certificate is designed to provide information on sustainable design and construction to students of the Construction Sciences Department, and to provide a training opportunity for current professionals such as architects, building managers, construction managers, and others.

For additional information on the Health and Safety Training for Hazardous Waste Operations Certificate, or other OSHA training opportunities, see the Environmental Science, Safety and Health Advisor.

Upon completion of the associate degree in Environmental Science, Safety and Health, the graduate will be able to:

- Collect air, water, waste, and soil samples for routine monitoring as required by regulatory agencies and for operational control of remediation or treatment systems.
- Conduct field investigations using environmental instrumentation.
- Assist in the operation and maintenance of systems used to control pollution, remediate contaminated materials, or treat water as required by environmental laws.
- Perform duties related to the management, treatment, storage, disposal, and emergency response to spills of hazardous materials and toxic substances in accordance with the EPA, OSHA and DOT.
- Collect and compile data necessary for an environmental site assessment.
- Utilize basic concepts of geology, hydrology, chemistry, and biology in the investigation of the occurrence, transport, and remediation of environmental contaminants.
- Demonstrate a knowledge of solid and hazardous waste management practices, including being able to evaluate hazardous waste data to provide information for compliance with environmental standards.
- Describe components of risk assessment and toxic substances exposure analysis. Identify duties requiring knowledge of safety regulations in the workplace and at construction sites.
- Demonstrate a working knowledge of the regulatory aspects of industrial hygiene.

- Total Degree Credit Hours: 110

Technical electives must be selected from the following list of courses:
Finance

Associate of Applied Science Degree

Today’s banking, investment, corporate finance, consumer credit, and commercial credit industries offer outstanding career opportunities for community college graduates. The associate degree program in Finance gives students the knowledge and skills they need to succeed in entry-level and management training positions. These may be in finance departments of corporations, government agencies, and departments of banks, savings and loans, mortgage and insurance companies. Examples of these positions include loan processor, financial planner, loan officer, financial analyst, mortgage banking trainee, foreign currency trader, credit analyst, insurance analyst, stockbroker trainee and, collections manager.

Upon completion of the associate degree in Finance, the graduate will be able to:

- Explain the key concepts of financial transactions in the macro-economy.
- Explain operational methods of various financial institutions.
- Demonstrate an understanding of both commercial and consumer credit; plan credit investigations, analyze credit reports, make credit granting decisions, implement a general collection system, demonstrate an understanding of credit laws, and measure the efficiency of a credit department.
- Understand stocks, bonds, mutual funds, real estate, insurance, and annuities and the interrelationship between them and their appropriate application.
- Analyze stocks, bonds, and mutual funds and the interrelationship between them. Explain the use of mutual funds to achieve diversification.
- Use spreadsheet software, financial calculators and the Internet to research and analyze financial topics.
- Apply capital budgeting techniques for valuing business investments.
- Write financial plans for business entities and individuals.
- Demonstrate the ability to use business periodicals, the Internet, value line, mutual fund prospectuses, and stockholders’ reports to produce analytical and descriptive research relevant to current financial markets.

Traditional Classes and Distance Learning

Choices at Columbus State

The Finance Program is proud to offer traditional and distance learning (DL) options for our students. The traditional class room experience continues to provide students with high quality instruction in a small classroom setting at the downtown campus and off-campus locations. Finance also offers distance learning courses that provide the same high quality learning as traditional instruction, yet with the flexibility of being able to complete your course work online or through video-based instruction.

**TOTAL DEGREE CREDIT HOURS**: **107**
Fire Science

Fire Science Associate Degree

Technological advancements and increasing sophistication in firefighting and prevention have made the role of the professional in this field more complex, requiring advanced preparation. This program is designed for firefighters and persons in related fields such as construction engineering, insurance investigation, and corporate safety.

The program emphasizes fire-fighting techniques, fire prevention, fire protection systems, and customer service. Combining these subjects with advanced hazardous material response, building construction, and hydraulics gives the student a firm foundation in fire protection and prevention.

Upon completion of the associate degree in Fire Science, the graduate will be able to:

- Demonstrate effective communication and interpersonal skills with supervisors, peers, and the public.
- Explain the history and basic principles of the fire service.
- Recognize and respond to changing fire conditions and the potential for collapse in structures.
- Demonstrate knowledge of the legal aspects of the fire service.
- Demonstrate the duties and responsibilities of Incident Command.
- Demonstrate necessary proficiencies with extinguishment hydraulics and fire protection systems.
- Demonstrate a working knowledge of fire investigation principles.

Geographic Information Systems

Geographic Information Systems Associate Degree

GIS Certificate

The Geographic Information Systems associate degree program provides the community with skilled professionals who use, edit, and make decisions using GIS systems. Graduates are able to work in diverse industries that use geographic information systems including government agencies, construction, banking, health care, land use planning, transportation mapping and analysis, and emergency response.

With the growth of decision-making using spatial data and geographic locations, many businesses are looking for individuals who have skills and knowledge in GIS. GIS professionals can analyze and match spatial data with geographic location, create maps and make decisions relevant to their industries. They use, edit and manipulate the GIS software in their day-to-day operations. GIS is expected to be a growth occupation in Ohio and the nation in the years to come.

The GIS Certificate program is designed for professionals seeking to enhance their knowledge and skills in Geographic Information Systems. It is most beneficial to entry and intermediate level GIS users who lack formal training and education in GIS. There are no prerequisites and no previous work experience in geographic
information technologies is required. The program is an evening and/or weekend program. Courses are taught as instructor-led or as Web-based instruction. Projects and assignments can be submitted using your own computer or lab facilities on campus.

The GIS program provides students with a solid educational background in communication skills, math, computer literacy and operations, and the humanities and behavioral sciences.

Upon completion of the associate degree in GIS, the graduate will be able to:

- Recognize, evaluate, combine and use the different forms of data acquisitions which are used in GIS mapping including GPS, surveying, photogrammetry, scanning, digitizing and remote sensing.
- Create and formulate techniques for implementing a geographic information system by having the knowledge and skills in creating, editing, using and georeferencing spatial data and GIS software.
- Develop strategic, business, and implementation plans for GIS projects, budgeting, software and hardware procurement, staffing, training and legal issues.

TOTAL DEGREE CREDIT HOURS .......................................................... 96

Technical Electives must be selected from the following list of courses:

### SPECIALIZATION TRACKS

#### GIS Specialization

**Must take at least two technical electives from:**
- GIS 275 Planning and Implementing GIS
- GIS 277 Introduction to ArcIMS
- GIS 278 Introduction to Programming in GIS
- GIS 281 Introduction to ArcGIS Server
- GIS 299 Special Topics in GIS

**Must take at least one technical elective from:**
- GIS 283 GIS in Emergency Management
- GIS 284 GIS in Health
- GIS 285 GIS in Business
- GIS 286 GIS in Utilities

### Environmental Specialization

- ENVR 101 Intro. to Environmental Science, Safety and Health
- ENVR 110 Industrial/Municipal Pollution Control
- ENVR 158 Environmental Site Assessment

### Landscape Specialization

- LAND 152 Site Planning
- LAND 110 Landscape Computer Application
- SURV 247 Townsite/Urban Development

### LIS Specialization

TOTAL CERTIFICATE CREDIT HOURS ........................................... 24-25

Technical Electives must be selected from the following list of courses.

**Must take at least one technical elective from:**
- GIS 275 Planning and Implementing GIS
- GIS 277 Introduction to ArcIMS
- GIS 278 Introduction to Programming for GIS
- GIS 279 Introduction to ArcGIS Databases
- GIS 281 Introduction to ArcGIS Server
- GIS 299 Special Topics in GIS

**Must take at least one technical elective from:**
- GIS 283 GIS in Emergency Management
- GIS 284 GIS in Health
- GIS 285 GIS in Business
- GIS 286 GIS in Utilities

* This course may be taken prior to starting the GIS Certificate.
1 This course may be taken Summer Quarter.
2 Two technical electives required for certificate (any quarter).
Health Information Management Technology

Health Information Management Technology
Associate Degree
Medical Coding Certificate

The Health Information Management Technology program prepares the student to become a professional responsible for maintaining components of health information systems consistent with the medical, administrative, ethical, legal, accreditation, and regulatory requirements of the health care delivery system. In all types of health care facilities, the health information management technician possesses the technical knowledge and skills necessary to process, maintain, compile, and report health information data for reimbursement, facility planning, marketing, risk management, utilization management, quality assessment and research; to abstract and code clinical data using appropriate classification systems; and to analyze health records according to standards. The health information management technician also may be responsible for functional supervision of the various components of the health information system.

The Medical Coding Certificate program prepares students with entry-level skills needed to code, classify, and index diagnoses and procedures for the purpose of reimbursement, standardization, retrieval and statistical analysis. Principles in ICD-9-CM coding, CPT coding, and third-party reimbursement will be emphasized.

The Health Information Management Technology degree program and the Medical Coding Certificate program are Web-based programs. All technical coursework is offered online except for HIMT 276, HIMT 292, HIMT 294, and HIMT 296.

Proctored testing is required for most HIMT courses.

Health Information Management Technology
Upon completion of the associate degree in the Health Information Management Technology, the graduate will be able to:
• Demonstrate knowledge of human anatomy, physiology, and pathophysiology, medical terminology, pharmacology and clinical data as it relates to the collection and use of health information.
• Review health records for completeness and accuracy to determine appropriateness and adequacy of health care documentation.
• Maintain and compile health information using electronic applications and work processes.
• Apply legal principles, policies, regulations and standards for the control, use, and dissemination of health information.
• Collect, compute, analyze, interpret and present statistical data related to health care services.
• Code, classify, and index diagnoses and procedures for the purpose of reimbursement, standardization, retrieval and statistical analysis.

• Review, abstract, retrieve, and compile health data for reimbursement, quality assessment, patient care research, clinical registries and other informational needs.
• Apply principles of supervision and leadership and the tools used to effectively manage human resources.
• Demonstrate ethical practices as outlined in the American Health Information Management Association (AHIMA) Code of Ethics.

The HIMT degree program at Columbus State is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Completion of the associate degree in Health Information Management Technology will permit graduates to sit for the Registered Health Information Technician (RHIT) certification examination and the Certified Coding Associate (CCA) examination. Graduates of the HIMT degree program may transfer to The Ohio State University, the University of Cincinnati, or the University of Toledo for a Bachelor of Science degree, majoring in Health Information Management and Systems.

Medical Coding Certificate
Upon completion of the Medical Coding Certificate, the student will be able to:
• Demonstrate knowledge of human anatomy, physiology, and pathophysiology, medical terminology, pharmacology and clinical data as it relates to the collection and use of health information.
• Review health records for completeness and accuracy to determine appropriateness and adequacy of health care documentation.
• Identify components of appropriate and adequate documentation of health care.
• Code, classify and index diagnoses and procedures for the purpose of reimbursement, standardization, retrieval and statistical analysis.
• Abstract data from patient records for reimbursement, quality assessment, patient care research, clinical registries and other identified informational needs.
• Demonstrate ethical practices as outlined in the American Health Information Management Association (AHIMA) Code of Ethics.

Specific Program Admissions Information
Listed below are requirements for admission to the Health Information Management Technology and the Medical Coding Certificate program. These requirements must be completed prior to acceptance into the HIMT degree program or the Medical Coding Certificate program.

• High school graduate or GED equivalency
• High school biology (or equivalent) with a grade of “C” or higher and completed within the past 5 years OR equivalent college credit for BIO 100 (completed within the past 5 years).
• High school chemistry with a grade of “C” or higher and
completed within the past 3 years, OR equivalent college credit for CHEM 100 (completed within the past 3 years)
- Placement into ENGL 101 Beginning Composition
- Placement into MATH 102 Beginning Algebra I
- Completion of CIT 094 Web Learning Tools with a grade of “C” or higher
- Completion of HIMT 121 Advanced Medical Terminology with a grade of “C” or higher
- Completion of HIMT 111 Introduction to HIMT with a grade of “C” or higher.
- Students must pass a drug screen and background check before they can be accepted into either the HIMT degree program or the Medical Coding Certificate program.

After earning a “C” or higher in HIMT 111 (which requires completion of the courses noted above), the student will be accepted into the HIMT degree program or the Medical Coding Certificate program. Once the student has been accepted into either the HIMT degree program or the Medical Coding Certificate program, the student may begin completing the appropriate plan of study.

Both the HIMT degree program and the Medical Coding Certificate program plans of study begin with autumn quarter as published. A student may also begin the program during winter, spring, or summer quarters; however, if a student begins a program in a quarter other than autumn quarter, it may take longer to complete the HIMT degree program or the Medical Coding Certificate program. An alternate plan of study must be followed in order to assure the prerequisites are met and that courses are planned to be taken during quarters in which they are offered. An alternate plan of study may extend program completion time.

Students must earn a “C” or higher in all HIMT technical and related courses to earn an Associate of Applied Science degree in HIMT or to complete the Medical Coding Certificate program.

Students are expected to follow the established plans of study. If a student deviates from the established plan of study, it may take longer to complete a certificate and/or two-year degree.

### Note

- Bio 261 Human Anatomy, Bio 262 Human Physiology, and Bio 263 Human Pathophysiology can be taken in place of Bio 121 and Bio 122.
- Bio 261 Human Anatomy, Bio 262 Human Physiology, and Bio 263 Human Pathophysiology can be taken in place of Bio 121 and Bio 122.
Heating, Ventilating and Air Conditioning Technology

Heating, Ventilating and Air Conditioning Technology Associate Degree
High Pressure Boiler License Training Program
Large Commercial Certificate
Residential/Light Commercial Certificate

The Heating, Ventilating and Air Conditioning Technology program prepares graduates for a wide variety of occupations in the $150 billion mechanical environment science field. Graduates find employment with large commercial heating and air conditioning contractors, residential mechanical contractors, parts and equipment distributors, large commercial and industrial facility maintenance departments, hospital facilities maintenance departments, custom design or new construction markets.

The increase in new high-rise buildings and real estate development within all major cities is a clear indication of the ongoing job opportunities available. Many graduates also find employment with equipment manufacturers in research and development. Today's society is demanding more emphasis on the ethical, legal, and regulatory requirements relating to environmental concerns facing the HVAC industry today and in the future.

The degree program offers the training needed to develop a high degree of technical skill, as well as the ability to work with minimal supervision and a strong sense of personal responsibility. Graduates with field experience and further experience in business management can look to ownership of their own HVAC companies.

The four-course High Pressure Boiler License Training program prepares students to take the State of Ohio High Pressure Boiler Operators License examination. To be licensed, individuals are also required to document directly-related work experience with high pressure boilers in accordance with State of Ohio requirements. This boiler license program gives technicians the opportunity to progress from licensed boiler operator through many more responsible jobs in industry and commercial applications.

Upon completion of the associate degree in Heating, Ventilating and Air Conditioning Technology, the graduate will be able to:

- Create manual and computer graphic representations of HVAC projects.
- Select piping materials and design piping systems.
- Be able to perform designs for commercial and industrial piping systems, including water, steam and refrigeration piping.
- Calculate heat loss and heat gain loads for residential and commercial structures, using National ACCA manuals and computer software.
- Use testing and analyzing instruments and calculate combustion process for various fuels (e.g., natural gas, coal, and fuel oil) to ensure proper operation for the most efficient operation of boilers and furnaces.
- Assist in the selection and application of a variety of residential and commercial HVAC equipment to solve environmental problems.
- Assist in the design of automatic control circuits using electro-mechanical and electronic control devices.
- Assist in designing preventative maintenance programs for various HVAC systems.
- Research and apply local, state, and national codes to various environmental systems.
- Assist in conducting energy audits of residential and commercial structures.
- Test and calculate airflow through system equipment.
- Read control schematics and test control circuits for malfunctions.
- Troubleshoot and repair gas/electric furnaces, fuel oil furnaces, split system air conditioners and heat pumps, humidifiers, and electronic air cleaners.

Technical Elective must be selected from the following list of courses:

HAC 291 Field Experience 4
HAC 258 Pneumatic Controls I 4
Hospitality Management Technology

Chef Apprenticeship Major
Dietetic Technician Major
Foodservice/Restaurant Management Major
Foodservice/Restaurant Management Major – Baking and Pastry Arts Track
Travel/Tourism/Hotel Management Major

Baking Certificate
Dietary Manager Certificate
Meeting and Event Management Certificate
School Foodservice Manager Certificate

The Hospitality Management programs provide quality learning experiences to enhance initial employment opportunities and to improve technical and supervisory skills for career advancement in foodservice, lodging, and tourism. Several majors leading to associate degrees are available for Chef Apprenticeship, Dietetic Technician, Foodservice/Restaurant Management (also Baking and Pastry Arts Track), and Travel/Tourism/Hotel Management. The programs are accredited by the Commission on Accreditation for Hospitality Management Programs (CAHM). In addition, Dietary Manager, Baking, Meeting and Event Management and School Foodservice Manager Certificate programs are available.

The Chef Apprenticeship major is offered in cooperation with the American Culinary Federation Columbus Chapter. It includes the theory-related classroom instruction and on-the-job training required for the National Apprenticeship Training Program of the American Culinary Federation (ACF). A Supplementary Application is required. (See Specific Program Admissions Information.) Chef apprentices are placed for employment for three years of on-the-job training under a professional chef in restaurants, clubs, hotels, or catering businesses. At the same time, the apprentices attend classes at Columbus State one full day each week to work toward the associate of applied science degree. The Columbus State program is accredited by the American Culinary Foundation Accrediting Commission. Program graduates qualify as Certified Culinarians through the ACF and as Journeyman Chefs through the U.S. Department of Labor, Bureau of Apprenticeship and Training.

The Dietetic Technician major is accredited by the Commission on Accreditation for Dietetics Education (CADE) of the American Dietetic Association. The seven-quarter program provides practicums coordinated with classroom instruction. Graduates are eligible for membership in the American Dietetic Association and qualify to take the national examination given by the Commission for Dietetic Registration to be credentialed as a Dietetic Technician Registered (DTR).

The Foodservice/Restaurant Management major combines classroom instruction, laboratory experience, and hospitality industry work experiences. The associate degree program prepares
graduates for supervisory positions in a variety of foodservice operations. This major is accredited by the American Culinary Federation Foundation Accrediting Commission, and graduates can qualify as Certified Culinarians by the American Culinary Federation upon successful completion of national written and practical examinations.

The Foodservice/Restaurant Management Major—Baking and Pastry Arts Track is designed to prepare graduates to prepare and produce pies, cookies, cakes, breads, rolls, desserts and other baked goods in a variety of baking environments such as independent and in-store bakeries as well as large commercial bakeries, restaurants and hotels. The program includes classroom instruction, laboratory experience, and industry work experience.

The Travel/Tourism/Hotel Management major prepares students for a wide variety of positions in travel agencies, hotels, attractions, and related tourism organizations. Required cooperative work experiences and hands-on instruction in computer reservations systems are included in a course of study appropriate for individual growth and advancement in hospitality and tourism.

The 18-credit Dietary Manager Certificate is approved by the Dietary Managers Association. It is open to persons working in the foodservice operation of a health care facility that employs a Registered Dietitian, who serves as the preceptor to the student. Persons completing the program are eligible to take the national certification exam to become a Certified Dietary Manager (CDM). Credit hours earned may be applied to an associate of applied science degree in the Dietetic Technician major.

The Baking Certificate program will prepare students to assist in the preparation and production of pies, cookies, cakes, breads, rolls, desserts, and other baked goods in a variety of baking environments including independent and in-store bakeries as well as large commercial bakeries, restaurants, and hotels. Duties may include stocking ingredients, preparing and cleaning equipment, measuring ingredients, mixing, scaling, forming, proofing, oven tending, product finishing, and presentation.

The School Foodservice Manager Certificate program includes four courses. The completion of these four courses will prepare the student to meet the education requirements for the third level of certification established by the School Nutrition Association.

The Meeting and Event Management Certificate is designed to prepare students to assume positions in meeting and event planning in conference centers, hotels, or large corporations. The certificate includes seven required courses. Upon successful completion of these courses, student could apply them to the Travel/Tourism/Hotel Management major to complete a degree in Hospitality Management.

In addition to CSCCC General Education outcomes, upon completion of the associate degree in Hospitality Management, the graduate will be able to:

- Demonstrate appropriate standards of professionalism, including ethical behavior and adherence to dress and grooming codes required for the industry.
- Exceed the expectations of a diverse population of customers in providing the hospitality experience.
- Manage effectively the resources of our industry operations, including human resources and financial controls.
- Demonstrate the ability to comply with current laws, rules and regulations governing foodservice, lodging and tourism.
- Demonstrate the ability to market and sell products and services.
- Integrate learned or acquired skills, both personally and professionally, within the workplace.

**Chef Apprenticeship Major**

In addition to the general Hospitality Management competencies, a graduate majoring in the Chef Apprenticeship program will be able to:

- Plan, organize, and supervise the production and service of appropriate high quality food and beverage to a variety of customers.

**Dietetic Technician Major**

In addition to the general Hospitality Management competencies, a graduate majoring in the Dietetic Technician program will be able to:

- Apply nutrition principles to menu planning and food production for a variety of customers.
- Analyze and apply nutrition assessment data to plan menus and nutrition education sessions and to provide nutrition care for persons/groups on both regular and modified diets.

**Foodservice/Restaurant Management Major**

In addition to the general Hospitality Management competencies, a graduate majoring in Foodservice/Restaurant Management will be able to:

- Plan, organize, and supervise the production and service of appropriate high quality food and beverage to a variety of customers.

**Travel/Tourism/Hotel Management Major**

In addition to the general Hospitality Management competencies, a graduate majoring in Travel/Tourism/Hotel Management will be able to:

- Apply destination geography knowledge as required for lodging and tourism industry.
- Plan, organize and supervise the delivery of services in both lodging and tourism operations.

**Specific Program Admissions Information**

Listed below are additional requirements for admission to the Chef Apprenticeship major and the Dietetic Technician major.

**Chef Apprenticeship Major**

- High school graduate or GED equivalency
- Placement into ENGL 101 Beginning Composition
- Placement into MATH 101 Business Mathematics
- Supplemental application required by the department (May 15 and November 15 deadlines)

**Dietetic Technician Major**

- High school graduate or GED equivalency
- Recommended high school or equivalent courses in Algebra, Chemistry and Biology
- Completed health statement (see program coordinator)
- Placement into DEV 031 or higher
- Placement into ENGL 100 or higher

**COURSE**  
**Quarter 1**  
- HOSP 122 Hospitality Sanitation ............................................................ 3  
**TOTAL CREDIT HOURS** ........................................................................ 3  

### Human Resources Management Technology

**Associate of Applied Science Degree**

Over the last several decades, the human resource (personnel) function has evolved into an extremely complex profession requiring an understanding of how each facet of human resources management impacts another and the organization as a whole. The plethora of federal and state laws regulating all aspects of the employee/employer relationship, compounded by conflicting judicial interpretations, require professionals skilled in understanding and applying these laws to day-to-day management decisions. Wrong decisions, by any representative of the organization, in hiring, discipline, termination, or the way employees are treated, may result in a multimillion dollar lawsuit, costing thousands of dollars in legal fees, even if the company prevails legally.

Senior management has begun to recognize that human resource management professionals, skilled in human resource and labor law, labor relations, policy development and administration, compensation and benefits, and employee relations, make a positive impact on a firm’s bottom line.

Columbus State’s Human Resources Management program teaches human resources management skills in a hands-on learning environment that bridges academic theory with “real world” applications. Students receive a foundational background in the many legal issues impacting human resources management, and they learn how to apply their comprehensive knowledge to a wide spectrum of human resources management functions.

Upon completion of the associate degree in Human Resources Management, the graduate will be able to:

- Research human resources laws, cases, and issues using the Internet and other resources.
- Apply human resources laws impacting private sector employers to day-to-day business operations.
- Write legal human resources policies, procedures, programs and employee handbook summaries for an organization.
- Develop protocol for and conduct the various types of interviews used in business.
Interactive Media

Interactive Media Associate Degree
Digital Video and Sound Major

The Interactive Media program provides the community with skilled professionals who can create and assemble multimedia products for corporate interactive training, advertising, and marketing purposes. Graduates are able to develop and produce scripts and computer animation, and apply multimedia technology to assemble graphics, text, sound, and video into meaningful productions.

The program supports an industry need to provide multimedia professionals to work in the ever-expanding market of integrated and interactive media communications, with a growing emphasis in Web site development.

The Interactive Media Associate Degree program is designed to impart four critical skills to its graduates:

- Design
- Scripting (source code and application), including HTML, CSS, MySQL, PHP, and Actionscript
- Familiarity with various design-oriented application programs including: Adobe Photoshop, Fireworks, Protocols, Avid Xpress, Premiere, AfterEffects, Flash, Dreamweaver, Illustrator, and Maya
- Experience in both the Macintosh and Windows platforms

By mastering these four areas, program graduates will be able to go beyond basic design and layout to complete the “big picture” regarding media structure and flowcharting. As a result, program graduates can cross cultural, aesthetic and technical boundaries.

The Digital Video and Sound major is designed to address the need for professionally trained graphic design and interactive media professionals who have the skill set to utilize audio and video assets (typically called “rich media”) in the production of new media whether in a CD-ROM, DVD, interactive Web sites or other delivery systems.

The Video Game Art and Animation track covers the core disciplines for video game art production. Students are provided the foundation in key areas that impact this field, including: time-based production, storytelling, a survey of the video game industry, traditional animation, etc. With this foundation, the remainder of the program will build on 3D character and environment production, audio integration and game development skills, conducted through 2D and 3D software, as well as various scripting and programming languages. Students will ultimately work on team-based game projects that expose them to the video game production process.

The jobs available in interactive multimedia are varied. Typical job possibilities for program graduates include multimedia technician, multimedia specialist, multimedia developer, media specialist, instructional design technician, computer graphic artist, 3D computer animator, multimedia illustrator, desktop media publisher, interface designer, animator, script integrator, digital journalist, and presentation artist.
Certification Courses
A series of online certificate courses are available for students interested in being certified in several Adobe software products: Dreamweaver, Photoshop and Flash. Each course is designed to prepare students to take the associate Adobe Certified Associate test for Web Communication, Rich Media Communication or Visual Communication. These tests are sanctioned by Adobe and offered to qualified students through Columbus State Community College and the Certiprof testing system (sanctioned by Adobe). Students taking these courses will be introduced to each objective and principle designed into the corresponding certification test. While completing these courses does not guarantee success for students taking the certification tests, the courses are a very focused preparatory tool for the certification test. These courses are offered exclusively in an online format.

Upon completion of the associate degree program in Interactive Media, the graduate will be able to:
• Possess a working-level knowledge of the interactive multimedia field and how it affects society and industry.
• Comprehend the relationship between design, marketing, and interactive multimedia projects.
• Understand the purpose and interrelationship between design, scripting, and software.
• Be able to evaluate the strengths and weaknesses of project design including storyboarding, diagramming, flowcharting, and brand relevance.
• Know the core concepts of scripting as they apply to multimedia and Web development.
• Learn the basic principles of digital video editing using various original or provided video clips.
• Understand the basic principles of 2D design, the elements of design, and concepts of forms and structures.
• Comprehend the basic concepts of 3D modeling: model construction, rendering, lighting, and animation.
• Create a functional, interactive, animated Web presence from conceptual stages to finished product.
• Possess extensive knowledge of industry standard Web animation software (Flash with a 30-week course sequence).
• Gain working knowledge of Web design application software using Dreamweaver.
• Use storyboard, flowchart and drawing skills to represent finished versions of a Web site, an interactive CD or a video.
• Complete an interactive portfolio.
• Gain real-world experience working as an intern in a multimedia-related company.

In addition to the Interactive Media competencies, graduates completing a Digital Video and Sound major will be able to:
• Understand the role of audio/visual production in an integrated marketing communications plan.
• Use software tools to capture audio and video from various sources.
• Use sound and sound editing channels to enhance video productions.
• Understand copyright and fair use laws as they relate to audio/video production.
• Stream and import video for web productions.
• Identify ways to incorporate text and character animation into video productions.
• Demonstrate an ability to record voice, music, and effect for multimedia products.
• Demonstrate an understanding of the processes involved in planning, scripting, recording, and editing a digital audio/video production.

In addition to the Interactive Media competencies, graduates completing a Video Game Art and Animation track will be able to:
• Demonstrate an understanding of the history, current industry and occupations that constitute the digital gaming industry.
• Possess fundamental visual and audio design/aesthetic skills in digital design, illustration, audio/sound effects and video in support of game development and design.
• Understand narrative methods with particular emphasis on those unique to video games.
• Understand the roles and responsibilities of team members and their collaboration in all phases of design, development and implementation.
• Demonstrate appropriate image-editing software and computer skills that directly support Gaming Art and Animation editing/enhancement and post-production workflow techniques.
• Be able to work as part of a larger technical/design team to complete tasks on time and on budget.
• Understand the fundamentals of game development for both Windows and specific game consoles. Develop a comprehensive professional portfolio to be used in pursuing jobs and/or internship opportunities.

Software/Hardware Requirements
Students taking courses in this curriculum may need to own or have access to hardware or software to pursue this degree. This is particularly important for students who are enrolled in distance-learning based sections of a particular course. Check with the program advisor to discuss specific course needs and options.

Interpreting/American Sign Language Education

Interpreting/American Sign Language Education Associate Degree
American Sign Language/Deaf Studies Certificate

The Interpreting/ASL Education Associate Degree program prepares graduates for entry-level interpreting/ASL positions where persons who are deaf or hard of hearing and hearing persons must communicate with each other. The associate degree program offers extensive course work in American Sign Language. A language lab helps students develop ASL and interpreting skills. A three-quarter practicum gives students opportunities to gain first-hand experience applying their interpreting skills and knowledge of professional ethics under the supervision of an agency interpreter.

To qualify for admission to the associate degree program, students must (1) have an entry-level knowledge of American Sign Language and deaf culture (equivalent to CSCC’s ITT 141, 142, 130 and 111); (2) have a good command of spoken English; (3) agree to adhere to the Code of Professional Conduct established by the Registry of Interpreters for the Deaf, Inc.; (4) attend a Mandatory Information Session conducted by the coordinator to complete an application form for the program; (5) agree to complete a minimum number of ITT courses each quarter; and (6) agree to daytime availability for one of their Practicum placements. Prior to acceptance into the Interpreting program, students may take any general education courses listed in the Plan of Study, and any courses listed in the ASL/Deaf Studies Certificate without permission of the ITT program coordinator.

The seven-quarter program is sequential, carefully integrating theory and skills with problem solving and critical thinking. Students must adhere to the Code of Professional Conduct of the Registry of Interpreters for the Deaf, Inc. in order to ensure successful language learning, students are REQUIRED to participate each quarter in activities and events outside of class time. Students must complete one quarter of their Practicum experience in a K-12 educational setting. This requires that students be available during normal, day school hours for a minimum of 15 hours per week during that Practicum experience.

Upon completion of the associate degree in Interpreting/ASL Education, the graduate will be able to:

- Demonstrate unique skills required for interpreting in specialized settings (e.g., oral, medical, mental health, deaf-blind, etc.).
- Demonstrate an understanding of the interpreting/translating RID Code of Professional Conduct.
- Demonstrate basic competency with American Sign Language (ASL) as well as a basic understanding of signed English.
- Demonstrate ability to interpret spoken English messages into ASL, and ASL messages into spoken English.
- Demonstrate ability to transliterate spoken English messages into Manually Coded English, and Manually Coded English into spoken English.
- Explain the role of the interpreter to both deaf and hearing consumers.
- Demonstrate knowledge of the deaf community and sensitivity toward the cultural traditions of the community.
- Assess a deaf consumer’s preferred mode of communication.
- Analyze and adapt the physical aspects of the interpreting setting or be able to adapt to physical aspects that cannot be changed.
- Demonstrate knowledge of various agencies/organizations serving the deaf community.

The CSCC Interpreting/American Sign Language Education Program is approved by the State of Ohio Department of Education. Students who successfully complete the Interpreting/American Sign Language Education Associate Degree are eligible to apply for their Educational Interpreting License from the State of Ohio Department of Education.

Specific Program Admissions Information
Listed below are additional requirements for admission to Interpreting/ASL Education Program.

- High school graduate or GED equivalency.
- Entry-level American Sign Language skills equivalent to CSCC’s Beginning ASL I (ITT 141), Beginning ASL II (ITT 142), Fingerspelling (ITT 130), and Introduction to the Deaf Community (ITT 111)—all with a “C” or better. Beginning ASL I and Introduction to the Deaf Community are offered autumn and spring quarters. Beginning ASL II and Fingerspelling are offered winter and summer quarters. Individuals with ASL experience may meet this requirement by taking an ASL placement exam. Contact Gerald Eichler at geichler@csc.edu.
- COMPASS™ test placement into ENGL 101 Beginning Composition or above, “No Reading Required,” and MATH 102.
- Complete the form “Application to Become an Interpreting/ASL Education Major.” This form can be obtained ONLY from the coordinator during a Mandatory Information Session. Mandatory Information Sessions tend to be scheduled in early January and July. Contact the coordinator of the Interpreting/ASL Education program, Chris Evenson, (614) 287-5616, for dates/times of the next Mandatory Information Session.
- Submit all previous college and university transcripts to the Registrar’s Office.
- Admitted with, and maintain, a minimum 2.0 GPA.

Students who go out-of-sequence may re-enter the Interpreting program providing space is available. Those students will be required to meet with an advisor, take applicable skills assessment exams, and must follow the current year’s Plan of Study for graduation, including any and all course work that has been added to the curriculum since their original start of the program.

Note: American Sign Language/Deaf Studies Certificate candidates do not need to attend a Mandatory Information Session.
Interpreting /ASL Education Associate Degree

Please check course descriptions for prerequisites to all courses in this curriculum.

COURSE   CR
Quarter 1 (A)
ENGL 101  Beginning Composition ..............................................3
ITT 110  Introduction to Interpreting ..............................................5

ITT 174  Religious Interpreting .......................................................3
ITT 175  Text Preparation and Analysis ..........................................3
ITT 265  Special Topics in Interpreting, ASL, Deaf Studies .................1–5

American Sign Language/Deaf Studies Certificate
For those individuals wanting to learn about people who are deaf, their unique culture and community, and to be able to converse with them via American Sign Language (ASL), Columbus State offers a certificate program. This program does not prepare individuals to become interpreters; it is strictly a program to enhance/establish communication skills and to learn about deafness. Attending a Mandatory Information Session with the coordinator is not required; students simply register for the courses. Once all courses have been successfully completed, students apply for the certificate by contacting the Interpreting/ASL education coordinator. Individuals successfully completing the following eight courses (35 credit hours) must apply for their certificate within four quarters of completing Advanced ASL I (ITT 145).

For additional information about the American Sign Language/Deaf Studies Certificate, please see the Interpreting/ASL education program coordinator. Individuals who have ASL experience may take an ASL placement test. Contact Gerald Eichler at geichler@csc.edu for more information.

*Registration for the following eight courses may be restricted to Interpreting/ASL Education majors for the first two weeks of registration. Seats not taken by majors will be released to any nonmajor students meeting the prerequisites 14 days after the first day of registration. Contact the coordinator for registration dates for nonmajors.

Landscape Design/Build

Landscape Design/Build Associate Degree

The Landscape Design/Build program prepares graduates for a wide range of careers with landscape design firms, materials wholesalers and retailers, commercial and private landscape facilities, and landscape contractors. Landscape Design/Build students learn plant selection, materials specification, landscape design, landscape construction estimating, and landscape maintenance procedures. Students in the program share common courses in surveying, soils, and drafting with other construction sciences students, giving the students a strong sense of the construction industry.

The Landscape Design/Build program provides students with a solid educational background in communication skills, math, computer literacy, operations, humanities, and behavioral sciences.

Upon completion of the associate degree in Landscape Design/Build, the graduate will be able to:

- Assist with the preparation of contract/design documents and construction specifications.
- Assist landscape professionals with the management and implementation of construction processes.
- Select suitable herbaceous and woody plants and properly install them.
- Estimate residential landscape project costs by utilizing take-off and costing methods.
- Be able to read and interpret plans and drawings.
- Assist in the survey and stake out of the job site.
- Create manual and/or computer generated designs of landscape projects.
- Create presentation materials using a variety of graphic techniques.
- Assist in the maintenance of both commercial and residential landscapes.
- Assist in the construction of landscapes and outdoor environments.
- Assist in the design and installation of irrigation systems.
- Identify common pests, diseases and problems as they relate to the landscape.

Upon completion of the associate degree in Landscape Design/Build, the graduate will be able to:

- Identify common pests, diseases and problems as they relate to the landscape.
- Assist in the design and installation of irrigation systems.
- Create presentation materials using a variety of graphic techniques.
- Assist in the maintenance of both commercial and residential landscapes.
- Assist in the construction of landscapes and outdoor environments.
- Assist in the design and installation of irrigation systems.
- Identify common pests, diseases and problems as they relate to the landscape.

Law Enforcement

Law Enforcement Associate Degree
Corrections Major

Law Enforcement Major

Law Enforcement Major–Academy Track

Persons trained for the law enforcement field are in high demand in many public and private organizations. Columbus State’s Law Enforcement program teaches students the technical skills they need to enter or advance in a wide variety of positions in criminal justice. Four associate degree majors give students a range of options to meet their personal career goals.

The Law Enforcement major prepares students for a variety of careers in federal, state, or local law enforcement agencies. The Corrections major trains students for careers in probation, parole, correctional institutions, community-based correctional programs, and social service agencies. The Law Enforcement–Academy Track major offers additional training required by the Ohio Peace Officers Training Council (OPOTC) for certified peace officers. Graduates of the Academy Track are eligible to take the OPOTC certification exam.

Specific Program Admissions Information
Listed below are additional requirements for admission to the Academy Track Program. Applicants must:
• Have a high school diploma or GED equivalency.
• Pass a physical.
• Take a personality factor inventory.
• Submit to a criminal history check (students with prior felony convictions may be excluded from the program; contact the department chairperson for more information).
• Possess a valid Ohio driver’s license.
• Complete a supplemental application required by the department.

Upon completion of the associate degree in Law Enforcement, the graduate will be able to:
• Locate and apply criminal law correctly.
• Prepare required reports accurately and in a concise, readable style.
• Prepare cases for trial and professionally testify in a court of law.

Corrections Major
In addition to the general Law Enforcement competencies, a graduate majoring in Corrections will be able to:
• Prepare pre-sentence reports and other required reports accurately.
• Demonstrate knowledge of effective correctional institution security measures.

Law Enforcement Major
In addition to the general Law Enforcement competencies, a graduate majoring in Law Enforcement will be able to:
• Demonstrate proper arrest procedures.
• Locate applicable case law.
• Process information at an accident scene and correctly complete required reports.
• Identify hazardous materials and initiate proper response.

Law Enforcement Major – Academy Track
In addition to the general Law Enforcement competencies, and the Law Enforcement major competencies, a graduate majoring in Law Enforcement – Academy Track will be able to:
• Understand and handle safely the double-action revolver, the semi-automatic pistol, and the shotgun.
• Demonstrate proficiency with the handgun and shotgun to current Ohio Peace Officer Training Council (OPOTC) standards for qualification.
• Perform safe and effective driving maneuvers to current OPOTC standards.
• Demonstrate basic crowd control techniques and riot formations.
• Demonstrate recommended self-defense techniques.

Marketing

Marketing Associate Degree
Direct Marketing Major
Retail Management Major
Direct Marketing Certificate
Electronic Marketing Certificate
Pre-MBA Certificate

Marketing is at the heart of what every business must do to be successful: attract and retain customers. Marketing professionals are responsible for knowing how to produce, price, promote, and distribute goods and services. Program graduates enjoy career opportunities in such diverse areas as product management, advertising, market research, public relations, Web-based businesses, customer service and sales.

The Marketing program provides a strong foundation in fundamental marketing concepts and principles. The advanced courses provide the opportunity for studying topics of particular interest to the student in such areas as consumer behavior, public relations, and advanced sales techniques. All of the courses in the Marketing Associate Degree program can be completed in both a traditional and distance learning option. The traditional class room experience continues to provide students with high quality instruction in a small classroom setting at our main campus and off-campus locations. The distance learning option provides the same high quality learning as traditional instruction, with the flexibility of being able to complete coursework online or through video based instruction.

The Direct Marketing and Retail Management majors build on a solid foundation in marketing to provide advanced skills in these specialized areas. The Direct Marketing major provides graduates with a survey of the major components of direct marketing including creative design, list selection, database management, and financial evaluation of direct marketing programs. Particular emphasis is placed on interactive technologies and their impact on direct marketing. The Retail Management major provides in-depth exposure to retail management principles and a strong internship program supported by many of the city’s leading retail operations.

The MBA (Master of Business Administration) is one of the most sought-after professional degrees—not only by those currently working in business but also by many other professionals who are increasingly in need of these types of skills. The Pre-MBA Certificate is designed for individuals who have already completed a baccalaureate degree and wish to pursue an MBA or for professionals in various fields who wish a basic grounding in business principles through an introduction to the business disciplines. All of the courses in this certificate can be completed online. For more information, access the Pre-MBA Web site at http://www.csc.edu/premba.

Transfer agreements are available that enable Marketing graduates to transfer to other institutions to complete their baccalaureate degree. Please contact advisor if interested in this option.

Columbus State Community College is nationally accredited by the Association of Collegiate Business Schools and Programs (ACBSP) for the offering of its business programs that culminate in the Associate of Arts, Associate of Science, and Associate of Applied Science degrees.

Upon completion of the associate degree in Marketing, the graduate will be able to:

- Understand the role of branding, the concept of brand equity, and brand elements in designing marketing programs and strategies.
- Demonstrate knowledge of the major communications tools used in marketing, with particular emphasis on developing a creative brief and comprehensive direct marketing campaign.
- Demonstrate knowledge of how consumer behavior impacts overall marketing strategy and influences the purchaser’s decision-buying process as identified by marketing research.
- Comprehend the sales process and understand how it relates to consumer and business-to-business purchasing.
- Identify issues that arise in global marketing and describe the basic mechanisms for doing business in foreign markets.
- Understand various consumer and industrial systems of distribution and supply chain management.
- Describe the components of the successful e-Commerce business model and their interrelationship.
- Understand the role of ethical decision making in the business world.

Direct Marketing Major
In addition to the Marketing competencies, a graduate with a Direct Marketing major will be able to:

- Define and develop a target market and select the most appropriate methods to reach it.
- Select and use the appropriate methodology to assess the costs of direct marketing efforts.
- Understand and be able to utilize interactive direct marketing media.
- Plan and implement telemarketing campaigns for purposes of direct selling, fund-raising, and business-to-business sales.
- Integrate creative activities and outcomes with appropriate direct marketing techniques.

Retail Management Major
In addition to the Marketing competencies, a graduate with a Retail Management major will be able to:

- Explain all facets of the buying and selling of merchandise.
- Exhibit knowledge of merchandise management including planning, control, and evaluation of the merchandise mix.
- Identify the various types of stock control systems.
- Develop and execute sales promotion activities including merchandise presentations.
- Describe the logistics of dealing with suppliers, merchandise handling, receiving, and stocking.
- Demonstrate an understanding of all phases of basic store operations.
- Demonstrate an understanding of mathematical tools that

- LOGI 100 | Principles of Logistics | 5 |
- ECON 240 | Principles of Macroeconomics | 5 |
- BMGT 257 | Project Management | 3 |

*Students must meet the prerequisite requirements before enrolling in these classes. These prerequisites can be completed by taking Math 102 Beginning Algebra I (for Accounting and Economics) and Math 103 Beginning Algebra II (for Statistics) with a grade of “C” or better.*
Massage Therapy

Massage Therapy Associate Degree
Massage Therapy LMT Degree Completion
Massage Therapy Certificate
Massage Therapy Advanced Techniques Certificate

The Massage Therapy program meets all requirements to sit for the State of Ohio Medical Board examination for Massage Therapy. It prepares the students to work in the massage therapy field, but not limited to, health and fitness environments, salon and day spas, medical offices, private practices and many other opportunities.

The Massage Therapy LMT Degree Completion program is designed for currently Licensed Massage Therapists to earn an associate of applied science degree. With proof of current licensure by the State of Ohio, the student will be awarded 45 technical credits towards their degree.

The Massage Therapy Advanced Techniques Certificate includes training in various advanced topics in massage therapy designed to prepare students for positions in specialized areas.

Upon completion of the associate degree in Massage Therapy, the graduate will be able to:
- Demonstrate and be able to perform soft tissue manipulation techniques which may be appropriate for use in the treatment of disorders of the human body.
- Effectively communicate the beneficial effects of massage to patients.
- Demonstrate the ability to assess and appropriately treat disorders of the human body, which may benefit from massage.
- Display an understanding and demonstrate the ability to establish and maintain appropriate patient and business records.
- Display an understanding of skills necessary to establish and operate a massage therapy practice or integrate into a multi-disciplinary environment.
- Demonstrate the ability to communicate effectively with other health care providers as to the advisability of massage.
- Display an understanding of and demonstrate the effective use of complementary therapeutic modalities in the treatment of ailments of the human body.
- Display an understanding of, and effectively educate patients in the proper care and prevention of musculoskeletal injuries.
- Demonstrate the ability to provide therapeutic massage in accordance with the State Medical Board of Ohio scope of practice and the professional ethical standards as determined by the American Massage Therapy Association.

Specific Program Admissions Information
Listed below are additional requirements for admission to the Massage Therapy degree program:
- High school graduate or GED equivalency
- Placement into ENGL 101 Beginning Composition
- Placement into MATH 101 Business Math
- Student must obtain a Certificate of Preliminary Education from the State Medical Board of Ohio

Mechanical Engineering Technology

Mechanical Engineering Technology Associate Degree

Individuals who are mechanically inclined and like to solve problems can have a satisfying career in the field of engineering that creates machines to work for people: Mechanical Engineering.

Columbus State’s Mechanical Engineering Technology program prepares students to enter this growing profession where the pool of applicants does not meet the demand. The program presents an inside look at the manufacturing process, as well as highlights skills with drafting, computers, and troubleshooting. Coursework includes an introduction to manufacturing technology, hydraulics, robotics, materials science, and computer aided drafting and manufacturing. Students get their hands on the college’s Solar Car and can be part of the team that designs the next winner of the Society of Automotive Engineers MiniBaja® competition.

Graduates are qualified to assist engineers in the industrial, consulting, scientific research and consulting communities or to transfer to a four-year college to pursue a Bachelor of Science in Engineering degree.

Engineering technology teaches students how to organize thoughts and approach problems—processes which are not only critical to their work, but also beneficial in everyday life. Mechanical engineering skills can take graduates anywhere—from designing stronger yet lighter helmets for the NFL to creating wheelchairs that are more maneuverable.

Upon completion of the associate degree in Mechanical Engineering Technology, the graduate will be able to:

- Apply basic knowledge of manufacturing and engineering technology, procedures, symbols, and graphics skills to the reading and production of sketches, drawings, blueprints and specifications.
- Assist in establishing tolerances related to production, by utilizing manual and/or computerized methods.
- Make significant contributions to the production of manufactured goods by utilizing skills and knowledge of: drafting, computers and automation technology, sound manufacturing practices, quality measures, machine capabilities/limitations, and assist in the selection of product equipment.
- Contribute to the solution of engineering and design problems involving mechanical systems, by utilizing knowledge and skills in electrical and mechanical principles, material performance and selection, basic machine elements, sound design and engineering practices.
- Apply computers and computer language to the solution of engineering problems.
- Utilize various quality tools and techniques such as SPC and TQM to support production in manufacturing area and other applicable work situations to improve any and all quality measures.

Medical Assisting

Medical Assisting Associate of Technical Studies Degree
Medical Assisting Certificate

The Medical Assisting program prepares graduates to work as medical assistants primarily in ambulatory settings such as medical offices, urgent care centers and clinics. Medical assistants are multi-skilled professionals who assist in patient care management. They perform a broad range of clinical and administrative duties, including scheduling and receiving patients, establishing and maintaining medical records, handling telephone calls, completing correspondence, processing insurance claims and managing finances. Medical assistants are a valuable member of the health care team, and job opportunities are numerous in central Ohio and nationwide. Graduates of the program are eligible to take the National Certification examination which is administered three times a year.

Upon completion of the Certificate Program in Medical Assisting, the graduate will be able to:
- Perform clerical functions to include execution of bookkeeping principles and special accounting entries.
- Process insurance claims including the application of managed care policies both diagnostic and procedural coding.
- Identify medical/legal issues within the medical office, respecting confidentiality and documenting appropriately in the medical record.
- Perform risk-management procedures and patient instruction for follow-up care health maintenance and disease prevention.
- Properly handle and dispose of infectious waste and biohazard materials in compliance with government regulations.
- Perform and collect various specimens in compliance with Standard Precautions set forth by the Centers for Disease Control and Prevention.
- Perform various diagnostic tests ordered by the physician, utilizing quality control procedures.
- Conduct various patient care procedures administrative, clinically, and laboratory, including preparation and administration of oral and parenteral medications as directed by the physician.
- Maintain and perform inventory of administrative and clinical supplies and equipment following office policy.

Listed below are additional requirements for admission to the Medical Assisting program:
- High school graduate or GED equivalency
- Placement into MATH 102 Beginning Algebra I or completion of DEV 031 with a grade of “C” or higher
- Placement into ENGL 101 Beginning Composition or completion of ENGL 100 with a grade of “C” or higher
- Placement OUT of reading requirements or completion of DEV/ESL courses
- Attend a Medical Assisting program information session (Program applications are available ONLY at the information sessions.)
- Completion of MULT 101 with a grade of “C” or better
- Completion of CIT 101 with a grade of “C” or better
- Current Heart Association Health Care Provider CPR with AED certification or completion of MULT 103 with a grade of “C” or better
- Current Red Cross First Aid certification or completion of MULT 103 with a grade of “C” or better
- BIO 121 and 122 require completion of high school biology and chemistry or BIO 100 within the last five years and CHEM 100 within the last three years. Contact the Biological and Physical Sciences Department (Nestor Hall, 4th Floor) for the most current information. Phone number is (614) 287-2522 or 5107.
- Students are required to maintain a grade of “C” or better in all basic and technical studies.
- Drug screening and a background check may be required.

Statement Regarding Infectious Diseases
Students in any of the Allied Health programs, including Medical Assisting, perform their clinical work on real people. Columbus State does not discriminate against students, faculty, or patients in any way, or based on color, creed, national origin, gender, disability or sexual preference. The patient populations with whom students will work come from all walks of life, and students may therefore be exposed to many types of communicable diseases. These are not limited to, but may include, Hepatitis (A, B, C or D), HIV/AIDS, Tuberculosis, Mumps, Rubella, Rubeola, etc.

ALL students are required to have appropriate immunizations after they are admitted to the program and before autumn quarter begins (information is given to all admitted students). Additionally, although all precautions are taken to minimize exposure and risk, there is always a slight possibility that precautions may fail or that a student may accidentally expose him/herself. All students entering the Medical Assisting program must be aware of this slight, but real, potential risk. Students are required to maintain personal health insurance.

Statement Regarding Pregnancy
Student disclosure of pregnancy status to program personnel is strictly voluntary. While the college does not require that a pregnant student disclose her pregnancy, the college encourages any student who is pregnant, or may become pregnant, to discuss with her advisor any potential risks and limitations.

Pregnancy does not preclude a student from remaining in a health-related program. Students disclosing a pregnancy are encouraged to have their health care practitioner document any restrictions that may assist the college in providing reasonable accommodations when required.

Should the student’s health care provider indicate that there are restrictions, once notified, the college is required to abide by the restrictions. If a student is placed on restrictions by her health care provider, and these restrictions are significant enough to compromise the student’s ability to continue in a laboratory course or clinical placement, the student may be required to withdraw from the course and re-enter the program at a later date, following delivery. If a health care provider indicates there are no restrictions, the student may continue in her laboratory or clinical course without any changes.

Medical Laboratory Technology Associate Degree

Medical laboratory technicians play an important role in the practice of modern medicine. They perform diagnostic procedures in the health care setting, such as chemical analysis of body fluids, classification of blood cells, identification of disease producing microorganisms, and the selection of compatible donor blood for transfusion. The Medical Laboratory Technology Associate Degree program is designed to prepare graduates to perform laboratory procedures in a variety of settings. Career and employment opportunities include hospitals, research and reference laboratories, public health and veterinary facilities, and environmental and quality assurance laboratories. Graduates may also pursue careers in marketing, sales and customer service.

The first six quarters of the Medical Laboratory program provide the students with entry-level knowledge and skills in clinical chemistry, clinical microbiology, hematology, immunohematology, immunology, and phlebotomy in a classroom laboratory setting. This training is enriched during the seventh quarter of the program when students have the opportunity to apply their previously acquired knowledge and skills in an actual working environment. Affiliated hospital and private laboratories located within our service district of approximately 60-miles of Columbus will be utilized for this ten-week clinical practicum.
Students who successfully complete the program are eligible to take the certification examination administered by the Board of Registry of the American Society for Clinical Pathology and become a certified MLT (ASCP). Graduates are also eligible to take the certification examination administered by the National Credentialing Agency for Laboratory Personnel and become a certified clinical laboratory technician (CLT). With additional education and/or technical experience, graduates may also advance in the field to become a technologist, research specialist, manager or educator.

The Medical Laboratory Technology program at Columbus State is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) at 5600 N. River Rd, Rosemont, IL 60018-5119, telephone (773) 714-8880. The program has produced over 800 graduates in the past 35 years who have consistently met or exceeded the national average on credentialing examinations. The Ohio Board of Regents recognizes Columbus State’s MLT program as a “Program of Excellence.”

The Medical Laboratory Technology Program delivers all program technical lecture courses in a Web-based format (online) and the technical laboratories are offered face-to-face in the campus laboratories located in Union Hall.

Alternative Web-Based Option for Students Outside of the Service District
This option is designed for students who are not located in our service district (outside Columbus, Ohio and surrounding counties). Both the Medical Laboratory Technology technical lecture and technical laboratory components are available in a Web-based format for students currently working in a clinical laboratory. The employer must be willing to sponsor the student by entering into a contractual agreement with Columbus State Community College and to provide the clinical training for seven quarters working closely with Medical Laboratory Technology Program faculty. Students interested in pursuing this option will need to contact the Medical Laboratory program coordinator for specific entrance requirements. The Medical Laboratory program contact number is (614) 287-2518. The program’s home page is http://www.cscc.edu/MLT/index.htm.

Medical Laboratory Technology
Upon completion of the associate degree in Medical Laboratory Technology, the graduate will be able to demonstrate entry-level competencies in the following areas of professional practice:
1. Pre-analytical, analytical, and post-analytical processes in all disciplines of the clinical laboratory.
2. Theoretical knowledge needed to assure accuracy and validity of test results by clinical correlation and quality control performance.
3. Professional attitudes and behaviors which are necessary for gaining and maintaining the confidence of the health care community.
4. Meeting the requirements to take a national certifying examination for Medical Laboratory Technicians.

Specific Program Admission Information
Listed below are additional requirements for admission to the Medical Laboratory Technology:
• High school biology with a grade of “C” or better completed within the last five years, or completion of BIO 100 with a grade of “C” or better, or equivalent college credit
• Placement into ENGL 101, or ENGL 111, or completion of ENGL 100 with a grade of “C” or better
• Completion of MATH 103 with a grade of “C” or better, or equivalent college credit
• Completion of CHEM 113 with a grade of “C” or better, or equivalent college credit
• Completion of MLT 100 with a grade of “C” or better
• Completion of CIT 101, with a grade of “C” or better or equivalent college credit
• Completed health record on file in the Health Records Office
• Minimum GPA of 2.500 or better through most recently completed course work
• Students may be required to complete drug testing, background screening, and a Health Occupation Basic Entrance Exam (HOBET).

Mental Health/Chemical Dependency/Mental Retardation

Associate Degree–Mental Health Track
Associate Degree–Chemical Dependency Track
Associate Degree–Mental Retardation Track
Prevention Specialist Certificate
Community Living Specialist Certificate
Advanced Chemical Dependency Certificate
Advanced Mental Health Certificate
Advanced Mental Retardation Certificate
Community/Habilitation Assistant Certificate

With social, economic, and moral issues constantly changing, society is faced with increasingly complex problems which require professional, caring helpers. This evolution has created a high demand for human service specialists. Human service specialists have a professionally and personally challenging role in providing services to both children and adults with a variety of needs and/or disabilities. Graduates work with persons with mental retardation and/or developmental disabilities, emotional/mental disorders, substance abuse and chemical dependency, as well as individuals who have co-occurring disorders. Specialists also work in consultation with psychologists, educators, psychiatrists and social workers.

Innovative educational approaches including videotaping, simulated situations, role-playing, marathon group participation and discussion in small group seminars are used to help students develop the knowledge, therapeutic skills, and necessary attitudes to succeed in this profession. The program stresses development and exploration of both personal and professional characteristics graduates will need to be effective helpers.

The associate degree program enables students to specialize in one of the following educational tracks during their second year: Mental Health, Chemical Dependency/Substance Abuse Prevention or Mental Retardation. The six-quarter, three-track program includes 560 hours of hands-on experience under the direct supervision of professionals in local agencies. Practicum experiences are available in a variety of community agencies which include mental health centers, day habilitation programs, state psychiatric hospitals, schools, senior centers, workshops, private hospitals, rehabilitation facilities, drug and alcohol treatment centers, homeless shelters, supported living environments, foster care facilities, youth treatment programs, and treatment programs within the criminal justice system.

Graduates who complete the associate degree program are eligible to apply for a Certificate of Registration as a Social Work Assistant with the State of Ohio Counselor/Social Worker and Marriage and Family Therapist Board. The Mental Health/Chemical Dependency and Mental Retardation program is accredited by the Council for Standards in Human Service Education.

The program also offers the following certificate programs:

Prevention Specialist Certificate
This 38-credit-hour certificate is open to students with an associate, a bachelor’s, or a master’s degree. Completion of this certificate meets educational practicum hours requirement for substance abuse prevention professional certification in the state of Ohio.

Community Living Specialist Certificate
This is a program (55–59 credit hours) for students who have, in the past, struggled with their own severe mental illness. Students make use of their coping skills to work effectively with persons with severe mental illness. Students participate in two to three clinical practicum experiences on a mental health community treatment team.

Advanced Chemical Dependency Certificate
This is a 52-credit-hour program for students with an associate, a bachelor’s, or a master’s degree in a related field. Completion of this certificate meets the 270 hours of acceptable chemical dependency training for CD licensure. Students have three or four supervised clinical practicum experiences, including one with clients who have co-occurring disorders.

Advanced Mental Health Certificate
This 52-credit-hour program is open to students with an associate, a bachelor’s, or a master’s degree. The curriculum provides courses focused on the knowledge and skills necessary to work in the mental health field. Students participate in four clinical practicum experiences in a variety of human service agencies.

Advanced Mental Retardation Certificate
This is a 51-credit-hour program designed for students with an associate, a bachelor’s, or a master’s degree. The curriculum offers courses focused on the knowledge and skills necessary to work with clients with MR/DD issues. Students participate in four clinical practicums in a variety of human service agencies.

Community/Habilitation Assistant Certificate
This is a 28-credit-hour program for students who have a developmental disability. Course work is adapted to a fifth grade reading level. The curriculum provides students with the knowledge and skills necessary to work as an assistant in the MR/DD field. Students participate in three clinical practicum experiences in a variety of human service agencies.

Courses MHCR 112, MHCR 115, MHCR 135, MHCR 191, MHCR 241, MHCR 247, MHCR 258, MHCR 291, and MHCR 298 are approved by Ohio Department of Mental Retardation and Developmental Disabilities in obtaining adult service certification.

All technical courses in the chemical dependency track are accepted by Ohio Chemical Dependency Professional Board and for renewal of social work licensure.
Upon completion of the associate degree in Mental Health/Chemical Dependency/Mental Retardation, the graduate will be able to:

- Describe the philosophy and benefits of community support groups in the recovery process.
- Collect data and monitor progress.
- Use counseling skills.
- Plan for, lead, and process groups.
- Apply conflict resolution and anger management skills.
- Formulate assessments.
- Demonstrate an awareness of and involvement in community advocacy activities.
- Interact effectively with diverse populations.
- Make appropriate referrals.
- Demonstrate ethical behavior.
- Develop and/or implement treatment/service plans.
- Develop and/or implement strategies to meet treatment/service goals.
- Apply service coordination/case management skills.
- Apply computer literacy skills.
- Demonstrate self-assessment skills.

In addition to the general outcomes listed above a graduate in the Chemical Dependency track will be able to:

- Identify and demonstrate the 12 Core Functions of a chemical dependency counselor.
- Recognize and identify significant signs and symptoms of chemical dependency using a variety of assessment tools.
- Identify varying levels of care for chemical dependency treatment and common criteria for appropriate referral.
- Identify relapse dynamics/triggers and utilize a variety of intervention strategies.
- Recognize stages of change and implement appropriate treatment strategies.

MH/CD/MR has articulation agreements with the following four-year colleges/universities: Ohio Dominican University, Otterbein College, Capital University, Franklin University, and University of Cincinnati.

Because students and workers in the health care field may be exposed to infectious materials and communicable diseases, the program emphasizes safety and prevention.

**Specific Program Admissions Information**

Listed below are additional requirements for admission to the Mental Health/Chemical Dependency/Mental Retardation program:

- Submission of an official copy of high school transcript verifying graduation or GED to Records and Registration.
- Attendance at a (voluntary) MH/CD/MR program orientation session.
- Placement out of or completion of DEV 031 and 044.
- Completion of ENGL 101 and PSY 100 with a “C” or higher.
- Completion of the following five courses with a grade of “C” or higher:
  - MHCR 111: Introduction to Mental Health
  - MHCR 112: Introduction to Mental Retardation
  - MHCR 114: Introduction to Chemical Dependency
  - MHCR 115: Introduction to Counseling
  - MHCR 117: Introduction to Documentation Skills
- Compliance with and completion of all additional program requirements outlined in the program’s admission policy.

- Mandatory attendance at a group admissions interview with the Mental Health/Chemical Dependency/Mental Retardation admissions coordinator and clinical coordinator.

### Associate, baccalaureate or master’s degree in a related field is required.

Students may pursue additional optional training in the following:

- MHCR 230 Supervision and Ethics in Human Services
- MHCR 230A Supervision in Human Services
- MHCR 230B Ethics in Human Services
- MHCR 234 Therapeutic Laughter
- MHCR 266 Treatment in the Criminal Justice System
- MHCR 270 Special Topics in CD Counseling
- MHCR 280 Special Populations in Human Services
- MHCR 290 Special Topics in Prevention

(See course descriptions.)
Multi-Competency Health

Associate of Applied Science Degree or
Associate of Technical Studies Degree
Basic Electrocardiography Certificate
Health Care Manager Certificate
Histology Certificate (Accredited by NAACLS)
Phlebotomy Certificate (Approved by NAACLS)

Many health care facilities have reorganized, and the job roles within these systems have adjusted to provide care and services based on patient needs. Many employment opportunities have been created for the individual who has documented competencies in a variety of health care skills. Multi-Competency Health provides the flexibility for students to gain these important skills in health care. Many of these courses require a clinical placement. Fingerprinting and drug screening may be required for this clinical placement. The student has many options from which to choose in Multi-Competency Health.

Option 1: Associate Degree
An Associate of Applied Science degree (A.A.S.) or an Associate of Technical Studies degree (A.T.S.) in Multi-Competency Health can be obtained by:

A) Associate of Applied Science (A.A.S.) option: A student may earn this degree option by choosing two or more certificate programs, one of which must be in MULT or NURC (Nursing Certificate programs), and at least six hours of technical options for a minimum of 49 technical hours. The student also completes the required general education courses, the required basic related courses, and the technical core courses. This degree allows the student to choose the multi-skill grouping of certificates that best suits his/her interest or employer needs.

B) Associate of Technical Students (A.T.S.) option: “Designing Your Own Degree” (Refer to the Graduation Requirements for the A.T.S. in the College Catalog.)

Upon completion of the associate degree requirements in Multi-Competency Health, the graduate will be able to:
• Use medical terminology correctly.
• Recognize life-threatening situations and take appropriate action.
• Demonstrate proficiency in technical skills.
• Work in a health care organization as a valued member of the health care team.
• Demonstrate interpersonal communication skills.
• Demonstrate effective infection control and safety practices.

Option 2: Certificate Programs
Many certificate programs are offered through the Multi-Competency Health Technology. These are focused technical programs that result in a certificate of completion. The certificate programs range from those designed for anyone interested to those that require completion of a health care program or specific licensure. Many area health care employers are interested in students who have successfully completed one or more of these certificates.
Option 3: Enhance or Complement Primary Skills in Nursing or Allied Health

There are many courses within Multi-Competency Health that can be taken in association with the degree option, as a complement to a certificate program, or as stand-alone courses that meet a professional need or personal interest. The requirements for each course vary. Many of these courses are open to all students and have no prerequisites. Others require completion of a health record.

Basic Electrocardiography (EKG) Certificate
A student completing the EKG Certificate will be able to:
- Position leads and operate electrocardiographic equipment correctly.
- Obtain and prepare an electrocardiography recording for analysis by a physician.
- Recognize and correct technical errors in an electrocardiography recording.
- Provide safe, professional, direct patient contact, specifically in the areas of infection control, electrical safety, privacy and environmental safety.

Health Care Manager Certificate (Online Certificate)
A student completing the Health Care Manager Certificate will be able to:
- Apply theories and principles of human resource management to real life health care situations.
- Generate action plans, implementation activities, and evaluation processes to assure continuous quality improvement in health care institutions.
- Apply strategies, processes and current trends in health care management.
- Understand risk management and the underlying legal principles inherent in the health care system.

Phlebotomy Certificate
A student completing the Phlebotomy certificate will be able to:
- Communicate (verbally and nonverbally) effectively and appropriately in the workplace.
- Demonstrate knowledge of the health care delivery system and medical terminology.
- Demonstrate knowledge of infection control and safety.
- Demonstrate basic understanding of the anatomy and physiology of the main body systems, and demonstrate basic knowledge of the circulatory, urinary, and other body systems necessary to perform specimen collection tasks.
- Demonstrate understanding of the importance of specimen collection and specimen integrity in the delivery of patient care.
- Demonstrate knowledge of collection equipment, various types of additives used, special precautions necessary, and substances that can interfere in clinical analysis of blood constituents.
- Follow standard operating procedures to collect specimens.
- Demonstrate understanding of requisitioning, specimen transport and specimen processing.
- Demonstrate understanding of quality assurance and quality control in phlebotomy.
- Complete eligibility requirements to sit for American Society for the Clinical Pathology certification exam.

Specific Program Admissions Information
Listed below are additional requirements that may apply for admission to the degree programs in Multi-Competency Health Technology.
- High school graduate or GED equivalency
- Recommended high school (or equivalent) courses in algebra (grade of “C” or better), biology (grade of “C” or better) and chemistry (grade of “C” or better)
- Completed health statement (See Health Records Office for detailed requirements.)
- Fingerprinting for background check
- Drug screening

| TOTAL CREDIT HOURS | | 16

**Quarter 3**

| MULT XXX* | Technical Certificate Course | 3
| HUM XXX | 111, 112, 113, 151, 152, or 224 | 5

**Technical Option Courses**

Students must select a minimum of 6 credit hours from technical options courses.

**COURSE** | **CR**
--- | ---
MULT 151* | Histologic Techniques Clinical | 2
MULT 150* | Histologic Techniques | 3
MULT 102* | CPR | 1
MULT 102 | Cardiopulmonary Resuscitation (CPR) | 1
MULT XXX | Technical Options Course | 3
MULT XXX | Technical Options Course | 3
TOTAL CREDIT HOURS | | 16

These requirements may vary according to major/plan of study.
Nuclear Medicine Technology

Nuclear Medicine Technology Associate Degree

Nuclear Medicine Technology is the medical specialty that uses the physiologic properties of radioactive material to evaluate conditions of the body and to provide therapy. The skills of the nuclear medicine technologist complement those of the nuclear medicine physician and other professionals in the field. Nuclear medicine technologists perform a number of tasks in the areas of patient care, technical skills, and radiopharmaceutical administration. They apply their knowledge of radiation physics and safety regulations to limit radiation exposure, prepare and administer radiopharmaceuticals, and use radiation detection devices and other kinds of laboratory equipment that measure the quantity and distribution of radionuclides deposited in the patient. They also perform in-vivo and in-vitro diagnostic procedures, use quality control techniques as part of a quality assurance program covering all procedures and products in the laboratory, and may participate in research activities.

Technology classes begin once per year. Admission to the program is competitive with completed applications received annually. Because students and health care workers in the health care field may be exposed to infectious materials and communicable diseases, the program emphasizes safety and prevention.

Upon completion of the associate degree in Nuclear Medicine Technology, the graduate will be able to:

- Apply knowledge of anatomy, physiology and positioning techniques to accurately acquire/process/display functional and anatomical structures on a nuclear medicine image.
- Develop the necessary skills to apply effective communication, critical thinking and problem solving in a nuclear medicine setting.
- Provide patient care and comfort in a compassionate, ethical and professional manner.
- Act as an agent through observation and communication to obtain pertinent information for the physician to aid in the diagnosis and treatment of the patient.
- Evaluate nuclear medicine images for appropriate positioning and image quality.
- Apply the principles of radiation protection for the patient, staff, and general public.
- Recognize emergency patient conditions and, if necessary, initiate lifesaving first aid and basic life-support procedures.
- Evaluate the quality control performance of nuclear medicine equipment systems, including the safe limits of equipment operation, and report malfunctions to the proper authority.
- Exercise independent judgment and discretion while performing nuclear medicine imaging procedures.
- Participate in nuclear medicine quality assurance programs.
- Meet or exceed the entry level expectations of employers
- To successfully complete the ARRT and/or NMTCB national certification exams

Specific Program Admissions Information

Prospective students are required to attend an informational and advising session to learn detailed program requirements and career opportunities. These sessions are held in the autumn and winter quarters and are extremely helpful in answering students’ questions.

A program application is available in each information packet distributed at the autumn and winter quarter informational/advising sessions. Interested persons can obtain session dates and general information by calling the Nuclear Medicine Technology Office, (614) 287-5215, or by contacting Shawndeia Thomas via e-mail with your name and return mailing or e-mail address to: Sthoma11@csc.edu.

Listed below are additional requirements for admission to the Nuclear Medicine Technology program:

- High school graduate or GED equivalency
- Required high school (or equivalent) courses in Biology (grade of “C” or better) or completion of BIO 100 (grade of “C” or better) and Chemistry (grade of “C” or better) or completion of CHEM 100 (grade of “C” or better)
- Placement into ENGL 101 Beginning Composition or completion of ENGL 100
- Completion of PHYS 100 or equivalent with a grade of “C” or better
- Completion of Math 104 and/or placement into or completion of Math 148 College Algebra
- Completion of Chem 112 or Chem 113 or equivalent with a grade of “C” or better
- Placement into “No Reading Required” or completion of DEV 040
Nursing

Nursing Associate Degree

Nursing Certificate Programs (NURC)

Practical Nursing Certificate

Nursing Associate Degree

Columbus State’s Associate Degree program in Nursing prepares graduates to provide health care services to clients of all ages located in a variety of settings in the community and home.

The program is sequential and integrates theory from biological and social sciences with reasoning and communication skills to develop a graduate who can think critically, solve problems, and communicate effectively. Opportunities are available to complete the nursing program in seven or nine quarters depending on the student’s needs. Students who go out-of-sequence in the Nursing program may join the program sequence with a subsequent class, providing space is available and petitioning requirements are met. Students entering subsequent nursing classes will meet the catalog requirements for graduation in place for that class.

Nursing classes are structured to promote student participation and learning through lecture, seminar, laboratory practice, and clinical experiences. Two program tracks are available: the traditional track and the online track. In the traditional track, lecture and seminar activities take place on campus in the classroom. In the online track, lecture and seminar content are done using an online format, but as with the traditional track, laboratory practice and clinical experiences will be hands on. These learning opportunities are designed to encourage the student to apply concepts and utilize critical thinking skills in the promotion, maintenance, and restoration of health of clients. Students learn to work collaboratively with other health team members within the health care delivery system.

Students take 54 credit hours of nursing courses and 51 credit hours in the arts and sciences. An elective of at least 2 credit hours is required. Students participate in 4-16 hours of clinical experience each week in a variety of health care settings under the direction of a registered nurse. Two nursing outcome exams are given during the nursing program. Students must achieve a minimum percentile score on these exams in order to continue to the next nursing course or to graduate.

Students who successfully complete the associate degree program are qualified to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). The Nursing program at Columbus State is accredited by the National League for Nursing Accrediting Commission, 61 Broadway New York, N.Y. 10006, telephone (212) 363-5555, and the North Central Association of Colleges, and is approved by the Ohio Board of Nursing.

Upon completion of the associate degree in Nursing, the graduate will be able to:

- Implement safe, competent, nurturing care in the role of the Associate Degree Nurse.
- Plan care for persons of all ages using the nursing process.
- Communicate effectively, including the use of teaching and

Students should request a program plan of study from their faculty advisor.
counseling techniques, in the promotion, maintenance, and restoration of health.

- Manage nursing care for a diverse population of clients in a variety of practice settings.
- Synthesize knowledge from nursing and related disciplines using critical thinking skills.
- Analyze legal, ethical, and economic concepts that influence nursing practice.
- Plan for maintaining competence and personal growth.

Program Admissions Information

Listed below are general requirements for admission to Nursing. For specific directions, see Nursing Admission requirements available in Nursing, Records and Registration, Advising Services, the Admissions Office, and the nursing home page within the Columbus State Community College Web site. Academic advising is available in Advising Services to help guide new students through the admission process. A separate application is required for nursing and is available on the Internet at www.cscc.edu/nursing.

It is highly recommended that those with an interest in nursing make an appointment to meet with an academic advisor in Advising Services by calling (614) 287-2668. There are two tracks available for the Nursing program. The online track is available for those who have a bachelor’s degree in another field of study; the traditional track is available for those with or without a previous degree.

Admission into Nursing requires completion of these criteria:

1. Required Documentation
   After completing all of the other admission criteria, student must submit an application specific to nursing to the Nursing Department through the homepage: www.cscc.edu/nursing. Applications submitted prior to meeting all criteria will be deleted. Information about application periods will be posted at the nursing homepage also.

   Achievement of a minimum GPA of 2.6 on a 4-point scale based on completion of courses at the school or college most recently attended (high school, vocational program, or higher education institution). Official transcripts must be on file in the Records and Registration Office to verify GPA by the deadline dates. Students who do not have a minimum 2.6 GPA for their most recent coursework must complete at least 12 credit hours of college-level coursework at Columbus State with a minimum GPA of 2.6 for admission to the Nursing program. The minimum 2.60 GPA must be maintained through the start of classes in Nursing.

2. COMPASS™ Placement Tests
   Math Skills: Placement above MATH 103 Beginning Algebra II, or completion of MATH 103. Students awarded transfer credit by Columbus State for MATH 103 are not required to take the Math Skills Test. Credit awarded for MATH 135 will not substitute for the MATH 103 requirement.

   Writing Skills: Placement into ENGL 101 Beginning Composition, or ENGL 111 English Composition, or completion of ENGL 100 Language Development. Students awarded transfer credit by Columbus State for ENGL 101 or ENGL 111 are not required to take the Writing Skills Test. Placement tests are administered in the Testing Center, Aquinas Hall 002. Call (614) 287-2478 for hours and directions to a Web site with sample questions.

3. College courses completed with a grade of “C” or better:
   - NURC 101 Nurse Aide Training Program or prior learning assessment credit (“N” credit) or copy of current Ohio practical nurse license (LPN). Requires completion of health records before registering for the course.
   - NURC 102 Patient Care Skills or copy of current Ohio practical nurse license (LPN).
   - CHEM 113 Introduction to Organic and Biochemistry
   - Complete PSY 100 or PSY 240 credit.

4. Nurse Entrance Test (NET)
   Completion of NET with a reading comprehension score of 64% or above is required for admission. This score reflects a science reading ability of at least the 12th grade. Applicants are encouraged to review NET Study Guide in preparation for taking the NET. The study guide is available at the Columbus Metropolitan Library or for purchase at the bookstore. A NET math composite score of 64% is required.

5. Additional Admission Information
   - The Columbus State admissions application form is online at www.cscc.edu. If it has been more than three years since you attended classes at Columbus State, call (614) 287-2453 or 1-800-621-6407, ext. 2453, to reactivate your student file.
   - To register to take the Nurse Entrance Test (NET), contact ACT Skills Max and Testing Center at (614) 287-5750. The initial cost for taking the NET is $25 payable at the Cashier’s Office, Rhodes Hall. The cost to repeat the NET is $50. On the day of the test, bring a picture ID and paid receipt to the Testing Center, Center for Workforce Development, Room 223. Retesting eligibility begins six months from the date of previous NET testing. Net scores from schools other than Columbus State Community College will not be accepted. The Nursing Program will maintain nursing scores for a period of four years.
   - Contact the Records and Registration Office, Room 201, Madison Hall, (614) 287-2658, for information about the processing of college transfer credit from other institutions.
   - Applicants currently licensed as Practical Nurses should refer to “Licensed Practical Nurse Admission Procedure to Nursing,” available from Nursing Department or online at www.cscc.edu/nursing.
   - Applicants for admission from another program preparing students to take NCLEX-RN should refer to “Procedure for Admission to Nursing Program from another R.N. Program” for transfer information. This information is available from the Nursing Department or online at www.cscc.edu/nursing.
   - The Ohio Board of Nursing Felony Policy: Section 4723.28 of the Ohio Revised Code states that the Board may deny a convicted felon a license or the privilege of sitting for the licensure examination. A student with a history of felony conviction is responsible for informing the Nursing chairperson of this history.
   - The Ohio Board of Nursing Licensure Application Requirement: As of June 2004, the Ohio Board of Nursing requires all applicants for licensure to identify existing psychiatric condition(s). Please check with the Board of Nursing, (614) 466-3947 or www.nursing.ohio.gov, for further clarification or questions.
• A new federal law, PROWORA, known as the “Personal Responsibility Act” limits licensure to U.S. citizens and other qualified applicants. The State Board of Nursing is required to keep assurance of citizenship on record with applications for licensure. School of Nursing will provide graduates with the form along with the licensure applications.

• Admission to Nursing is offered for a specific quarter only. Students who declare the offer of admission, or who fail to respond, must re-apply if they wish to be considered for a future class and must meet the admission criteria in effect for that class.

• A minimum grade of “C” or better is required in all Nursing, science, psychology, and math courses in the curriculum. Students accepted to Nursing who do not achieve a minimum grade of “C” or better in any of the following support courses must retake the course(s) prior to the start of their NURS classes or during the quarter in which the course(s) is (are) required in the curriculum plan, in order to remain a student in good standing in the program: BIO 261 Human Anatomy, BIO 262 Human Physiology, PSY 240 Human Growth and Development through the Life Span, BIO 215 General Microbiology, BIO 263 Human Pathophysiology, MATH 135 Elementary Statistics.

• Columbus State Community College makes every effort to inform prospective students of the admission requirements for the Nursing program. Students are responsible for maintaining awareness of the application periods, of the admission requirements and any changes made to those requirements over time. Any questions about admission criteria should be directed to Columbus State Advising Services at (614) 287-2668.

• While waiting to start Nursing, students should first complete admission requirements and then work on general education and basic related courses listed on the Plan of Study. Please continue to work with academic advisor to complete your pre-admission checklist and to plan a schedule of other courses.

• Clinical agencies have set requirements for patient safety. Students accepted to the program will be informed of the specific requirements for health, fingerprinting, drug screening and CPR, which must be met prior to starting and while continuing the NURS sequence of courses.

Application Process

The applications for the online program track will be available each November 1 through December 30 to fill the following autumn class (one class start per year). The traditional program track admits two classes per year, autumn and spring. Applications are available January 14 through January 31 to fill the following autumn and spring classes. All applications can be found online at www.csc.edu/nursing.

Vocational Education Transfer Option with the Ohio State University College of Education

The Nursing Program at Columbus State has completed an articulation agreement with the Technical Education and Training Program of the Ohio State University College of Education. This agreement allows nursing students to complete their associate degree at Columbus State, transfer their credits to Ohio State, and complete a baccalaureate degree in Technical Education and Training. Students completing the Ohio State program may be eligible for certification by the Ohio Department of Education to teach in related high school career and technical education programs throughout the State of Ohio. Interested students should contact their Columbus State department chairperson for curriculum requirements and additional details. Please note that course requirements for this transfer option may differ from the standard Plan of Study published in the catalog.

Nursing Certificate Programs (NURC)

Several certificate programs are offered through the Nursing Department. These are focused programs that result in a certificate of completion. The programs range from those designed for anyone interested in patient care to those for the licensed nurse interested in a specific area of training. Many area health care employers are interested in students who have successfully completed these programs.
Clinical agencies have set requirements for patient safety. Students enrolling in programs with a clinical component will be informed of the specific requirements for health and/or drug screening prior to enrollment.

**Nurse Aide Training Program Certificate**
A student completing the Nurse Aide Certificate will be able to:
- Effectively communicate in the health care setting.
- State and demonstrate principles of medical asepsis and standard precautions.
- Identify and demonstrate the principles of safe resident care.
- Discuss and demonstrate correct basic nursing skills.
- Meet the eligibility requirements needed to apply to take the state test for nurse aides.

**Patient Care Skills Certificate**
A student completing the Patient Care Skills Certificate will be able to:
- Effectively communicate in the health care setting.
- State and demonstrate principles of medical asepsis and standard precautions.
- State and demonstrate the principles of surgical asepsis.
- Identify and demonstrate the principles of safe resident care in an acute care setting.
- Discuss and demonstrate correct basic nursing skills commonly performed in the acute care setting.

**Pranic Healing Certificate**
A student completing the Pranic Healing Level I Certificate will be able to:
- Identify basic concepts and principles of Pranic Healing.
- Demonstrate basic Pranic Healing techniques on three or more ailments.
- Identify the 11 major energy centers and their corresponding internal organs.
- Describe important things to avoid when healing.
- Demonstrate self-decontamination techniques and self-recharging techniques.
- Practice self-healing and distant healing.

**Complementary Care Certificate**
A student completing the Complementary Care Certificate will be able to:
- Define terms associated with complementary care practices.
- Identify the different types of complementary care practices.
- Discuss the use of complementary care methods for health maintenance.
- Discuss the role of research in the evaluation of complementary care.

**Registered Nurse First Assistant Certificate**
A student completing the Registered Nurse First Assistant Certificate will be able to:
- Act effectively and safely as a first assistant in surgery.
- Meet eligibility requirements to take the RNFA certificate examination.

**Train the Trainer Certificate**
A student completing the Train the Trainer Certificate will be able to:
- Teach, coordinate, and supervise a Nurse Aide Training Program.
- Meet the requirements established by the Ohio Department of Health.

**Train the Trainer Certificate**
A student completing the Train the Trainer Certificate will be able to:
- Teach, coordinate, and supervise a Nurse Aide Training Program.
- Meet the requirements established by the Ohio Department of Health.

**Pranic Healing Certificate**
A student completing the Pranic Healing Level I Certificate will be able to:
- Identify basic concepts and principles of Pranic Healing.
- Demonstrate basic Pranic Healing techniques on three or more ailments.
- Identify the 11 major energy centers and their corresponding internal organs.
- Describe important things to avoid when healing.
- Demonstrate self-decontamination techniques and self-recharging techniques.
- Practice self-healing and distant healing.

**Registered Nurse First Assistant Certificate**
A student completing the Registered Nurse First Assistant Certificate will be able to:
- Act effectively and safely as a first assistant in surgery.
- Meet eligibility requirements to take the RNFA certificate examination.

**Practical Nursing Certificate**
The Practical Nursing Certificate program is a part-time evening and weekend program designed to prepare graduates to provide health care to clients of various ages in a variety of health care settings. The seven-quarter program is designed as a career path for entry-level patient care providers. Nursing assistants and patient care assistants can continue their education in the PN certificate program and become licensed practical nurses after successful completion of the program and passing the PN licensing exami...
nation. After obtaining their practical nursing license, graduates of the PN certificate program may apply for articulation into the associate degree nursing program at Columbus State Community College.

The practical nursing certificate program is sequential and it helps students to develop communication, critical thinking, and problem-solving skills. Nursing courses are structured to promote student learning through lecture, laboratory, clinical, seminar, and practicum experiences. Learning opportunities are designed to apply practical nursing concepts in the promotion, maintenance and restoration of health for clients. Students learn to work collaboratively with other health team members in the health care delivery system.

Students take 32 hours of nursing courses and 23 hours in arts and sciences for a total of 55 credits. Students will participate in clinical experiences in a variety of health care settings under the direction of a registered nurse. A practical nursing outcome exam will be given at the beginning of the seventh quarter of the program. Students must achieve a minimum score on this outcome exam in order to graduate.

Students who successfully complete the Practical Nursing Certificate program are qualified to apply to take the National Council Licensure Examination for Practical Nurses (NCLEX-PN). The program is approved by the Ohio Board of Nursing.

Upon completion of the Practical Nursing Certificate Program, the graduate will be able to:
- Demonstrate the role and scope of practice for the practical nurse in Ohio.
- Apply knowledge from the biological, behavioral, and nursing sciences to the care of clients.
- Utilize the nursing process to provide safe and effective nursing care to a diverse population in a variety of health care settings.
- Communicate effectively with clients and families, health care providers, and community members for the purpose of health promotion, maintenance and restoration.
- Safely perform nursing skills according to accepted standards of practice.
- Demonstrate professionalism by engaging in legal, ethical, and accountable behaviors and utilizing economic concepts as they relate to the health care arena.
- Synthesize knowledge from nursing and related disciplines using critical thinking skills.
- Demonstrate caring behaviors by respecting the diversity of each person by treating them with dignity and integrity.
- Collaborate with the health care team to provide and delegate nursing care according to Ohio Board of Nursing rules.

Program Admissions Information
Students need to apply to CSCC and adhere to admission criteria. Specific requirements for admission to the Practical Nursing Certificate Program are listed below:
- Practical Nurse Certificate Program application.
- High school biology, with a grade of “C” or better, within the past five years or BIO 100 Introduction to Biological Sciences, or a college level biology.
- Placement into ENGL 101 Beginning Composition.
- Placement into MATH 100 Calculations and Dosages.
- Completion of the following college courses with a grade of “C” or better: PNUR 101 Nurse Aide Training Program or STNA and MULT 101 Medical Terminology.
- Completion of Nurse Entrance Test (NET) with a reading comprehension score of 55% or above and a math score of 55% or above.
- Grade point average of 2.25 or better in most recently completed course work.
- DEV 090 College Success Skills is recommended.
- Completion of the following college courses with a grade of “C” or better: NURC 101 Nurse Aide Training Program or STNA and MULT 101 Medical Terminology.
- Placement into ENGL 101 Beginning Composition.

Paralegal Studies

Paralegal Studies Associate Degree
Paralegal Studies Certificate  
(Post Baccalaureate Option)

Due to the explosive growth of legal services now being requested in all sectors of our economy, there is a continuous demand for well-trained personnel in all facets of the legal assisting process. The need for paralegal assistants is so great that it is estimated that one paralegal will assist every three or four attorneys, and, in some areas of practice, such as corporate legal departments, there will be one legal assistant hired for every attorney.

The nature of the paralegal assistant’s position in the legal community requires individuals with a well-rounded educational background. Critical thinking and excellent communication skills are essential competencies of a legal assistant and are included in courses in English, mathematics, humanities, social science, and basic science.

The technical curriculum has been designed to provide students with knowledge and skills in the role of a legal assistant, ethical requirements, legal research, analysis, the preparation of legal documents, litigation practice and procedure, real estate transactions, family law, administrative law, criminal law, and probate law and practice.

The Paralegal Studies Certificate (Post Baccalaureate Option) is designed for persons who currently possess a bachelor’s, master’s or Ph.D. degree.

Paralegal assistants have traditionally been utilized in legal environments that are intensive in both client contact and document preparation.

Upon completion of the associate degree in Paralegal Studies, the graduate will be able to:
• Demonstrate proficiency in manual and computer assisted research of legal questions and incorporate the same into properly cited memoranda of law.
• Demonstrate an understanding of the legal and ethical responsibilities of a legal assistant.
• Demonstrate an ability to use municipal, county, state, and federal clerks of court, and other recording offices.
• Prepare deeds, notes, and other documents for residential real estate transfer.
• Draft documents required to complete family law matters.
• Draft pleadings, motions and other documents within the applicable rules of evidence and procedure to prepare and complete civil and criminal litigation.
• Prepare documents for use in corporate, partnership, and other business related matters.
• Draft wills, trusts, and other documents necessary for estate administration.
• Describe the legislative and judicial functions of administrative agencies.

NOTE: Paralegal assistants may not sign legal documents, appear in court, or give legal advice. All activities in legal matters must be supervised by a licensed attorney.

### Quality Assurance Technology

#### Quality Assurance Technology Associate Degree

Individuals who have high standards, are logical and observant, good at problem solving, and have an investigative mind, are a great fit for a career as a Quality Assurance Technician. Quality assurance technicians are responsible for monitoring, testing, and continuously improving the quality of products and services for today’s businesses.

Coursework in Columbus State’s Quality Assurance program will include an introduction to manufacturing, statistical process control, value engineering, and technical writing. Participants will study and practice the major elements and concepts of total quality management, including principles and styles of systems thinking, continuous improvement, management by data, and historic influences of leaders in quality management. Students will learn statistical methods to determine reliability, the effectiveness of data analysis, the use of simulations, and ways to improve system performance.

Graduates will find a wide range of opportunities in fields as diverse as manufacturing, banking, insurance, or food processing. A valuable member of the business team, grads will apply the tools of their chosen field in a problem-solving process to achieve significant gains for the company—such as product improvement, reducing scrap, shortening cycle time, and improving profitability. Quality assurance technicians have the satisfaction of working in an area that is essential, not only to profitability, but to survival of the business.

**Quick Notes on QA:**
- Salaries for QA technician job postings in Columbus are seven percent higher than the national average. *(Source: Indeed.com)*
- Students work on quality improvement projects for local organizations as part of their course work.
- The quality movement started in manufacturing, but it is now applied to service, health care, education and government sectors.
- A career in QA may combine technical knowledge, change management, people skills and teaching.

The Quality Assurance Technology also shares related courses with the Electronic Engineering Technology and the Mechanical Engineering Technology. For additional information, refer to Electronic Engineering Technology and Mechanical Engineering Technology which are listed in this section of the Catalog.

Upon completion of the associates degree in Quality Assurance Technology, the graduate will be able to:
- Improve products, processes and systems in manufacturing and service environments by selectively applying statistical and quality improvement tools according to the Shewhart Cycle.
- Apply a variety of teamwork, leadership, and communications skills (verbal, written, and graphic) to communicate effectively with clients, suppliers, co-workers and others in the work environment.

---

### Course Descriptions

- **LEGL 230**: Special Problems in Legal Assisting
- **LEGL 234**: Litigation II
- **LEGL 238**: Insurance Law
- **LEGL 240**: Professional Malpractice
- **LEGL 232**: Taxation
- **LEGL 244**: Debtor/Creditor Relations
- **LEGL 250**: Intellectual Property
- **LEGL 261**: Social Security Practice and Procedure
- **LAWE 212**: Ohio Criminal Code
- **LAWE 220**: Constitutional Law
- **LAWE 215**: Introduction to Cyberlaw
- **LAWE 260**: Criminal Evidence and Trial
- **LEGL 222**: Immigration Law
- **ACCT 106**: Financial Accounting
- **ACCT 107**: Managerial Accounting

---

- **TOTAL CREDIT HOURS**: 53
- **TOTAL DEGREE CREDIT HOURS**: 53
• Apply fundamental principles of project management.
• Read and interpret engineering blueprints, drawings, specifications and quality charts.
• Apply a basic knowledge of physics, electronics, manufacturing processes, metrology, and materials testing and analysis to improving, and/or designing new products and processes.
• Apply knowledge of specifications, sampling plans and testing techniques to the analysis of materials, components and systems.
• Apply cost estimating techniques and cost containment procedures to new and existing products and systems, while maintaining or improving quality.
• Apply the elements of current quality management trends including inspection, traceability/documentation, quality audits, and nonconforming identification and review processes to business elements within an organization.

**Radiography**

**Radiography Associate Degree**

**Limited Radiography Certificate**

Radiographers are highly skilled professionals qualified by education to perform imaging examinations and accompanying responsibilities at the request of a physician. A radiographer is able to perform diagnostic imaging, fluoroscopy, trauma, surgical, and portable radiography. Specialized areas in the curriculum include computed tomography, vascular and digital imaging, and magnetic resonance imaging.

Technology classes begin in summer quarter. Admission to the program is competitive with completed applications received annually. Because students and health care workers in the field may be exposed to infectious materials and communicable diseases, the program emphasizes safety and prevention.

**Program Mission and Goals**

The mission of the Columbus State Community College Radiography program is to provide a quality educational program that meets the lifelong learning needs of its community. This is achieved by preparing graduates for entry-level employment as radiography science professionals. The program mission is consistent with the college’s mission statement.

The program holds as its primary objectives the education and training of qualified applicants to become competent radiographers. The program endeavors to instill in students, and subsequently graduates, the following goals:

1. Recognition of the need for lifelong learning in their chosen profession.
2. The ability to behave in a compassionate, ethical, and professional manner.
3. Completion of all program requirements, competence to meet entry-level expectations of employers, and successfully completion of the ARRT national certification exam.
4. Ability to apply skills in communication, critical thinking, and problem solving in the practice of the radiography profession.

**Specific Program Admissions Information**

Prospective students are required to attend a mandatory information session to learn detailed program requirements and career opportunities. These sessions are held several times each quarter and are very helpful in answering students’ questions. Information session dates are available by calling Shawneida Thomas at (614) 287-5215 or via email at Sthoma11@cscc.edu. Information can also be found on the Web at: [www.cscc.edu/health/index.htm](http://www.cscc.edu/health/index.htm).

The yearly deadline for application to the Radiography program is April 1 for admission beginning the following summer. Applications are available only by attending one of the mandatory information sessions.

Listed below are additional requirements for admission to the Radiography program.

* High school graduate, GED, or equivalent
Limited Radiography Certificate
This Certificate Program meets the requirements of the Ohio Revised Code (3701-72-01 - 3701-72-04) for a General X-Ray Machine Operator. It is designed to meet the learning needs of adults wishing to enter the imaging field of radiography with a limited license. The RAD 190 course and the modularized RAD 141 and RAD 142 courses are a part of the program’s technical requirements.

At the completion of the program, the learner will be able to:
1. Demonstrate competence in academic technical courses that meet the ODH requirements.
2. Be eligible to apply for the ODH General X-Ray Machine Operator (GxMO) State Examination.
3. Demonstrate competence in patient care skills and radiographic positioning and imaging skills specific to a GxMO.
4. Incorporate general education outcomes for effective communication necessary in a health care setting.
5. Incorporate basic related course content to support technical course academic theory and practice.
6. Develop technical skills required for employment in outpatient imaging facilities, urgent care centers, and physician practices.
7. Develop additional clinical skills needed for employment in subspecialty areas in imaging. Examples include podiatry, chiropractic, general practitioner, outpatient imaging facilities, urgent care centers, and physician practices.
8. Move seamlessly from the certificate program to the associate degree program at Columbus State, if desired.

Note: Individuals who have been convicted of, plead guilty to, or plead no contest to a crime may not be eligible to take the American Registry of Radiologic Technologists (ARRT) Radiography Registry according to the ARRT’s Code of Ethics, Section B.3. Rules of Ethics. For additional information, contact the ARRT (www.arrt.org).
Real Estate

Real Estate Associate Degree

The associate degree program in Real Estate offers course work that meets the standards of professionalism in the real estate industry. The program follows a blueprint for real estate education developed by the Ohio Association of Realtors. Courses meet the educational requirements for real estate licensure in the State of Ohio.

The program meets the career objective of persons interested in real estate sales or other allied real estate professions. For licensed real estate brokers and sales associates, it provides training to upgrade their professional competence and to meet future educational requirements of the profession. For students who plan to continue their education beyond the associate degree, it offers credit courses that may transfer to some four-year colleges and universities.

Prospective real estate students who plan to take the real estate licensing exam are more successful when they take courses as shown in the plan of study.

Upon completion of the associate degree in Real Estate, the graduate will be able to:

- Demonstrate understanding of key principles and concepts involved in a real estate transaction.
- Prepare and present correctly all forms necessary to complete a real estate transaction.
- Create effective promotional plans to market property.
- Identify and explain different construction materials.
- Apply one of three appraisal techniques to the evaluation of a residential or commercial property.
- Manage a real estate property sales force effectively.
- Apply relevant formulas and microcomputer applications to the practice of real estate.
- Effectively apply current technology to daily real estate activity.

Respiratory Care

Registered Respiratory Therapist Associate Degree

Sleep Study Certificate

Respiratory therapists are life support specialists concerned with managing, controlling and treating problems related to the cardio-pulmonary system. Respiratory care practitioners work with the physician, nurse and other health care personnel.

The complexity of the respiratory therapist’s responsibility requires extensive training, dedication and professionalism. Respiratory Care takes place in such settings as intensive care units, the newborn nursery, surgical and medical units, emergency departments, outpatient departments, sleep laboratories, and home health facilities.

In addition to classroom learning, students enrolled in the Respiratory Care program gain hands-on experience while working in area health care facilities, under the supervision of qualified instructors. These clinical experiences teach students to apply their knowledge and skills in actual work environments. Because students and workers in the health care field may be exposed to infectious materials and communicable diseases, the program emphasizes safety and prevention.

Columbus State’s program is accredited by the Committee on Accreditation for Respiratory Care.

Graduates are eligible for the Certification Examination for Entry-Level Respiratory Therapists and the Registry Examination for Advanced Respiratory Therapy Practitioners offered by the National Board for Respiratory Care, Inc. Upon successful completion of the Certification Examination, graduates are eligible to become licensed as Respiratory Care Professionals as required by the Ohio Respiratory Care Board.

Upon completion of the associate degree in Respiratory Care, the graduate will be able to:

- Demonstrate the ability to collect and evaluate patient data; and recommend procedures to obtain additional data.
- Demonstrate the ability to correctly assemble, use and maintain respiratory care equipment using principles of infection control and quality assurance.
- Initiate, conduct, and independently modify prescribed therapeutic procedures and recommend modifications based on patient response.
- Demonstrate personal and professional behaviors required for successful employment.

Specific Program Admissions Information

Listed below are requirements for admission to the Respiratory Care program.

- High school biology with a “C” or above within the last three years
- CHEM 113 with a “C” or above
- NURC 101 with a “C” or above
- Completion of the Health Occupation Basic Entrance Test (HOBET)
- RESP 102 with a “C” or above
- Completed health record on file in the Health Records Office
- Minimum Total GPA of 2.50 or above
- Acceptable Drug Testing and Background Screening must be completed. Students receive this information upon acceptance into the program.
- All admission criteria must be met by March 31 of the application year.
- Prospective students may obtain additional information at quarterly program information sessions. Contact Cheryl Trogus, ctrogus@csc.edu, for session dates.

For additional information, please see the program Web site at [http://www.cscc.edu/Respiratory/index.htm](http://www.cscc.edu/Respiratory/index.htm)

Statement Regarding Infectious Diseases:

Students in this program perform their clinical work on patients in health care facilities and may therefore be exposed to many types of communicable diseases and infectious materials. All students are required to have appropriate immunizations after they are admitted to the program (information is given to all admitted students). Additionally, although all precautions are taken to minimize exposure and risk, there is always a slight possibility that precautions may fail or that a student may have an accidental exposure. All students entering the program must be aware of this slight, but real, potential risk. All students are encouraged to have personal health insurance in effect by the first day of class.

Sleep Study Certificate
A student completing the Sleep Study Certificate will be able to:

- Demonstrate basic understanding of the function of sleep and the effects of sleep on the different body systems.

- Demonstrate an understanding of the different stages of the normal architecture of sleep and the function of the circadian rhythm.

- Demonstrate an understanding of basic sleep disorders, sleep hygiene, and the effects of sleep deprivation on the body and society.

- Demonstrate an understanding of the functions of sleep and the electrical activity of the brain during sleep.

- Demonstrate knowledge of the basic electronics and instrumentation used in a sleep lab.

- Demonstrate knowledge of EEG electrode placement and respiratory monitoring devices.

- Demonstrate the ability to score polysomnography tracings.

- Demonstrate the ability to titrate various treatment devices to provide patient education.

Sport and Exercise Studies
Associated Degree–Exercise Science Major
Associated Degree–Physical and Recreation Instruction Major
Associated Degree–Sport Management Major
Exercise Specialist Certificate

The Sport and Exercise Studies program prepares students to work in sport, recreation, health and/or fitness centers. From private clubs to public facilities, trained managers, instructors, and programmers are needed to develop, train, staff, and implement programming to address the wellness needs of the general public or specific clients/populations, in compliance with local, state, and federal guidelines. Exercise science, strength and resistance training, risk management, human nutrition, anatomy, physiology, sport business/marketing, and health and physical education courses blended with the college’s General Education course work will develop the skills necessary to gain a managerial or technical position within the sports and fitness field. The Sport and Exercise Studies program offers three majors from which to choose: Exercise Science, Physical and Recreation Instruction and Sport Management.
Upon completion of the associate degree in a Sport and Exercise Studies program, the graduate will be able to:

- Determine a target market for Sport and Exercise programs using needs-based evidence.
- Use evaluation as a means for continuous improvement of Sport and Exercise programming.
- Actively pursue professional development opportunities.
- Model lifestyle physical activity.

The Exercise Science graduate will be able to:

- Accurately interpret health assessment and risk stratification data.
- Perform industry-standard measures of physical fitness assessments.
- Use assessment-based data, in consultation with client needs and interests, to develop exercise prescriptions.
- Demonstrate applicable research skills and technology assisting sport.
- Choose appropriate pedagogical methods for sport.
- Design and manage physical facilities and equipment to provide a safe, appropriate and cost neutral facility.

The Sport Management graduate will be able to:

- Demonstrate skill in planning and administering effective recreational, fitness, wellness and sport activities in the community.
- Assess the potential for behavioral change in each client, creating maximal opportunity for success.
- Demonstrate organizational and administrative leadership in delivery of sport and exercise programs by establishing program direction, a risk management plan, and financial and budgetary stewardship.

The Physical and Recreation Instruction graduate will be able to:

- Coordinate comprehensive sport programming to meet stated institutional goals and objectives.
- Select and evaluate coaching staff and related personnel in a sport setting.
- Secure supplemental funding sources for private and/or public sport programming.
- Demonstrate applicable research skills and technology assisting sport.

Traditional Classes and Distance Learning Choices at Columbus State

The Sport and Exercise Studies program is proud to offer traditional and distance learning options for our students. The traditional classroom experience continues to provide students with high quality instruction in a small classroom setting at our downtown campus and off-campus locations. The Sports and Exercise Studies program also offers distance learning courses that provide the same high quality learning as traditional instruction, yet with the flexibility of being able to complete course work online.

The distance learning option for the Sport Management major requires a student to apply for admittance to the program. Some courses may require face-to-face learning or transfer credits from previous learning. Applicants should contact the Sport and Exercise Studies program coordinator for details on admission.

Students graduating from Columbus State’s Sport and Exercise Studies program can transfer into these programs to complete bachelor’s degrees via distance learning:

- Wellness and Fitness major at the California University of Pennsylvania
- Sport Management or Sport Coaching at the United States Sports Academy

Students can inquire about traditional learning program transfers into baccalaureate degree programs as well.

Specific Program Admissions Information

Listed below are additional requirements for admission to Sport and Exercise Studies:

- High school graduate or GED equivalency
- Placement into ENGL 101 Beginning Composition
- Placement into MATH 101 Business Math

Supply Chain Management

Supply Chain Management Associate Degree
International Commerce Major
Strategic Procurement Major
International Business Certificate
International Commerce Certificate
Strategic Procurement Certificate
Supply Chain Management Certificate

Supply Chain Management encompasses the planning and management of all activities involved in sourcing and procurement, conversion, and all logistics management activities. It also includes coordination and collaboration with channel partners, such as suppliers, intermediaries, third-party service providers, and customers. In essence, Supply Chain Management integrates supply and demand management within and across companies, both domestically and internationally. The Greater Columbus Metropolitan Area is home to many distribution operations including centers for Limited Brands, Spiegel, Eddie Bauer, JC Penney, Kraft, Consolidated Stores Corporation, and McGraw-Hill Companies, and it is home to the only “Free Trade Zone” in the state of Ohio.

Supply Chain Management graduates may expect entry-level, first-line management positions as supervisors and managers in such areas as traffic and transportation, inventory management, warehousing, export/import, purchasing, materials control, traffic and operations management.

Columbus State Community College is nationally accredited by the Association of Collegiate Business Schools and Programs (ACBSP) for the offering of its business programs that culminate in the Associate of Arts, Associate of Science and Associate of Applied Science degrees.

Upon completion of the associate of applied science degree in Supply Chain Management, the graduate will be able to:

- Describe the various functions that comprise supply chain management and describe the interrelationship between them and other functional areas within a company.
- Be able to make channel-related decisions to satisfy industrial and consumer wants in both domestic and international markets.
- Demonstrate knowledge of supply chain management terminology including inventory techniques, bar-coding systems, picking and delivery processes, and storage and sorting systems.
- Demonstrate knowledge of the function and operation of warehouses and distribution facilities.
- Explain the role of inventory control and management.
- Describe the traffic management function and its role in carrier selection, rate determination and rate negotiation.
- Demonstrate knowledge of state and federal laws that impact the distribution function, including knowledge of common carrier obligations.
- Participate in the development of an integrated plan of action consistent with established supply chain management goals.
- Understand the analytical tools useful in supply chain management particularly as they relate to measuring and analyzing productivity.
- Possess a basic understanding of industrial safety issues particularly as they relate to the development of a basic safety program.
- Understand the principles of interactive management and how they apply to managing worker performance, retention/hiring procedures, and developing collaborative action plans.
- Possess fundamental supervisory skills including setting performance objectives, coaching and feedback, and conducting formal performance reviews.
within such organizations. Grounded in fundamental courses in supply chain management—transportation, global shipping, global marketing, etc.—this major also includes a three-quarter language sequence in Spanish or Chinese, as well as supplemental courses in business culture and economics to broaden and deepen student understanding of the complexities of international commerce. A travel-abroad component is part of the program.

In addition to mastering the Supply Chain Management competencies, an International Commerce grad will be able to:
- Describe and discuss the nature of current globalization.
- Recognize the exponential growth of international trade and the economic impact of international logistics activities.
- Understand the importance of a country’s infrastructure to an international logistician.
- Identify the characteristics of the international transportation infrastructure.
- Understand how IncotermS are used to share responsibilities between exporters and importers.
- Understand the advantages/disadvantages of alternative terms of payment used in international commerce.
- Understand the risks that currency exchange rates pose for international traders.
- Identify and understand the purpose/function of various required documents common to international trade.
- Explain cultural, social, economic, and political factors that impact organizations.
- Describe the roles of verbal and nonverbal communication in cross-cultural encounters.
- Evaluate strategies for effective negotiation and training of global managers.
- Gain an awareness of the language of international marine insurance.
- Identify the types of air/ocean transportation services and aircraft/vessel sizes.
- Identify and understand the characteristics of intermodal transportation and the functions of international transportation forwarders and brokers.
- Converse at a basic business level in Spanish or Chinese.
- Understand the significance and need for adequate packaging practices in international trade.

Strategic Procurement Major

The Strategic Procurement major is designed to provide focused skills in purchasing and negotiation to students interested in this field. This major is built upon a solid foundation in current supply chain management theory and practice included in the National Association of Purchasing Managers certification examination.

In addition to the Supply Chain Management competencies, a graduate in the Strategic Procurement major will be able to:
- Explain and implement a Lowest Total Cost plan.
- Explain and develop purchasing objectives.
- Explain how policies and procedures are utilized to affect purchasing plans.
- Explain how purchasing organizations should be utilized.
- Explain how use of specifications, descriptions and standards are utilized to help determine right quality.
- Explain how the industrial purchasing function operates.
- Explain how the not-for-profit purchasing function operates.
- Explain how and why “make vs. buy” and outsourcing decisions are made.
- Develop a supplier management plan that ensures development, evaluation, and selection of the right supplier.
- Explain pricing principles and what methods are best utilized for determining the right price.
- Explain the different types of contracts and under what conditions and situations each works best.
- Explain how negotiations can help resolve nonprice issues that help support the lowest total cost principle.
- Explain how, why, and when international purchasing is best.
- Develop and present a purchasing strategic and tactical plan.
- Develop and present a buying plan and inventory management plan that ensure right quantity/right time.
- Explain the ethical and legal issues that effect purchasing.
- Explain the what, why, and how of negotiation.
- Explain and develop negotiation objectives, strategies, and tactics.

Supply Chain Management Certificates

Supply Chain Management certificates can be earned in International Business, International Commerce, Strategic Procurement, and Supply Chain Management. Each certificate can be completed totally in a distance learning format. Courses for these certificates follow the guidelines and cover the content established by the Council of Supply Chain Management Professionals (CSCMP), the Institute for Supply Management (ISM) and The North American Small Business International Trade Educators (NASBITE) respectively, in their certification exams.

Surgical Technology

Surgical Technology Associate Degree
Surgical Technology Certificate

Surgical Technology is a dynamic and exciting allied health profession. The surgical technologist is a vital member of the allied health field of professionals who work closely with surgeons, anesthesiologists, registered nurses, and other personnel delivering surgical patient care.

Columbus State Community College offers a four-quarter academic/laboratory/clinical Certificate Surgical Technology program concurrent with a six-quarter academic/laboratory/clinical Associate of Applied Science Degree program.

The Commission on Accreditation of Allied Health Education Programs (CAAHEP) accredits the certificate and associate degree programs. Graduates are eligible to obtain national certification as a Certified Surgical Technologist (CST) upon successful examination administered by the Liaison Council on Certification for the Surgical Technologist (LCC-ST).

Upon completion of the Surgical Technology Certificate, the student will be able to:

- Demonstrate knowledge and practice of basic patient care concepts.
- Demonstrate the application of the principles of asepsis in a knowledgeable manner that provides for optimal patient care in the operating room.
- Demonstrate basic surgical case preparation skills in the sterile processing role (STSP) and transportation/communication role (STTC).
- Demonstrate the ability to perform the role of first scrub (STSR) and second scrub (STSR2) on basic surgical cases.
- Demonstrate responsible behavior as a health care professional.

Upon completion of the associate degree in Surgical Technology, the graduate will be able to:

- Demonstrate all competencies required for the certified Surgical Technologist (CST).
- Demonstrate advanced knowledge and practice of patient care techniques.
- Demonstrate advanced knowledge of sterile and surgical techniques.
- Demonstrate advanced knowledge and practice in the role of the first scrub (STSR) and second scrub (STSR2).
- Demonstrate knowledge and practice of circulating skills and tasks (STAC).
- Demonstrate knowledge relating to operating room emergency situations.
- Demonstrate advanced organizational skills.
- Demonstrate advanced knowledge in one or two surgical specialty areas.
- Demonstrate a professional attitude.
Specific Program Admission Information
Listed below are additional requirements for admission to the Surgical Technology program.

College placement testing
- Placement testing into MATH 104 or completion of MATH 103. A student who has college algebra transfer credit (grade of “C” or better) is not required to take the placement test.
- Placement testing into ENGL 101 or ENGL 111 or completion of ENGL 100. Student who has college transfer credit for ENGL 101 is not required to take the placement test.
- Placement testing above the reading requirements or completion of DEV 044. Student who has college transfer credit for ENGL 101 is not required to take the placement test.

Course completion of the following:
- High school graduate or GED equivalency
- High school biology (grade of “C” or better) within the past five years or BIO 100 or BIO 101 (with a grade of “C” or better)
- Completion of the following:
  - CHEM 113 with a grade of “C” or better
  - NURC 101 Nurse-Aide Training Program
  - NURC 102 Patient Care Skills I
  - HIMT 121 Advanced Medical Terminology

Grade Point Average of 2.5 or better in courses related to the Surgical Technology plan of study

Upon acceptance into the Surgical Technology, the following additional items are required to be completed by the student before registration for autumn quarter will be allowed:
- MULT 102 Cardiopulmonary Resuscitation
- Completed Health Record on file at the Health Records Office, including drug testing and background check.

Acceptance is conditional on the submission and clearance of student background history by Columbus State Community College's Public Safety Department and drug screening clearance by Columbus State Community College's Health Records Office. Prospective students can obtain additional information at program information sessions or by contacting Leslie Washington at (614) 287-3655 or lwashi01@cscc.edu. Interested persons also can visit the Surgical Technology Web site at www.csc.edu/SurgTech/.

Statement Regarding Infectious Diseases
Students in this program perform clinical work on real people. Columbus State does not discriminate against students, faculty, or patients in any way, or based on color, creed, national origin, gender, disability or sexual preference. The patient populations with whom we work come from all walks of life.; thus students may be exposed to many types of communicable diseases. These are not limited to, but may include, Hepatitis (A, B, C or D), HIV/AIDS, TB, Measles, German measles, and Mumps.

All students are required to have appropriate immunizations after they are admitted to the program (information is given to all admitted students). Additionally, although all precautions are taken to minimize exposure and risk, there is always a slight possibility that precautions may fail or that a student may accidentally expose himself/herself. All students entering the program must be aware of this slight, but real, potential risk. All students are encouraged to have personal health insurance in effect by the first day of class.

Technical Communication
Associate of Applied Science Degree

In business, industry, government, technology and health care, there is a need to communicate information of a technical nature to varied audiences. Technical Communication is the process of translating technical information into forms that different audiences can understand and use. Technical communicators are the translators. They write, edit, and perform page layout and design on user manuals, textbooks, training materials, press releases, memos, environmental impact statements, video scripts and online help files. They design Web pages, develop computer-based training (CBT) modules, prepare multimedia presentations, and develop material for delivery on CD, DVD and the Internet.

The Associate of Applied Science Degree in Technical Communication at Columbus State Community College is the only technical communication degree program in central Ohio. The program provides students with the practical, specific skills and technical knowledge needed to get entry-level jobs as technical communicators. All courses are taught in a state-of-the-art computer classroom with a variety of computer applications.

The program is designed to be completed within six quarters of full-time study. Students are required to take eleven courses in Technical Communication (TCO courses) and another 15-25 credits in a single cognate (specialization) area. The choice of the cognate area is up to the student in consultation with the Technical Communication advisor and the advisor in the cognate area. Currently, there are more than 20 approved cognates in areas such as accounting, aviation maintenance, computer programming, marketing, microcomputing and graphic communications. For a complete listing, contact the Technical Communication Program Coordinator.

A technical communicator should be able to discuss projects with a technical expert and know the best way to translate information so that the targeted audience will understand it. The cognate area enhances the knowledge and skills of the technical communicator and provides vocabulary and basic knowledge about the chosen field.

Upon completion of the Associate of Applied Science Degree in the Technical Communication, the graduate will be able to:

• Write in the forms most often required of a Technical Communicator: processes, procedures, reports, manuals, etc.
• Translate complex material into clear, concise, and easy-to-use language for specific targeted audiences.
• Participate in the entire technical writing cycle, both individually and collaboratively, including planning, researching, and coordinating projects; writing, revising, and editing documents; designing and placing graphics; and producing a final product.
• Prepare and deliver oral presentations both in formal and informal settings.
• Develop basic graphics and integrate them into text.
• Apply the principles learned in technical cognates to technical communication.
• Critically evaluate existing documentation for clarity, completeness, and effectiveness.
• Operate the word processing and desktop design packages most widely used in the technical communication field.
• Incorporate the basic concepts of multimedia production into professional technical presentations.
• Edit documents individually and collaboratively, using both hard copy and online methods.
• Carry out, prepare, and produce documented primary or secondary research.
• Demonstrate an understanding of concepts of time/project management both in individual and team projects.

Veterinary Technology

Veterinary Technology Associate Degree

Veterinary technicians are registered, certified or licensed members of the veterinary health care team. They play an integral role in many areas of veterinary clinical practice, including medical, surgical, laboratory, and office procedures. All tasks are performed under the supervision of a licensed veterinarian. Compassion for animals is essential, because the main focus of individuals employed as veterinary technicians is the treatment and nursing of healthy and sick animals.

The American Veterinary Medical Association accredits Columbus State’s Veterinary Technology program. The Associate of Applied Science Degree in Veterinary Technology provides students with both classroom and clinical experiences. Students have the opportunity to intern at The Ohio State University Veterinary Teaching Hospital. Students also will spend a portion of their clinical experience in various veterinary settings, including research centers, private clinical practices, veterinary emergency hospitals, veterinary diagnostic laboratories, and zoos. Columbus State Community College emphasizes safety and disease prevention because students and employees in health care professions may be exposed to infectious materials, communicable, and zoonotic diseases.

Columbus State Community College also offers an evening Veterinary Technology program designed for the working student. The evening program can be completed in nine quarters with courses starting no earlier than 5:00 p.m. Some daytime availability may be required during the Clinical Experience A-D courses.

For students interested in equine health, a joint program has been developed between Columbus State’s Veterinary Technology and Otterbein College’s Department of Equine Science. Successful completion of these two programs will result in an Associate of Applied Science Degree in Veterinary Technology from Columbus State Community College, and the Bachelor of Arts Degree in Equine Health Technology from Otterbein College. For more information, contact Dr. Maria Calderone, mcalderone@otterbein.edu.

For students interested in animal science, a joint program has been created between Columbus State’s Veterinary Technology and The Ohio State University’s Department of Animal Science. Successful completion of these two programs will result in an Associate of Applied Science Degree in Veterinary Technology from Columbus State Community College, and the Bachelor of Science Degree in Agriculture from The Ohio State University. For more information, please contact Mariette C. Benage, benage.1@osu.edu. Special advising with the program coordinator is necessary for students who wish to participate in these joint programs.

Please note that there may be changes to the Veterinary Technology program admission requirements and curriculum periodically. Any admission criteria or curriculum changes will be updated at the Veterinary Technology Mandatory Information Sessions.

Upon completion of the Associate of Applied Science Degree in Veterinary Technology, and under the supervision of a licensed veterinarian, the graduate will be able to:

- Perform patient assessment techniques, obtain thorough patient history, and maintain medical records for patient animals in a veterinary health care setting.
- Effectively communicate preventative medicine, treatment protocols, dental health, and medical and surgical procedures to veterinary clients.
- Prepare and dispense medications according to a prescription, perform drug dosage calculations and maintain controlled drug records.
- Administer and understand the effects of treatments and/or medications delivered either orally or parenterally.
- Apply and manage wound dressings, bandages, and splints.
- Properly collect, prepare and handle diagnostic specimens for laboratory analysis.
- Perform clinical laboratory procedures, including complete blood counts, serum chemistries, microbiology, immunologic testing, urinalysis, and cytology.
- Identify internal, external, and blood parasites of domestic animal species.
- Safely handle and perform routine procedures on common laboratory animals used in research settings.
- Prepare equipment, instruments, animals, and medications for surgical, diagnostic, and anesthetic procedures.
- Administer and effectively monitor anesthesia, including anesthetic induction, maintenance, and recovery by inhalation and/or parenteral routes.
- Assist in diagnostic, medical, and surgical procedures, including post-operative management, pain control, and skin closure.
- Perform complete routine dental prophylaxis.
- Administer and monitor basic and/or intensive nursing care, including fluid therapy and nutritional management.
- Perform diagnostic imaging procedures using appropriate safety measures.
- Comprehend the approach to providing safe and effective care for avian, exotic and small mammal species.

Graduates register with the Ohio Veterinary Medical Licensing Board to become Registered Veterinary Technicians in the State of Ohio. Graduates are eligible to take the Veterinary Technician National Exam (VTNE) that is recognized in more than 40 states to certify veterinary technicians. Students must successfully pass the VTNE to be eligible for licensure in the State of Ohio.

Specific Program Admissions Information

Prospective students are required to attend an information session where they will receive the separate admission application for the Veterinary Technology program. Detailed admission criteria, plans of study, and career opportunities are also discussed. These sessions, held periodically throughout the year, are very helpful in answering the prospective students’ questions. General information packets and information session dates and times may be obtained by contacting the office associate at (614) 287-5511 or by sending an e-mail request to kfannin@csc.edu.
The yearly deadline for application and completion of admission requirements is March 23 for admission beginning the following summer quarter (evening plan of study) or the following autumn quarter (day plans of study), based on space availability. Students must meet all admission requirements before being considered for admission into the Veterinary Technology.

Listed below are additional requirements for admission to the Veterinary Technology:

- High school graduate or GED equivalency
- Required high school (or equivalent) courses in Biology (grade of “C” or better within the past five years) or BIO 100 or 101 (grade of “C” or better) and Chemistry (grade of “C” or better within the past three years) or CHEM 100 (grade of “C” or better)
- Placement into ENGL 101 Beginning Composition.
- Placement into “No Reading Required” (students with college transfer credit for ENGL 101 or ENGL 111 are not required to take the placement test).
- Completion of MATH 103 Beginning Algebra II with a grade of “C” or better
- Attendance at a Veterinary Technology Mandatory Information Session (Applicants will receive a separate admission application for the Veterinary Technology program at these sessions. Applicants will not be considered for admission until an information session has been attended.
- Computer literacy (high school, work-related or completion of CIT 101)
- Grade point average of 2.5 or better (most recently completed coursework).

Upon acceptance into the Veterinary Technology, the student will be required to complete the following Health Related Technology Requirements:

- Complete a Health Statement declaring all allergies, medications, and physical limitations or restrictions
- Tuberculin Testing (Mantoux) within the past year
- Tetanus Booster (Td) within the past eight years
- The student must obtain health insurance coverage and keep the coverage on a continual basis while attending CSCC as a Veterinary Technology student.
- Rabies vaccination or signed waiver
- Drug Test
- Background Check

Acceptance is conditional on the submission and clearance of student background history by Columbus State Community College’s Public Safety Department and drug screening clearance by the Columbus State Community College’s Health Records Office. You can obtain additional information at the program information sessions or by contacting Kelly Fannin at (614) 287-5511.
Course Descriptions

The College’s Course Numbering System

No two courses at Columbus State have the same course number. The three- or four-letter alpha identifier indicates the department, and the three numbers indicate the specific course within each department.

Listed below are the various departments in alphabetical order. Refer to this chart to find the department in which a given course can be found. For example, ACCT 106 Introduction to Accounting would be found in the Course Descriptions section under Accounting (ACCT).

</tr>
</thead>
<tbody>
<tr>
<td>ACCT 107</td>
<td>Managerial Accounting</td>
<td>(A, W, SP, SU, DL)</td>
<td>5 credits</td>
</tr>
</tbody>
</table>

Course is a continuation of ACCT 106 with special emphasis on the uses of financial measurements, calculations, and reports used by an organization to make a variety of management decisions. Specific uses discussed are methods for costing of products and services, decision analysis, budgeting, and control.

Lecture: 5 hours
Lab fee: $2.00

Course Number—The three- or four-letter alpha identifier indicates the department; the three numbers that follow identify the specific course. Three of four letters followed by XXX indicate an elective requirement for which only the department is specified; here the student may choose the specific course, subject to approval of his/her advisor. Where no alphabetical or numerical characters appear, the elective may come from more than one department.

Quarter Offered—Indicates which quarter or quarters the course is offered: A(Autumn), W(Winter), SP(Spring), SU(Summer).

Prerequisite—Any coursework that must be completed before the student is eligible to enroll for the course. For example, if ENGL 101 were listed as a prerequisite for a course, then only students who have completed ENGL 101 would be eligible to register for the course.

Corequisite—Any coursework that must be completed during the same quarter as the course in which you are enrolling. For example, if course ACCT 271 is a corequisite with course ACCT 272, both courses must be taken during the same quarter.

Class Hours—The number of hours per week a particular course meets in a lecture classroom.

Lab Hours—The number of hours per week a particular class meets in a laboratory situation. This is usually in addition to class hours.

Credits—The number of credits to be awarded to students who successfully complete the course.

Distance Learning (DL)—Designates course is also available in a distance learning format. Courses taken in the distance learning format may be subject to a different lab fee.

Lab Fee—Fee required of students registering in certain courses that is used to offset the cost of consumable materials, technology, and printing in classrooms or laboratory situations.

Module—A modular course is defined as a part of the main course that can stand alone. The topics are related, and, when combined with all parts, become the entire course. Modular courses usually do not exist without the main course. Courses may have various methods of instructional delivery, i.e., faculty lectures, Web, self-paced, etc. Modular courses may run on a term basis or be flexibly scheduled. Modular courses are designated as having an alpha letter after the course number, i.e., AVI 324A, AVI 324B. These examples are two modules of the main course AVI 324.
Accounting (ACCT)

ACCT 106 Financial Accounting (A, W, SP, SU, DL) 5 credits
ACCT 106 offers an introduction to accounting, emphasizing how general purpose financial statements communicate information about the business corporation’s performance and position for users external to management. Approximately one-third of the course emphasizes how the accountant processes and presents the information and includes exposure to recording transactions, adjusting balances, and preparing financial statements for service and merchandising firms according to established rules and procedures. The balance of the course examines major elements of the statements such as cash, receivables, inventory, long-lived assets, depreciation, current and long-term liabilities, and capital stock transactions. The Income Statement, Owner’s Equity Statement, Cash Flow Statement, and Balance Sheet are also covered.

Lecture: 5 hours – Lab: 0 hours
Concurrent: ACCT 106 and ACCT 107 can be taken concurrently
Lab fee: $2.00

ACCT 107 Managerial Accounting (A, W, SP, SU, DL) 5 credits
Course is a continuation of ACCT 106 with special emphasis on the uses of financial measurements, calculations, and reports used by an organization to make a variety of management decisions. Specific uses discussed are methods for costing of products and services, decision analysis, budgeting and control.

Lecture: 5 hours Lab fee: $2.00
Concurrent: ACCT 106 and ACCT 107 can be taken concurrently

ACCT 108 Intermed. Preparedness (A, W, SP, SU, DL) 4 credits
This is a follow-up course to ACCT 106 and ACCT 107 that develops the mechanical phase of theoretical concepts. This course is oriented toward the accounting major to enable the student to apply double entry accounting methods toward the daily maintenance of accounting records and the preparation of basic financial statements.

Lecture: 4 hours
Prerequisite: None Lab fee: $2.00

ACCT 121 Data Processing for Accountants (DL) 4 credits
As applied to the accounting world, in-depth practice in the varied practical applications of Microsoft Excel electronic spreadsheet.

Lecture: 4 hours
Prerequisite: ACCT 106 Lab fee: $5.00

ACCT 126 Accounting Systems (A, W, SP, SU, DL) 4 credits
ACCT 126 studies current practices and computer technologies used to design, utilize, and manage accounting information systems. Transaction process cycles, general ledgers, and subsidiary ledgers are analyzed. Internal controls, information security, and fraud detection are also examined. Students will prepare flowcharts and practice on accounting system software.

Lecture: 4 hours
Prerequisite: ACCT 106 and ACCT 107 Lab fee: $5.00

ACCT 131 Cost Estimating (On Demand) 4 credits
This course is a study of how to identify and estimate the various project cost elements such as labor, materials, and overhead. The cost behavior of variable, fixed, and mixed costs will be analyzed. The refinements of cost systems will also be covered.

Lecture: 4 hours Lab fee: $1.00

ACCT 211 Cost Accounting (SP, DL) 4 credits
ACCT 211 offers a study of the field of job order cost accounting; the cost cycle methods of handling materials, labor costs, and manufacturing overhead expenditures (controllable and uncontrollable); process cost accounting; byproducts and joint product costing; fundamental cost-volume-profit relationships (break-even analysis); static and flexible budgeting; activity-based costing and management.

Lecture: 4 hours
Prerequisite: ACCT 107 Lab fee: $2.00

ACCT 231 State and Local Taxation (SP, SU, DL) 4 credits
ACCT 231 covers payroll taxes (withholding and reports), unemployment taxes, Worker’s Compensation, franchise taxes, personal property taxes, municipal income taxes, Ohio personal taxes, sales and use taxes, real estate taxes, and vehicle and other taxes.

Prerequisite: ACCT 106 Lab fee: $5.00

ACCT 232 Federal Taxation I (A, SP, DL) 4 credits
ACCT 232 covers individual income taxes, returns, income exemptions, deductions, gains and losses, rates, adjustments, and credits. Also explores problems of proprietorship, partnerships, corporations, inventories, depreciation accounting, installment and deferred sales treatment. Filing requirements, payments, refunds, claims, and tax planning techniques are discussed.

Lecture: 4 hours
Prerequisite: ACCT 106 Lab fee: $5.00

ACCT 233 Federal Taxation II (W, DL) 4 credits
A continuation of ACCT 232, this course deals with nonliquidating distributions, earning and profits, and complete liquidations and corporate reorganization. Sub-chapter S corporations and partnerships are also covered, including reporting income, distributions, and liquidations. Estate and gift taxation are introduced.

Lecture: 4 hours
Prerequisite: ACCT 232 Lab fee: $3.00

ACCT 240 Tax Practice (A, DL) 4 credits
An advanced tax course covering the administrative aspects of practice before the IRS including rules, penalties, procedures, and ethics for client representation as a CPA, EA, or general tax preparer.

Lecture: 4 hours
Prerequisite: ACCT 236

ACCT 241 Auditing I: Principles (W, DL) 3 credits
This is a course concerned with the identification of professional qualifications and responsibilities of an auditor and study of auditing concepts utilized in the investigation and appraisal of economic information. Topics of study will include the role of the auditor in society, professional ethics, auditing standards, professional liability, audit objectives, relationship of risk and materiality to audit strategies, planning and accepting an engagement, an auditor’s concern with internal control and evidence gathering and analysis techniques for all audit cycles: revenue, expenditure, personnel services, productive, investing, and financing and cash.

Lecture: 3 hours
Prerequisite: ACCT 250 Lab fee: $3.00

ACCT 242 Auditing II: Applications (SP, DL) 3 credits
ACCT 242 is concerned with the practical application of professional qualifications and responsibilities of an auditor utilized in the investigation and appraisal of economic information. Evidence gathering and analysis techniques will be applied in a simulated audit case. Topics of study include audit sampling and auditor liability as well as the audit report and other special reports. Lecture: 3 hours

Prerequisite: ACCT 241 Lab fee: $3.00

ACCT 243 Professional Standards and Ethics for Accountants (On Demand) 1 credit
This course will provide the student with an understanding of the American
Institute of Certified Public Accountants’ Code of Professional Conduct and Rules of Conduct. Students will study real-world situations and follow the required rules to make ethical decisions.

Lecture: 1 hour Lab fee: $1.00

ACCT 250 Intermediate Accounting I (A, W, SP, SU, DL) 4 credits
This course presents a continuation of accounting theory. Topics explored include an in-depth study of the accounting process and accounting records; the nature and content of accounting statements: balance sheet, income statement, and retained earnings statement; analysis of working capital; analysis and methods of valuation and statement presentation of the following items: cash and receivables, and inventories. Lecture: 4 hours Prerequisite: ACCT 108 with a “C” or better and completion of, MATH 103 Lab fee: $1.00

ACCT 252 Intermediate Accounting II (A, SU, DL) 4 credits
This course offers a continuation of ACCT 250 including analysis and methods of valuation and statement presentation of the following items: current liabilities, and contingent items, intangible assets, deferred charges and long-term liabilities, investments, stockholders equity, and earnings per share. Lecture: 4 hours Prerequisite: ACCT 250 Lab fee: $1.00

ACCT 253 Intermediate Accounting III (A, W, DL) 4 credits
ACCT 253 is a continuation of ACCT 252 with a study of accounting for taxes, leases, pensions, cash flow statements, error analysis, and full disclosure in financial reporting. Lecture: 4 hours Prerequisite: ACCT 252 Lab Fee: $1.00

ACCT 258 Advanced Accounting (SP) 4 credits
ACCT 258 is the study of financial accounting theory and practice relating to accounting for business combinations, consolidated financial statements, partnerships, segment and interim reports, and foreign operations. Lecture: 4 hours Prerequisite: ACCT 253 Lab fee: $1.00

ACCT 266 Public Admin./Fund Accounting (SP, SU, DL) 4 credits
ACCT 266 deals with the principles and applications of fund accounting as it relates to state and local governments. It includes budgeting, accounting, reporting, and auditing for federal government, colleges, universities and hospitals. Lecture: 4 hours Prerequisite: ACCT 250

ACCT 269 Foundations of Accounting (DL) 5 credits
ACCT 269 is a survey course concerned with the foundations of both financial and managerial accounting. This course covers the accounting for assets, liabilities, and owner’s equity, financial statements and analysis, and managerial accounting. This course is not open to students with credit for ACCT 106 or ACCT 107. ACCT 269 is intended to meet the requirements of pre-MBA students. Lecture: 5 hours Prerequisite: None Lab fee: $2.00

ACCT 271 Accounting Practicum (A, W, SP, SU) 3 credits
ACCT 271 offers a structured employment situation in which the student is introduced into an actual accounting office. The student is expected to perform many of the accounting procedures studied in conjunction with their other classes (i.e., bank reconciliations, payroll, journal entries, etc.) and to gain relevant experience and a limited work record. Weekly supervision of the intern is used to solve any job-related problems and to attempt to develop a sense of responsibility and a professional attitude within the student/intern. The job must be at least 21 hours a week in accounting work. Practicum: 21 hours Prerequisite: ACCT 250 Corequisite: ACCT 272

ACCT 272 Accounting Seminar (A, W, SP, SU) 2 credits
ACCT 272 offers a practical work experience in which the student is expected to perform several operational auditing procedures (i.e., flowcharts, organization charts, analysis of existing internal control, recommendations, etc.) related to an accounting internship position. Emphasis is placed upon analyzing and further understanding the student’s working environment. Lecture: 2 hours Prerequisite: ACCT 250 Corequisite: ACCT 271

ACCT 275 Fraud Examination I (On Demand) 2 credits
This course is designed as:
- An elective course for the accounting major.
- A useful course for business executives interested in acquiring additional information about fraud detection, investigation and prevention.
- An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.) Lecture: 2 hours Lab fee: $2.00

ACCT 276 Fraud Examination II (On Demand) 2 credits
This course is designed as:
- An elective course for the accounting major.
- A useful course for business executives interested in acquiring additional information about fraud detection, investigation and prevention.
- An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.) Lecture: 2 hours Lab fee: $2.00

ACCT 277 Fraud & Legal Environment (On Demand) 4 credits
This course provides an overview of the legal system as it relates to fraud and fraud examination. The topics covered include basic business law, civil court system, criminal law, and the criminal court system. Other topics covered are law enforcement agencies, burden of proof, subpoenas, search warrants, charges, arrests, working papers, reports, testimony, and the legal rights of suspects. Lecture: 4 hours Lab fee: $3.00

ACCT 278 Fraud & Investigative Procedures (On Demand) 4 credits
This course provides background information about fraud rationale from a social and behavioral science perspective. It also covers appropriate investigative procedures such as interviews of witnesses and suspects, and interrogations. Lecture: 4 hours Lab fee: $3.00

ACCT 281 Sarbanes-Oxley Act I (On Demand) 2 credits
This course is designed as:
- An elective course for the accounting major.
- A useful course for business executives interested in acquiring additional information about the Sarbanes Oxley Act.
- An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.) Lecture: 2 hours Lab fee: $2.00

ACCT 282 Sarbanes-Oxley Act II (On Demand) 2 credits
This course is designed as:
- An elective course for the accounting major.
- A valuable course for business executives interested in acquiring additional information about the Sarbanes Oxley Act.
- An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.) Lecture: 2 hours Lab fee: $2.00
ACCT 285 CPA Exam Preparation: Auditing and Attestation  
(On Demand)  
3 credits
This course covers the accounting implications of business planning, measurement, information technology, legal entities, and economic concepts using the MDS method. Course presumes that student has background knowledge in this area such as would have been obtained through previous coursework in Economics, Auditing, Information Systems, and the like. 
Lecture: 3 hours
Lab fee: $350.00 (The lab fee includes all course materials and is nonrefundable after their distribution).

ACCT 286 CPA Exam Preparation: Business Environment  
(On Demand)  
3 credits
This course covers the accounting implications of business planning measurement, information technology, legal entities, and economic concepts using the MDS method. Course presumes that student has background knowledge in this area such as would have been obtained through previous coursework in economics, cost accounting, information systems, and the like. 
Lecture: 3 hours
Lab fee: $350.00 (The lab fee includes all course materials and is nonrefundable after their distribution).

ACCT 287 CPA Exam Preparation: Financial Accounting and Reporting  
(On Demand)  
3 credits
This course covers the accounting principles generally accepted in the United States (GAAP) that affect business organizations, not-for-profit organizations, and governmental entities using the MDS method. Course presumes that the student has background knowledge in this area as would have been obtained through previous coursework such as intermediate accounting. 
Lecture: 3 hours
Lab fee: $350.00 (The lab fee includes all course materials and is nonrefundable after their distribution).

ACCT 288 CPA Exam Preparation: Regulation  
(On Demand)  
4 credits
This course covers the federal taxation, ethics, professional responsibilities, legal responsibilities, and business law using the MDS method. This course presumes that the student has background knowledge in this area such as would have been obtained through previous coursework in the areas of Federal Tax, Business Law, and Ethics. 
Lecture: 4 hours
Lab fee: $450.00 (The lab fee includes all course materials and is nonrefundable after their distribution).

ACCT 291 Internal Audit I  
(On Demand)  
2 credits
This course is designed as:
• An elective course for the accounting major. 
• An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.)
Lecture: 2 hours  Lab fee: $2.00

ACCT 292 Internal Audit II  
(On Demand)  
2 credits
This course is designed as:
• An elective course for the accounting major. 
• An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.)
Lecture: 2 hours  Prerequisite: ACCT 291 Lab fee: $2.00

ACCT 293 Operational Auditing  
(On Demand)  
2 credits
This course is designed as:
• An elective course for the accounting major. 
• A useful course for business executives interested in acquiring additional information about fraud detection, investigation, and prevention. 
• An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.)
Lecture: 2 hours  Lab fee: $2.00

ACCT 294 Internal Audit: Special Topics  
(On Demand)  
2 credits
This course is designed as: 
• An elective course for the accounting major. 
• An interesting course for individuals in need of related continuing education credit. (Please verify that this course qualifies for continuing education credit with your certifying organization.)
Lecture: 2 hours  Lab fee: $2.00

ACCT 295 – 299 Studies in Contemporary Accounting  
(On Demand)  
1–5 credits
These are specially designed courses offering to meet the needs of the constantly changing accounting community and student population. 
Prerequisite: Permission of Instructor

Anthropology (ANTH)

ANTH 200 Introduction to Physical Anthropology  
(A, W, SP, SU, DL)  
5 credits
This course introduces students to the basic concepts of biological anthropology. It discusses anthropology's relationship with other biological and social sciences, surveys nonhuman primates, examines some aspects and examples of nonhuman behavior in depth, covers topics in current human diversity, and looks at human evolutionary history. A distance learning (DL) version of Introduction to Physical Anthropology is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $6.00

ANTH 201 World Prehistory  
(A, W, SP, SU, DL)  
5 credits
This course is an overview of world prehistory. Since the majority of human existence occurred long before written records and historical documents were available, this course introduces students to the fundamentals of prehistoric archaeology. The course surveys human origins, investigates the emergence of domestication and agriculture, and explores the rise of settlements and civilizations. A global perspective is taken in the study of the prehistoric human past. A distance learning (DL) version of World Prehistory is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $6.00

ANTH 202 Intro to Cultural Anthropology  
(A, W, SP, SU)  
5 credits
Cultural anthropology focuses on understanding human cultural diversity, using research techniques such as participant observation to explore the lifeways of groups. Topics include cross-cultural treatments of social systems such as politics, economics, family and marriage, and kinship. General theories of cultural interpretation and change are discussed in a broad geographical context. Students apply concepts and complete a “mini-project” using anthropological research techniques. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $6.00

ANTH 240 Intro to Forensic Anthropology  
(A, W, SP)  
5 credits
This course introduces students to the field of forensic anthropology.
Forensic sciences use methods and applications from anthropology in the investigation and detection of crime, the processing of mass disasters, the recovery of war dead and missing persons, and in international human rights investigations. The course covers the development of forensic anthropology, examines the theoretical and methodological bases of forensic anthropology, and considers present applications as well as future directions in this relatively new subfield of anthropology.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: ANTH 200 or BIO 161 or LAW 111 Lab fee: $6.00

**ANTH 290 Capstone Experience in Anthropology**  
**On Demand**  
3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have a special interest in continuing in a baccalaureate degree program in anthropology. Course requirements include the completion and presentation of a research project that relates to the student’s academic interest after reviewing research methodologies and findings in anthropology; assembly of a portfolio that covers student’s academic career at Columbus State Community College; and participation in testing of academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: Completion of AA/AS core requirements and at least 75 hours toward the degree and five credit hours in anthropology
Lab fee: $6.00

**ANTH 293 Independent Study in Anthropology**  
**On Demand**  
1–5 credits
ANTH 293 is an individual, student-structured course that examines a selected topic in anthropology through intensive reading or research. The independent study elective permits a student to pursue his/her interests within the context of a faculty-guided program.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Permission of the Instructor and the Chairperson and one course in Anthropology
Lab fee: $6.00

**ANTH 299 Special Topics in Anthropology**  
**On Demand**  
1–5 credits
ANTH 299 allows students to examine selected topics of interest in anthropology in detail.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Varies
Lab fee: $6.00

**Applied Technologies (APPL)**

**APPL 100 Survey of the Construction Industry**  
(A, W, SP, SU)  
2 credits
This seminar course provides an overview of the vast array of opportunities in the construction industry. Students will be exposed to careers ranging from the many administrative and management career opportunities available in the industry (e.g., construction management, architecture, and civil engineering) as well as the wide range of skilled trades careers needed to build America (e.g., electrician, carpenter, operating engineer, plumber, HVAC, and welder). Also covered will be the wide range of construction operations: residential, commercial, industrial, and public works.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: None
Lab fee: $10.00

**APPL 107 Introduction to Welding**  
4 credits
This course introduces the learner to the welding profession, welding tools, welding safety, OxyFuel setup, cutting, and heating, base metal preparation, weld quality, and all aspects of Shielded Metal Arc Welding (SMAW) (known as “Stick Welding”) including equipment setup, and electrode selection. Through this course the learner will be able to assess what other welding skills and knowledge they desire and/or need for the work place.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: None
Lab fee: $85.00

**APPL 108 Fundamentals of MIG Welding**  
4 credits
This course introduces the learner to additional welding symbols and drawings, all aspects of Gas Metal Arc Welding (GMAW) (known as MIG Welding), including equipment set-up, gas selection, usage of both solid core and flux core welding wire, using both fillet and multiple-pass welds. Through this course the learner will be able to assess what other welding skills and knowledge they desire and need for the various trades in the work force.

Prerequisite: APPL 107

Lecture: 2 hours – Lab: 4 hours
Lab fee: $85.00

**APPL 109 Basic Skills for the Construction Industry**  
3 credits
This course introduces the student to basic technical skills that are common to all construction trades: safety in the workplace, measuring and construction math, hand and power tool usage, blueprint reading, and basic rigging operations.

Lecture: 2 hours – Lab: 2 hours
Lab fee: $20.00

**APPL 115 Introduction to Carpentry**  
4 credits
This course introduces the learner to the varied and complex systems that make up the carpentry trade. History of the trade, career opportunities, and types of construction are discussed. Course introduces the learner to the proper and safe use of hand and portable power tools that are used on the jobsite.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: None
Lab fee: $35.00

**APPL 116 Carpentry: Structural Framing**  
4 credits
This course introduces the learner to different systems within carpentry. Blueprint reading, plans and drawings are discussed. Floor, wall, ceiling, and roof framing are the focus of this course.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: APPL 115
Lab fee: $35.00

**APPL 117 Carpentry: Interior/Exterior Repair and Renovation**  
4 credits
Roofing applications, stairs, interior and exterior finishes, and drywall are the main focus of this course. Energy conservation, thermal and moisture applications and “green building” are introduced.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: APPL 116
Lab fee: $40.00

**APPL 118 Intermediate Welding Applications**  
4 credits
Using welding methods, materials, and techniques of Arc welding, MIG welding, and OxyFuel welding, the student will be instructed in methods that are best suited to weld metals in a wide range of real-world applications. This includes ‘in-position’ or ‘out-of-position’ welding on flat work as well as round work.

Lecture: 2 hours - Lab: 4 hours
Prerequisites: APPL 108
Lab fee: $95.00

**APPL 119 Construction Industry Employability Skills**  
3 credits
This seminar course covers a wide range of life and employability/employee skills. These skill sets are essential to successfully enter the workforce and build a career with a clear upward path.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: None
Lab fee: $15.00

**APPL 125 Introduction to Electrical Work**  
4 credits
This course introduces the learner to the electrical profession, electrical safety, electrical tools, and basic skills. Basic electrical theory and the National Electrical Code will be introduced. The learner will engage in conduit bending, wiring single, two-way, and three-way switches.
valuation process, appraisal mathematics and use of financial calculator, correlating to a final conclusion of value. Coverage includes review ofing on detailed implementation of the three approaches to valuation andThis course covers the entire spectrum of the valuation process, center -

### APPL 126 Electrical: Introduction to Commercial Wiring 4 credits
This course introduces the learner to electrical blueprints, conductors, conductor termination, splices, and wiring devices. Residential wiring, grounding, circuit breakers, and fuses are covered in depth. Installation of electrical services, lighting, lamps, ballasts, and components are discussed.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: None  Lab fee: $35.00

### APPL 127 Electrical: Repair and Renovation 4 credits
This course introduces the learner to motor theory and application, motor maintenance, load calculations, and over-current protection. Distribution equipment, fire alarm systems, and electrical hazards are discussed. This course helps the learner to apply basic knowledge of wiring and circuitry to diagnose and repair basic wiring problems.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: APPL 126  Lab fee: $35.00

### APPL 134 Introduction to Plumbing 4 credits
This course introduces the learner to the plumbing profession, plumbing safety, tools, plumbing math, and drawings. Plastic, copper, and cast iron pipe and fittings are discussed. Drain, waste and vent systems are introduced.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: None  Lab fee: $40.00

### APPL 135 Plumbing: Fixtures, Valves, and Faucets 4 credits
This course introduces the learner to installation and testing of DWV piping as well as installing roof, floor, and area drains. Installing and testing water supply piping, installing fixtures, valves, and faucets, and water heater installation are covered.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: APPL 134  Lab fee: $40.00

### APPL 136 Plumbing: Repair and Renovation 4 credits
This course introduces the learner to plumbing codes, types of venting, direct and special waste, and sewage and sump systems. Servicing of piping systems, fixtures, and appliances are discussed in detail.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: APPL 135  Lab fee: $40.00

### Appraisal (APPR)

#### APPR 101 Principles of Appraisal (A, W, SP, SU) 3 credits
This is the introductory course to appraisal, establishing a firm foundation for principles, concepts, and procedures for implementation of the valuation process. Coverage includes attributes and necessary skills for the professional appraisal, identification of centers for employment opportunities or establishing individual, independent appraisal practices, the nature of value, basic appraisal principles, federal reserve system, money and capital markets, real estate markets, valuation process, data collection and analysis, neighborhood description, site and improvement description, requirements for Ohio appraiser licensing or certification, and professional appraisal designations.

Lecture: 3 hours – Lab: 0 hours  Lab fee: $2.00

#### APPR 102 Procedures of Appraisal (A, W, SP, SU) 3 credits
This course covers the entire spectrum of the valuation process, centering on detailed implementation of the three approaches to valuation and correlating to a final conclusion of value. Coverage includes review of valuation process, appraisal mathematics and use of financial calculator, methods of site valuation, cost approach, sales comparison approach, income approach, reconciliation, and final conclusion of value.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: APPR 101  Lab fee: $2.00

#### APPR 115 Report Writing with Case Studies (A) 2 credits
This course covers techniques in writing both form and narrative appraisal reports. Course covers the logic progression appraisal format as well as writing techniques. Students will be expected to write narrative style descriptions, while applying USPAP to report writing and formatting techniques. Students will exam case studies and analyze for errors and logic consistencies.

Lecture: 1 hour – Lab: 0 hours
Prerequisites: APPR 101 and APPR 102  Lab fee: $2.00

#### APPR 211 Litigation Support and Expert Testimony (SP) 3 credits
This course demonstrates the numerous opportunities available for the appraiser to offer appraisal services in litigation matters involving real estate taxes, contamination, condemnation, fraud, divorces, construction defects, etc. Coverage includes litigation opportunities, role of the appraiser, role of the attorney, compliance with USPAP, pretrial conference, witness demeanor and effective communication, direct examination, cross examination, and depositions.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: APPR 101  Lab fee: $2.00

#### APPR 235 Residential Market Analysis/Best Use (S) 2 credits
Course provides a look at the relationship between market analysis and high-est and best use. Students will examine the market by reviewing census data, government reports, demographics, rent studies and other real estate studies to learn how to measure demand. Students will also explore the four tests for highest and best use and the proper support for each conclusion.

Lecture: 2 hours – Lab 0 hours
Prerequisite: APPR 101 and APPR 102  Lab Fee: $3.00

#### APPR 240 Residential Site Valuation and Cost Approach (AU) 2 credits
Course will focus on the valuation of vacant land parcels and the development of the cost approach. The valuation of land is explored by looking at all of the different techniques used in the market. This course will explore the methods used to establish replacement cost and reproduction costs of structures as well as a discussion of depreciation and the methods used to measure depreciation in the marketplace.

Lecture: 2 hours – Lab: 0 hours
Prerequisites: APPR 101 and APPR 102  Lab Fee: $3.00

#### APPR 250 Residential Sales Comparison and Income Approaches (W) 3 credits
Course provides the student with the techniques necessary for completing the sales comparison and income capitalization approaches of the valuation process. The course explores paired sales analysis as a tool to support adjustments and the selection of appropriate capitalization rates for use in the income approach.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: APPR 101 and APPR 102  Lab Fee: $3.00

#### APPR 260 Advanced Residential Applications (SP) 2 credits
This course will apply advanced residential methodologies involving a complex residential case study appraisal assignment. This case study will inter-relate site valuation, the cost approach, the sales comparison approach and the income approach to value. Students will correlate to a final conclusion of value of their own choosing and learn to support that conclusion.

Lecture: 2 hours – Lab: 0 hours
Prerequisites: APPR 101 and APPR 102  Lab Fee: $3.00
ARCH 110 Construction Drafting: Manual I (A, W, SP, SU) 2 credits
This course presents basic concepts and fundamentals of drafting especially for the building construction industry and covers the use of drawing instruments, lettering practices, basic line work, dimension procedures and an introduction to orthographic projection.
Lecture: 1 hour – Lab: 3 hours Lab fee: $15.00
Prerequisite: ARCH 110

ARCH 111 Architectural Drafting: Manual II (A, W, SP) 4 credits
This course is intended to develop the skills of drafting especially for building construction and covers the use of lettering practices, line quality and weights, dimension procedures, orthographic projection, and the drawing of plans, sections and elevations.
Lecture: 2 hours – Lab: 6 hours
Prerequisite: ARCH 110

ARCH 112 Construction Drafting: CAD I (A, W, SP, SU) 2 credits
This course introduces students to the intermediate features of AutoCAD and builds upon the basics learned in ARCH 112. Emphasis is placed on advanced dimensioning features, hatching, attributes, external references and paper/model space. Several small projects will be created utilizing these features. Lectures, in-class demonstrations, and hands-on work sessions are employed as teaching tools during the course. The course uses the current release of AutoCAD.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: ARCH 110 or permission of instructor

ARCH 113 Architectural Drafting: CAD II (A, W, SP, SU) 2 credits
This course introduces students to the intermediate features of AutoCAD and builds upon the basics learned in ARCH 112. Emphasis is placed on advanced dimensioning features, hatching, attributes, external references and paper/model space. Several small projects will be created utilizing these features. Lectures, in-class demonstrations, and hands-on work sessions are employed as teaching tools during the course. The course uses the current release of AutoCAD.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: ARCH 112

ARCH 114 Architectural Drafting: CAD III (A, W, SP, SU) 2 credits
This course introduces students to the advanced features of AutoCAD and builds upon the basics learned in ARCH 113. Emphasis is placed on two-dimensional drafting commands. The student will learn the tools necessary to create a set of working drawings for a residential project. Lectures, in-class demonstrations, and hands-on work sessions are employed as teaching tools during the course. The course uses the current release of AutoCAD.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: ARCH 113

ARCH 115 Microstation CAD Drafting I (W) 3 credits
This course is to provide training in the use of basic display, drawing, manipulation, dimensioning, text, cell, reference files and plotting commands required to the elementary use of Bentley Microstation. After mastering system basics, students will be given individual projects.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: ARCH 110 or permission of instructor

ARCH 155 Residential Construction/Wood Structures (A, SP) 3 credits
This course outlines the various phases of residential construction for site analysis to finish material installations, including conventional wood framing, floor and roof truss framing, heavy timber/post and beam construction, and various plywood panel construction techniques. Additional topics discussed include the design and use of floor joist span charts, simple beam and footing design, as well as roof and foundation design. This course concludes with the choice of building a structural/framing model or preparing a PowerPoint presentation of a residential construction task.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: CIVL 120

Arabic (ARAB)

ARAB 102 Elementary Arabic II (On Demand) 5 credits
ARAB 102 is a continuation of ARAB 101 with further development of listening, reading, speaking and writing skills and further study of Arabic culture. ARAB 102 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ARAB 101 with a grade of “C” or better

Arabic (ARAB)

ARCH 100 Introduction to the History of Architecture (A, W, SP) 5 credits
This course studies the fundamental elements of architecture, its development, and its meaning to various cultures throughout western history. Architecture is viewed from the perspectives of form, function, interior and exterior space, technological development, and landscape. ARCH 100 meets elective requirements in the Associate of Arts and Associate of Science degree programs.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $9.00

Architectural (ARCH)

ARCH 296 Appraisal Practicum/Seminar (A, W, SP, SU) 2 credits
This course will introduce students to the appraisal work environment, appraisal skills, real property research, and application of previously learned theories. The course will provide a foundation of the appraisal process and an opportunity for students to apply classroom skills in an appraisal environment.
Seminar: 1 Hour – Practicum: 7 Hours
Prerequisites: By instructor permission only. Lab Fee - None

APPAR 284 USPAP and Fair Housing 2 credits
This is a capstone course for the Ohio appraisal certification. Course users will learn to apply the standards of the industry to the instruments of appraisal process. This course covers the requirements for ethical and competent appraiser performance as set out in materials developed and issued by the Appraisal Foundation. Coverage includes history of the Appraisal Foundation, functions of Appraisal Standards Board and the Appraisal Qualifications Board, rules of USPAP, and standards of USPAP. This course will also cover the Federal, State and Municipal Fair Housing requirements for appraisals.
Lecture: 2 hours
Prerequisites: None Lab fee: $2.00

APPAR 296 Appraisal Practicum/Seminar (A, W, SP, SU) 2 credits
This course will introduce students to the appraisal work environment, appraisal skills, real property research, and application of previously learned theories. The course will provide a foundation of the appraisal process and an opportunity for students to apply classroom skills in an appraisal environment.
Seminar: 1 Hour – Practicum: 7 Hours
Prerequisites: By instructor permission only. Lab Fee - None

Home Inspection Course (A, SP) Noncredit
This 45-hour, noncredit course includes everything needed to become a self-employed home inspector in Ohio. Students use their accumulated skills, experience and knowledge to reinvent themselves as home inspectors. Learn what it takes to start a home inspection business by networking with other students, performing actual home inspections, and submitting inspection reports.

APPAR 120 Appraisal Qualifications Board 2 credits
This course outlines the various phases of residential construction for site analysis to finish material installations, including conventional wood framing, floor and roof truss framing, heavy timber/post and beam construction, and various plywood panel construction techniques. Additional topics discussed include the design and use of floor joist span charts, simple beam and footing design, as well as roof and foundation design. This course concludes with the choice of building a structural/framing model or preparing a PowerPoint presentation of a residential construction task.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: CIVL 120 Lab fee: $12.00

Arabic (ARAB)

ARAB 101 Elementary Arabic I (On Demand) 5 credits
ARAB 101 presents an introduction to the fundamentals of the Arabic language with practice in listening, reading, speaking and writing. Course includes studies in Arabic culture. ARAB 101 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $6.00

ARCH 111 Construction Drafting: Manual II (A, W, SP, SU) 4 credits
This course is intended to develop the skills of drafting especially for building construction and covers the use of lettering practices, line quality and weights, dimension procedures, orthographic projection, and the drawing of plans, sections and elevations.
Lecture: 2 hours – Lab: 6 hours
Prerequisite: ARCH 110

ARCH 112 Construction Drafting: CAD I (A, W, SP, SU) 2 credits
This course is an introduction to the basic features of AutoCAD. Emphasis is placed on the basic display, drawing, editing, dimensioning, and text commands required for the elementary use of AutoCAD. Lectures, in-class demonstrations, and hands-on work sessions are employed as teaching tools during the course. The course uses the current release of AutoCAD.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: ARCH 110 or permission of instructor

ARCH 113 Architectural Drafting: CAD II (A, W, SP, SU) 2 credits
This course introduces students to the intermediate features of AutoCAD and builds upon the basics learned in ARCH 112. Emphasis is placed on advanced dimensioning features, hatching, attributes, external references and paper/model space. Several small projects will be created utilizing these features. Lectures, in-class demonstrations, and hands-on work sessions are employed as teaching tools during the course. The course uses the current release of AutoCAD.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: ARCH 112

ARCH 114 Architectural Drafting: CAD III (A, W, SP, SU) 2 credits
This course introduces students to the advanced features of AutoCAD and builds upon ARCH 113. Emphasis is placed on the use of additional two-dimensional drafting commands. The student will learn the tools necessary to create a set of working drawings for a residential project. Lectures, in-class demonstrations, and hands-on work sessions are employed as teaching tools during the course. The course uses the current release of AutoCAD.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: ARCH 113

ARCH 115 Microstation CAD Drafting I (W) 3 credits
This course is to provide training in the use of basic display, drawing, manipulation, dimensioning, text, cell, reference files and plotting commands required to the elementary use of Bentley Microstation. After mastering system basics, students will be given individual projects.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: ARCH 110 or permission of instructor

ARCH 155 Residential Construction/Wood Structures (A, SP) 3 credits
This course outlines the various phases of residential construction for site analysis to finish material installations, including conventional wood framing, floor and roof truss framing, heavy timber/post and beam construction, and various plywood panel construction techniques. Additional topics discussed include the design and use of floor joist span charts, simple beam and footing design, as well as roof and foundation design. This course concludes with the choice of building a structural/framing model or preparing a PowerPoint presentation of a residential construction task.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: CIVL 120
ARCH 161 Presentation Drawings (A, SP)  3 credits
ARCH 161 is a manual drafting course that is designed to serve as a basis for presentation drawings by hand or using the computer. Problems are designed to strengthen the student’s understanding of 3D drawing principles, and to use those principles in order to solve drawing and design issues.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: ARCH 111 Lab fee: $15.00

ARCH 214 Electricity (W, SU)  2 credits
This course studies the electrical code, electrical systems, standards, conventional symbols, nomenclature, layouts and fixture and equipment schedules. Coordination of electrical work with the elements of the building is emphasized.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: CMGT 121 Lab fee: $6.00

ARCH 215 Lighting (W, SU)  2 credits
This course deals with the fundamentals of lighting within buildings. The appropriate quantity of lighting is calculated and the appropriate selection and placement of lighting within a space is studied.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: CMGT121 Lab fee: $6.00

ARCH 221 Design Studio I (W)  3 credits
This course is built around the design process and design logic and will also include an emphasis on working either alone or as part of a team. The design theme may include emphasis on sustainable architecture as the primary design goal. When sustainable architecture is the framework of the course, lectures and research assignments will include lessons on solar energy, conservation practices, building materials, and other aspects of sustainability.
Lecture: 2 hours – Lab: 6 hours
Prerequisite: ARCH111 and ARCH114 or permission of instructor Lab fee: $20.00

ARCH 223 Design Studio II (SP)  3 credits
This course is built on the foundations laid by ARCH 221 and includes discussions of design principles. Students will develop a work on various design projects including a small and complex architectural project.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: ARCH 221 or permission of instructor Lab fee: $20.00

ARCH 232 Building Construction Standards (A, SP)  3 credits
This course focuses primarily on building and zoning codes. Emphasis is placed on the OBBC (Ohio Basic Building Code) and the Columbus, Ohio zoning code. Other areas of study include the influence of professional associations, manufacturers, and testing laboratories in design and construction documents; CSI specifications, their organization, content and relationship to other contract documents; and professional practice in architecture.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: CMGT 121 Lab fee: $12.00

ARCH 237 Structures: Steel, Concrete and Masonry (W, SU)  4 credits
This course presents basic conceptual and practical structural design concepts. Steel, concrete and masonry structures are studied and evaluated mathematically. The student will learn how to evaluate and design beams and columns in both steel and concrete. Other topics include bearing plate/ base plate design, bolted and welded connections, concrete and masonry wall design. Drafting projects require the use of CAD and will focus on structural elements.
Lecture: 2 hours – Lab: 6 hours
Prerequisite: MATH 148, ARCH 114 and MECH 242 Lab fee: $12.00

ARCH 240 3D Modeling and Rendering: AutoCAD (On Demand)  3 credits
Course is an introduction to presentation drawing techniques using computer applications. The course will focus on three-dimensional modeling, rendering and other applications useful to the profession.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: ARCH 113 and ARCH 161 Lab fee: $12.00

ARCH 242 3D Visualization: formZ I (A)  4 credits
This course is an introduction to three-dimensional computer modeling using formZ. Basic modeling functions, lighting, material applications and rendering will be studied. This course focuses on techniques and methods applicable to architects, interior designers and other building related professions.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: Associate degree or higher, or 50 completed hours within Architecture program, or permission of instructor Lab fee: $15.00

ARCH 243 3D Visualization: formZ II (W)  4 credits
This course builds upon the fundamentals learned in ARCH 242 and focuses on more advanced techniques. Emphasis is placed on advanced modeling techniques, the mapping of realistic finishes, and the replication of real-world interior and exterior lighting conditions. The fundamentals of architectural animation are also studied.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: ARCH 242 Lab fee: $15.00

ARCH 246 3D Visualization: 3ds Max I (SP)  4 credits
This course is an introduction to three-dimensional computer modeling using form Z. Basic modeling functions, lighting, material applications and rendering will be studied. This course focuses on techniques and methods applicable to architects, interior designers and other building related professions.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: Associate degree or higher or 50 completed hours within Architecture program, or permission of instructor Lab fee: $15.00

ARCH 247 3D Visualization: 3ds Max II (SU)  4 credits
This course builds upon the fundamentals learned in ARCH 246 and will focus on more advanced techniques. Emphasis is placed on advanced modeling techniques, the mapping of realistic finishes, and the replication of real-world interior and exterior lighting conditions. The fundamentals of architectural animation are also studied.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: ARCH 246 Lab fee: $15.00

ARCH 250 Building Enclosure Materials (A, SP)  3 credits
This course is designed to expand on the knowledge gained in CIVL 120, with the study of how such materials and others are combined to form the building shell. The course focuses on the separation between exterior and interior environments. Topics covered include roofing, glass, windows and doors, walls, foundations, and interior finishes, vertical transportation and acoustics.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIVL 120 Lab fee: $12.00

ARCH 252 Post Production (W, SU)  3 credits
This course presents the fundamentals of post-editing computer renderings. Emphasis is placed upon adding people and trees, correcting the lighting levels and applying different filter effects.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: ARCH 242 or ARCH 246 Lab fee: 15.00

ARCH 266 Working Drawings (A, SP)  5 credits
This course both introduces the student to the practice of working drawings and integrates knowledge based on all prior architectural courses. Part of the course focuses on individual tasks, such as the generation of details, schedules, and plans, while another part of the course will focus on work generated in a group setting, simulating a team effort common
to a modern architectural office.
Prerequisite: ARCH 114, ARCH 232 and ARCH 250 Lab fee: $20.00

ARCH 270 Professional Practice and Management (A, SP) 3 credits
Students learn about planning projects, defining project scope and translating physical needs into building area, developing alternative solutions, preparing schedules and estimates, coordinating work efforts, and other practical factors. The student must consider physical constraints, code implications, costs, bidding, construction sequencing and practices, design goals, and working with consultants.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: ARCH 250 or permission of instructor Lab fee: $10.00

ARCH 276 SketchUp (A, SP) 2 credits
To introduce the student to SketchUp V.5, a software package developed for the conceptual stages of design. SketchUp V.5 is a deceptively simple, amazingly powerful tool for creating, viewing, and modifying 3D ideas quickly and easily. SketchUp was developed to combine the elegance and spontaneity of pencil sketching and the flexibility of today's digital media.
Lecture: 1 hour – Lab: 2 hours Lab fee: $10.00

ARCH 282 Sustainable Design Strategies (SP) 3 credits
ARCH 282 will introduce the student to the issues and concepts related to sustainable design. The impact of the building's site, energy efficiency, the use of renewable forms of energy, including solar energy, will be studied as it relates to building design. Projects will be assigned on a regular basis and will be adaptable to the varied backgrounds of students.
Lecture: 3 hours
Prerequisite: ENVR 282 or permission of instructor Lab Fee: $10.00

ARCH 283 Sustainable Energy Performance (SU) 3 credits
Students become familiar with the concept of thermal transfer, the energy characteristics of various building energy systems and components, and learn how to compare the projected performance characteristics of one building model against another. The object is to learn an approach that enables well-informed decisions to be made that will affect sustainability.
Lecture: 3 hours
Prerequisite: ENVR 282 or permission of instructor Lab fee: $10.00

ARCH 291 Field Experience (SU) 3 credits
Off-campus work experience in architecture, consulting engineering, or construction-related paid employment that augments formal education received in the technology, with actual work conditions and job experience. “N” credit will not be allowed for this course.
Lecture: 0 hours – Lab: 36 hours Lab fee: $0.00

ARCH 299 Special Topics in Architecture (On Demand) 1-5 credits
ARCH 299 provides an opportunity for detailed examination of selected topics in Architecture.
Lecture and Lab hours: Vary depending upon topic
Prerequisite: Varies based upon topic Lab fee: $10.00

Art (ART)

ART 101 History of Western Art (A, W, SP, SU) 5 credits
A survey of artistic expression in the Western World from the earliest times to the present, including the types of media used and their limitations, the role of patronage in artistic development, the relationship of art and the artist to developments in society, and a consideration of the attributes of “great” art in any time or age. ART 101 meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in Humanities and the Arts.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $2.00

ART 121 Beginning Drawing (A, W, SP, SU) 5 credits
ART 121 is an introduction to the basic techniques of freehand drawing. Emphasis is on media, concepts, drawing from observation and development of technique. Course meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in the Arts.
Lecture: 0 hours – Lab: 10 hours Lab fee: $2.00

ART 122 Two-Dimensional Design (A, W, SP, SU) 5 credits
ART 122 is an introduction to the basic concepts of two-dimensional design: line, shape, space, hue, value and texture. Course covers the use of various media in a variety of problem-solving projects leading toward an awareness of the principles of visual organization.
Lecture: 0 hours – Lab: 10 hours Lab fee: $2.00

ART 123 Beginning Painting (On Demand) 5 credits
ART 123 introduces studio painting fundamentals utilizing varied subject matter and media.
Lecture: 0 hours – Lab: 10 hours Lab fee: $2.00

ART 131 Three-Dimensional Design (On Demand) 5 credits
ART 131 is aimed at developing the student’s basic understanding of three-dimensional visual communication through the exploration of three-dimensional principles. Students learn through the process of solving visual art problems. Solutions to these problems are achieved through the fabrication of three-dimensional art objects. Various techniques and media that are common to this area of study are systematically addressed.
Lecture: 0 hours – Lab: 10 hours
Prerequisite: ART 122 or permission of instructor Lab fee: $2.00

ART 221 Life Drawing 5 credits
The Life Drawing course emphasizes figure drawing with a foundation in anatomical study. The student will concentrate on proportion and design to further their understanding of the human figure as a complicated three-dimensional form and its metaphorical or literal interpretation through various drawing media. In addition, students will be able to develop a more advanced and informed interpretation of life drawing within historic and cultural contexts.
Lecture: 1 hour – Studio 8 hours
Prerequisite: ART 121 Lab fee: $20.00

ART 230 Color Composition (A, SP) 5 credits
This course examines the theory and artistic application of basic color principles through student projects and lecture. Topics such as color mixing, interaction and organization are presented.
Lecture: 0 hours – Lab: 10 hours
Prerequisite: ART 122 or permission of instructor Lab fee: $2.00

ART 242 World Cinema (A) 5 credits
ART 242 is a course exploring the history of world cinema through analysis of the content and structure of selected major historic examples in the genre, from the beginnings of film in the late 19th century to the present. Special attention will be given to the work of important filmmakers from around the world and to the social and philosophical context in which they worked.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $2.00
Time Arts Courses

ART 215 Time Arts Foundation (On Demand) 4 credits
ART 215 is an introductory course exploring the visual and audio tools necessary for the production of time art works. The course will also introduce students to thematic, motivic, concrete, symbolic and other structural elements used in such works. Students will create original works utilizing digital camera, tape recorder, video camera and digital audio composition.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: ASC 290 is required for all Associate of Arts and Associate of Science degree-seeking students. Students are advised to take this course in conjunction with ENGL 101 or ENGL 111.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: AS or AA major, ENGL 100 Lab fee: $4.00

ART 216 The Temporal Image (On Demand) 4 credits
This course will simultaneously explore the history of independent film-making (beginning with Dali and Duchamp and ending with the works of Paik and Viola) and the techniques for independent film/video production. Building on the concepts and techniques learned in ART 215, students will create their own explorations of images in time.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: HUM 245 and ART 215 Lab fee: $4.00

ASC 290 Capstone Experience in Arts and Science (On Demand) 3 credits
ASC 290 Capstone Experience in Arts and Science (On Demand) 3 credits
This course examines theory and practice about learning strategies, motivation and thinking, focusing on the application of four major learning strategies to success in college. Course is taught in a computer environment to engage students in active learning. This course has been proven to increase grade point averages and retention rate of college students. Students at Columbus State with the academic environment. Students pursing a detailed examination of selected topics of art.
Lecture: Varies – Lab: Varies
Prerequisite: Permission of Instructor Lab fee: $2.00

ASC 299 Special Topics in Arts and Science (On Demand) 1–5 credits
This course explores special topics in Arts and Sciences and is designed to meet specific needs.
Lecture hours: Vary – Lab hours: Vary
Prerequisites: Vary

HUM 245 Art and Music Since 1945 (see HUM 245) MUS 217 Electronic Sound (see MUS 217)

Astronomy (ASTR)

ASTR 161 The Solar System (A, W, SP, SU) 5 credits
This course offers an introduction to astronomy focusing on the solar system. Topics include the night sky, seasons, phases, eclipses, gravity, light, astronomical tools, solar system origin, terrestrial planets, giant planets, moons, rings, comets and asteroids. Simulations and demonstrations related to subject matter are included. This class may require additional time outside of the scheduled class hours.
Lecture: 5 hours
Prerequisite: MATH 104 Lab fee: $6.00

ASTR 162 Stars and Galaxies (A, W, SP, SU) 5 credits
This course explores stars and galaxies. Topics include gravity, light, telescopes, the Sun stellar properties, stellar structure and evolution, the interstellar medium, supernovae, black holes, galaxies and the structure, history, and future of the universe. Simulations and demonstrations related to subject matter are included. This class may require additional time outside of the scheduled class hours.
Lecture: 5 hours
Prerequisite: MATH 104 Lab fee: $6.00

Automotive Technology (AUTO)

AUTO 061 Basic Automotive Systems and Theories of Operation (A, W, SP, SU) 4 credits
This course covers automotive basic systems and theories of operation. Class includes the physical, hydraulic, and electrical theoretical basics, as applied to cars and light trucks. This course and AUTO 062 are prerequisites for all other automotive courses. Credit for this course can be obtained by satisfactory completion of the course, documented previous training and/or experience, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 3 hours – Lab: 3 hours
Concurrent: It is recommended that this course be taken the same quarter as AUTO 062. Lab fee: $25.00

AUTO 062 Auto Shop Orientation and Service (A, W, SP, SU) 4 credits
This course covers the operation of an automotive shop. It includes the use of hand and power tools and basic maintenance operations on cars and light trucks. This course and AUTO 061 are prerequisites for all other automotive courses. Credit can be obtained by satisfactory completion of the course, documented previous training and/or experience, or by satisfactory results of a proficiency exam administered by the department.
Prerequisite: AUTO 061 and AUTO 062
Lecture: 3 hours – Lab: 3 hours
Concurrent: It is recommended that this course be taken the same quarter as AUTO 061. Lab fee: $25.00

AUTO 101 Auto Care (On Demand) 3 credits
This course is designed for the nonautomotive student who is interested in obtaining a familiarity with the fundamentals of automotive systems and preventative maintenance. Also included is information on choosing a repair shop, tips and techniques for dealing with minor breakdowns, and vehicle purchasing strategies.
Lecture: 2 hours – Lab: 2 hours Lab fee: $30.00

AUTO 110 Engine Operation and Overhaul (A, SU) 4 credits
AUTO 110 is a basic course in automotive engines and theory behind their operation. All engine mechanical systems are explored during teardown and assembly of a current automotive engine. Common in-car repairs are covered. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: AUTO 061 and AUTO 062
Concurrent: It is recommended that this course be taken the same quarter as AUTO 115. Lab fee: $30.00

AUTO 115 Engine Diagnosis and In-Car Repair (A, SU) 3 credits
This is an advanced engine course including minor cylinder head and valve machining, component service, and engine removal and installation. AUTO 115 prepares student to achieve national ASE certification in engine repair.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 110
Concurrent: It is recommended that this course be taken the same quarter as AUTO 110. Lab fee: $30.00

AUTO 120 Automatic Transmissions: Operation and Overhaul (W, SP) 4 credits
This is a basic course exploring the theory of operation behind today's automatic transmission. Hydraulic and electrical systems are emphasized during a complete teardown and assembly. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: AUTO 061 and AUTO 062
Concurrent: It is recommended that this course be taken the same quarter as AUTO 125. Lab fee: $25.00

AUTO 125 Automatic Transmissions: Diagnosis and In-Car Repair (W, SP) 3 credits
This is an advanced course in automatic transmission and transaxle service and diagnostics. Emphasis is on field diagnostics and repairs. AUTO 125 prepares student to achieve national ASE certification in automatic transmissions.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 120
Concurrent: It is recommended that this course be taken the same quarter as AUTO 120. Lab fee: $25.00

AUTO 130 Manual Transmissions/Driveline: Operation and Overhaul (A, SU) 4 credits
This course provides a working knowledge of manual transmissions, transaxles, and differentials. Repair and diagnostics are covered during complete teardown and assembly. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: AUTO 061 and AUTO 062

AUTO 135 Manual Transmissions: Diagnosis and In-Car Repair (A, SU) 3 credits
This is an advanced course in clutch, manual transmission, transaxle, and differential diagnostics. Class includes clutch and transmission removal and installation. AUTO 135 prepares student to achieve national ASE certification in manual transmissions.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 130
Concurrent: It is recommended that this course be taken the same quarter as AUTO 130. Lab fee: $15.00

AUTO 140 Suspension and Steering: Theory and Operation (SP, SU) 4 credits
This course provides a working knowledge of the diagnosis and repair of wheels, tires, suspension systems, steering systems, and wheel alignment diagnosis and adjustment. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: AUTO 061 and AUTO 062 Lab fee: $25.00

AUTO 145 Suspension and Steering: Diagnosis and Repair (A, W) 3 credits
This is an advanced course covering detailed diagnostics and service of suspension components. It includes instruction on both two-wheel and four-wheel alignment. AUTO 145 prepares student to achieve national ASE certification in suspension and steering.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 140 Lab fee: $25.00

AUTO 150 Brake Systems: Theory and Operation (W, SP) 4 credits
This course provides a working knowledge of the diagnosis and repair of the hydraulic system, drum brake systems, disc brake systems, power assist units, and associated systems including wheel bearings, parking brakes and related electrical circuits. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: AUTO 061 and AUTO 062 Lab fee: $30.00

AUTO 155 Brake Systems: Diagnosis and Repair (SP) 3 credits
This is an advanced course covering detailed diagnostics and repair of automotive brake systems including anti-lock systems. It prepares student to achieve national ASE certification in brake systems.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 150 Lab fee: $25.00

AUTO 160 Electrical Systems: Theory and Operation (W, SU) 4 credits
This course provides a working knowledge of the diagnosis and repair of general electrical systems, including the battery, starting, charging and lighting systems. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: AUTO 061 and AUTO 062 Lab fee: $25.00

AUTO 165 Electrical/Electronic: Diagnosis and Repair (A, SP) 3 credits
AUTO 165 is an advanced course designed to provide the knowledge necessary to diagnosis and repair automotive electrical systems, including the diagnosis and service of supplemental inflatable restraint systems and
other electronically controlled accessories. It prepares student to achieve national ASE certification in electrical systems.

**Prerequisite:** AUTO 160  Lab fee: $25.00

**AUTO 170 Heating and Air Conditioning Systems: Theory and Operation (SP)**  4 credits

This course provides a working knowledge of the diagnosis and repair of air conditioning systems, refrigeration systems, heating and engine cooling systems, and control units. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department.

Lecture: 2 hours – Lab: 2 hours

**Prerequisite:** AUTO 170 Lab fee: $30.00

**AUTO 175 Heating and Air Conditioning: Diagnosis and Repair (SP, SU)**  3 credits

This is an advanced course designed to provide the knowledge necessary to diagnose and repair automotive air conditioning systems, including the diagnosis and repair of automatic temperature controls and related electronic systems. AUTO 175 prepares student to achieve national ASE certification in heating and air conditioning systems.

Lecture: 2 hours – Lab: 2 hours

**Prerequisite:** AUTO 170 Lab fee: $30.00

**AUTO 180 Engine Performance: Theory and Operation (A, SP)**  4 credits

This course provides the opportunity to gain a working knowledge of engine performance diagnostics. It includes diagnosis and repair of the ignition system, fuel and exhaust systems, emission control systems, and an introduction to engine electrical and computer control systems. Credit for this course can be obtained by satisfactory completion of the course, ASE certification in this area, or by satisfactory results of a proficiency exam administered by the department. It is strongly recommended that students complete AUTO 110 and AUTO 160 prior to registering for this course.

Lecture: 2 hours – Lab: 4 hours

**Prerequisite:** AUTO 160  Lab fee: $25.00

**AUTO 181 Fundamentals of Alternative Fuel Systems (On Demand)**  3 credits

This course provides a working knowledge of predominate alternative fuel systems currently in use in automotive applications. These include CNG, LNG, propane, ethanol, methanol, electric, oxygenated gasoline, and gasohol. The unique characteristics of each fuel, along with the systems used to adapt automobiles to its use, are explored, along with the federal legislation that is mandating and controlling this technology.

Lecture: 2 hours – Lab: 2 hours

**Prerequisite:** AUTO 180 Lab fee: $20.00

**AUTO 185 Computerized Engine Performance (W, SU) 3 credits**

The course is designed to provide students with a working knowledge of advanced engine diagnostics. Emphasis is placed on the diagnosis and repair of computerized engine control systems. AUTO 185 prepares student to achieve national ASE certification in engine performance.

Lecture: 2 hours – Lab: 2 hours

**Prerequisite:** AUTO 180 Lab fee: $25.00

**AUTO 186 Advanced Alternative Fuel Systems (On Demand)**  3 credits

This is an advanced course designed to provide students with background knowledge and experience on current alternate fuel conversion systems and proper installation procedures. Symptom analysis, diagnosis, and repair of alternate fuel related engine performance problems are covered. AUTO 186 prepares student to achieve national ASE certification in alternate fuels.

Lecture: 2 hours – Lab: 2 hours

Prerequisite: AUTO 181 and 185 Lab fee: $20.00

**AUTO 190 Automotive Business Management (On Demand) 3 credits**

This is an introduction to automotive management principles. Topics covered include systems approach to management, management styles, financial measures, MBO and quality, time management, customer and employee relations, marketing and the legal environments.

Lecture: 2 hours – Lab: 2 hours

Prerequisite: AUTO 061 and AUTO 062 Lab fee: $10.00

**AUTO 191 Service Advising (On Demand) 3 credits**

Course covers, in depth, the primary responsibilities of a service advisor, including writing a proper repair order, scheduling, selling maintenance and customer relations. Estimating, repair order tracking and time management skills are also presented.

Lecture: 2 hours – Lab: 2 hours

Prerequisite: AUTO 190 Lab fee: $10.00

**AUTO 192 Automotive Service Management (On Demand) 3 credits**

This course covers the variety of duties of the service manager. Principles presented in AUTO 190 are further developed along with practical implementation strategies. Facilities and equipment planning and management along with financial management and analysis are covered.

Lecture: 2 hours – Lab: 2 hours

Prerequisite: AUTO 190 Lab fee: $10.00

**AUTO 193 Automotive Service Merchandising (On Demand) 3 credits**

AUTO 193 explores the principles of marketing, merchandising, and advertising and their application in the automotive repair industry. Upon completion of this course, the student will be able to demonstrate the ability to develop specific merchandising and advertising items and to develop a departmental marketing plan.

Lecture: 2 hours – Lab: 2 hours

Prerequisite: AUTO 190 Lab fee: $10.00

**AUTO 195 Auto Parts: Sales (On Demand) 2 credits**

The duties and responsibilities of a parts department counter person are covered in this course. Also included are using catalogs and locator systems, as well as outside sales.

Lecture: 1 hours – Lab: 2 hours

Prerequisite: AUTO 190 Lab fee: $10.00

**AUTO 196 Auto Parts: Inventory Control (On Demand) 2 credits**

This course covers the various inventory control systems that are commonly used in automotive parts departments and stores. Determining inventory levels is an integral part of this course.

Lecture: 1 hour – Lab: 2 hours

Prerequisite: AUTO 190 Lab fee: $10.00

**AUTO 197 Auto Parts: Management (On Demand) 3 credits**

This course covers the various management duties of a parts department manager. Pricing, inventory merchandising, forecasting, and purchasing are included.

Lecture: 2 hours – Lab: 2 hours

Prerequisite: AUTO 190 Lab fee: $10.00

**AUTO 210 Current Trends in Engine Repair (On Demand) 2 credits**

The content of this course reflects very recent technological advances and changes in engine design and repair made by the automobile industry.

Lecture: 1 hour – Lab: 2 hours

Prerequisite: AUTO 115 Lab fee: $15.00

**AUTO 220 Current Trends in Automatic Transmissions (On Demand) 2 credits**
The content of this course reflects the most recent technological advances and changes in automatic transmission design and repair made by the automobile industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 170 Lab fee: $20.00

AUTO 240 Current Trends in Manual Transmissions (On Demand) 2 credits
The content of this course reflects the most recent technological advances and changes in manual transmission design and repair made by the automobile industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 135 Lab fee: $15.00

AUTO 245 Steering, Suspension and Brakes: Diagnosis and Evaluation (On Demand) 3 credits
This course prepares students to service and repair Ford steering, suspension, and brake systems and pass the written and hands-on evaluations required to earn Ford STST General Brakes Certification and Base Steering and Suspension Certification.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 140 and AUTO 150 Lab fee: $25.00

AUTO 250 Current Trends in Brake Systems (On Demand) 2 credits
The content of this course reflects the most recent technological advances and changes in brake system design and repair made by the automobile industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 155 Lab fee: $15.00

AUTO 260 Current Trends in Electrical Systems (On Demand) 2 credits
The content of this course reflects the most recent technological advances and changes in electrical system design and repair made by the automobile industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 165 Lab fee: $15.00

AUTO 265 Electrical Diagnosis and Evaluation (On Demand) 3 credits
This course prepares students to service and repair Ford electrical systems and pass the written and hands-on evaluations for the Ford STST Basic Electrical Certification.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 160 Lab fee: $22.00

AUTO 270 Current Trends in A/C Systems (On Demand) 2 credits
The content of this course reflects the most recent technological advances and changes in heating/air conditioning system design and repair made by the automobile industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 175 Lab fee: $15.00

AUTO 280 Current Trends in Engine Systems (On Demand) 2 credits
The content of this course reflects the most recent technological advances and changes in engine control system design and repair made by the automobile industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 185 Lab fee: $15.00

AUTO 297 Special Topics in Automotive Technology (On Demand) 1 credit
This is an advanced level course elective that will address current issues in the automotive industry.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: AUTO 061 and AUTO 062 Lab fee: $15.00

AUTO 298 Special Topics in Automotive Technology (On Demand) 2 credits
This is an advanced level course elective which will address current issues in the automotive industry.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: AUTO 061 and AUTO 062 Lab fee: $15.00

AUTO 299 Special Topics in Automotive Technology (On Demand) 3 credits
This is an advanced level course elective that will address current issues in the automotive industry.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: AUTO 061 and AUTO 062 Lab fee: $15.00

AUTO 300 Shop Experience (SP) 4 credits
This course is taken during a student’s final quarter. It includes a final assessment of skills and knowledge. Skills are measured in a shop condition with the students performing diagnostics and repairs. A review of the eight ASE areas is also included.
Lecture: 1 hour – Lab: 8 hours
Prerequisite: Permission of instructor Lab fee: $35.00

TOYO 237 Toyota Manual and Automatic Transmissions (On Demand) 3 credits
This is an advanced course in diagnosis and repair of manual and automatic transmissions and drivelines as specifically applied to Toyota vehicles. It provides a brief refresher of the underlying theory and principles of these systems followed by a primary focus on proper maintenance, repair, and diagnosis of system concerns.
Lecture: 3 hours
Prerequisite: AUTO 120 and AUTO 130 Lab fee: $20.00

TOYO 257 Toyota Suspension, Steering, and Brake Systems (On Demand) 3 credits
This is an advanced course in suspension, steering, and brake systems diagnosis and repair. It provides a brief refresher of the underlying theory and principles of these systems followed by a primary focus on proper maintenance, repair, and diagnosis of system concerns.
Lecture: 3 hours
Prerequisite: AUTO 140 and AUTO 150 Lab fee: $20.00

TOYO 267 Toyota Electrical Systems (On Demand) 4 credits
This is an advanced course in electrical circuit diagnosis and repair. It provides a working knowledge of the principles of troubleshooting and diagnosis of Toyota electrical systems. This course also explores the effective use of manufacturer wiring diagrams, diagnostic tools, and the 6-step diagnostic process to isolate and resolve electrical malfunctions.
Lecture: 4 hours
Prerequisite: AUTO 160 Lab fee: $20.00

TOYO 277 Toyota Climate Control Systems (On Demand) 1.5 credit
This is an advanced course in automotive heating and air conditioning systems diagnosis and repair as specifically applied to Toyota vehicles. It provides a brief refresher of the underlying theory and principles of these systems followed by a primary focus on proper maintenance, repair, and diagnosis of system concerns.
Lecture: 1.5 hours
Prerequisite: AUTO 170 Lab fee: $20.00
TOYO 287 Toyota Engine Controls I and Hybrid General Service (On Demand)  
3 credits
This is an intermediate level course in engine controls and hybrid systems as specifically applied to Toyota vehicles. It provides an in-depth presentation of the engine control systems current in various Toyota vehicles. It also provides an overview of the operation of current Toyota hybrid systems and the operation and service unique to vehicles equipped with hybrid powertrain systems.
Lecture: 3 hours
Prerequisite: AUTO 180 Lab fee: $20.00

Aviation Maintenance Technology (AMT)

AMT 101 Introduction to Aviation (A, SP) 4 credits
Aircraft maintenance differs from other types of maintenance because aircraft operate in an environment where the degradation of an essential system or catastrophic failure can have grave results for people in the air or on the ground. Any maintenance technician must know how a particular machine should work in a given environment; for AMTs that knowledge starts with an understanding of the basic science involved in flight. In this course, students receive an introduction to aerodynamics and the physics of flight. Focus will be on principles of simple machines, sound, fluid dynamics, heat, and pressure as they pertain to fixed and rotary winged aircraft, aircraft powerplants, and propellers. Students will also learn the principles of primary and secondary flight controls and aircraft nomenclature.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: Placement into MATH 102 and ENGL 101 Lab fee: $12.00

AMT 110 AMT Regulations, Privileges and Documentation (A, SP) 4 credits
A critical part of an AMT’s job is to make sure that all work performed on an aircraft is in accordance with the manufacturer’s technical data and applicable government regulations. The technician needs extensive reference skills to know where to acquire this information and background in the regulations pertaining to aircraft maintenance. This course is an in-depth study of Title 14 of the Code of Federal Regulations, Aeronautics and Space, as they pertain to the Aviation Maintenance Technician. Focus will be on history of the FAR’s, certification of mechanics, certification of aircraft, engines and propellers. In addition, students study the regulatory maintenance requirements of aircraft and regulatory requirements of aircraft records. The format of FAA and manufacturer’s publications is studied with emphasis on aircraft technical publication research.
Lecture: 3 hour – Lab: 2 hours
Prerequisite: Placement into MATH 102 and ENGL 101 Lab fee: $12.00

AMT 115 Aircraft DC Electricity (A, SP) 5 credits
With the sophisticated aircraft manufactured today, an understanding of basic DC concepts is essential for the modern aircraft maintenance technician. In this course, students will develop a fundamental understanding of basic DC electrical circuits with an emphasis on airborne installations. Electrical theory and practical application will be accomplished and proven through extensive experimentation and practice. Aircraft maintenance practices as they relate to batteries and power calculations, as well as, the relationship of voltage, current, and resistance will be examined, and precision measurement of these values will be made on operational circuits.
Lecture: 3 hours – Lab: 5 hours
Prerequisite: Placement into MATH 102 and ENGL 101 Lab fee: $20.00

AMT 130 Aircraft Ground Handling and Safety (W, SU) 2 credits
Aircraft maintenance cannot be performed safely without a full understanding of the hazards and handling procedures involved with aircraft in a hangar, shop, or outdoor ramp environment. In this class, students will study and engage in practices involving aircraft in these situations. Emphasis will be placed on accomplishment of tasks while preserving a safe environment for personnel and equipment. Students will become proficient at performing various aircraft maintenance responsibilities that involve shop safety, tie-down procedures, aircraft jacking and hoisting, and aircraft cleaning.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: Placement into MATH 102 and ENGL 101 Lab fee: $16.00

AMT 140 Aircraft Tools, Hardware and Materials (W, SU) 5 credits
This course helps students acquire the foundational and practical skills pertaining to the identification, proper use, and safe handling of the tools, hardware, and materials used while performing aircraft maintenance. Students will also receive instruction and apply techniques associated with methods of safety wiring hardware, welding, inspection of welds, and heat-treatment of metals.
Lecture: 3 hours – Lab: 6 hours
Prerequisite: Placement into MATH 102 and ENGL 101 Lab fee: $26.00

AMT 145 Aircraft AC Electricity (W, SU) 5 credits
In this class, the basics of AC power will be discussed, along with its uses on aircraft avionics and passenger comfort systems. How the electron is controlled and manipulated will be examined. Elementary logic functions and their operators will be discussed and put to practical use. Basic troubleshooting techniques with the use of wiring diagrams, schematics, and other useful tools will be emphasized.
Lecture: 3 hours – Lab: 4 hours
Prerequisite: AMT 115 Lab fee: $20.00

AMT 150 Basic Aircraft Inspection Systems (W, SU) 2 credits
One of the most important roles of the aircraft maintenance technician is the inspection of aircraft and their components. Superior skills in this area are essential in determining airworthiness. Students need to start practicing proper inspection techniques early and need to understand the personal barriers that can affect the inspection process. In this course, students will begin to learn inspection skills with an introduction to basic aircraft inspection methodology, an introduction to aircraft conformity research practices, applied techniques of visual and functional defect recognition, and an introduction to nondestructive inspection and testing procedures. Maintenance record management and the human factors involved with the performance of these tasks will also be presented.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: AMT 110 Lab fee: $12.00

AMT 160 Aircraft Reciprocating Engine Maintenance 1 (A, SP) 4 credits
The vast majority of general aviation aircraft in service today are powered by reciprocating (piston) engines. An aviation maintenance technician needs a broad understanding of these power plants to provide safe aircraft for flight. The focus of this course is the horizontally opposed reciprocating aircraft engine. Areas studied include theory of operation, engine construction features, maintenance and overhaul. Radial engine design, inspection and repair are also addressed. Reciprocating engine lubrication system design and maintenance for both radial and opposed engine are examined. Students learn the proper techniques for ground operational checks of reciprocating engines.
Lecture: 2 hours – Lab: 5 hours
Prerequisites: AMT 110, AMT 140 Lab fee: $20.00

AMT 162 Aircraft Reciprocating Engine Maintenance 2 (A, SP) 5 credits
As with any type of heat engine, an aircraft reciprocating engine has certain requirements beyond the integrity of its own components for operation. It needs delivery systems for air and fuel and some means to ignite this
mixture. These subsystems can vary from simple to very complex. This course covers the reciprocating engine ignition, fuel metering, and induction systems. Students study magneto, float carburetors, fuel injection systems, supercharging and turbo-supercharging. Emphasis is placed on the theory of operation, inspection, maintenance practices, and troubleshooting of each system.

Lecture: 3 hours – Lab: 5 hours
Prerequisites: AMT 110, AMT 115, AMT 140 Lab fee: $20.00

AMT 165 Aircraft Propellers (A, SP) 3 credits
To produce thrust and remain aloft, most general aviation (and a limited number of commuter and corporate aircraft) utilize engine-driven propellers. Aircraft propeller systems range from the relatively simple to extremely complex machines. In this course, the principles of operation, governing systems, and ice control will be covered for all types of aircraft propellers. Focus will be placed on propeller inspection, lubrication, service, repair, removal, and installation.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: AMT 145 Lab fee: $20.00

AMT 175 Aircraft Electrical Systems 1 (A, SP) 3 credits
With aircraft electrical system integrity becoming a major factor in the operation of complex aircraft today, the need for understanding on-board power sources is essential to the technician. In this course, the design and theory behind some of the most common DC and AC power supply systems and their controls are covered, with emphasis placed on maintenance practices and troubleshooting procedures. Extensive hands-on practical study of wire terminations and connector contact techniques, including crimping and soldering, is also accomplished in this course.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: AMT 145 Lab fee: $20.00

AMT 180 Aircraft Turbine Engine Maintenance 1 (W, SU) 5 credits
Since the dawn of jet propulsion, turbine powered aircraft have gained in popularity and played a pivotal role in the expansion of the aviation industry. A thorough understanding of turbine engine theory and operation is vital to an aircraft maintenance technician. In this course, the theory and operation of aircraft turbine engines, the study of turbine engine construction and design, and principles of turbine engine maintenance, inspection, repair, and troubleshooting will be presented. Application of procedures to remove, install, rig, and operationally test turbine engines will be accomplished along with the identification and repair of lubrication systems and components.

Lecture: 3 hours – Lab: 5 hours
Prerequisites: AMT 110, AMT 140 Lab fee: $20.00

AMT 182 Aircraft Turbine Engine Maintenance 2 (W, SU) 5 credits
To maintain turbine engines, the technician must be familiar with the sub-systems needed to operate the engine. A broad understanding of engine ignition, fuel, air bleed, temperature regulation, and starting systems is essential for proper maintenance to be performed. This course deals with the study of electrical principles of turbine engine ignition systems, principles of operating turbine engine electrical and pneumatic starting systems, and the theory of operation of turbine engine fuel systems, fuel metering systems, and subsystems. A study of applied techniques to inspect, maintain, troubleshoot, repair and adjust the respective systems including airflow, temperature control, and thrust reverser systems will be undertaken. Principles of unducted fan systems will be examined as well.

Lecture: 3 hours – Lab: 5 hours
Prerequisites: AMT 110, AMT 115, AMT 140 Lab fee: $20.00

AMT 190 Aircraft Ice/Rain Protection Systems (W, SU) 2 credits
Ice formation can add sufficient weight and drag to prevent safe flight. Aircraft flying into known icing conditions must utilize some means of preventing ice formation or removing ice. This course will familiarize students with anti-ice, de-ice, ice detection, and rain protection systems used on the airframe, engine, and propeller installations. Emphasis also will be placed on troubleshooting and repair of the systems and associated servicing and inspection techniques.

Lecture: 1 hour – Lab: 2 hours
Prerequisites: AMT 145, AMT 165 Lab fee: $12.00

AMT 195 Aircraft Electrical Systems 2 (W, SU) 4 credits
A broad understanding of various aircraft electrical systems is imperative to a technician. Many other on-board systems depend on electrical system integrity to function properly. This course deals with complete DC and AC electrical systems overview including control and monitoring systems. Troubleshooting, inspection and maintenance techniques related to these systems are put to practical use with a high level of expectation.

Lecture: 2 hours – Lab: 4 hours
Prerequisites: AMT 175 Lab fee: $24.00

AMT 210 Aircraft Sheet Metal Structures (A, SP) 5 credits
The primary structures of most aircraft today are made of some form of metal. An understanding of the techniques involved in forming and fabricating various components for metal structures is essential for the technician to maintain and repair airframes for continued service and reliability. In this course, students will study properties of aircraft metals, fabrication of aircraft repairs by complex bending, riveting, and use of structural adhesives. Students will design and layout repairs of metal aircraft. Students will also learn to detect, prevent, and correct corrosion of metals used in the aviation industry.

Lecture: 2 hours – Lab: 8 hours
Prerequisites: AMT 120, AMT 140 Lab fee: $28.00

AMT 212 Aircraft Wood, Dope and Fabric (A, SP) 3 credits
Although most modern aircraft structures are primarily metal or composite materials, many homebuilt and new light sport aircraft are reviving the use of fabric and wood that was common in the past. This course is an introduction to aircraft structures constructed using wood and doped fabric materials. The students will become familiar with inspection and repair techniques of wood structures. Students will also study the types of aircraft fabric covering with a focus on inspection and repair of polyester based covering.

Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 140 Lab fee: $26.00

AMT 215 Aircraft Environmental Controls (A, SP) 3 credits
Aircraft fly at different times of the year, at high altitudes, and in areas of the world where the climate could be hot, cold or temperate. To compensate, they carry on-board environmental control systems. In this class, students discover how pilots and passengers remain comfortable through heating, air conditioning, pressurization, and supplemental oxygen systems and how the technician maintains them. Maintenance practices of on-board smoke, carbon monoxide, and fire detection and suppression systems are also covered.

Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 145, AMT 149 Lab fee: $20.00

AMT 220 Aircraft Fuel Systems (A, SP) 3 credits
Fuel supply and delivery systems play one of the most important roles in the operation of aircraft engines and various airframe mounted heating and auxiliary power units. Proper installation and maintenance of these systems is essential to the safety of flight as it relates to consistent power production for propulsion and hazards associated with system failures. In this course, students will develop an understanding of aviation maintenance procedures and the tools used by the aircraft technician in the practice of fabrication and installing fluid lines and fittings and the knowledge the aircraft mechanic needs to properly inspect, service, troubleshoot and repair aircraft fuel systems associated components, and related systems and subsystems.

Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 140, AMT 145 Lab fee: $26.00
AMT 235 Aircraft Instrumentation (W, SU) 4 credits
Aircraft instruments provide an essential part of overall cockpit situational awareness, and the information presented from instruments can sometimes be more reliable than a pilot’s senses. Technicians need a broad understanding of how the instrument systems function and the maintenance required to achieve the high reliability necessary for the pilot’s peace of mind and the safety of flight. In this course, students will study instrument systems for monitoring flight envelope, airframe systems, environment, and engine parameters. Analog and electronic display systems are covered. Practical application of troubleshooting procedures and maintenance practices associated with these devices will be accomplished with a high level of achievement expected.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: AMT 145, AMT 162, AMT 182 Lab fee: $26.00

AMT 240 Aircraft Composite Structures (W, SU) 3 credits
For many reasons, the use of composite materials is an intelligent choice for multiple components on large aircraft as well as for the entire structure of some smaller airplanes. With the increased use of these materials today, aircraft maintenance technicians need to become familiar with the unique processes involved in fabrication and repairing composites. In this course, students will discover the principles of composites aircraft structures. The focus will be on basic composite nomenclature, inspection, and repair of nonmetallic structures. Students will learn the basic core materials, types of materials used, and repair procedures. This course will also cover maintenance practices related to windows, doors and interior furnishings.
Lecture: 1 hour – Lab: 4 hours
Prerequisites: AMT 140, AMT 150 Lab fee: $26.00

AMT 245 Aircraft Landing Gear and Fluid Power Systems (W, SU) 6 credits
The landing gear system is one of the most stressed components on any aircraft. It has to support the weight of the entire aircraft, absorb the forces of impact during landing and taxiing, and survive the tremendous localized heat produced during rollout by the brakes. For these reasons, and due to the complexity of retractable gear and nose steering systems, the maintenance technician needs to possess extensive knowledge of landing gear and associated systems. This course will include heavy focus on hydraulic and pneumatic principles, inspection and repair of air/oil struts, wheels, brakes, tires, and the landing gear system in relation to the aircraft. Students will also learn the principles of inspection, repair, and replacement of hydraulic and pneumatic rigid and nonrigid lines.
Lecture: 4 hours – Lab: 6 hours
Prerequisites: AMT 140, AMT 150 Lab fee: $20.00

AMT 250 Advanced Nondestructive Inspection for Aircraft (W, SU) 3 credits
Constant inspection of aircraft and components is essential to providing aircraft that are safe for flight. In most cases, it is not cost effective or practical to damage or destroy a component in order to determine the useable life remaining. Also, operational environments vary widely so it may not be realistic to rely on the manufacturer’s original tests to establish time between failures. Consequently, it is necessary to devise ways of testing and inspecting components without the technician having to replace them at each inspection. In this course, students will be engaged in an advanced study of applied techniques for selecting and performing nondestructive inspection processes involved in the aviation industry. Techniques involving the use of sophisticated test equipment will be utilized with a high degree of practical application.
Lecture: 2 hours – Lab: 3
Prerequisites: AMT 140, AMT 150 Lab fee: $20.00

AMT 255 Aircraft Navigation and Communication Systems (A, SP) 4 credits
The use of airborne radio equipment is essential to modern day air travel. Without it, the ability to fly to a desired destination in varying weather conditions, while avoiding other aircraft doing the same, would be an impossible task. A technician’s familiarity with aircraft warning, communication, and navigation systems is vital to safe air travel. This course will examine these systems and allow students to gain practical experience in the testing, troubleshooting, and required inspections associated with them.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: AMT 145 Lab fee: $22.00

AMT 260 Aircraft Rigging and Assembly (A, SP) 3 credits
Large and small aircraft utilize rigged cables or electro-hydraulic actuators to transmit the pilot’s desired maneuvers to the aircraft’s flight controls. Also, complex devices such as entry doors, landing gear systems, and lift augmentation devices can require elaborate rigging techniques in order to function properly. In this course, students will begin with a review of the basic sciences for the aviation maintenance technician, including aerodynamics, flight stability, and theory of flight for fixed wing aircraft. In addition, advanced principles and techniques of aircraft rigging, assembly and structure alignment will be studied and put to practical use.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 110, AMT 140 Lab fee: $24.00

AMT 262 Fundamentals of Helicopter Maintenance (A, SP) 3 credits
Rotary-wing aircraft have many distinct characteristics, which make their maintenance different from conventional fixed-wing airplanes. The popularity and widespread use of helicopters has created a need to train technicians in maintenance practices specific to rotary wing aircraft. In this course, students will start with a review of the basic sciences for the aviation maintenance technician, including aerodynamics, flight stability, and the theory of flight for rotary wing aircraft. Upon completion of this review, application of advanced principles and techniques specific to rigging rotary aircraft will be accomplished.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 110, AMT 140 Lab fee: $20.00

AMT 270 Aircraft Conformity Inspections (A, SP) 5 credits
A crucial role of the Aviation Maintenance Technician is to determine “airworthiness” – whether an aircraft (and its components) conforms to the original type design or properly altered condition and is safe for flight. In this course, aviation maintenance students will hone their critical inspection skills by studying the application of Federal Aviation Regulations pertinent to aircraft maintenance or the aircraft technician and, with the help of aircraft specific technical data, perform an examination of the disposition of the required maintenance records, use proper inspection equipment and aids, and complete a thorough inspection of an airframe and powerplant along with all its related systems. Students will also learn the proper procedures for returning an aircraft to service after maintenance or inspection.
Lecture: 3 hours – Lab: 7 hours
Prerequisites: AMT 150, AMT 160, AMT 165, AMT 180, and AMT 210 Lab fee: $24.00

AMT 280 Advanced Aircraft Maintenance Practices (W, SU) 6 credits
Once students finish this program and complete the FAA certification process, they will be expected to enter the workforce and master the trade through experience and further training. Starting this journey can seem overwhelming to the new technician. By placing students into real-life situations with a controlled environment, valuable experience can be gained as well as insight into future expectations. In this course, students will first complete the cooling and exhaust portion of their powerplant training. They will then be subjected to work place scenarios in the hangar. Assignments will include tasks requiring them to research procedures, perform repairs, and create proper documentation.
Lecture: 4 hours – Lab: 6 hours
Prerequisites: AMT 160, AMT 165, AMT 180, AMT 195, AMT 210, and AMT 260 Lab fee: $24.00

AMT 285 Aircraft Weight and Balance (W, SU) 3 credits
Changes to equipment and the accumulation of debris while an aircraft is in service can result in compromising changes to its weight and balance. If the weight of an aircraft or the distribution of weight is not held to stringent
boundaries, the safety of the aircraft, and perhaps its ability to take off, is compromised. In this course, there will be an in depth look at aircraft and helicopter weight and balance. Students will study the principles of computing weight and balance, computing and correction of adverse load conditions, and the basics of computing weight and balance for transport category aircraft. Procedures for weighing aircraft and documentation of weight and balance data are emphasized.

Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 101, AMT 130  Lab fee: $12.00

AMT 290 Human Factors in Aviation Maintenance (W, SU) 4 credits
Awareness of how the individual technician or the people around him/her perform the tasks as expected, understanding the caveats surrounding these tasks, and identifying areas where mistakes can be made during the process are all a very important part of modern aircraft maintenance. Continual improvement in the detection and perception by individuals can dramatically reduce the errors that occur in the performance of aircraft maintenance. In this course, students will examine the major human causative agent in aircraft accidents: the human being.

Lecture: 3 hours – Lab: 2 hours
Prerequisites: AMT 110, AMT 150  Lab fee: $12.00

AMT 295 Aircraft Systems Review (W, SU) 3 credits
As a student progresses through the AMT program, an overwhelming amount of information spanning a multitude of diverse subject matter is presented. It would be unrealistic to expect the student to retain all this information for such a long time before becoming eligible for formal FAA certificate testing. This course prepares the graduate to take the FAA National Knowledge exam. A series of practice tests are used to determine competency of all subject areas tested. Areas of weakness are also reviewed. To successfully complete the course and be given permission to take the FAA exams, an average score of 80% must be achieved in all three areas of testing: General, Airframe and Powerplant.

Lecture: 2 hours – Lab: 3 hours
Prerequisites: AMT 270  Lab fee: $12.00

Biology (BIO)

A mandatory safety lesson (normally given in the laboratory) must be completed before the student is admitted to certain biology laboratory sessions. Approved safety glasses are required for some laboratory sessions and may be purchased through the bookstore. Attendance during the first week of class is mandatory and may affect a student’s continuation in these classes. Students must complete 60% of the laboratories in a course to receive credit. Courses in this area may require additional hours outside of the scheduled class times. Prerequisite for all biology courses above BIO 100 is high school biology completed within the last 5 years or completion of BIO 100, BIO 111, or previous college credit in biology within the last 5 years. Students enrolled in distance versions of these courses may be required to come to campus for an orientation meeting, completion of certain exams, and laboratories. Laboratories in distance learning courses are generally done on an every other week basis on campus.

BIO 100 Introduction to Biological Sciences (A, W, SP, SU, DL) 4 credits
BIO 100 is a general biology course in which basic principles of the characteristics of life, biochemistry, cell reproduction and genetics are explored. Students who enroll in the distance version of this course will be required to come to campus for exams and orientation meetings.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: Placement into English 100 or higher. Not open to students with credit for Biology 111, 112, 121, 125, 126, 174, 261, Natural Science 101, or subsequent course that this list serves as course prerequisites. Lab fee: $3.00

BIO 101 Introduction to Anatomy and Physiology (A, W, SP, SU, DL) 3 credits
BIO 101 is a general overview of normal human anatomy and physiology. Topics include the cell, tissues, and the musculoskeletal, nervous, cardiovascular, genitourinary, digestive, respiratory, and endocrine systems.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: Placement into English 100 or higher. Not open to students with credit for Biology 121, 122, 261, 269, 211 or 212.

Lab fee: $3.00

BIO 102 Human Biology II: Human Biology (A, W, SP, SU, DL) 5 credits
BIO 102 presents an introduction to the study of human biology. Topics included are human evolution, human reproduction, human growth and development, homeostasis, the human brain and the environmental impact of humans on earth. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting, completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisite: High school biology or BIO 100 or BIO 111
Lab fee: $19.00
BIO 121 Anatomy, Physiology and Pathology I
(A, W, SP, SU, DL) 5 credits
BIO 121 is an integrated organ systems approach to the anatomy, physiology and pathology of the human body. Topics include cell biology, histology, and the integumentary, skeletal, muscular and nervous systems. Feline and human cadavers are used for demonstrations in the laboratory.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: High school biology and chemistry, or BIO 100 and CHEM 100, or NSCI 103 and placement into ENGL 101. Not open to students with credit for BIO 261, BIO 269, BIO 211 or BIO 212. Lab fee: $19.00

BIO 122 Anatomy, Physiology and Pathology II
(A, W, SP, SU, DL) 5 credits
This course is a continuation of BIO 121. Topics include endocrinology, hematology, respiratory system, cardiovascular system, metabolism, gastrointestinal system, thermal regulation, and the renal and reproductive systems. Feline and human cadavers are used for demonstrations in the laboratory.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: BIO 121 Lab fee: $19.00

BIO 124 Human Genetics (On Demand) 3 credits
Mendelian and classical genetics are presented. Emphasis placed on the discovery of the DNA molecule and its structure, genetic mutations and diseases, as well as genetic engineering and its implications.
Prerequisites: High school biology, or BIO 100, or NSCI 103 and ENGL 101 Lab fee: $3.00

BIO 125 General Botany (W) 5 credits
This course covers the biology of the major plant groups. Topics include diversity, physiology, reproduction, ecology and economic significance.
Lecture: 4 hours – Lab: 3 hours
Prerequisites: Placement into ENGL 101, high school chemistry and biology, or CHEM 100 and BIO 100, or NSCI 103 Lab fee: $18.00

BIO 126 Introduction to Ecology (On Demand) 5 credits
This course provides an introduction to ecology. Topics include population dynamics, distribution of species and energetics.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: BIO 111 or BIO 174, high school chemistry, CHEM 100, or NSCI 103 Lab fee: $16.00

BIO 127 Environmental Science (On Demand) 5 credits
This course provides a survey of current issues in the study of environmental science. Topics include scientific principles and concepts, human population dynamics, resources and resource management, pollution, world problems and environment and society. Emphasis will be placed on how individual actions and economic and political policies can affect the environment. Proposed solutions to environmental problems will be considered.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: Placement into ENGL 101, high school biology, or BIO 100 Lab fee: $19.00

BIO 174 Biological Sciences I (A, W, SP, SU, DL) 5 credits
Designed for biology majors, this course provides in-depth coverage of cell biology, genetics and embryology. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting, completion of certain exams and laboratories. Laboratories are generally done on a weekly basis on campus. This course and BIO 175 provide a two-quarter sequence in biological science that will fulfill the elective requirement for the Associate of Science degree.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: High school chemistry or CHEM 100, high school biology or BIO 100, or BIO 111
Corequisite: CHEM 171 Lab fee: $26.00.

BIO 175 Biological Sciences II (A, W, SP, SU, DL) 5 credits
This course is a continuation of BIO 174. Designed for biology majors, BIO 175 provides an in-depth coverage of evolution, diversity of life, animal behavior and ecology.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: BIO 174 Lab fee: $25.00

BIO 201 General Zoology: Animal Diversity and Systematics (On Demand) 5 credits
Course offers a survey of the diversity of organisms in the animal kingdom. Emphasis is placed on evolutionary interrelationships, locomotory, nutritional and reproductive strategies of the major groups. This course will fulfill the elective requirement for the Associate of Science degree.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: BIO 174 Lab fee: $26.00

BIO 205 Introduction to Biotechnology (On Demand) 4 credits
A molecular biology course designed to introduce major concepts in DNA structure and function, gene expression, recombinant DNA, biotechnology, techniques and applications of genetic engineering, medical biotechnology (gene therapy), forensics and DNA profiling, and the impact and potential of the human genome project.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: BIO 111 or BIO 115 or BIO 124 or BIO 174 Lab fee: $5.00

BIO 262 Introduction to Biotechnology Lab (On Demand) 1 credit
A general laboratory course designed to introduce students to the principles of biotechnology. Topics include sterile techniques; DNA isolation and purification; bacterial culture techniques; transformation, purification and isolation of plasmid DNA; DNA restriction analysis; gel electrophoresis, PCR and RFLP analysis; and animal cell and plant tissue culture techniques. This course may require additional hours outside of scheduled times.
Lecture: 0 hours – Lab: 4 hours
Prerequisite: BIO 205 Lab fee: $27.00

BIO 211 Principles of Human Physiology I (On Demand) 5 credits
This is the first course of a two-quarter sequence which presents a detailed, in-depth exploration of neuromuscular physiology, brain and special senses, and the cardiovascular, circulatory and respiratory systems. This class and BIO 212 are suitable as transfer prerequisites for BS Nursing/Allied Health and pre-professional programs.
Lecture: 5 hours – Lab: 0 hours
Prerequisites: BIO 261 or equivalent, CHEM 111 and CHEM 112 and placement into ENGL 101. Not open to students with credit for BIO 121 or BIO 262. Lab fee: $6.00

BIO 212 Principles of Human Physiology II (On Demand) 5 credits
This is the second course of a two-quarter sequence (continuation of Biology 211) offering a detailed, in-depth exploration of renal, endocrine, reproductive and digestive physiology, thermal regulation and metabolism.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: BIO 211 Lab fee: $6.00

BIO 215 General Microbiology (A, W, SP, SU, DL) 5 credits
BIO 215 is a general microbiology course for biology majors (non-microbiology majors). Topics covered include taxonomy, morphology and staining, culture techniques, bacterial metabolism, and physical and chemical methods for microbial control. General concepts in immunology, including host defense mechanisms and hypersensitivity, are also covered. Related laboratory is required, including identification of unknown bacteria. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting, completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus.
Lecture: 3 hours – Lab: 4 hours  
Prerequisite: High school chemistry and biology, or CHEM 100 and BIO 100, or NSCI 103 and placement into ENGL 101  
Lab fee: $26.00

**BIO 216 Microbial Diseases (On Demand) 3 credits**  
Course presents a basic study of the concepts of microbial disease. Topics covered are host-parasite interactions and resistance and immunity to disease, including the development of the immune system and mechanics of antigen-antibody reactions. Additional topics for detailed discussion are human airborne, food borne, or water borne infections and human contact diseases.  
Lecture: 3 hours – Lab: 0 hours  
Prerequisite: BIO 215, ENGL 101  
Lab fee: $3.00

**BIO 250 General Genetics (On Demand) 5 credits**  
BIO 250 covers the principles of genetics, including molecular genetics, transmission genetics of prokaryotes and eukaryotes, developmental and nonchromosomal genetics, and the genetics and evolution of populations.  
Lecture: 5 hours – Lab: 0 hours  
Prerequisites: CHEM 252 or equivalent and BIO 111 or BIO 174, plus 5 additional hours in biology  
Lab fee: $5.00

**BIO 253 Fundamentals of Human Nutrition (SU, W) 5 credits**  
BIO 253 presents the nutrient and food energy needs of human biological systems throughout the life cycle with consideration of socio-psychological factors. Consideration also is given to the role of nutrition in preventive health care and various alterations in health and disease states.  
Lecture: 5 hours  
Prerequisite: CHEM 112 or CHEM 113 or CHEM 253 or CHEM 261  
Lab Fee: $3.00

**BIO 261 Human Anatomy (A, W, SP, SU, DL) 5 credits**  
The gross anatomy of the human body is presented in detail. Course offers a thorough study of the head and neck, thorax, abdomen, pelvis, upper and lower limbs and back regions. The laboratory study includes an in-depth study of a human cadaver.  
Lecture: 3 hours – Lab: 4 hours  
Prerequisite: High school biology or BIO 100 or BIO 101 or BIO 111 or equivalent  
Lab fee: $26.00

**BIO 262 Human Physiology (A, W, SP, SU, DL) 5 credits**  
An introductory course in human physiology designed to cover the normal physiology of all organ systems. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting, completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus.  
Lecture: 4 hours – Lab: 3 hours  
Prerequisite: BIO 161 or equivalent, placement into ENGL 101. Not open to students with credit for BIO 122, Bio 211 or BIO 212  
Lab fee: $13.00

**BIO 263 Human Pathophysiology (A, W, SP, SU, DL) 5 credits**  
This course deals with the disordered functioning of the human body as a result of disease. It is designed for students or practitioners in nursing or other allied health professions who wish to increase their understanding of the changes occurring in physiology due to an abnormality.  
Lecture: 5 hours – Lab: 0 hours  
Prerequisite: BIO 169 or BIO 211 and 212 or equivalent, CHEM 112 or CHEM 113 or equivalent, or permission of instructor  
Lab fee: $3.00

**BIO 290 Capstone Experience in Biology (A, W, SP, SU) 3 credits**  
BIO 290 is an integrated science course blending elements of chemistry, physics and biology. Topics include the historical development of the sciences, ethical issues in science and how they affect the advancement of scientific thought, and the scientific method as it relates to experimental design and interpretation of scientific results. The laboratory utilizes an investigative approach, taking students through the process of identifying a research problem, conducting a literature review, writing a research proposal, collecting and analyzing data, writing a scientific paper and presenting results.  
Lecture: 2 hours – Lab: 2 hours  
Prerequisite: 75 hours or more of course work completed with a minimum of 20 credit hours within the sciences  
Lab fee: $19.00

**BIO 293 Independent Study in Biology (On Demand) 1–5 credits**  
Independent study course allows for a detailed examination of selected topics of interest in biology.  
Lecture: 1 to 5 hours – Lab: 0 to 6 hours  
Prerequisite: Permission of instructor

**BIO 299 Special Topics in Biology (On Demand) 1–5 credits**  
BIO 299 is an opportunity for a detailed examination of selected topics of interest in biology.  
Lecture: 1 to 5 hours – Lab: 0 to 6 hours  
Prerequisite: Permission of the instructor

### Business Management (BMGT)

**BMGT 101 Principles of Business (A, W, SP, SU, DL) 5 credits**  
A discussion of all significant activities in the field of business including the interaction of business with internal and external forces, ownership, management, marketing, production, human resources, finance and control. These areas are discussed as they relate to the basic principles of management and economies.  
Lecture: 5 hours – Lab: 0 hours  
Lab fee: $5.00

**BMGT 102 Managing Interpersonal Skills I (A, W, SP, SU, DL) 3 credits**  
This course introduces the student to management themes and the five primary skill sets required to be a successful manager. The course provides opportunities for students to begin to learn, develop, and apply managerial skills through personal assessment and an introduction to various skill concepts and behavior models.  
Lecture: 1 hour – Lab: 4 hours  
Lab fee: $5.00

**BMGT 103 Managing Interpersonal Skills II (W, SP, DL) 3 credits**  
This course builds upon BMGT 102 and expands the students understanding of Temperament and Type theory. Students also learn the basics of Emotional Intelligence and how to apply these management tools to motivate and improve performance.  
Lecture: 1 hour – Lab: 4 hours  
Prerequisite: BMGT 102  
Lab fee: $5.00

**BMGT 107 Gateway to Business for ESL Students (A, W, SP, SU) 5 credits**  
This course is designed for ESL students who are interested in either pursuing a Business Plan of Study or simply strengthening their understanding of contemporary business, with an emphasis on American business. Students will learn key business definitions and terms, federal and other institutions pertinent to business, typical business functions and processes, an overview of competition and strategy, and important performance measurements for businesses.  
Prerequisite: ENGL 101  
Lecture: 5 hours – Lab: 0 hours  
Lab fee: none

**BMGT 111 Management (A, W, SP, SU, DL) 5 credits**  
The basic management functions of planning, organizing, leading, controlling and staffing business organizations are covered. The organization is viewed as a system of interdependent parts which interacts with the outside environment. Topics include leadership, motivation, communication and problem solving.  
Lecture: 5 hours – Lab: 0 hours  
Lab fee: $5.00
BMGT 123 Risk Management  (A, W, SP, SU)  3 credits
Risk Management provides the students with an understanding of the various elements of risk, and how to manage it. The course will review the use of Risk Management, a core management skill, in contemporary business.
Lecture: 2 hours – Lab: 2 hours Lab fee: none

BMGT 150 Principles of Public Administration (A, W, SP, SU)  3 credits
This course provides an overview of the management of public programs. Emphasis will be placed on understanding in detail, the institutions, processes, and techniques required for work in the public and nonprofit sectors. Topics include appropriate competence in leadership style, managerial role, budgeting, personnel relationships, legal, decision making, and communication.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: BMGT 111 and BMGT 102 Lab fee: none

BMGT 151 Organizational Communication (A, SP)  3 credits
This course provides an introduction to fundamental concepts and applications of individual, group, and organizational behavior in the workplace. Topics include foundations of organizational behavior, perception and individual decision making, values, attitudes, the foundations of group behavior, understanding work teams, and organizational dynamics. Prerequisite: BMGT 111
Lecture: 3 hours – Lab: 2 hours
Lab fee: $5.00

BMGT 205 Public Safety Management (A, W, SP, SU)  3 credits
This course reviews the considerations required for planning and administration of services that enhance the safety of citizens. Students will learn service plans and procedures that include fire, police, and security agencies. The course will include methods and plans for implementing strategies and tactical operations.
Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BMGT 206 Seminar Topics in Public Administration (A, W, SP, SU)  3 credits
This course will provide students an advanced discussion of advanced contemporary issues facing public administrators. Students learn more distinctions between administrators in the public and private sector. Topics for the course include privatization and contracting – out of government services, the accountability and discretion of public decision makers, role of public administrators in budgeting, and the ethics of public employees, Students will choose topics to research and develop positions about public agencies. Students will gain and understanding of the complexity and diversity of different types of bureaucracies and constructive means to improve them.
Lecture: 2 hours – Lab: 2 hours Lab fee: none

BMGT 207 Capstone in Public Administration (A, W, SP, SU)  4 credits
This course gives students an opportunity to examine, in detail special topics of interest in public administration. Students will be exposed to lecture, discussion, seminar, and research of educational experiences all in support of role management in the public and government environment. Students will work individually and in teams to solve problems of research, technical writing, editing, and presentation on the study and implementation of projects in public administration. NOTE: BMGT 207 can only be taken during the final quarter prior to graduation.
Lecture: 3 hours – Lab: 2 hours Lab fee: none

BMGT 208 Organizational Communication (A, SP, DL)  3 credits
The Organizational Communication course provides students with the knowledge and skills necessary to pursue careers dependent on human interaction in business, industry or government. Bridging the gap between the classroom and the workplace is an objective of the organizational communication course. Emphasis will be placed on communication structure and process within organizations and the need for individual and group communication skill development.
Lecture: 3 hours – Lab: 0 hours Lab fee: $5.00

BMGT 211 Organizational Behavior (A, W, SP, SU, DL)  4 credits
This course provides an introduction to fundamental concepts and applications of individual, group, and organizational behavior in the workplace.
Topics include foundations of organizational behavior, perception and individual decision making, values, attitudes, the foundations of group behavior, understanding work teams, and organizational dynamics. Prerequisite: BMGT 111
Lecture: 3 hours – Lab: 2 hours
Lab fee: $5.00

BMGT 216 Ethics and Leadership (A, W, SP, SU, DL)  4 credits
BMGT 216 offers a comprehensive and practical study of the principles of ethics combined with a study of the fundamentals of leadership. The course develops a framework for determining what is right and wrong within an organizational context. Expected ethical conduct on both a personal and organizational level is reviewed. Additionally, this course provides an in-depth study of leadership styles, skills and roles, as well as the functions and impact of leaders in organizations. The course integrates writings from the humanities, military leaders, political leaders, religious leaders, and business leaders with basic leadership and ethical principles. Students will explore their ethical philosophy and leadership styles to develop or improve ethical leadership skills.
Lecture: 4 hours – Lab: 0 hours Lab fee: $5.00

BMGT 218 Management Training for Supervisors (A, W, SP, SU, DL)  5 credits
This course presents a comprehensive examination of management functions, techniques and the role of a supervisor. BMGT 218 will increase awareness of the supervisory role and present proven methods and techniques to improve performance. Major areas covered include setting objectives, problem identification techniques, decision-making, time management, management styles, motivation, training subordinates, performance evaluation, verbal and nonverbal communications, interviewing techniques, and a look at the challenge of leadership in an organizational setting. Emphasis is placed on actual on-the-job problems.
Lecture: 5 hours – Lab: 0 hours Lab fee: $5.00

BMGT 230 Organizational Development and Change Management (A, SP)  5 credits
This course explores contemporary organizational development which is defined as the application of knowledge, skills, and tools to improve organizational performance, enhance organizational functioning, and maximize human potential. This course adopts a strategic perspective, and provides concepts and tools related to diagnosing an organization’s problems or intentions, designing interventions to help them overcome obstacles and/or achieve their goals, leading and managing the resulting change process, and evaluating and institutionalizing new organizational strategies.
Lecture: 5 hours – Lab: 0 hours Lab fee: $5.00

BMGT 231 Entrepreneurship I (A, W, SP, SU, DL)  4 credits
This is the first of a two-quarter sequence that introduces the fundamental considerations in planning and executing the start-up of a new small business venture. The course focuses on planning selected critical aspects of a business plan in the areas of orientation to small business, strategic planning, financial considerations, location, layout and beginning inventory.
Lecture: 4 hours – Lab: 0 hours Lab fee: $5.00

BMGT 232 Entrepreneurship II (A, W, SP, SU, DL)  4 credits
This course is a sequel to BMGT 231 and completes the basic instruction necessary for competence in managing a small business enterprise. Topics covered will include effective operation of an established business with emphasis on strategic planning, market analysis, pricing, inventory control and credit collections.
Lecture: 4 hours – Lab: 0 hours Lab fee: $5.00
BMGT 238 Entrepreneurship Practicum (A, W, SP, SU) 4 credits
The practicum provides a supervised, cooperative work experience with on-the-job application of knowledge and skills acquired in the classroom. Practicum: 40 hours
Prerequisite: Permission of instructor
Co-requisite: BMGT 239 Lab fee: $2.00

BMGT 239 Entrepreneurship Seminar (A, W, SP, SU) 2 credits
On-campus seminar which allows students to report on small business management knowledge gained in specific areas of the internship. The course may include a market research survey, case reports, or other special projects.
Seminar: 2 hours
Prerequisite: Permission of instructor
Co-requisite: BMGT 238 Lab fee: $1.00

BMGT 245 Introduction to Nonprofit Management (A) 5 credits
This course traces the history, philosophy, and societal role of nonprofits in the United States, and how social sector organizations today compare organizationally to public and private sector organizations. Additionally, this course explores the characteristics of effective and ethical management and leadership in nonprofit organizations are explored. More specifically, it explores the fundamental challenges to effective leadership including defining and articulating the organization’s mission, formulating relevant organizational strategy, crafting an aligned organizational structure, identifying and understanding the multiple “customers” served, and identifying and prioritizing the critical strategic managerial tasks that must be successfully executed. As such, it examines the roles of the executive director, the board, staff and volunteers.
Lecture: 5 hours – Lab: 0 hours Lab fee: $5.00

BMGT 246 Operational Management of Nonprofit Organizations (W) 5 credits
This course focuses on the “tactics” of strategy implementation in a nonprofit organization. It answers the question: “Now that we have determined our mission and strategic goals, what do we have to do to get there?” Course explores human resource development and supervision, program planning, managing volunteers, outcome assessment and measurement, board and committee development, and risk management.
Lecture: 5 hours – Lab: 0 hours Lab fee: $5.00

BMGT 247 Legal and Financial Issues in Nonprofit Management (SP) 5 credits
This course introduces the legal and financial issues relevant to managing a 501 (c) (3) nonprofit organization. Issues to be addressed include organizing the entity, qualifying for and maintaining nonprofit status, principles of fundraising, and strategic marketing. Financial issues covered include the principles of fiscal responsibility for nonprofits, as well as cost accounting, budgeting, the presentation of financial statements, proposed development, and in-kind resources.
Lecture: 5 hours – Lab: 0 hours Lab fee: $5.00

BMGT 248 Leadership Seminar in Nonprofit Management (SU) 5 credits
This course is a project-based capstone learning experience that will facilitate the application of knowledge acquired in BMGT 245, 246, and 247 to a contemporary problem or initiative in a nonprofit organization. Leadership strategies relevant to a nonprofit organizational context and an exploration of professional motivation and commitment will also be explored.
Lecture: 4 hours – Field Experience: 7 hours Lab fee: $5.00

BMGT 250 Project Management Methodologies (A, W, SP, SU) 5 credits
Students will develop their personal project methodology that can be customized to any field of interest. It will include activities in all project phases and processes such as project charters, communication plans, requirements validation, change management, risk/issue management, testing and quality assurance.
Prerequisites: BMGT 254 Project Management Techniques, BMGT 257 Project Management Principles.
Lecture: 5 hours – Lab: 0 hours Lab fee: $0.00

BMGT 253 The Art and Science of Managing Conflict (A, W, SP, SU, DL) 4 credits
This course provides students with a basis and a context for effectively managing conflict. The course covers fundamentals of emotional intelligence and emotional intelligence competencies, a critical thinking model, various models of conflict management, dealing with disruptive and antagonistic behaviors, and the eight elements of effective conflict management. The course focuses on theory and practical application and is designed to equip managers with both the basic theoretical knowledge and initial practical experience needed to manage conflict effectively.
Lecture: 3 hours – Lab: 2 hours Lab fee: $10.00

BMGT 254 Project Management Techniques (A, W, SP, SU) 5 credits
Students will learn to use a variety of Project Management tools, such as breakdown structures, resource and time estimating, resources allocation, GANTT charts, earned value, PERT charts, and critical path analysis.
Prerequisite: BMGT 257 Project Management Principles
Lecture: 5 hours – Lab: 0 hours

BMGT 257 Project Management Principles (A, SP) 3 credits
This course introduces students to the basic concepts of project management. Students learn to define the scope of a project; minimize change of scope; establish goals; define dependency networks; communicate the project plan; use Program Evaluation and Review Techniques (PERT) charts and Critical Path Management; schedule projects; establish tasks, sub tasks, and milestones; and assign resources to tasks. Students use matrix management principles and tools as a way to facilitate project planning and monitoring. Students are required to plan a project from inception to completion.
Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BMGT 258 Enterprise Planning and Analysis (A, SP) 4 credits
This course provides students with a review of operations, including service and manufacturing. It includes a review of tools, techniques, and methodologies that enhance organizational problem-solving, planning, and process analysis and improvement. Students will become familiar with application of these tools and learn which is best suited to a particular organizational challenge.
Prerequisites: ACCT 107, BMGT 101, BMGT 111, MATH 102
Lecture: 3 hours Lab: 2 hours

BMGT 259 Project Management Capstone Course (A, W, SP, SU) 5 credits
In this capstone course for the project management certification program, students use the knowledge they gained from BMGT 257, BMGT 254 and BMGT 250 to manage his/her own project. The project can be real or a case study.
Prerequisites: BMGT 250, BMGT 254, BMGT 257
Lecture: 5 hours – Lab: 0 hours Lab fee: None

BMGT 260 Business Management Seminar (A, W, SP, SU) 2 credits
On-campus seminar which allows students to report on small business management knowledge gained in specific areas of the internship. The course may include a market research survey, case reports, or other special projects.
Seminar: 2 hours
Prerequisite: BMGT 280, and Permission of Instructor
Co-requisite: BMGT 261
BMGT 261 Business Management Practicum (A, W, SP, SU) 3 credits

The practicum provides a supervised, cooperative work experience with on-the-job application of knowledge and skills acquired in the classroom.
Practicum: 21 hours
Prerequisite: BMGT 280, and Permission of Instructor
Co-requisite: BMGT 260

BMGT 272 Case Studies in Strategic Management (A, W, SP, SU, DL) 5 credits

This case studies seminar is designed as a capstone course for graduating Business Management students and Accounting majors to allow students to inter-relate various functional disciplines to which they have been exposed during their preceding business coursework. Using case studies, students are provided an opportunity to apply various decision-making and problem-solving principles and practices in a course that will provide an integrative view and reinforce understanding of strategy.
Prerequisites: ACCT 107, ECON 200, FMGT 101, HRM 121, and MKTG 111.

Note: Course is open to Business Management majors in their last quarter of study, only after all course prerequisites have been met. Registration requires prior approval by the Business Management Technology Program Coordinator.
Lecture: 3 hours – Lab: 2 hours  Lab Fee: $10.00

BMGT 280 Business Professional Development (A, W, SP, SU) 3 credits

Business Professional Development provides students with a competitive advantage in a variety of situations. Students learn to use business etiquette to improve communication through e-mail, written correspondence, and the telephone. Students learn how to improve relations with customers, employees, supervisors, and peers by learning how to accept gifts and compliments and use social graces while eating or attending social activities. Students learn appropriate dress, posture, handshakes, and nonverbal communication. The course explores cultural differences in global etiquette.
Prerequisite: ACCT 106, and Permission of Instructor
Lecture: 2 hours – Lab: 2 hours  Lab fee: $10.00

Business Office Applications (BOA)

BOA 101 Business Grammar (A, W, SP, SU, DL) 3 credits

This course is a structured program reviewing the parts of speech in detail. In addition, it is designed to help students become skillful in sentence analysis, word choice, punctuation, vocabulary, capitalization, number expression, and spelling. Any DEV classes needed are to be taken before scheduling this challenging review course. It is recommended that students take BOA 101 prior to ENGL 101. Business Office Applications majors must earn a “C” grade or better in BOA 101.
Lecture: 2 hours – Lab: 2 hours

BOA 105 Desktop and Document Management (A, W, SP, SU, DL) 1 credit

This is a foundation course preparing students to manage the computer desktop and documents. Students will learn to create and manage document folders, download and upload documents and folders, download and use utility software to view PDF files, videos, and multimedia presentations, condense and extract zipped files and folders.
Lecture: 0 hours – Lab: 2 hours  Lab fee: $5.00

BOA 106 Internet Research (A, W, SP, SU, DL) 1 credit

This course prepares students to use the Internet effectively for research in a business and workplace environment. Students will learn how to perform basic and complex Internet searches, use search engines and subject guides effectively, evaluate and cite online resources, and utilize specialized research tools, including newsgroups and intelligent search agents. Students will also learn about copyright issues and when it is appropriate to download and use media from the Internet, and when it is necessary to obtain permission. Computer and Internet experience is recommended.
Lab: 2 hours  Lab Fee: $5.00

BOA 111 Bookkeeping Basics I (A, W, SP, SU, DL) 4 credits

This course is designed to provide students with a basic understanding of bookkeeping principles and procedures including analysis of business transactions, journalizing, posting, adjusting and closing entries, and financial statement preparation. Also included are transactions involving payroll accounting, bank accounts, and cash funds. Any DEV math classes needed are to be taken before scheduling this course. Recommended: Students should complete BOA 172 Excel before taking this course.
Lecture: 4 hours – Lab: 0 hours  Lab Fee: $5.00

BOA 112 Bookkeeping Basics II (A, W, SP, SU, DL) 4 credits

This is a continuation of BOA 111 Bookkeeping Basics I. The course is designed to provide students with a strong basic knowledge of accounting and bookkeeping terminology, concepts, and procedures. Topics include combined journals, payroll accounting, special journals, and the full accounting cycle for a merchandising firm.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: BOA 111 with “C” grade or higher  Lab Fee: $5.00

BOA 113 QuickBooks I (A, W, SP, SU, DL) 1 credit

This is an introductory course for QuickBooks accounting software in which students learn to keep a set of computerized books for a small company. Any DEV math classes needed are to be taken before scheduling BOA 113. Recommended: Students should complete BOA 111 Bookkeeping Basics I before taking this course.
Lecture: 0 hours - Lab: 2 hours  Lab fee: $5.00

BOA 114 QuickBooks II (A, W, SP, SU, DL) 1 credit

This is an intermediate course in which students will gain additional knowledge in the use of QuickBooks software. Adjustment of company inventory, payroll processing, and banking transactions are covered along with other selected topics.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: BOA 113  Lab fee: $5.00

BOA 115 Computer Bookkeeping with Peachtree® (A, W, SP, SU, DL) 3 credits

This course contains basic accounting procedures using computerized accounting software Peachtree® 2007. The course covers how to create a company file, run accounts payable, manage inventory and payroll, track inventory and fixed assets, maintain ledgers and journals, and create reports.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: BOA 111  Lab fee: $5.00

BOA 116 Adjusting Entries and Error Corrections (A, W, SP, SU, DL) 2 credits

Students will learn to set up the trial balance, compute and record all end-of-period adjustments, and present the adjusted trial balance. Also included in this course is how to do the monthly bank reconciliation, correcting errors in the trial balance and in the accruals and deferrals.
Lecture: 2 hours
Prerequisites: BOA 112  Lab fee: $5.00

BOA 117 Payroll (A, W, SP, SU, DL) 2 credits

This course examines paying wages, withholding, depositing, and reporting taxes, as well as the correct use of government forms. In this course,
students will learn who gets overtime pay and who does not; how to process a W-4 and complete the 941, 940, W-2 and W-3; how and when to deposit withheld taxes using actual forms.

Lecture: 2 hours
Prerequisite: BOA 112 Lab fee: $5.00

BOA 118 Inventory and Depreciation
(A, W, SP, SU, DL) 2 credits
Students will learn the perpetual and periodic methods of recording inventory. Find out how to cost out inventory and record cost of goods sold using weighted and moving average, FIFO, LIFO, and lower of cost or market (LCM). Students will also learn to compute and record depreciation for book and tax purposes; the 4 major methods of GAAP depreciation; MACRS depreciation for tax purposes, including Section 179 deductions; and tax depreciation of cars, SUVs and other vehicles.

Lecture: 2 hours
Prerequisite: BOA 112 Lab fee: $5.00

BOA 119 Internal Controls and Fraud Prevention
(A, W, SP, SU, DL) 2 credits
This course examines internal controls and their role in the prevention of fraud. This is a core course in the Bookkeeping Certificate program.

Lecture: 2 hours
Prerequisite: BOA 112 Lab fee: $5.00

BOA 121 Records Management (A, W, SP) 3 credits
This course is designed to provide knowledge of efficient management of electronic and manual business records, ARMA filing methods and systems, and principles for the selection of records systems and supplies. Any DEV classes needed should be taken before scheduling BOA 121.

Lecture: 2 hours – Lab: 2 hours
Prerequisites: BOA 189 Access Modules 1 and 2

BOA 125 Outlook (A, SP, DL) 3 credits
This course is a desktop information management application using Microsoft Outlook software. Students will learn problem-solving techniques to organize and manage a variety of tasks, such as file management, calendar, e-mail, contacts, tasks, and journals. The goal of this course is to promote independent problem-solving proficiency while working simultaneously as a member of an office team. Prior computer experience is strongly recommended.

Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BOA 131 Introduction to Keyboarding
(A, W, SP, SU, DL) 3 credits
BOA 131 is an introductory interactive system of keyboarding, teaching the “touch” system of typing. Development of basic keyboarding skills is measured in words per minute and accuracy of one error per minute. To receive credit for this course, students must complete all keyboarding lessons in assigned text and demonstrate ability to key at least two different two-minute timings, each with a minimum speed of 25 words a minute (“D” grade) and accuracy of two or fewer errors. Students must earn a “C” grade or better as a prerequisite for BOA 132 Document Formatting and Skill Building I.

Lecture: 2 hours – Lab: 2 hours Lab fee: $3.00

BOA 132 Document Formatting and Skill Building I
(A, W, SP, SU, DL) 3 credits
BOA 132 presents an intermediate interactive system reinforcing keyboarding skills by touch. Applications using Microsoft Word are designed to teach formats for business correspondence, tabulations, and manuscripts with emphasis on correct techniques, proofreading, decision-making skills, and accuracy; further development of keyboarding speed measured in words per minute and accuracy of one error per minute on three-minute timings. To receive credit for this course, students must demonstrate assigned formatting skills and be able to key at least two different three-minute timings, each demonstrating a minimum speed of 35 words a minute (“D” grade) with accuracy of three or fewer errors.

Students must earn a “C” grade or better as a prerequisite for BOA 133 Document Formatting and Skill Building II.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: “C” grade or better in BOA 131 or proficiency exam Lab fee: $3.00

BOA 133 Document Formatting and Skill Building II
(A, W, SP, SU, DL) 3 credits
BOA 133 presents an advanced interactive system reinforcing keyboarding skills by touch. Applications using Microsoft Word software are designed to continue instruction of business correspondence, tabulations, manuscripts, reports, and various business forms with emphasis on correct techniques, proofreading, decision-making skills, and accuracy; further development of keyboarding speed measured in words per minute and accuracy of one error per minute on five-minute timings. To receive credit for this course, students must demonstrate assigned formatting skills and be able to key at least two different five-minute timings, each demonstrating a minimum speed of 45 words per minute (“D” grade) with accuracy of five or fewer errors. A grade of “C” or better is required in BOA 133 in order to graduate from the BOA program.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: “C” grade or better in BOA 132 Lab fee: $3.00

BOA 138 Computer Transcription (SP) 3 credits
This course is designed to provide students with increased skill in the use of machine transcription equipment. Final form copy is the goal in transcribing audio tapes of business correspondence, technical reports, drafts, and other business communications in a broad range of business formats. Emphasis on the fundamentals of English in grammar, spelling, and vocabulary will reinforce transcription skills. Recommended: Students should complete BOA 101 before taking this course.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: BOA 132 Lab fee: $5.00

BOA 139 Keyboarding Improvement (W, SP, DL) 3 credits
This elective course is designed to provide students with increased skill in the use of the keyboard by touch. Students need to be able to key by touch from text at least 40 wpm with reasonable accuracy, using correct finger placement. The emphasis will be on speed and accuracy using straight-copy material, time writings, and drills. The grading system is Satisfactory or Unsatisfactory. Recommended: Complete BOA 131 Intro to Keyboarding or pass the BOA 131 proficiency exam before taking this course.

Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BOA 150 Office Procedures I (A, SP) 3 credits
This foundation course will provide continuity and integration with all BOA courses by focusing on the essential knowledge, skills, abilities, qualities, and attitudes that are critical for success in an office environment. In addition to soft skills, students will learn to plan business meetings and travel as well as organizing a workplace environment. The third component of this course will introduce students to development of an electronic portfolio. This electronic portfolio will be integrated into all courses in the curriculum.

Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BOA 151 Office Procedures II (W, SU) 3 credits
As a continuation of BOA 150 Office Procedures I, this course covers additional topics essential to the success of an office employee and will continue to provide continuity and integration with all BOA courses and curriculum. This course will emphasize business information and financial systems, managing office records, preparing and delivering presentations, teamwork in the workplace, planning and advancing your career, and professional development.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: BOA 150 Lab fee: $5.00
BOA 164 WordPerfect (A, SP) 3 credits
BOA 164 provides students with a solid foundation in this word processing software. Covers basic to advanced features including the use of icons, the ruler bar, line and page formatting, tabs, headers, footers, footnotes, endnotes, merging, tools, file management, and other selected topics. Recommended: Keyboarding skill of 35 words per minute. Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BOA 167 Desktop Publishing (A, SP) 3 credits
This course utilizes a desktop publishing software program widely used to design sophisticated publications. This course begins with the basics and builds upon this knowledge to demonstrate how to work with text frames and layers, format text, apply styles, add graphics, and much more. Recommendations: 35 words per minute keyboarding skill, computer experience and skills in word processing software. Lecture: 2 hours – Lab: 2 hours Lab fee: $5.00

BOA 172Excel (Modules 1 and 2) (A, W, SP, SU) 2 credits
This is a foundation course using Microsoft Excel spreadsheet software. Students will explore Excel features and functions used in business applications. Students will learn to plan and create worksheets, modify and maintain worksheets, insert formulas, create charts, and enhance the display of workbooks. Recommended: Keyboarding and computer experience. Lecture: 0 hours – Lab: 2 hours Lab fee: $5.00

BOA 172AExcel Module 1 (A, W, SP, SU, DL) 1 credit
This is an introductory course in Microsoft Excel spreadsheet software. Students will learn to create a worksheet, modify worksheets, and create formulas. Recommended: Keyboarding and computer experience. Lecture: 0 hours – Lab: 2 hours Lab fee: $5.00

BOA 172BExcel Module 2 (A, W, SP, SU, DL) 1 credit
This is a continuation of introductory and intermediate skills using Microsoft Excel spreadsheet software. Students will learn to move data within and between workbooks, maintain workbooks, create charts in Excel, and enhance the display of workbooks. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 172A Lab fee: $5.00

BOA 173Excel Module 3 (A, SP, DL) 1 credit
This is a course using intermediate features/functions of Microsoft Excel spreadsheet software. Students will learn to format worksheets using advanced formatting techniques, work with templates and workbooks, use advanced features for financial, math, statistical, and logical functions. Students are responsible for the software in this distance-learning course. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 172B Lab fee: $5.00

BOA 173BExcel Module 4 (A, SP, DL) 1 credit
This is a course using intermediate and advanced features/functions of Microsoft Excel spreadsheet software. Students will learn to use Excel’s analysis tools, manage and audit worksheets, collaborate with workgroups, and use data from the Internet and other sources. Students are responsible for the software in this distance-learning course. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 173A Lab fee: $5.00

BOA 188PowerPoint (Modules 1 and 2) (A, W, SP, SU) 2 credits
This is a foundation course using Microsoft PowerPoint presentation graphics software. Students will learn to create and enhance slide presentations using clipart, charts, photographs, videos, and sound. More advanced visual elements and animation are also incorporated in this course. Recommended: Keyboarding and computer experience. Lecture: 1 hour – Lab: 3 hours Lab fee: $5.00

BOA 188A PowerPoint Module 1 (A, W, SP, SU, DL) 1 credit
This is an introductory course to Microsoft PowerPoint presentation graphics software. Students will learn the fundamentals of creating and enhancing a presentation using clip art, charts, photographs, videos, and sound. Recommended: Keyboarding and computer experience. Lecture: 0 hours – Lab: 2 hours Lab fee: $5.00

BOA 188B PowerPoint Module 2 (A, W, SP, SU, DL) 1 credit
This course is a continuation of introductory features/functions using Microsoft PowerPoint presentation software. Students will learn to add visual appeal, animation, and visual elements to PowerPoint presentations. Recommended: Keyboarding and computer experience. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 188A Lab fee: $5.00

BOA 189 Access (Modules 1 and 2) (A, W, SP, SU) 2 credits
This is a foundation course using Microsoft Access database software. Students will learn to create and modify database tables, create data forms and queries, generate reports, and use database wizards. Recommended: Keyboarding and computer experience. Lecture: 0 hours – Lab: 3 hours Lab fee: $5.00

BOA 189A Access Module 1 (A, W, SP, SU, DL) 1 credit
This is an introductory course in Microsoft Access database software. Students will learn to create, modify, and enhance tables in a database. Recommended. Keyboarding and computer experience. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 189A Lab fee: $5.00

BOA 189B Access Module 2 (A, W, SP, SU, DL) 1 credit
This is a continuation of Microsoft Access database software features and functions. Students will learn to modify tables, create forms, create reports, and use database wizards. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 189A Lab fee: $5.00

BOA 190 Access Module 3 (A, W, SP, SU, DL) 1 credit
This is a course using intermediate features/functions of Microsoft Access database software. Students will learn to create and modify advanced tables, create and modify forms, refine queries, and use advanced report features. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 189B Lab fee: $5.00

BOA 190B Access Module 4 (A, W, SP, SU, DL) 1 credit
This is a course using intermediate and advanced features/functions of Microsoft Access database software. Students will learn to use Access tools, create database applications, and use data from the Internet and other sources. Lecture: 0 hours – Lab: 2 hours Prerequisite: BOA 190A Lab fee: $5.00

BOA 191 Word I (Modules 1 and 2) (A, W, SP, SU) 2 credits
This is a foundation course using Microsoft Word software. Students will learn to create, modify and maintain documents, format and customize documents, create tables and charts, and enhance documents with special features. Students must earn a “C” grade or better in BOA 191 as a prerequisite for BOA 192 Word II. Recommended: Keyboarding skill of at least 35 words per minute and computer experience. Lecture: 1 hour – Lab: 3 hours Lab fee: $5.00

BOA 191A Word Module 1 (A, W, SP, SU, DL) 1 credit
This is an introductory course using Microsoft Word software. Students will learn to create and edit a document, format documents, arrange text, and use simple graphics. Recommended: Keyboarding and computer experience. Lecture: 0 hours – Lab: 2 hours Lab fee: $5.00

BOA 191B Word Module 2 (A, W, SP, SU, DL) 1 credit
This is a continuation of features and functions using Microsoft Word software. Students will learn to modify and maintain documents, customize documents, create tables and charts, and enhance documents with special...
BOA 192 Word II (Modules 3 and 4) (A, W, SP, SU) 2 credits
Provides additional skills and refines techniques presented in BOA 191. This is an intermediate and advanced level course using Microsoft Word software. Students will learn to merge documents, sort and select data, format with special features, add visual elements, and format using macros and styles. Students will learn how to work with shared documents, share data, and create specialized tables and indexes. Recommended: Keyboarding skill of at least 35 words per minute and computer experience.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: BOA 191A Lab fee: $5.00

BOA 192A Word Module 3 (A, W, SP, SU, DL) 1 credit
This is an intermediate course using Microsoft Word software. Students will learn to customize paragraphs and pages, sort and insert Building Blocks, format with special features, add visual elements, and format using macros and styles.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: BOA 192A Lab fee: $5.00

BOA 192B Word Module 4 (A, W, SP, SU, DL) 1 credit
This is an intermediate/advanced course using Microsoft Word software. Students will learn how to work with shared documents, share data, create specialized tables and indexes, and use XML in Word.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: BOA 192A Lab fee: $5.00

BOA 193 Word III (A, W, SP, SU, DL) 3 credits
This is an advanced level course using Microsoft Word software. Reinforcement of important design concepts such as consistency, focus, balance, directional flow, contrast, color, proportion, legibility, and readability will be emphasized. Students will learn to create professional-looking business documents in the form of letterheads, business cards, calendars, certificates, newsletters, brochures, booklets, and forms.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: “C” grade or better in BOA 192 Lab fee: $5.00

BOA 195 Office Integration I (A, W, SP, SU, DL) 1 credit
This course offers intermediate and advanced features to integrate Word, Excel, PowerPoint, Access, and Outlook applications. Students will learn to join office applications that work together.
Lecture: 0 hours – Lab: 2 hours
Prerequisites: BOA 192A, 173A, 188B, 190A Lab fee: $5.00

BOA 196 Office Specialist Seminar I (A, SP, DL) 1 credit
This course is designed for students who have completed Word, Excel, PowerPoint, and Access modules 1 and 2. The course will provide students with a structured review and hands-on practice using Word, Excel, PowerPoint, and Access features and functions in preparation for office systems certification.
Lecture: 0 hours – Lab: 2 hours
Prerequisites: BOA 191B, BOA 172B, BOA 188B, BOA 189B Lab fee: $5.00

BOA 197 Office Specialist Seminar II (A, SP, DL) 1 credit
This course is designed for students who have completed Word, Excel, and Access modules 1 through 3, PowerPoint modules 1 and 2, and Outlook. The course will provide students with a structured review and hands-on practice using Word, Excel, PowerPoint, and Access, and Outlook intermediate and advanced features in preparation for office systems certification.
Lecture: 0 hours – Lab: 2 hours
Prerequisites: BOA 192A, BOA 173A, BOA 188B, BOA 190A, BOA 125 Lab fee: $5.00

BOA 250 Capstone (A, SP) 4 credits
This capstone course provides a hands-on application environment where students work in teams to plan, develop, implement, and present automated business and financial office applications. Students will also complete an electronic portfolio and participate in a community service project related to the program of study. Students must earn a “C” grade or better in BOA 250 in order to graduate from the BOA program.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: BOA 101, BOA 111, BOA 121, BOA 133, BOA 151, BOA 195, Lab fee: $5.00

BOA 270 Business Office Applications Practicum (A, SP) 2 credits
The practicum is a professional field experience program designed to provide the student with an opportunity to work in a professional office environment. This opportunity allows students to integrate the theory and knowledge of course content with the application of principles and practices in a work environment.
Lecture: 0 hours – Lab: 14 hours
Corequisite: BOA 271
Prerequisites: BOA 151, BOA 195, BOA 101, BOA 121, BOA 133 Lab fee: $5.00

BOA 271 Business Office Applications Practicum Seminar (A, SP) 2 credits
This seminar provides opportunities for discussion and activities related to a business office environment. Students will discuss the work experience and demonstration of ability to transfer program skills and technology to an office environment. Students will prepare weekly reports and complete work-related projects and assignments. This course must be taken as a corequisite with BOA 270 Practicum.
Lecture: 2 hours – Lab: 0 hours
Corequisite: BOA 270
Prerequisites: BOA 151, BOA 195, BOA 101, BOA 111, BOA 121, BOA 133 Lab fee: $5.00

BOA 297 Special Topics in Business Office Applications (On Demand) 1–3 credits
BOA 297 provides an opportunity for detailed examination of selected topics of interest in office applications and administration.
Lecture: Varies – Lab: Varies
Prerequisite: Varies Lab fee: $20.00

Chemistry (CHEM)

A mandatory safety lesson must be completed before the student is admitted to any other chemistry laboratory sessions. Approved Chemical Splash Resistant goggles are required and may be purchased through the bookstore. Certain clothing restrictions exist and will be explained by the instructor. Attendance during the first week of class is mandatory and may affect a student’s continued enrollment in these classes. Students must earn at least 60% of the total laboratory points in a course to receive a passing grade for the course. Courses in this area may require additional hours outside of scheduled class times. High school chemistry must have been completed within the last 3 years, or the student must have completed CHEM 100 or CHEM 111 in order to meet the prerequisite requirement.

CHEM 100 Introduction to Chemistry (A, W, SP, SU, DL) 4 credits
This is a preparatory chemistry course covering the basic concepts of chemistry with emphasis on the physical and chemical properties of matter, problem-solving, and an introduction to chemical reactions. Re-
lated laboratory work and demonstrations are included. Safety training and goggles are required for laboratory sessions. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning course are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: MATH 102 or higher and placement into ENGL 100 or higher. Not open to students with credit for CHEM 111, 112, 113, 171, 172, or 173. Lab fee: $13.00

CHEM 110 Chemistry and Society (A, W, SP, SU) 5 credits
CHEM 110 is a course for nonscience majors intended to a) acquaint students with the science of chemistry as it relates to modern technological society, and b) help students learn about chemistry in the context of their everyday lives. This course will also help students realize the interconnection between chemistry and other disciplines in the natural sciences. The material in the course focuses on the practical significance of basic chemistry in the context of social, political and economic issues that affect our world. In addition, this course will provide students with an interactive laboratory experience. Safety training and goggles are required for participation in laboratory sessions.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: Placement into Math 102 or higher and placement into ENGL 101. Not open to students with credit for CHEM 111 or higher.
Lab fee: $19.00

CHEM 111 Elementary Chemistry I (A, W, SP, SU, DL) 5 credits
This is an introductory course in fundamental chemical concepts and laboratory techniques. Topics include atomic structure, periodic classification of elements, stoichiometry, solutions, acids and bases, pH and buffers, the gas laws, chemical equilibrium and nuclear chemistry. Safety training and goggles are required for laboratory sessions. This course and CHEM 112 provide a two-quarter sequence in physical science that will fulfill the elective requirement for the Associate of Science Degree. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning course are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: MATH 102 or higher and placement into ENGL 101. Not open to students with credit for CHEM 171, 172 or 173.
Lab fee: $19.00

CHEM 112 Elementary Chemistry II (A, W, SP, SU, DL) 5 credits
CHEM 112 is an introductory course in fundamental organic chemistry, biochemistry and laboratory techniques. Course covers the study of carbon compounds organized according to functional groups including carbohydrates, lipids, proteins, enzymes and vitamins. Emphasis is placed on physiological function. Safety training and goggles are required for laboratory sessions. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning course are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisite: CHEM 111; not open to students with credit for CHEM 171 or CHEM 251 or higher.
Lab fee: $19.00

CHEM 113 Elements of Organic and Biochemistry (A, W, SP, SU, DL) 5 credits
This is a course in elementary chemical concepts designed primarily for allied health students. It includes the study of basic organic chemistry, especially related to functional groups, and biochemistry including carbohydrates, lipids, proteins, enzymes and nucleic acids and metabolism. Safety training and goggles are required for the laboratory session. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning courses are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: CHEM 100 or CHEM 111, or successfully completing a chemistry placement exam; MATH 102 or higher; and placement into ENGL 100 or CHEM 100, or CHEM 111, or successfully completing a chemistry placement exam; MATH 102 or higher; and placement into ENGL 101. Not open to students with credit for CHEM 112 or CHEM 251.
Lab fee: $19.00

CHEM 171 General Chemistry I (A, W, SP, SU, DL) 5 credits
CHEM 171 presents fundamental chemical principles for chemistry majors and pre-professionals. Topics include chemical calculations, the mole concept, atomic structure, periodic classification, bonding, the behavior of gases and thermochemistry. Laboratory sessions provide bench experiences. Students will be required to participate in a laboratory research experience. Safety training and goggles are required for laboratory sessions. This is the first of a three-quarter sequence designed for students entering scientific disciplines. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning courses are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: High school chemistry or CHEM 100 or CHEM 111, completion of or concurrent enrollment in MATH 148 or equivalent, and placement into ENGL 101.
Lab fee: $19.00

CHEM 172 General Chemistry II (A, W, SP, SU, DL) 5 credits
This course is a continuation of CHEM 171. Topics include chemical bonding, molecular geometry, behavior of liquids and solids, solutions, kinetics, equilibrium and acid-base chemistry. Laboratory sessions provide bench experiences. Students will be required to participate in a laboratory research experience. Safety training and goggles are required for laboratory sessions. This is the second of a three-quarter sequence designed for students entering scientific disciplines. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning courses are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisite: CHEM 171
Lab fee: $19.00

CHEM 173 General Chemistry III (A, W, SP, SU, DL) 5 credits
CHEM 173 is a continuation of CHEM 172. Topics include buffers, solubility equilibria, atmospheric chemistry, entropy and free energy, electrochemistry, the chemistry of metals and nonmetals, coordination complexes and nuclear chemistry. Laboratory sessions provide bench experiences. Students will be required to participate in a laboratory research experience. Safety training and goggles are required for laboratory sessions. This is the third of a three-quarter sequence designed for students entering scientific disciplines. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories in distance learning courses are generally done on an every other week basis on campus.

Lecture: 4 hours – Lab: 3 hours
Prerequisite: CHEM 172
Lab fee: $19.00

CHEM 251 Organic Chemistry I (A, W, SP, SU) 5 credits
This is the first course in a three-course sequence in organic chemistry. CHEM 251 covers structure, nomenclature, physical properties, bonding and reactions of alkanes, alkenes, and alkyl halides.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: CHEM 173
Lab fee: $6.00

CHEM 252 Organic Chemistry II (A, W, SP, SU) 5 credits
This is the second course in a three-course sequence in organic chemistry. This course includes the study of physical and chemical properties of aromatic compounds, alcohols, thiols, ethers, epoxides, sulfides, carbonyl
compound, carboxylic acids and their derivatives, and carbohydrates. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: CHEM 251 
Concurrent Enrollment: CHEM 254 Lab fee: $6.00

CHEM 253 Organic Chemistry III (A, W, SP, SU) 5 credits
This is the third course in a three-course sequence in organic chemistry. This course includes the study of spectroscopic methods, molecular orbital theory, polymers, the chemical and physical properties of amines, amino acids, proteins, lipids and nucleic acids. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: CHEM 252 Lab fee: $6.00

CHEM 254 Organic Chemistry Laboratory I (A, W, SP, SU) 3 credits
This is the first course in a two-course sequence in organic chemistry laboratory. This course introduces the student to laboratory techniques of organic chemistry, including synthesis, isolation, purification, and identification of organic compounds. Students will be required to participate in a laboratory research experience. 
Lecture: 1 hour – Lab: 8 hours
Prerequisite: CHEM 252 and or concurrent enrollment in CHEM 252 Lab fee: $39.00

CHEM 255 Organic Chemistry Laboratory II (A, W, SP, SU) 3 credits
This is the second course in a two-course sequence in organic chemistry laboratory. This course includes further study of organic laboratory techniques including synthesis, isolation, purification and identification of organic compounds. Students will be required to participate in a laboratory research experience. 
Lecture: 1 hour – Lab: 8 hours
Prerequisites: CHEM 252 and CHEM 254 Lab fee: $39.00

CHEM 261 General Biochemistry (A, W, SP, SU) 5 credits
This is an introductory course in biochemistry dealing with the molecular basis of structure and metabolism of plants, animals and microorganisms. 
Lecture: 5 hours – Lab: 0 hours
Prerequisites: CHEM 252 and two quarters of biological science Lab fee: $6.00

CHEM 290 Capstone Experience in Chemistry (On Demand) 3 credits
CHEM 290 is an integrated science course blending elements of chemistry, physics and biology. Topics include the historical development of the sciences, ethical issues in science and how they affect the advancement of scientific thought, and the scientific method as it relates to experimental design and interpretation of scientific results. The laboratory utilizes an investigative approach taking students through the process of identifying a research problem, conducting a literature review, writing a research proposal, collecting and analyzing data, writing a scientific paper and presenting results. 
Lecture: 2 hours – Lab: 2 hours
Prerequisite: 75 hours or more of course work completed with a minimum of 20 credit hours within chemistry Lab fee: $18.00

CHEM 293 Independent Study in Chemistry (On Demand) 1-5 credits
CHEM 293 offers a detailed examination of selected topics of interest in chemistry.
Prerequisite: Permission of instructor Lab fee: Varies

CHEM 299 Special Topics in Chemistry (On Demand) 1-5 credits
This course is an opportunity for a detailed examination of selected topics of interest in chemistry. 
Lecture: 1 to 5 hours – Lab: 0 to 6 hours
Prerequisite: Permission of the instructor Lab fee: Varies

Chinese (CHIN)

CHIN 101 Elementary Chinese I (A, W, SP, SU) 5 credits
This course offers an introduction to the fundamentals of the Mandarin Chinese language with practice in listening, speaking and simplified Chinese characters. It also includes selected studies in Chinese culture. CHIN 101 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $6.00

CHIN 102 Elementary Chinese II (W, SP) 5 credits
CHIN 102 is a continuation of CHIN 101 with further development of listening and speaking skills. Course also focuses on writing skills and further study of Chinese culture. CHIN 102 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: CHIN 101 with a grade of “C” or better or by placement exam Lab fee: $6.00

CHIN 103 Elementary Chinese III (On Demand) 5 credits
CHIN 103 is a continuation of CHIN 102 with further development of listening and speaking skills. Some focus also is given to writing skills and further study of Chinese culture. CHIN 103 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: CHIN 102 with a grade of “C” or better or by placement exam Lab fee: $6.00

CHIN 104 Elementary Chinese IV (On Demand) 5 credits
CHIN 104 is a continuation of CHIN 103 with further development of listening and speaking skills. Some focus also is given to writing skills and further study of Chinese culture. CHIN 104 meets elective requirements in the Associate of Arts degree programs and transfer requirements in foreign languages and literature. 
Lecture: 5 hours – Lab: 0 hours
Prerequisite: CHIN 103 with a grade of “C” or better or by placement exam Lab fee: $6.00

Civil Engineering Technology (CIVL)

CIVL 120 Basic Construction Materials (A, W, SP, SU) 3 credits
A study of the properties, construction applications, standards, specifications and elementary material testing methods of soils, aggregates, asphalts, portland cement concrete, masonry, metals and woods. Laboratory exercises include basic common construction industry materials testing procedures and comparison of results to industry standards and specifications. 
Lecture: 2 hours – Lab: 3 hours
Prerequisite: MATH 102 or placement into a higher level mathematics course Lab fee: $20.00
CIVL 121 Heavy Construction Materials (W) 3 credits
A comprehensive study and application of the material testing methods of soils, aggregates, asphalt, and portland cement concrete required in the heavy construction industry. The laboratory exercises provide fundamental hands-on experience in preparation for the American Concrete Institute (ACI) Grade 1 Concrete Field Technician exam. Preparation in the ACI Grade 1 Contract Field Technician test is a course requirement.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIVL 120 Lab fee: $55.00

CIVL 123 Heavy Construction Drawings (A, W, SP) 3 credits
Reading and interpretation of construction drawings as related to highway and public works construction projects. Interpretation of the relationships of plans, elevations, sections and details, and the coordination with published specifications. A basic method of material quantity take-off will be explained.
Lecture: 2 hours – Lab: 3 hours Lab fee: $15.00

CIVL 125 Heavy Construction Methods (W, SP) 3 credits
A study of methods used to build horizontal projects, such as highways, dams, airports, bridges and utility lines. The various pieces of equipment and materials used in these type projects will be explained as well as the processes used.
Lecture: 2 hours – Lab: 3 hours Lab fee: $5.00

CIVL 221 Elementary Hydraulics (A, W) 3 credits
Course is a study of liquids at rest and in motion in enclosed conduits and open channels. The effects of static heat, velocity, pressure and friction in enclosed piping systems are analyzed. Principles of pump systems, pump station design and detailing are emphasized. Fundamentals of open channel flow, quantification of rainfall runoff and culvert design are introduced.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: MATH 104 or 112 Lab fee: $12.00

CIVL 222 Public Utility Systems (W) 3 credits
CIVL 223 is a study of the principles of public utility theory, planning, design and detailing. Emphasis is placed on applying current design standards and local and state regulations to the planning, design and plan preparation for sanitary collection systems, storm water management systems and water distribution systems. Detail plan preparation using CAD systems is also emphasized.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: CIVL 221 and 123 Lab fee: $12.00

CIVL 223 Public Utility Systems (W) 3 credits
CIVL 221 Elementary Hydraulics (A, W) 3 credits

CIVL 224 Heavy Construction Estimating (A, SU) 3 credits
Course is a comprehensive study of the topics associated with, and unique to, heavy/highway construction estimating. The major focus of the course will involve determining the cost factors of the equipment-intensive operations associated with heavy/highway construction. The secondary focus will be relating the equipment selection and cost factors to the labor requirements, materials’ price extensions, and time requirements as utilized in the model crew method of estimating.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: CIVL 123, CMGT 125 and CMGT 131 Lab fee: $9.00

CIVL 291 Field Experience (SU) 3 credits
Field Experience offers real-world, off-campus job/work experience in civil engineering, consulting engineering, or the surveying industry that augments formal education received in the technology. “N” credit will not be allowed for this course.
Lecture: 0 hours – Lab: 36 hours Lab fee: $5.00

CIVL 299 Special Topics in Civil Engineering Technology (On Demand) 1–5 credits
The study of special topics in civil engineering technology industry designed to meet specific needs.
Lecture: 1 hour – Lab: 1-15 hours
Prerequisite: Permission of instructor Lab fee: $10.00

Communication (COMM)
(Also see English, Technical Communication, and Theater)

Note: Courses taught at a distance (DL) may have a higher lab fee than traditionally taught courses.

COMM 105 Speech (A, W, SP, SU, DL) 3 credits
Emphasis is placed on both verbal and nonverbal communication techniques in public speaking. Individual presentations, including at least three major speeches, are required. The fundamental principles of interpersonal communications and small group discussion are introduced. Audio and/or videotaping of selected projects will occur.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 101 or 111 Lab fee: $1.00

COMM 110 Conference and Group Discussion (A, W, SP, SU) 3 credits
Through role play, discussion and participation, students will develop attitudes, skills and knowledge of methods necessary to effectively participate in discussion at conferences, in committees and in other small groups. This course is recommended as a substitute for COMM 105 in some technologies; check with academic advisor.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 101 or 111 Lab fee: $1.00

COMM 115 Oral Interpretation (A, W, SP, SU, DL) 3 credits
Students will read literature orally and listen critically. They will then practice techniques for presenting literature dramatically. The cultural and social functions of oral literature will be discussed. Emphasis will be placed on analyzing literary works, recognizing their emotional and dramatic values, and projecting those qualities through oral presentations. Writing assignments include response journals and short critical papers.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 101 or 111 Lab fee: $1.00

COMM 150 Video Art Production (A, W, SP) 5 credits
This course introduces students to the art of independent film and video through analysis of short films and production of digital video shorts. Students will analyze independent films and videos to develop a descriptive definition of video as a collaborative art form. Students will learn digital video photography, conversion of VHS to digital form, script writing, editing and post production in iMovie (Macintosh nonlinear editing software for nonprofessionals). Students will create short videos in selected genre, such as biographical narrative, the parody, or the community-interest documentary.
Lecture: 4 hours – Lab: 2 hours
Prerequisite: ENGL 102 or equivalent with a grade of “C” or higher required; COMM 245 Introduction to Film is recommended
Lab Fee: $25.00

COMM 200 Business Communications (A, W, SP, SU, DL) 3 credits
Emphasis is placed on principles of effective business writing. Students practice writing business letters and memos. A problem-solving or technical report related to the student’s area of concentration is required. Resume preparation and job search techniques are covered.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ENGL 102 or ENGL 111 with a grade of “C” or higher and at least two quarters (or equivalent) work experience in a technology
Lab fee: $5.00

COMM 202 Writing for Health and Human Services (A, W, SP, SU) 3 credits
Students specializing in human services and health care fields practice the kinds of writing essential to record keeping and research in their profes-
sions. Legal and ethical interdisciplinary communication is emphasized. Using practice and real-life cases, students write descriptions, summaries and evaluations. Job search techniques and letter, memo, and report formats are covered. A short research paper using APA documentation is required. This course may substitute for COMM 200 or COMM 204 in certain technologies; check with academic advisor.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: ENGL 102 or ENGL 111 with a grade of “C” or higher, enrollment in a technical program, and current clinical /field placement
Lab fee: $7.00

COMM 204 Technical Writing (A, W, SP, SU, DL) 3 credits
Students learn the principles of technical writing and practice the types of writing required of technicians, including letters, memos, and reports as required in a student’s technology. A problem-solving report is written. Resume preparation and job search techniques are covered. Oral reports using visual aids are required.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ENGL 102 or ENGL 111 with a grade of “C” or higher and at least two quarters (or equivalent) in the student’s technology
Lab fee: $5.00

COMM 206 Governmental Communications (On Demand) 3 credits
The course emphasizes the principles of effective writing practiced in government settings. The student learns to write various types of correspondence in a variety of formats, in addition to researching and writing a report adhering to specific guidelines. The student will also prepare selected components of a job application package.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or better
Lab fee: $7.00

COMM 207 Writing for the Web (A, W, SP, SU, DL) 3 credits
This course introduces students to the fundamentals of writing on the Web. It examines the stylistic and rhetorical dimensions of creating text for the Web, examines which combination of media should be employed to support text, and considers basic issues of design and usability, including how reading strategies on the WWW differ from reading strategies for paper documents.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Lab fee: $5.00

COMM 208 Communication for the Mass Media (W, SP) 3 credits
This course prepares students to communicate effectively with the mass media including newspapers, magazines, radio and television through press conferences, news releases, feature stories, research reports and statements. Students will prepare and present a portfolio that may include news and feature stories, brochures, flyers, research and other assignments completed for the course.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Corequisite: COMM 105 or equivalent is recommended
Lab fee: $7.00

COMM 220 Introduction to Mass Communication (A, W, SP, SU, DL) 5 credits
Students will become better consumers of news and other mass media through the study and discussion of the history, roles and impact of mass media in American society. Principal ethical, policy and legal questions confronting reporters and media are reviewed. Students are introduced to news writing, advertising and public relations techniques.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Lab fee: $1.00

COMM 245 Introduction to Film (A, W, SP, SU, DL) 5 credits
This course introduces students to cinema by analyzing the elements of film technique: literature, story, drama, editing, movement, acting, sound, photography, staging and theory. Film as a cultural product is also discussed. Class activities include critical viewing, discussion and writing assignments.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or higher
Lab fee: $7.00

COMM 250 Advanced Video Art Production (On Demand) 5 credits
This course is a continuation of COMM 150 Video Art Production. Students will further develop their skills in digital video photography, scriptwriting, editing, and post-production in iMovie. Students will create short videos in selected genres, such as the biographical narrative, the parody, or community-interest documentary.
Lecture: 4 hours – Lab: 2 hours
Prerequisite: COMM 150 and permission of the instructor
Lab fee: $25.00

COMM 297/298/299 Special Topics in Communication (On Demand) 1–5 credits
Lecture hours: Vary – Lab hours: Vary
Prerequisite: Varies

Computer Information Technology (CIT)

CIT 089 Introduction to FrontPage (W, SP, DL) 1 credit
This course introduces the student to Web page creation. The student will create a simple homepage using Microsoft FrontPage. Distance learning students are responsible for the required software.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: CIT 094
Lab fee: $10.00

CIT 092 Introduction to HTML (A, SU, DL) 1 credit
Learn the most important topics of HTML, including creating an HTML document; viewing an HTML file in a Web browser; working with text elements; inserting special characters, lines, and graphics; creating hypertext links; working with color and images; creating text and graphical tables; using tables to enhance page design; creating and working with frames; and, controlling the behavior of hyperlinks on a page with frames.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: None
Lab fee: $10.00

CIT 093 Project Management (W, SU) 1 credit
Learn to develop, plan, schedule, and chart project information, and balance workloads for people working on several projects at once, tracking all phases of the project to meet deadlines and stay on budget. Uses Microsoft approved text.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: None
Lab fee: $10.00

CIT 094 Web Learning Tools (A, W, SP, SU, DL) 1 credit
This one-credit-hour course provides students with an introduction to Blackboard and to the Internet. Students will learn how to use Blackboard, find information, and explore the World Wide Web. Not open to students who have taken CIT 139.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: None
Lab fee: $10.00

CIT 095 Computer File Management (A, W, SP, SU) 1 credit
This one-credit-hour course is an introductory course on the Windows operating system. The objective of the course is to teach fundamental skills in working with the desktop, drives, folders, files, and applications.
Not open to students who have taken CIT 121.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: None Lab fee: $10.00

CIT 100 Computer Literacy (A, W, SP, SU, DL) 1 credit
This one-credit-hour course provides students with an introduction to computer technology, computer hardware, and computer software.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: None Lab fee: $10.00

CIT 101 PC Applications I (A, W, SP, SU, DL) 3 credits
This course is designed to provide students an introduction to fundamental computer applications and technologies based on the International Computing Drivers’ License (ICDL). ICDL is an international standard for measuring competence in those essential computer skills necessary to work and community in today’s society. While the program is currently offered in more than 130 countries worldwide, the program is relatively new in the United States. Ohio is the first to create a state-wide focus on the ICDL program. The ICDL course includes 7 modules: 1. Concepts of Information Technology (IT); 2. Using the Computer and Managing Files; 3. Word Processing; 4. Spreadsheets; 5. Database; 6. Presentation; and 7. Information and Communication. This course is not designed for users with no familiarity with the computer. These computer users should take CIT 100 Computer Literacy before taking this course. Distance learning students are responsible for the required software.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: DEV 030 and completion of ENGL 100 or ESL 100, or placement into ENGL 101 or 111 Lab fee: $10.00

CIT 102A Word Integration (A, W, SP, SU, DL) 1 credit
Business-oriented features of Word such as merging letters, merging labels, page layout for newsletters, columns, object linking and embedding, outlines, and Web pages. Not open to students who have completed CIT 102.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: CIT 101 Lab fee: $10.00

CIT 102B PC Business Excel (A, W, SP, SU, DL) 1 credit
Business-oriented features of Excel such as lists, filters, pivot tables and charts, 3-D formulas, data validation, auditing tools, and IF functions. A bridge course designed to prepare students for CIT 231 Expert Excel. Not open to students who have completed CIT 102.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: CIT 101 Lab fee: $10.00

CIT 102C PC Business Access (A, W, SP, SU, DL) 1 credit
Business-oriented features of Access such as creating and manipulating forms and form data, creating and manipulating reports and report data, creating complex reports, relating tables, refining table design, using Access database tools, and integrating Access with other applications. This is a bridge course to prepare students for CIT 233 Expert Access. Not open to students who have completed CIT 102.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: CIT 101 Lab fee: $10.00

CIT 103 Computer Concepts and Logic (A, W, SP, SU) 3 credits
This course is an introduction to computer information systems, computer concepts, and programming logic. Along with general computing concepts, this course will cover command line interaction, file management, pro-
gramming logic using pseudo code, flowcharts, and VB.NET.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: MATH 102 and completion of ENGL 100, ESL 100, or placement into ENGL 101 Lab fee: $15.00

CIT 110 Unified Modeling Language (UML) (A, W, SP, SU) 3 credits
This course teaches all of the major UML diagram types and the basic notation involved in creating and deciphering them. Students will learn to read, draw, and use this visual modeling language to create clear and effective blueprints for software development projects.
Lecture: 2 hours - Lab: 3 hours
Prerequisites: CIT 103 Lab fee: $15.00

CIT 120 Foundations of Game Programming 1 (On Demand) 4 credits
This course introduces students to the rigorous field of interactive simulation and gaming. Students learn about the major components of modern simulations and games from both a design perspective and a technical perspective. Topics covered include: fundamentals of simulation / gaming, user interface design, human computer interaction, input/output paradigms, and an overview of simulation/game design process. Lab activities are designed to foster critical thinking and problem solving skills through the development of an understanding of the development process as well as interactive programming techniques through the creation of working interactive programs in a high-level programming language.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 103 or permission of instructor Lab fee: $30.00

CIT 121 PC Operating Systems (A, W, SP, SU) 3 credits
This course examines common operating systems, from the Windows family to Linux and MAC. The student will also learn how operating systems interact with networks and hardware. The content of this course is designed to help a student prepare for the software portion of the CompTIA A+ certification exam.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 103 Lab fee: $15.00

CIT 123 Workstation Installation/Configuration (A, W, SP) 3 credits
This course provides students with the necessary skills and knowledge to identify and perform tasks involved in supporting networks. The course is designed to prepare students to perform essential network administration tasks.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 103 Lab fee: $20.00

CIT 127 Structured Programming (On Demand) 4 credits
CIT 127 is an introduction to the software development process through a modern block-structured language. Computer problem solving and program debugging strategies, data abstraction, modularity, parameter passing, and elementary data structures are covered in this class. Fundamentals of linked lists, stacks, and queues are also introduced. Recursion, recursively-defined data structures, and tree structures will be discussed.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 120 Lab fee: $30.00

CIT 128 Concepts of 3D Graphics (On Demand) 4 credits
This course introduces students to concepts of 3D graphics, 3D modeling, and the mathematics necessary for 3D programming. Topics covered include: 3D model generation and texture generation, 3D trigonometric operations, 3D vector motion, and matrix transformations in 3-space. Lab activities focus upon creating textures & models and learning the mathematical principles that underlie the computer graphics field.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 120 Lab fee: $30.00
CIT 130 MIS II: Project Management Fundamentals (A, W, SP, SU) 3 credits
This course teaches the genesis of project management and its importance to improving the success of information technology projects. The student will demonstrate knowledge of project management terms and techniques such as the triple constraint of project management and the project life cycle using project management industry tools and techniques. This course satisfies PMI’s 35-hour education requirement to sit for the Project Management Professional (PMP) Exam.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: CIT 110  Lab fee: $15.00

CIT 137 Advanced Information Presentation (A, W, SP, SU) 3 credits
Learn how computer graphics are used to communicate information effectively. Computer lab assignments include chart format and data content. Students will learn how to create effective business presentations complete with graphs, organization charts, graphics, sound, movies, and Web links. Students will research a topic and develop presentations. Uses Microsoft approved text. Covers skil set for PowerPoint Expert certification.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 101  Lab fee: $15.00

CIT 139 Web Essentials (A, W, SP, SU, DL) 3 credits
Students will learn the dynamics of the Web environment and explore World Wide Web (WWW) sites. Hands-on experience using the Internet will be emphasized. The midterm and final examinations will be taken in the Testing Center at Columbus State.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 103  Lab fee: $10.00

CIT 145 HTML (A, SP, DL) 3 credits
This course provides an in-depth study of Hypertext Markup Language and its use in Web pages. Student will receive experience in TCP/IP, HTTP, and HTML in a Web server environment.
Lecture: 2 hours—Lab: 3 hours
Prerequisite: CIT 139

CIT 147 JavaScript Fundamentals (W, SU) 3 credits
This course provides an in-depth study of scripting languages that add interactivity to Web sites. Scripting languages such as JavaScript and pHp are extensions to hypertext markup language (html) that enable one to get data stored in Web page forms. With scripting languages, one may make intelligent Web pages that verify and calculate input and make presentation decisions based on said input. Students will be introduced to programming concepts to provide planning logic for programs.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 145  Lab fee: $15.00

CIT 150 Networking for Home and Small Business (On Demand) 4 credits
This course is designed to teach students the fundamentals of networking while gaining the skills needed to obtain entry-level home and small business network installation jobs. Students gain knowledge in networking theory and obtain hands-on experience in networking, PC configuration, Internet connectivity, wireless connectivity, and file/print sharing.
Lecture: 3 hours – Lab: 3 hours  Lab fee: $20.00

CIT 151 Networking 1 (A, W, SP, SU) 3 credits
CIT 151 is an introductory course to Local Area Networks (LANs). This course will explore the current technology available for LANs including both hardware and software.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 121  Lab fee: $15.00

CIT 152 Working at a Small-to-Medium Business (On Demand) 4 credits
This course is designed to teach students the basics of routing and remote access, addressing, and security. Students will gain hands-on experience with servers that provide e-mail services. Web spaces and authenticated access, network monitoring. Students will also learn troubleshooting skills as well as the necessary soft skills required for interacting with customers.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: CIT 150 with ‘C’ or higher  Lab fee: $20.00

CIT 154 Introducing Routing and Switching in the Enterprise (On Demand) 4 credits
This course is designed for students to learn the equipment applications and protocols installed in enterprise networks with an emphasis on switched networks, IP Telephony requirements and security. This course introduces advanced routing protocols such as Enhanced Interior Gateway Routing Protocol (EIGRP) and Open Shortest Path First (OSPF) Protocol. The hands-on exercises include configuration, installation and troubleshooting.
Lecture: 3 hours - Lab: 3 hours
Prerequisite: CIT 152 with ‘C’ or higher  Lab fee: $20.00

CIT 156 Designing and Supporting Communications Technology (On Demand) 4 credits
This course is designed for students to learn basic network design, how to gather user requirements, establish proof-of-concept, and perform project management tasks. Students learn lifecycle services such as system upgrades, competitive analysis and system integration.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: CIT 154 with ‘C’ or higher  Lab fee: $20.00

CIT 158 CISCO Certification Review (On Demand) 1 credit
This course is designed to help students prepare for either the Cisco CCENT (Cisco Certified Entry Networking Technician) or the CCNA (Cisco Certified Network Associate). Upon completion of either the CCNA Discovery Track or the CCNA Exploration Track students can prepare for a Cisco certification exam. This is a self-paced course in which students can study for a certification exam.
Lecture: 0 hours – Lab: 3 hours
Prerequisite: CIT 156 with ‘C’ or higher  Lab fee: $20.00

CIT 163 Visual Basic 1 (A, W, SP, SU, DL) 4 credits
CIT 163 emphasizes the essential aspects of creating the graphical user interface of a Visual Basic Windows program. The student also will learn fundamental aspects of coding a VB.NET program, along with more advanced topics such as manipulating MS Access databases, sequential file processing, error handling, and data validation. Software is provided to students.
Lecture: 2 hours – Lab: 5 hours
Prerequisite: CIT 103  Lab fee: $15.00

CIT 165 COBOL 1 (On Demand) 3 credits
This course is designed for students to learn basic network design, how to gather user requirements, establish proof-of-concept, and perform project management tasks. Students learn lifecycle services such as system upgrades, competitive analysis and system integration.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: CIT 152 with ‘C’ or higher  Lab fee: $20.00

CIT 167 C++ Programming 1 (A, W, SP, SU) 4 credits
This is an introductory course in ANSI-Standard C++ Language Programming. Lab problems are targeted towards writing programs with business applications. Computer lab projects will provide hands-on experience in developing programs with an ANSI-Standard C++ compiler environment.
Lecture: 2 hours – Lab: 5 hours
Prerequisite: CIT 103  Lab fee: $15.00

CIT 169 Java Programming 1 (A, SP) 3 credits
This course is an introduction to the art of computer programming in Java. Included are features needed to construct Java Applets, Java applications,
control structures, methods, arrays, character and string manipulation, graphics, and object-oriented programming.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 103 Lab fee: $15.00

CIT 171 Database Administration/SQL (A, SP) 4 credits
This course provides the student with the necessary skills and knowledge to identify and perform the tasks involved in implementing and managing databases on MS SQL Server.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: CIT 151 or CIT 173 Lab fee: $15.00

CIT 173 Database Programming (A, W, SP) 3 credits
This course presents an overview of Database Management Systems (DBMS) programming techniques and systems. The student will write programs using ORACLE.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 103 Lab fee: $20.00

CIT 175 Systems Analysis 1 (A, W, SP) 4 credits
CIT 175 is an introduction to the fundamentals of traditional and object systems analysis, design, and project management. Emphasis will be placed on the Systems Development Life Cycle (SDLC), various flow diagrams, system requirements, project scheduling and managing analysis, and design activities.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: CIT 103 Lab fee: $15.00

CIT 179 C# Programming I (A, W, SP, SU) 4 credits
This course provides an introduction to programming including the basic concepts of object-oriented programming. Students will learn about the C# programming language and how to write a C# program using methods, classes, selection and repetition and arrays.
Lecture: 2 hours – Labs: 4 hours
Prerequisites: CIT 103 Lab fee: $20.00

CIT 200 Certification Test Review (A, W, SP, SU) 1 credit
Students will review topical material to take an industry certification exam relevant to their field of study.
Lecture: 0 hours – Lab: 3 hours
Prerequisite: CIT 175 Lab fee: $10.00

CIT 206 Foundations of Gaming Programming 2 (On Demand) 4 credits
This class is a continuation of CIT 120 and is intended to further develop the student’s understanding of the simulation/gaming production and implementation process. Class activities are focused upon understanding of more advanced concepts and implementation techniques central to the game and simulation development process. Lab activities are focused upon the writing of simple, yet complete, interactive programs in a high-level programming language, like Java.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 120 Lab fee: $30.00

CIT 212 Web Database Development (W, SU) 3 credits
Databases are now an integral part of the Internet and many Web sites use databases in the background to control their content. This course shows how to design and use databases for the Web using MySQL and PHP. No previous knowledge of MySQL or PHP is required.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: CIT 145 Lab fee: $30.00

CIT 213 Designing an E-Commerce Website (A, SP) 3 credits
E-commerce has become a frequently used word in the area of business as the Web has become a popular way to sell to a larger market with less overhead. With a particular emphasis on consumer market, this course pushes not just the why, but also the practical application of creating a shopping cart. Students will learn how to create a usable e-commerce application from planning the application, designing the user interface and data store to implementing the entire application while taking into consideration the four fundamental marketing ingredients of product, price, place and promotion as informed by interactive media. MySQL database and PHP scripting language will be used to implement the e-commerce application. No previous knowledge of MySQL or PHP is required.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: CIT 212 Lab fee: $30.00

CIT 226 Digital Audio/Video Programming (On Demand) 3 credits
This course will explain the programming methods of how digital audio and video data are manipulated for use in a video game format, as well as teach students how to develop their own audio and video tools and filters.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: CIT 206 Lab fee: $30.00

CIT 227 Data Structures and Algorithms (On Demand) 4 credits
CIT 227 is an introduction to the software development process through a modern block-structured language. Computer program solving and program debugging strategies, data abstraction, modularity, parameter passing, and elementary data structures are discussed. Additional topics include fundamentals of linked lists, stacks, and queues. Recursion, recursively-defined data structures, and tree structures will be discussed.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 127 Lab fee: $30.00

CIT 228 Computer Graphics 1 (On Demand) 4 credits
This course is intended to provide a rigorous introduction to 2D and 3D computer graphics concepts, techniques, and algorithms. Topics covered may include point plotting, line drawing, clipping, sprite animation, optimization, projection, shading, transformations, and other topics. Lab activities will include programming projects in two and three dimensional graphics varying from simple to complex.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 128 Lab fee: $30.00

CIT 229 Computer Graphics 2 (On Demand) 4 credits
This class is a continuation of CIT228 and is intended to provide advanced mathematical concepts, techniques, and algorithms for 3D computer graphics. Topics covered may include texture mapping, curves and surfaces, image processing, alpha-blending, bump mapping, anti-aliasing, pixel-shaders, volumetric lighting, and other topics. Lab activities will include various programming projects using a modern 3D graphics API.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 228 Lab fee: $30.00

CIT 230 MIS III: Project Management Case Studies (A, W, SP, SU) 3 credits
Through the use of case studies, this course focuses on analyzing and implementing the concepts and techniques learned in the Project Management Fundamentals class.
Lecture: 2 hours - Lab: 3 hours
Prerequisites: CIT 130 Lab fee: $15.00

CIT 231 Expert Excel (A, SP, DL) 3 credits
Advanced features and formats in the spreadsheet application MS Excel. Uses Microsoft approved text. Covers skill set for Microsoft Expert certification. Distance learning students are responsible for the required software.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: CIT 102 or 102B and MATH 102 Lab fee: $15.00

CIT 233 Expert Access (A, W, SP, SU, DL) 3 credits
Course presents a continuation of CIT 102 presenting database software, including file creation, screen and report generators. Emphasis is placed on Macros, Switchboards, Dialog boxes and VB applications. Uses Microsoft approved text. Covers skill sets for Access Expert certification.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: CIT 102 or 102C and MATH 102
CIT 241 An Introduction to the Mainframe – z/OS Basics (On Demand) 4 credits
This course provides the background, knowledge, and skills necessary to begin using the basic facilities of a mainframe computer. Topics covered include: the mainframe in business today, including mainframe job roles; mainframe interfaces; Job Control Language; mainframe hardware and architecture; middleware for the mainframe, application programming on the mainframe; networking, and security topics. This course is designed for someone with prior programming experience or education.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 103, CIT 121 or permission of instructor
Lab fee: $30.00

CIT 242 An Introduction to the Mainframe – Large Scale Commercial Computing (On Demand) 4 credits
This course helps students gain an understanding of the reasons companies chose mainframe system to run (and grow) their large-scale computing environments. Topics include capacity, scalability, integrity and security, availability, access to large amounts of data, systems management and autonomic capabilities. This course is designed for someone with prior programming experience or education.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 241 or permission of instructor
Lab fee: $30.00

CIT 243 An Introduction to the Mainframe – Networking (On Demand) 4 credits
This course provides the background, knowledge, and skills necessary to begin using the basic communication facilities of a mainframe system. Students will be given a broad understanding of networking principles and the hardware and software components necessary to allow the mainframe to participate in a high volume data communications networks. Topics covered include: overview of the importance of the mainframe environment, TCP/IP, SNA, SNA/IP implementation on the mainframe, networking operations, security and problem determination.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 241 or permission of instructor
Lab fee: $30.00

CIT 244 An Introduction to the Mainframe – Security (On Demand) 4 credits
This course provides the background, knowledge, and skills necessary to begin using the basic security facilities of a mainframe system. Students will have a broad understanding of both the security principles and the hardware and software components needed to insure that the mainframe resources and environment are secure. Topics covered include elements of security, systems architecture and virtualization, cryptography, as well as security in operating systems, networks, middleware and applications.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 241 or permission of instructor
Lab fee: $30.00

CIT 245 Introduction to Game Prototyping and Development (On Demand) 4 credits
This course is the first of a 3 part sequence in which students put into practice all of the information and knowledge gained in the previous courses. Students are introduced to the XNA Game Studio Express and the XNA platform, which is designed for game developers to easily create video games for Windows and the Xbox 360 console.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: CIT 206, CIT 227, CIT 229
Lab fee: $30.00

CIT 246 Game Development Project – Part 1 (On Demand) 3 credits
This course is the second of a 3-part sequence in which students put into practice all of the information and knowledge gained in the previous courses. In this sequence the students first identify, then build, the necessary components for a full working 3D simulation/game engine. Lab activities focus upon designing and implementing simple simulations/games upon the XNA platform.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: CIT 245
Lab fee: $30.00

CIT 247 Game Development Project – Part 2 (On Demand) 3 credits
This course is the third of a 3-part sequence in which students put into practice all of the information and knowledge gained in the previous courses. In this sequence the students first identify, then build, the necessary components for a full working 3D simulation/game engine. Lab activities focus upon designing and implementing simple simulations/games upon the XNA platform.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: CIT 246
Lab fee: $30.00

CIT 250 Network Communication Systems (A, W, SP, SU, DL) 3 credits
Students will learn the fundamentals of data communication and computer networks. Course includes basic communication theory as applied to both digital and analog communication networks. Students will also learn the basics of the OSI layered network model and characteristics of the wide area and local area data communication networks.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 151
Lab fee: $10.00

CIT 251 Networking 2 (A, SP) 3 credits
Course is a continuation of CIT 151. Students will learn advanced local area network concepts and how they can be applied to support enterprise-wide information management of a large organization. The student will learn to install and configure a network using UNIX.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 151
Lab fee: $5.00

CIT 252 Enterprise Networking (W, SP) 4 credits
CIT 252 is a continuation of CIT 251. Students will learn to use the Microsoft Windows Server environment to support small and enterprise-wide information management systems. Students will complete a series of laboratory assignments using the Windows Server environment.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 251
Lab fee: $10.00

CIT 253 TCP/IP (A, SP, DL) 3 credits
This course demonstrates the concepts and analyzes the results using utilities provided by Windows. The course covers the aspects of TCP/IP such as history, client/server model, addressing, bridging, and routing/DHCP, Windows domains, and name services.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 252
Lab fee: $10.00

CIT 255 Server Administration I (A) 4 credits
Students will learn how to perform administration tasks using MS Windows networks. Elements include management of data storage, monitoring event logs, designing and administering Windows security model, and designing and developing a security needs analysis. The student will also utilize the client and server technologies used in designing and implementing Web services such as network address translators, proxy servers, firewalls, and Internet Information Services.
Lecture: 2 hours – Lab: 5 hours
Prerequisite: CIT 252
Lab fee: $10.00

CIT 257 Network Security (W) 3 credits
This course focuses on the underlying theory of computer security by covering topics such as e-security, cryptography, security architecture and management, laws and ethics, telecommunications, network and Internet security, risk assessment and auditing, and firewalls.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 255
Lab fee: $10.00

CIT 258 Wireless Networking (SP) 3 credits
This course is designed to provide students and network administrators with an in-depth knowledge of wireless LAN basics including IEEE
802.11, Wi-Fi, Bluetooth, WiMax technologies, encryption techniques, site surveys, securing, troubleshooting, monitoring, and managing wireless LANs, while preparing the students for CWNA certification.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 165 Lab fee: $15.00

CIT 269 Java Programming 2 (W, SU) 3 credits
This course is a continuation of Java Programming 1. More advanced work in Java applets, applications, structures, methods, and arrays will be included.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 169 Lab fee: $15.00

CIT 270 Advanced Web Programming (A, SP) 4 credits
This course focuses on using the Common Gateway Interface (CGI) and Active Server Pages (ASP) to create dynamic, interactive Web content. Both Perl and VBScrip are taught in this course. Although no prior experience with either programming language is required, students are expected to understand basic programming concepts. Practical, real-world lab exercises provide students with hands-on experience, including working with the Apache Web Server and Microsoft Internet Information Server (IIS).

Lecture: 2 hours – Lab: 5 hours
Prerequisite: CIT 147 Lab fee: $15.00

CIT 271 Data Mining and Warehousing (W, SU) 4 credits
This course provides students with the necessary skills and knowledge to design and develop relational databases and provides an introduction to data mining and data warehousing concepts.

Lecture: 2 hours – Lab: 6 hours
Prerequisite: CIT 171 Lab fee: $15.00

CIT 273 Database Systems (W, SU) 3 credits
CIT 273 presents an introduction to database systems in theory and application. Students will design and build databases using ORACLE.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 173 Lab fee: $20.00

CIT 276 Information Security Audit (On Demand) 3 credits
This course is designed for students, web developers, and network administrators who want to gain knowledge related to information and database security focusing on the areas of security, auditing, and implementation.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: CIT 259 Lab fee: $15.00

CIT 277 Computer Forensics (On Demand) 3 credits
This course is designed for students and systems administrators involved in responding to security incidents and applying computer forensics skills. This course focuses on the latest technologies in computer forensics techniques in order to recognize and respond to security threats.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 259 Lab fee: $25.00

CIT 278 Business Continuity and Disaster Recovery (On Demand) 3 credits
This course is designed for students and network administrators who need to obtain knowledge and experience for disaster recovery. This course will provide methods used to identify vulnerabilities and take appropriate countermeasures to prevent and mitigate failure risks for an organization. This course takes an enterprise-wide approach to developing a disaster recovery plan.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 276 Lab fee: $25.00
CIT 279 C# Programming II (A, W, SP, SU)  4 credits
This course provides a continuation of the basic concepts of object-oriented programming using the C# programming language. Students will learn more advanced programming using inheritance, exception handling, and controls. Students will also use files and streams for input and output.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: CIT 179   Lab fee: $20.00

CIT 280 ACP Examination (A, SP)  1 credit
Students will review topics covered in all previous technical courses. Students will be eligible to take the Associate Computer Professional (ACP) examination administered by the Institute for the Certification of Computer Professionals (ICCP). All software developer students in Computer Information Technology will take CIT 280 during their graduating quarter.
Lecture: 0 hours – Lab: 3 hours   Lab fee: $40.00

CIT 281 Capstone for Software Developer (A, SP)  5 credits
In this capstone course, software developer majors will work in assigned groups to convert a manual business process to a computer-based solution. Using project management techniques, students will design, present, and program their solution using a Web user interface and database technology. Emphasis will be placed on the ability to demonstrate technical expertise and software skills required for employment.
Lecture: 2 hours – Lab: 8 hours
Prerequisites: CIT 263 and CIT 275   Lab fee: $30.00

CIT 282 Capstone for Net Admin./User Support/Web Dev. (A, SP)  5 credits
This is the capstone course for the User Support, Networking Administrator, and Web Developer tracks. Students will work in small groups or individually to design and develop a typical business system. Students in the Software Developer track take CIT 281.
Lecture: 2 hours – Lab: 8 hours
Prerequisites: See table below.   Lab fee: $30.00

CIT 283 MIS Internship (On Demand)  3 credits
Supervised on-the-job application of knowledge and skills learned in the classroom.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: CIT 230   Lab fee: $15.00

CIT 290 CIT Seminar (On Demand)  1 credit
Supervised on-the-job application of knowledge and skills acquired in the classroom
Lecture: 1 hour – Lab: 0 hours
Prerequisites: Must be a Computer Information Technology major with GPA of a least 2.5; must have completed 12 hours in the technology or have permission of instructor.
Corequisites: CIT 299   Lab fee: $3.00

Special Topics in CIT
Special Topics in CIT is a series of courses specifically designed to meet the needs of the constantly changing business community and student population. Courses will be designed with the advice of the particular group requesting the course and approval by the department chairperson.
Lecture: 0 hours – Lab: 1–5 hours   Lab fee: $5.00

CIT 291 Special Topics in CIT 1 (On Demand)  1–5 credits
CIT 292 Special Topics in CIT 2 (On Demand)  1–5 credits
CIT 293 Special Topics in CIT 3 (On Demand)  1–5 credits
CIT 294 Special Topics in CIT 4 (On Demand)  1–5 credits
CIT 295 Special Topics in CIT 5 (On Demand)  1–5 credits
CIT 296 Special Topics in CIT 6 (On Demand)  1–5 credits

CIT 297 CIT Internship/Field Experience 1 (On Demand) 1 credit
The student works 12 hours per week in an activity that relates to the student’s occupational objective.
Lecture: 0 hours – Lab: 12 hours

CIT 298 CIT Internship/Field Experience 2 (On Demand) 2 credits
The student works 24 hours per week in an activity that relates to the student’s occupational objective.
Lecture: 0 hours – Lab: 24 hours

CIT 299 CIT Practicum (On Demand)  4 credits
The student works 28 hours per week in an activity that relates to the student’s occupational objective.
Lecture: 0 hours – Lab: 28 hours
Prerequisites: Computer Information Technology major with GPA of a least 2.5. Completion of 12 hours in technology or permission of instructor.
Corequisites: CIT 290   Lab fee: $3.00

Construction Management (CMGT)

CMGT 105 Construction Contract Documents (A, W, SP, SU, DL)  3 credits
Course offers a study of construction industry documents as they relate to a construction project. Emphasis is placed upon legal aspects of documents; roles of design professionals, contractors, and owners; utilization and effects of construction documents; procurement of construction services; assembly of a project manual; specifications formatting; drawing and specifications coordination; submittals and project closeout. Standard forms, ethics, bonding, CSI MasterFormat, and credentialing will also be examined.
Lecture: 2 hours – Lab: 3 hours   Lab fee: $5.00

CMGT 106 Supervision of Field Operations (W, SP)  3 credits
CMGT 106 presents an overview of the principles of construction industry field operations and supervision. Emphasis is placed upon field supervision, revealing the importance of and insights into the complex and responsible task of managing people. Various phases of proper management will be discussed such as understanding employee behavior, boosting productivity, communicating effectively with employees, ethics and professionalism, handling discipline problems, sexual harassment and discrimination, planning and organizing, making and implementing decisions, solving problems, reducing costs and improving safety.
Lecture: 2 hours – Lab: 3 hours   Lab fee: $4.00

CMGT 115 Building Construction Methods (A, W, SP, DL)  3 credits
This course is a presentation on the technical operations, methods, and operational sequences used in the construction of a modern commercial building. The content will be provided so that the student understands the sequence of construction operations in the field. Students will also understand the rationale for, and the sequential nature of, the building construction process.
Lecture: 2 hours – Lab: 3 hours   Lab fee: $3.00

211
CMGT 121 Building Construction Drawings (A, W, SP, SU, DL)  3 credits
CMGT 121 is a study of reading and interpreting building construction working drawings and project manuals, as related to residential, commercial and industrial construction. Emphasis is placed upon drawing organization; relationship of plan, section, and elevation; coordination of the drawings and specifications; shop drawings and submittals; graphic symbols and interpretation skills; and construction mathematics required for use in building drawings.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: MATH 102 or instructor permission  Lab fee: $20.00

CMGT 131 Construction Quantity Survey (A, W, SP, SU)  3 credits
This course develops a student’s use of construction math relative to linear, area, and volumetric measures of common construction materials. Also presented is how to compute and organize basic material quantities used in a building construction project, including those required for site preparation.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: CMGT 115, 121 or instructor permission  Lab fee: $15.00

CMGT 135 Safety and Loss Prevention (W, SP)  3 credits
CMGT 135 is an introduction to materials covering the expanding concerns of construction safety and loss prevention. Emphasis will be placed upon identification of work hazards and unsafe practices; supervisory safety and loss prevention techniques to minimize loss in productivity and resources; OSHA and Ohio BWC as safety resources; creation of a safety plan; the profitability of safety and loss prevention; and the creation and promotion of an ethical and pro-active safety culture in the construction workplace.
Lecture: 2 hours – Lab: 3 hours  Lab fee: $7.00

CMGT 141 Building Estimating (SP, SU)  3 credits
This course is a study of the current manual practices of estimating skills and methods utilized to create project estimates. Emphasis will be placed upon preparation of estimates for typical commercial building projects; incorporating drawing interpretation, quantity survey, and construction methods in estimate creation; and calculating the time, cost, and effort in the form of crew size for the various tasks involved with a construction project.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 131 or instructor permission  Lab fee: $9.00

CMGT 153 Residential Construction (A, SP, SU, DL)  3 credits
Class offers a presentation and overview of residential construction. Emphasis will be placed upon home construction methods and field operations, structural design elements, terminology, materials and equipment used, and an understanding of the sequential nature of the residential construction process.
Lecture: 2 hours – Lab: 3 hours  Lab fee: $2.00

CMGT 221 Managing a Construction Company (A, SP, SU)  3 credits
CMGT 221 gives students an overview of the operations and management of a construction firm. Emphasis is placed upon construction management firm organization, roles and responsibilities of construction industry participants, accounting and cash flow, analysis of general management techniques, and ethics and professionalism. Students will create a sound business plan in order to better understand what it takes to be successful in the construction industry.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: CMGT 105, 115, and 121 or instructor permission  Lab fee: $5.00

CMGT 231 Computer Estimating Buildings (W, SU)  3 credits
This course offers a comprehensive study of the skills required to “take-off” the amount of materials from a set of construction plans in an orderly manner and arrive at a final price utilizing computer software. The course develops the general background information and bidding strategies to be used for estimating a commercial construction project.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 131 or instructor permission  Lab fee: $20.00

CMGT 241 Planning and Scheduling (A, SU)  3 credits
CMGT 241 is a study of the management and coordination of construction projects utilizing systematic planning and scheduling. Local and global construction industry methods and techniques will be reviewed and practiced in simulated projects. Topics include WBS (Work Breakdown Structure), PDM (precedence diagram method), and the manual calculations involved with CPM (Critical Path Method) scheduling. The student will learn fundamental skills to develop, analyze, and manage construction projects utilizing several scheduling methods. Fundamental course work will be supplemented with the use of Primavera Project Planner (P3) software.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 131 or instructor permission  Lab fee: $10.00

CMGT 251 Construction Cost Controls (A, W)  3 credits
Course explores the various methods and techniques used by construction professionals for predicting and analyzing cost performance are presented. The student will learn how to implement cost reduction strategies, monitor field performance, and develop cost databases for estimating future work. This format will provide the student exposure to various types of schedules and projects, as well as assist in the understanding of the concepts and methods used for control and monitoring construction project progress.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 241  Lab fee: $10.00

CMGT 252 Construction Law (A, W)  3 credits
CMGT 252 presents an intensive study of the legal aspects and characteristics unique to the construction industry. Students review typical legal problems which arise in the day-to-day business of construction. Emphasis is placed upon the bidding process and laws; contracts, sub-contracts, and supply contracts; labor laws and issues, insurance and bonding; lien laws, dispute resolution, and remedies; and ethical behavior in the construction industry.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 105 or instructor permission  Lab fee: $5.00

CMGT 261 Project Management (W, SP)  3 credits
This capstone experience provides student the opportunity to demonstrate, present, and simulate methods and techniques used to obtain and manage a construction project. The methods and techniques studied include project marketing, obtaining financing, start-up, schedule development, control structures, organizational forms, subcontractor and vendor coordination, schedule adjustment, shop drawing coordination, move-out/shut-down phase, and correspondence and tracking techniques. Some computer simulations will be used to demonstrate project management activities and processes. Student teams are selected jointly by the students and approved by the instructor to prepare for and simulate the process of obtaining financing, marketing/sales, management and some field operational concerns by the project management teams. This information shall be organized by the teams and presented as if making a presentation to a potential customer as a final exercise for the course.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 251  Lab fee: $10.00

CMGT 281 Computer Estimating Residential (A, SP)  3 credits
This course offers a comprehensive study of the skills required to take-off the amount of materials from a set of residential construction plans in an orderly and effective manner and arrive at a cost for construction. The course will develop the general background information for the process of bidding/pricing a residential construction project utilizing estimating software.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CMGT 131 or instructor permission  Lab Fee: $20.00
**Dance (DANC)**

All studio classes are held at BalletMet Columbus, 322 Mount Vernon Ave.

**DANC 101 Classical Ballet I (A, W, SP)** 2 credits
Classical Ballet I presents the basics of this disciplined yet exquisitely moving form of art. Class covers fundamentals of classical ballet technique, coordination, strength and flexibility with an emphasis on proper execution and comprehension. Course is repeatable for up to 6 total credits.
Lecture: 1 hour – Lab: 2 hours Lab fee: $8.00

**DANC 102 Classical Ballet II (A, W, SP)** 2 credits
Classical Ballet II is a continuation of Classical Ballet I, following through on the development of basic skills and their incorporation into combinations of movements. Class is repeatable for up to 6 total credits.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: 6 hours of Ballet I or permission of instructor
Lab fee: $8.00

**DANC 110 Dance Appreciation (On Demand)** 2 credits
This class will explore dance as ritual, tradition, educational tool, popular entertainment, propaganda and art form as a reflection and function of culture. It will involve demonstration and teaching of a proper body warm-up, focusing on range of motion, cardiovascular preparation, body awareness, flexibility and strength. Course also covers experimental movement relating to topics of lecture that will involve movement in place and across the floor.
Lecture: 1 hour – Studio: 2 hours Lab fee: $8.00

**DANC 121 Beginning Tap I (A, W, SP)** 1 credit
Beginning Tap I introduces basic level tap dance techniques. Tap classes emphasize precession in sound, rhythm, movement, gesture and expression. Course is repeatable for up to 3 total credits.
Lecture: hours – Studio: 2 hours Lab fee: $8.00

**DANC 122 Beginning Tap II (A, W, SP)** 1 credit
Beginning Tap II continues with the fundamentals of tap, developed to include more complex movement combinations and interpretations. Emphasis is on quick and efficient learning skills. Course is repeatable for up to 3 total credits.
Lab: 2 hours
Prerequisite: 6 hours of Tap I or permission of instructor Lab fee: $8.00

**DANC 131 Beginning Jazz I (A, W, SP)** 1 credit
Jazz dance techniques at the beginning level. Jazz classes combine classic Broadway theatre dance with contemporary movement styles, elementary body part isolations, and basic combinations. Class is repeatable for up to 3 total credits.
Lab: 2 hours
Prerequisite: 6 hours of Jazz I or permission of instructor Lab fee: $8.00

**DANC 132 Beginning Jazz II (A, W, SP)** 1 credit
DANC 132 demonstrates additional jazz dance techniques and includes more complex movements, combinations and interpretations. Course is repeatable for up to 3 total credits.
Lab: 2 hours
Prerequisite: 6 hours of Jazz I or permission of instructor Lab fee: $8.00

**DANC 140 Modern Dance I (On Demand)** 2 credits
This is a beginning course in the movement and vocabulary, both physical and linguistic, of modern dance.
Lecture: 1 hour – Studio: 2 hours Lab fee: $8.00

**DANC 299 Special Topics in Dance (On Demand)** 1–5 credits
This course presents an examination of types and styles of dance other than those regularly offered.
Lecture: Varies – Lab: Varies Lab fee: $8.00

**Dental Hygiene (DHY)**

**DHY 101 Preventive Concepts I (A)** 1 credit
This 1-credit-hour course introduces students to the concepts of individualized oral hygiene instructions and topics related to patient education.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: Admission to Dental Hygiene Program

**DHY 102 Preventive Concepts II (W)** 1 credit
This 1-credit course introduces students to the concepts and principles on instrumentation.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: DHY 101

**DHY 103 Techniques I (SP)** 1.5 credits
This 1.5-hour lecture course is designed to expand the student’s knowledge of dental hygiene practice including ultrasonic instrumentation, care of implants and dental appliances, topical anesthetic, care of the special need patient (geriatric, pregnancy, pediatric) and product review.
Lecture: 1.5 hour – Lab: 0 hours
Prerequisite: DHY 110

**DHY 110 Introduction to Dental Hygiene (A)** 4 credits
This 4-hour course is designed to acquaint the dental hygiene student with the role of the dental hygienist and to provide background knowledge, information and the necessary foundation required for subsequent didactic and clinical dental hygiene course work.
Lecture: 3 hours – Lab: 1 hour
Prerequisite: Admission to Dental Hygiene Program Lab fee: $60.00
DHY 206 Techniques IV (W)  
1 credit  
This 1-hour lecture course is designed to introduce the foundational principles of enhanced therapeutics for periodontal therapy, instrument management, expanded functions, licensure requirements, and advanced computer technology enhancement for dental practices. Dental forensics and other emerging professional issues in dental hygiene will be discussed.  
Lecture: 1 hour – Lab: 0 hours  
Prerequisite: DHY 110

DHY 207 Techniques V (SP)  
1 credit  
This lecture course is designed to provide the student with knowledge of professional ethics, legal responsibilities of the dental hygienist, and the role of organized dental hygiene. In addition, office management skills, alternate practice settings and securing employment will be emphasized. The student will create a Dental Hygiene Portfolio including a prepared resume.  
Lecture: 1 hour – Lab: 0 hours  
Prerequisite: DHY 110

DHY 214 Dental Hygiene Treatment Planning (SP)  
0.5 credits  
This 0.5-credit course involves the study of theory on how to complete a total treatment plan for a patient based on individual needs using the ADPIE concept. Columbus State’s Smoking Cessation Program guidelines will be covered in this course.  
Lecture: 0 hours – Lab: 1.5 hour  
Prerequisite: DHY 110

DHY 215 Case Studies and Presentations (SP)  
0.5 credits  
This 0.5-credit-hour course provides the student with the opportunity to assess, plan, implement and evaluate a complete patient case study. The student will present a 30-minute oral report on each case study to the members of the Junior and Senior classes.  
Lecture: 0 hours – Lab: 1.5 hours  
Prerequisite: DHY 110

DHY 220 Dental Hygiene Clinic II (SU)  
4 credits  
This 4-credit, 12 contact-hour clinical course will provide ongoing experience in total patient care.  
Lecture: 0 hours – Lab: 12 hours  
Prerequisite: DHY 110  
Lab fee: $300.00

DHY 221 Dental Hygiene Clinic III (A)  
4 credits  
This 4-credit, 12 contact-hour clinical course builds upon previous clinical course work involving dental hygiene total patient care.  
Lecture: 0 hours – Lab: 12 hours  
Prerequisite: DHY 110  
Lab fee: $300.00

DHY 222 Dental Hygiene Clinic IV (W)  
4 credits  
This 4-credit, 12 contact-hour clinical course will provide ongoing experience in total patient care.  
Lecture: 0 hours – Lab: 12 hours  
Prerequisite: DHY 110  
Lab fee: $300.00

DHY 223 Dental Hygiene Clinic V (SP)  
4 credits  
This 4-credit, 12 contact-hour clinical course is the final course in the clinical dental hygiene sequence. It is designed to enable the student to incorporate all the techniques and treatment modalities previously acquired involving total patient care. Emphasis will be placed on refinement of treatment and professional decision making.  
Lecture: 0 hours – Lab: 12 hours  
Prerequisite: DHY 110  
Lab fee: $300.00

DHY 240 Dental Materials (SU)  
1 credit  
This 1-hour lecture course is designed to study the chemical, physical and biological properties of materials used in dentistry. Emphasis will be placed on the manipulation and utilization of materials that have application to the dental hygienist.  
Lecture: 1 hour – Lab: 0 hours  
Prerequisite: DHY 110
DHY 245 Dental Materials Laboratory (SU) 1 credit
This 3-hour laboratory course places emphasis on the manipulative techniques and practical application of various materials used in the practice of dentistry.
Lecture: 0 hours – Lab: 3 hours
Prerequisite: DHY 110 Lab fee: $150.00

DHY 250 Oral Histology (A) 1 credit
This 1-credit-hour course involves the study of tissues comprising the oral cavity, along with the embryonic development of these tissue and facial structures.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: DHY 110

DHY 251 Oral Pathology (SU) 3 credits
This 3-credit-hour course involves the study of oral pathology with emphasis placed upon the recognition of normal and abnormal conditions.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: DHY 110

DHY 252 Biostatistics and Research for the Dental Hygienist (SP, DL) 1 credit
This lecture course introduces the student to biostatistics, dental indices, and research methods in dentistry.
Lecture: 0 hours – Lab: 1.5 hours
Prerequisite: DHY 110

DHY 253 Oral Hygiene (W) 3 credits
This 3-credit-hour course for dental hygiene students is designed to place emphasis on the etiology, assessment, evaluation, classification, treatment, and maintenance of the periodontally involved dental patient.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: DHY 110

DHY 254 Dental Hygiene in Review (W) 0.5 credits
This 0.5-credit lab course is a comprehensive review of dental hygiene courses to aid students in the preparation for both clinical and written examinations for licensure.
Lecture: 0 hours – Lab: 1.5 hours
Prerequisite: DHY 110

DHY 255 Dental Pharmacology (A) 2 credits
This 2-hour lecture course surveys the drugs commonly encountered in the dental office. Emphasis is given to drugs and drug actions which can affect dental treatment.
Lecture: 2 hours – Lab: 0 hours
Prerequisite: DHY 110

DHY 256 Periodontology (W) 3 credits
This 3-hour lecture course is designed to place emphasis on the etiology, assessment, evaluation, classification, treatment and maintenance of the periodontally involved dental patient.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: DHY 110

DHY 257 Dental Hygiene in Review (W) 0.5 credits
This 0.5-credit lab course is a comprehensive review of dental hygiene courses to aid students in the preparation for both clinical and written examinations for licensure.
Lecture: 0 hours – Lab: 1.5 hours
Prerequisite: DHY 110

DHY 258 Biostatistics and Research for the Dental Hygienist (SP, DL) 1 credit
This lecture course introduces the student to biostatistics, dental indices, and research methods in dentistry.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: DHY 110

DHY 259 Community Dental Health I (SP) 1 credit
This 1-hour lecture course introduces the philosophy, techniques, attitudes, and behaviors necessary to promote oral disease prevention through organized community-based programs. The student will be responsible for completing and presenting an oral health prevention or health promotion lesson plan.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: DHY 110

DHY 260 Community Dental Health II (W) 2 credits
This 2-hour lecture course introduces the dental hygiene student to public health concepts and principles. The student will be introduced to their roles and responsibilities as a community health educator.
Lecture: 2 hours – Lab: 0 hours
Prerequisite: DHY 283

DHY 261 Community Dental Health III (SP) 1 credit
This course provides the dental hygiene student with the opportunity to apply the principles of community dental health in a practical setting.
Lecture: 0 hours – Lab: 3 hours
Prerequisite: DHY 284

DHY 262 Complete Dentures I (A, DL) 3 credits
This course involves an introduction to complete dentures and includes a study of the procedures from preliminary impressions through wax contouring, with special emphasis upon artificial tooth arrangement.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Acceptance into program

DHY 263 Complete Dentures II (W) 2 credits
This course is a continuation of the study of complete dentures and includes procedural material from flasking through patient remount and occlusal adjustments.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: Acceptance into program Lab Fee: $65.00

DHY 264 Complete Dentures III (SP) 3 credits
This course involves a study of procedures required to solve specific post insertion problems, e.g., repair, rebase, and reline. In addition, the student is introduced to the immediate denture technique.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program Lab fee: None

Dental Laboratory Technology (DENT)

DENT 101 Materials I (A) 3 credits
This course involves a comprehensive study of the chemical and physical properties of materials used by the dental technician.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Acceptance into program

DENT 111 Anatomy (A, DL) 3 credits
This course provides the student with an introduction to the masticatory system. The student will be exposed to the significant structures and landmarks of the oral cavity, with extensive study of the permanent dentition.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: Acceptance into program

DENT 121 Complete Dentures I (A, DL) 3 credits
This course involves an introduction to complete dentures and includes a study of the procedures from preliminary impressions through wax contouring, with special emphasis upon artificial tooth arrangement.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program Lab fee: $65.00

DENT 122 Complete Dentures II (W) 2 credits
This course is a continuation of the study of complete dentures and includes procedural material from flasking through patient remount and occlusal adjustments.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: Acceptance into program Lab Fee: $65.00

DENT 123 Complete Dentures III (SP) 3 credits
This course involves a study of procedures required to solve specific post insertion problems, e.g., repair, rebase, and reline. In addition, the student is introduced to the immediate denture technique.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program Lab fee: None
DENT 132 Occlusion (A,–DL) 3 credits
This course will entail a study of occlusal morphology, the temporomandibular joint, and mandibular movements.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 142 Removable Partial Dentures I (W) 3 credits
This course is a basic study of removable partial dentures and presents principles such as survey, design, and fabrication.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 143 Removable Partial Dentures II (SP) 2 credits
This course will involve an intensification of the study of survey, design and fabrication of removable partial dentures.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: Acceptance into program

DENT 153 Fixed Partial Dentures I (W, DL) 3 credits
This course will introduce the student to the fixed appliance. The content will be limited to the single unit crown.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 224 Complete Dentures IV (SU) 2 credits
In this course, the student will fabricate an overdenture and will concentrate upon characterization of complete dentures.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: Acceptance into program

DENT 244 Removable Partial Dentures III (SP) 3 credits
During this course, the student will apply acquired knowledge and skills by fabrication of removable partial dentures. The didactic portion will encompass specialized designs such as stressbreakers, precision attachments, and the RPI technique.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 256 Fixed Partial Dentures IV (SP) 3 credits
This course will involve a study of crown and bridge cases not covered previously, as well as the use of attachments. The student will construct multiple unit appliances and construct one-piece castings.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 275 Ceramics I (W, DL) 4 credits
This course is an introduction to dental ceramics and will involve a study of porcelain fused to metal restorations. The students will construct porcelain veneers and full-coverage single unit crowns.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: Acceptance into program

DENT 276 Ceramics II (SP) 3 credits
This unit will entail a continuation of the study of the porcelain fused to metal restoration. It will also include the study of the Maryland bridge and the porcelain jacket crown and other multiple unit appliances.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 285 Orthodontics (SP) 2 credits
This course provides a basic introduction to the laboratory skills necessary to provide services in the areas of orthodontics.
Lecture: 1 hour – Lab: 3 hours

DENT 296 Applied Laboratory I (SP) 3 credits
This course consists of laboratory and is intended to simulate a working laboratory. The student will fabricate fixed and removable appliances.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Acceptance into program

DENT 297 Applied Laboratory II (SU) 7 credits
This course consists entirely of laboratory and is intended to simulate a working laboratory situation with regard to work schedules, case flow, and coping with real problems.
Lecture: 1 hour – Lab: 18 hours
Prerequisite: Acceptance into program

Lab fee: $75.00

Developmental Education Department (DEV)

DEV 006 Basic Grammar Skills (A, W, SP, SU, DL) 2 credits
This course covers grammar skills including the correct use of verb tenses and forms; simple, compound, and complex sentences; fragments, run-ons and comma splices. Traditional and Web-based sections are available.
Lecture: 2 hours – Lab: 0 hours
Lab fee: $2.00

DEV 007 Basic Punctuation Skills (A, W, SP, SU, DL) 2 credits
This course covers punctuation skills including the correct use of commas, semicolons, quotation marks, apostrophes and other marks. Traditional and Web-based sections are available.
Lecture: 2 hours – Lab: 0 hours
Lab fee: $2.00

DEV 015 Spelling and Vocabulary (A, W, SP, SU) 3 credits
This course is designed to improve vocabulary and spelling skills through the use of memorization, phonics, the application of rules, and personal word lists.
Lecture: 3 hours – Lab: 0 hours
Lab fee: $2.00

DEV 028 Algebra Foundations (A, W, SP, SU) 3 credits
This course is designed for students who need special assistance to re-enter DEV 031 Pre-Algebra. The course is structured to develop students' critical thinking and problem solving in relation to basic algebra concepts. Methods of instruction will include collaborative activities, lecture and writing activities involving terminology, simplifying expressions, solving equations and signed number operations. In order to re-enter DEV 031, a C+ or higher in DEV 028 is required. The course is not open to students with credit for DEV 031 or higher.
Lecture: 3 hours – Lab: 0 hours
Lab fee: $3.00

DEV 030 Basic Mathematics (A, W, SP, SU, DL) 5 credits
Basic Mathematics offers a review of arithmetic concepts including whole numbers, fractions, decimals, percents, proportions, formulas and data interpretation. The course is structured to develop students' critical thinking, problem solving, math and study skills through collaborative activities, writing assignments, real-life applications, and the use of modern technology in the classroom. Traditional, Web-based and hybrid sections are available.
Prerequisite: By placement exam; this mastery learning course is not open to students with credit for DEV 031 or higher.
Lecture: 5 hours – Lab: 0 hours
Lab fee: $6.00

DEV 031 Pre-Algebra (A, W, SP, SU, DL) 5 credits
Pre-Algebra is designed for students who have no experience with algebra and for those who need to strengthen their abilities to work with algebraic mathematics. Topics include simplifying algebraic expressions, solving equations, working with exponents, formulas, signed number operations, monomial operations and application problems. This course will help to develop students' algebra and study skills and help them to perform successfully in MATH 101, MATH 102 and in the workplace. Traditional, Web-based and hybrid sections are available. This course is not open to students with credit for MATH 101, 102 or higher. Please note that students cannot take DEV 030 and DEV 031 concurrently.
Prerequisite: By placement exam or "C" or higher in DEV 030
Lecture: 5 hours – Lab: 0 hours
Lab fee: $6.00
Lecture: 1-5 hours – Lab: 0 hours

This course focuses on developing students’ basic reading skills. Students will practice strategies for improving reading rate and comprehension. Critical reading skills will be introduced through reading and responding to essays, keeping a journal and vocabulary notebook, and doing workbook activities. In order to re-enter DEV 044, a “C” or higher is required in DEV 040. This course is not open to students with credit for DEV 044.

Lecture: 4 hours – Lab: 2 hours Lab fee: $4.00.

DEV 041 Basic Communication Skills (A, W, SP, SU) 5 credits

This course combines elements of the writing process with the basic principles of writing clear, coherent, and well-developed paragraphs. Students will review rules of grammar usage and punctuation. Critical thinking skills will be developed through reading, class discussion and journal writing.

Prerequisite: By placement exam; not open to students with credit for any of the ENGL 100 series or higher.

Lecture: 4 hours – Lab: 2 hours Lab fee: $12.00

DEV 044 Critical Reading and Thinking (A, W, SP, SU) 3 credits

Critical Reading and Thinking is designed to help students develop higher-order reading skills that will help them become more effective and efficient readers. In this course, students will expand basic reading and critical thinking skills. A variety of reading disciplines will be used for discussion, reading, and writing assignments, and for projects that will allow students to critique their self-knowledge and evaluate ideas. The course is open to all Columbus State students.

Lecture: 3 hours – Lab: 0 hours Lab fee: $2.00

DEV 050 Career Life Planning (A, W, SP, SU) 3 credits

Career and Life Planning is designed to help students identify and examine their abilities, interests, values/ and personalities relative to educational and career choices. Upon completion of this course, a student will be able to develop a plan of action for gaining employment and/or pursuing a field of study that meets his or her personal needs. Traditional and Web-based sections are available.

Lecture: 3 hours – Lab: 0 hours Lab fee: $11.00.

DEV 090 College Success Skills (A, W, SP, SU) 2 credits

College Success provides students with skills necessary to be successful in their personal, academic and career-related pursuits. The course focuses on an orientation to the College, study skills, note-taking, test-taking and time management. This course is required of students who place in two Developmental Education courses. Traditional and Web-based sections are available.

Lecture: 2 hours – Lab: 0 hours Lab fee: $6.00

DEV 098 Special Topics in Developmental Education (On Demand) 1–5 credits

Students can explore special topics in developmental reading, writing, mathematics or related areas. This course is designed to meet special needs.

Lecture: 1-5 hours – Lab: 0 hours

Prerequisites: Will vary Lab fee: Will vary

DEV 099 Special Topics in Developmental Education (On Demand) 1–5 credits

Course provides an opportunity for study of special topics in developmental reading, writing, mathematics or related areas. This course is designed to meet special needs.

Lecture: 1-5 hours – Lab: 0 hours

Prerequisites: Will vary Lab fee: Will vary

Digital Design and Graphics (GRPH)

For all photography courses, see Digital Photography (FOTO).

GRPH 110 Survey of Digital Design (A, W, DL) 5 credits

This course provides an overview of the digital design and graphics industry. The student will be introduced to various areas and job opportunities in this field. A basic overview of the printing industry, graphic design, advertising and marketing communications will be discussed. Key terminology and related software used in this business will be reviewed. Laboratory time will be used for understanding basic skills.

Lecture: 5 hours

Prerequisites: None Lab fee: $10.00

GRPH 111 Black and White Photography 4 credits

(See Digital Photography FOTO 111.)

GRPH 112 Introduction to Computer Design (A, W, SP, SU, DL) 4 credits

This course introduces the student to the computer software program most widely used in the graphic communications field. A basic working knowledge of Adobe Photoshop, Adobe Illustrator, Adobe InDesign is the primary goal of this course. The student will learn these skills through basic project development.

Lecture: 3 hours Lab: 3 hours

Prerequisites: None Lab fee: $29.00

GRPH 113 Fundamentals of Layout and Storyboarding (A, SP) 4 credits

A storyboard is used by graphic artists, Web developers, and audio/video professionals to map out visually a series of actions and events. The storyboard graphically outlines in rough format how the project will appear in the final state. This course will introduce students to the fundamental skills in conceptualizing and developing coherent and compelling storyboards. Significant focus will be placed on learning how to communicate ideas into a logical layout that tells the story.

Lecture: 4 hours

Prerequisites: None Lab fee: $20.00

GRPH 114 Digital Photography 4 credits

(See Digital Photography FOTO 114.)

GRPH 115 Fundamentals of Illustration (A, SP) 4 credits

This course is an introduction to the basic techniques of visual communication. Significant focus will be placed on learning how to communicate ideas into a logical layout that tells the story. This course provides a study of basic sketching techniques used to create storyboards. Emphasis is placed on the human form, gestures, facial expressions, perspective, line, textures, contrast and composition.

Lecture: 4 hours

Prerequisites: None Lab fee: $15.00

GRPH 116 Introduction to Traditional Animation (W, SU) 4 credits

In this course, the student will be introduced to the animation process and will learn to adapt this process to various projects. Drawing techniques will be reviewed and practiced to develop the quality and imagination of the student’s project. The student will learn the importance of acquiring a large collection of reference material in many different subjects. This will help the student’s observation skills and creative thinking.

Lecture: 4 hours

Prerequisites: GRPH 113 and GRPH 115 Lab fee: $15.00

GRPH 122 Publishing with Adobe InDesign (W, SU, DL) 5 credits

This course will expand the students knowledge in Adobe InDesign, the most widely used desktop publishing programs in the digital design and graphics industry. By working on various projects, students will learn more
about the tools and menu options that will help them produce anything from small ads to multipage documents. Type face manipulation, color control and preparing a document for printing are also covered.

Lecture: 5 hours
Prerequisite: GRPH 112 Lab fee: $36.00

**GRPH 123 Electronic Publishing with InDesign II (A, W, DL)**

This course introduces students to electronic publishing software, specifically InDesign with typographical command sequences and manipulation applications. Special emphasis is placed on its use to generate and create professional quality publications, such as advertisements and newsletters.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: None Lab fee: $28.00

**GRPH 131 Advertising Design I (A, W, SP, DL)**

5 credits

This course provides the student with an understanding of how graphic design, advertising and marketing are used together to provide a client with effective visual communications to a specific target market. Elements of design, design philosophy, typography, marketing and color will be discussed in preparation for advertising campaign development. Verbal presentation is an important element in this course.

Lecture: 5 hours
Prerequisites: GRPH 112, GRPH 122 Lab fee: $25.00

**GRPH 150 Package Design I (A, W, SP, DL)**

5 credits

In this course, the student will learn the importance of the package design as an advertising element. Package structure and producing 2-D and 3-D comprehensive package designs will be stressed. An extensive study of required package elements and how to visually present that to the consumer will be discussed. Evaluating the creative process from concept to finished package and how this relates to the consumer is very important to the success of a package.

Lecture: 5 hours
Prerequisites: GRPH 113, FOTO 114, GRPH 131 Lab fee: $25.00

**GRPH 216 Advanced Traditional Animation (A, SP)**

4 credits

This course teaches students advanced skills and techniques to be applied to the development of animation sequences. The emphasis is on creating and developing characters and compositions that effectively support story telling. Topics include the creation of realistic and stylized character design, movement and interaction, as well as props, backgrounds, layout and effects.

Lecture: 4 hours
Prerequisites: GRPH 113, GRPH 115, and GRPH 116 Lab fee: $15.00

**GRPH 242 Media Color Management (A, W, SP, DL)**

5 credits

This course is an introduction to color and how color is perceived and managed across different devices and outputs. Techniques will be used to identify, examine, and measure color to ensure color quality. Students will develop an understanding and application of color theory, color perception, and color management for a color’s final destination.

Lecture: 5 hours
Prerequisites: GRPH 110 Lab fee: $25.00

**GRPH 243 Vector Illustration (A, SU, DL)**

5 credits

This course provides the student with a comprehensive knowledge of Adobe Illustrator. This software will enable the student to produce complex technical drawings, illustrations and creative typographic applications. Individual projects, team projects and project presentation are used for evaluation.

Lecture: 5 hours
Prerequisite: GRPH 112 Lab fee: $27.00.

**GRPH 251 Photoshop and Design I (A, W, SP, DL)**

5 credits

This course combines the fundamental skills introduced in preliminary courses with the new technologies of desktop scanning and separation. The course incorporates such topics as color separation and photographic manipulation. The software used in this course is Photoshop.

Lecture: 5 hours
Prerequisite: GRPH 112 Lab fee: $24.00

**GRPH 252 Digital Imaging II (A, SP)**

3 credits

Advanced Electronic Imaging Techniques are covered using Photoshop CS4. These techniques are commonly used with images that are going to be printed in a marketing piece. This course is geared toward those who want to learn every aspect of Photoshop and to learn the techniques that are used in the real work world.

Lecture: 2 hours – Labs: 3 hours
Prerequisites: None Lab fee: $ 24.00

**GRPH 254 Advanced Illustrator (A, SP)**

4 credits

This course is focused on advanced principles and applications of Adobe Illustrator, CS4. This course will focus on advanced tips and techniques while developing an understanding for design and creativity. Customizing your work environment to increase your illustration productivity will be reviewed. The study of the gradient mesh tools, advanced brush techniques and advanced vector illustration techniques will be major focus.

Lecture: 2 hours Lab: 4 hours
Prerequisite: GRPH 243 Lab fee: $25.00

**GRPH 258 Photojournalism (SP)**

4 credits

(See Digital Photography FOTO 265.)

**GRPH 260 Digital Design and Graphics Practicum (A, W, SP, SU)**

4 credits

This course provides supervised, on-the-job application of the knowledge and skills the student acquired in the classroom.

Lecture: 0 hours – Practicum: 28 clock hours for 4 credits
Prerequisites: Digital Design and Graphics major, with GPA of at least 2.5 and completion of 12 hours in the technology, or permission of instructor
Corequisite: GRPH 261 Lab fee: $3.00

**GRPH 261 Digital Design and Graphics Seminar (A, W, SP, SU)**

1 credit

This course offers an opportunity for supervised application of digital design and graphics knowledge to the specific area of internship.

Seminar: 1 hour – Lab: 0 hours
Prerequisites: Digital Design and Graphics major, with GPA of at least 2.5 and completion of 12 hours in the technology, or permission of instructor
Corequisite: GRPH 260 Lab fee: $3.00

**GRPH 262 Photoshop WOW! (A, SP)**

4 credits

This course will enlighten and inspire graphic designers, and illustrators. In this course the student will learn step-by-step methods for creating both commercial and fine-art images, with tips and techniques that will take their professional skills to a new level. The student will learn the most innovative techniques for creating and enhancing images, graphics and type, using layer styles, patterns, actions, gradients, custom tools, and other advanced features of Photoshop.

Lecture: 2 hours Lab: 4 hours
Prerequisites: GRPH 251 Lab fee: 25.00
GRPH 265 Character and Environment Design 4 credits
This course will teach students the importance of costume, personality, and story interactivity. Students will also learn to place characters into designed environments. This course will also emphasize professional applications, techniques, and quality. Advanced principles of 3D environment design, architecture and level design will be studied.
Lecture: 4 hours
Prerequisites: GRPH 216 Lab fee: $15.00

GRPH 270 Advanced Black and White Photography (SU) 4 credits
(See Digital Photography FOTO 150.)

GRPH 271 Studio Lighting (W) 4 credits
(See Digital Photography FOTO 220.)

GRPH 273 Advertising Design II (W, DL) 5 credits
This course provides a more extensive and in-depth study of the graphic design process. Using the knowledge students receive in GRPH 131, more complex advertising campaigns and formal presentation options will be emphasized. Individual project presentation and group presentations are a very important part of the business and this class. A class critique will follow each project.
Lecture: 5 hours – Lab: 0 hours
Prerequisites: GRPH 131 Lab fee: $25.00

GRPH 278 Photo Lab (A, W, SP, SU) 1 credit
(See Digital Photography FOTO 178.)

GRPH 281 Color Photography (A, SP) 4 credits
(See Digital Photography FOTO 160.)

GRPH 282 Digital Publishing II (A, SP, DL) 4 credits
This course will provide the student with a more comprehensive study of desktop publishing and how it applies to practical project work. This class will deal with issues that give the student an understanding of the processes involved in producing high-end graphic publications. This course uses QuarkXPress.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: GRPH 112, GRPH 122 Lab fee: $36.00

GRPH 284 Ad Agency I (AU, SP) 4 credits
This is a capstone course for the graphic designer, which provides the student with advanced graphic design techniques and project presentation practices. The student will learn how to produce elements of advertising campaigns in two and three dimensional form. This class will work in a simulated advertising agency environment to develop product advertising from marketing concepts to visual design applications. One formal team presentation is required for completion of this class.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: GRPH 122 and GRPH 243 or 251 Lab fee: $29.00

GRPH 288 Advanced Digital Photography (SP) 4 credits
(See Digital Photography FOTO 214.)

GRPH 291 Portfolio Development (W, SU, DL) 4 credits
In this course, the student will develop a traditional portfolio of his/her graphic design and photography work, as well as create a portfolio on CD. The student will develop a visually effective and informative resume. Learning proper presentation skills when showing the portfolio to prospective employers is a very important part of this class.
Lecture: 4 hours
Prerequisites: GRPH 113, GRPH 273, GRPH 284 Lab fee: $15.00

GRPH 292 Business of Design (A, SP) 4 credits
This course introduces students to the business and marketing practices needed, and commonly found, in professional design firms and in freelance design work. Emphasis will be placed on developing professional objectives based upon the financial, legal, organizational, promotional, interpersonal and ethical practices particular to design. This course is a research and business-planning course.
Lecture: 4 hours
Prerequisites: GRPH 110, GRPH 112, GRPH 122 and GRPH 131 Lab Fee: $3.00

GRPH 294 Business of Photography (DL) 3 credits
(See Digital Photography FOTO 290.)

GRPH 297/298/299 Special Topics in Digital Design and Graphics (On Demand) 1–4 credits
These courses provide an opportunity for detailed examination of a selected topic in digital design and graphics.
Lecture: 1 to 4 hours – Lab: 1 to 4 hours Lab fee: $28.00 per course

Digital Photography (FOTO)

FOTO 111 Black and White Photography (A, W, SP, SU) 4 credits
This course introduces students to the basic principles of continuous-tone photography, emphasizing a balance of technical, aesthetic, and business concerns including composition and lighting, as well as manipulative functions, operative settings, exposure, and focus control of cameras and enlargers. Students will also learn to develop film and produce industry acceptable contact sheets and prints. A 35 mm SLR film camera with manual setting capabilities is needed. This course is film-based.
Lecture: 2 hours Lab: 4 hours
Prerequisite: None Lab fee: $32.00

FOTO 112 Photoshop for Photographers (A, W, SP, SU, DL) 4 credits
This course familiarizes students with Photoshop and its relationship with digital photography as a business, design, and communication tool. The goal of this industry-based approach is to facilitate the integration of technical ability and visual problem solving skills in order to strengthen visual communication with the medium of digital photography. Students will need access to a version of Photoshop that best suits their needs.
Lecture: 3 hours Lab: 3 hours
Prerequisite: None Lab fee: $24.00

FOTO 113 Photoshop for Photographers II (On Demand, DL) 5 credits
This course introduces students to advanced principles of Photoshop as they relate to digital image editing and digital workflow. The goal of this course is to continue the integration of technical ability and creative visual problem-solving skills in order to strengthen visual communication and digital workflow skills. Students will need access to a version of Photoshop that best suits their needs.
Lecture: 5 hours
Prerequisite: FOTO 112 Lab fee: $24.00

FOTO 114 Introduction to Digital Photography (A, W, SP, SU) 4 credits
This course introduces students to the basic principles and applications of digital photography as a medium, a skill-set, and an integral part of today's digital literacy needs. Topics covered include capturing images using digital cameras while emphasizing the manipulation of camera controls, exposure, lighting, on-and-off camera flash, essential imaging tactics, digital workflow for photography, print, web and image storage and archival. Students are required to have a digital camera (point and shoot or DSLR).
Lecture: 3 hours – Lab: 3 hours
Prerequisite: None Lab fee: $15.00
FOTO 115 Digital Photography and Design (A, W, SU)  3 credits
This course introduces students to the basic to advanced principles of design as they relate to digital photography as a business, design and communication tool. The goal of this industry-based approach is to facilitate the integration of aesthetics and technical ability and visual problem solving skills in order to strengthen visual design and communication with the medium of digital photography. Students are required to have a digital camera (point and shoot or DSLR).
Lecture: 3 hours
Prerequisite: FOTO 114  Lab fee: $24.00

FOTO 116 Artistic Photography  3 credits
This course focuses on principles and concepts of digital photography as a conceptual-based product in the realm of art and the artist. The goal of this qualitative approach is to facilitate the integration of aesthetics and technical ability with visual problem solving skills in order to strengthen the “self” as artist and the product as art. In that “Deconstructionist Theory” seems to center around the idea that language and meaning are often inadequate in trying to convey the message or idea to communicate and in that the photographer is often not recognized as “artist” it is the objective to communicate visually and artistically, write with depth and meaning which can help strengthen visual communication with the medium of photography.
Lecture: 2 hours Lab: 2 hours
Prerequisite: FOTO 114  Lab fee: $24.00

FOTO 117 Digital Panoramic Photography (On Demand) 3 credits
This course covers the basic and advanced principles of digital panoramic photography. Students will learn the latest technological advances in panoramic digital photography. Students will learn how to control exposure, focus, and white balance when taking 5 to 30 pictures of a single scene (e.g., landscape, building, room interior) that will be stitched together digitally in a current image-editing software. Focus will be on visual communications of natural and urban landscapes in the context of commercial utilization for marketing or advertising material. Students are required to have a digital camera (point and shoot or DSLR).
Lecture: 3 hours
Prerequisite: FOTO 114  Lab fee: $24.00

FOTO 118 Real Estate Photography (On Demand) 3 credits
This course covers the basic through advanced principles of digital real estate photography as it is used for promotional flyers, brochures, magazine ads and Web sites. This course will cover all the techniques, skills, equipment and lighting needed to adequately document the interior and exterior of houses with minimal distortion and maximum marketing appeal. Students are required to have a digital camera (point and shoot or DSLR).
Lecture: 3 hours
Prerequisite: FOTO 114  Lab fee: $24.00

FOTO 119 Digital Infrared Photography (On Demand) 3 credits
This course introduces students to the basic principles of digital infrared photography as it is used for contemporary wedding portraiture and landscapes for client products, magazine ads and Web sites. This course covers all the techniques, skills and equipment students needed to use their existing digital camera to photograph infrared radiation. Students are required to have a digital camera (point and shoot or DSLR).
Lecture: 3 hours
Prerequisite: FOTO 114  Lab fee: $24.00

FOTO 120 PainterX for Photographers  4 credits
This course is focused on the principles and applications of Painter X as it relates to digital photography. Students will learn Painter X techniques by completing a series of skill-based projects and quizzes. Topics covered include; digital painting theory, image size and resolution, basic image editing control, tonal and color correction, retouching, digital painting, sharpening, blurring, filtering and other manipulation, as well as additional special effects techniques related to the digital photography industry. To develop a student’s technical ability and visual problem solving skills.
Lecture: 3 hours Lab: 3 hours  Lab fee: $24.00

FOTO 121 Lightroom for Photographers  3 credits
This course explores the importance of workflow management through the program Adobe Photoshop Lightroom. Students will learn effective file management and organization skills, editing and batch processing methods, the efficiency of building personal customized templates, editing and imaging large #scale photo shoots, and creating presentations and web galleries, along with compiling commercial print packages. Special attention will be paid to advanced composition techniques and image sequencing for marketing collateral and client proofing and presentations. This course will create a solid foundation of Photoshop Lightroom, which in conjunction with Photoshop CS3, is essential for streamlining the digital imaging process.
Lecture: 2 hours Lab: 2 hours  Lab fee: $24.00

FOTO 122 Landscape Photography (On Demand) 3 credits
This course is designed to provide students with a firm grounding in the digital photographic techniques and skills to create successful images of landscapes that could be used as stock photography or marketing and promotional materials for print or Web. Students will learn how to implement specific digital design elements and camera angles that aid in the digital translation of the three-dimensional world to two dimensions for display in print or on the Web. They also will explore the technical controls of the camera, from setting the hyper-focal distance to long, tripod-based exposures during the daytime, with reference to relevant theories to the work of recent and contemporary landscape photographers. Students are required to have a digital camera (point and shoot or DSLR).
Lecture: 3 hours
Prerequisite: FOTO 114  Lab fee: $15.00

FOTO 123 Aperture for Photography  3 credits
This course is focused on the principles and concepts that introduce students to Aperture. This is a powerful tool for organizing, adjusting, and distributing your digital photographs. This course will teach students to sort, group, and stack images just as you would on a traditional light table. Students will learn how Aperture complements Photoshop, and discover some amazing organizing, productivity, and presentation tools offered by Aperture that are not available within Photoshop which can help post-production techniques within the medium of photography.
Lecture: 3 hours  Lab fee: $18.00

FOTO 125 Night Photography (On Demand) 3 credits
This course introduces students to the principles of night photography using digital camera equipment. Students will learn effective motion control techniques, architectural documentation, light painting, and multiple exposure techniques commonly used in today’s commercial advertisements and promotional materials. Students will learn how to effectively use the law of reciprocity to create exposures that last up to a half an hour with minimal digital noise. Also covered will be many post-production alternatives which can refine the night-time digital capture. Students are required to have a digital camera (point and shoot or DSLR) and a tripod.
Lecture: 3 hours
Prerequisite: FOTO 111 or FOTO 114  Lab fee: $15.00

FOTO 130 Macro and Close-Up Photography (On Demand)  3 credits
This course introduces students to all the concepts, equipment and techniques related to macro and close-up photography as it relates to commercial photography applications such as advertisements and promotions for both print and Web. Students will learn the technical considerations involved in using their DSLR to capture the smallest details. Students will implement the core design and exposure theories in digital photography to capture the details of a smaller world. Working with close-up filters, extension tubes and bellows, students will achieve professional macro-photographed subjects. Students are required to have a digital...
FOTO 114 View Camera Photography (SP) 4 credits
This is an advanced photography class dealing with large format photography. The course focuses on the needs of industrial photographers who photograph workers on the job, machinery, industrial layout, prominent places in an industry, etc. These photographs are used in company publications or for ad campaigns. Industrial photography demands knowledge of the industry as well as its equipment. This requires the student to have access to a DSLR camera.
Lecture: 3 hours
Prerequisite: FOTO 114 Lab fee: $18.00

FOTO 214 Advanced Digital Photography (A, W, SP, SU) 5 credits
This course provides an in-depth look at the digital single lens reflex camera (DSLR), advanced digital shooting techniques in different lighting conditions, and digital workflow solutions with image editing software for taking full advantage of the DSLR’s range of capabilities. This course focuses on high resolution JPEG and RAW capture for photo-industry specific venues and outputs. A continuation of aesthetic and technical camera controls will be covered. This course assumes that the student has an understanding of basic digital photography and has access to a DSLR camera.
Lecture: 5 hours
Prerequisite: FOTO 114
Prerequisite: None Lab fee: $15.00

FOTO 220 Studio Lighting (A, W, SP) 4 credits
This course has an emphasis on lighting problem solving in relation to indoor studio lighting techniques and equipment for product photography. This course exposes the student to more extensive use of product lighting, lighting techniques and the Zone System of exposure with the use of digital camera systems. This course will introduce the concepts of lighting required for basic commercial product photography with emphasis on lighting products based upon surface qualities and shape. Additional emphasis will be on designing sets and advertising arrangements for print and Web. It is required that each student have a DSLR as well as a handheld incident light meter (analog or digital).
Lecture: 3 hours Lab: 3 hours
Prerequisite: FOTO 214 Lab fee: $28.00

FOTO 232 Industrial Photography (On Demand) 3 credits
This course introduces students to the techniques and concerns of industrial photography. The course focuses on the needs of industrial photographers who photograph workers on the job, machinery, industrial layout, prominent places in an industry, etc. These photographs are used in company publications or for ad campaigns. Industrial photography demands knowledge of the industry as well as its equipment. This requires the student to have access to a DSLR camera.
Lecture: 3 hours
Prerequisite: FOTO 114 Lab fee: $18.00

FOTO 250 View Camera Photography (SP) 4 credits
This is an advanced photography class dealing with large format photography. The student, using college-provided 4x5 equipment, explores the techniques used in large format film exposure, development, and printing. The emphasis is on discovering all of the benefits associated with a view camera in various aspects of the photographic field. Studio work outside of regular class time is required.
Lecture: 2 hours Lab: 4 hours
Corequisite: FOTO 178
Prerequisites: FOTO 150 Lab fee: $40.00

FOTO 260 Studio Portraiture (SP) 4 credits
The focus in this class will be upon advanced posing, lighting and background creation of the single subject and multiple-subject portraiture. Basic-to-advanced studio portrait lighting techniques and on-location (indoor and outdoor) portrait lighting techniques will be covered, in addition to on-camera flash fill techniques and portable strobe use. This course assumes that the student has an understanding of advanced digital photography and has access to a DSLR camera and a hand-held incident meter (analog or digital).
Lecture: 3 hours Lab: 3 hours
Prerequisites: FOTO 214 Lab fee: $40.00

FOTO 261 Environmental Portraiture 4 credits
The focus in this class will be upon basic posing, lighting and background creation of the single subject and multiple-subject portraiture. Basic-to-advanced portrait lighting techniques used on-location (both indoor and outdoor) will be covered, in addition to on-camera flash fill techniques, and portable strobe use. This course assumes that the student has an understanding of advanced digital photography and has access to a DSLR camera and an external flash unit. In this course, students will develop an advanced understanding of problems and solutions associated with creating expressive environmental portraits. Students will learn how to identify the assets and deficits found in any environment including available light, environment, and background. Students will work with light modifiers, flash-fill, and off camera flash to explore advantages offered by each.
Lecture: 3 hours Lab: 3 hours
Prerequisites: FOTO 214 Lab fee: $24.00

FOTO 265 Photjournalism (A, SP) 3 credits
This course provided an introduction to the principles and theories of photjournalism in the digital era. FOTO 265 will increase technical understanding of digital photography as a medium, enabling the student to document news worthy events with accuracy. The latest digital photographic techniques and technology will be employed throughout and the digital work output should be suitable for publication in newspapers, magazines, Web sites, company publications, brochures, pamphlets, announcements, circulars, folders, handouts, leaflets, throwaways, tracts, and digital slide-show presentations. This course will also cover media ethics, legal issues and the evolving technological impact of photjournalism. Student must have access to a DSLR camera.
Lecture: 3 hours
Prerequisites: FOTO 214 Lab fee: $18.00

FOTO 266 Photjournalism II (On Demand) 3 credits
This course presents advanced principles, concerns and theories of photjournalism in the digital era. This course will increase technical
understanding of digital photography as a medium, enabling the student to document newsworthy events with accuracy. This course provides continued experience in shooting, digital processing, production-based projects, and deadlines, using current digital technology paralleling the photojournalism industry. The latest digital photographic techniques will be employed throughout and the digital work output should be suitable for publication in a variety of media. This course will also cover media ethics, legal issues and the evolving technological impact of photojournalism. Students must have access to a DSLR camera.

Lecture: 3 hours
Prerequisites: FOTO 265  Lab fee: $18.00

**FOTO 279 Photoshop for Retouching**  4 credits
This course is focused on the principles using Photoshop for professional retouching as it relates to digital photography. Students will learn Photoshop retouching techniques by completing a series of skill-based projects and quizzes that cover basic to advanced topics of: digital imaging, image editing, tonal and color correction, retouching – glamour, single and multiple portraits, batch retouching, collage techniques, as well as additional special effects techniques related to the digital photography industry. The goal of this approach is to facilitate the integration of technical ability and visual problem solving skills with today’s industry recognized post-production program, Photoshop, to strengthen visual communication with the medium of photography.

Lecture: 3 hours Lab: 3 hours
Prerequisites: FOTO 112  Lab fee: $24.00

**FOTO 280 Photoshop Layers**  4 credits
This course is focused on the principles of the layers feature within Photoshop as it relates to digital photography. Students will learn the Photoshop layer techniques by completing a series of skill-based projects and quizzes that cover basic to advanced topics of: digital imaging, image editing, tonal and color correction, retouching, contrast masking, layer masks, collage techniques, as well as additional special effects techniques related to the digital photography industry. The goal of this approach is to facilitate the integration of technical ability and visual problem solving skills to strengthen visual communication with the medium of photography.

Lecture: 3 hours Lab: 3 hours
Prerequisites: FOTO 112  Lab fee: $24.00

**FOTO 290 Business of Photography (SP, DL)**  4 credits
This course introduces students to the business and marketing practices common in a professional photography business or in freelance photography work. Emphasis will be placed on developing professional objectives based upon careful consideration of the financial, legal, organizational, promotional, interpersonal and ethical practices particular to photography. This course is a research and business-planning course. No camera is needed.

Lecture: 4 hours
Prerequisite: None  Lab fee: $15.00

**FOTO 292 Digital Portfolio Development (SP)**  3 credits
This course is designed for digital photography majors to gain knowledge of photography portfolio book design and production as well as Web-hosted portfolio production as it relates to self-promotion for future clients, job placement, or pursuit of photography education at a four year university. Since the course is focused on the printed page and Web-posted portfolio to enhance the multi-medium delivery of any visual information, its potential applications are almost limitless. This course can provide groundwork for continued study and/or a career in digital photography or related industries.

Lecture: 3 hours
Prerequisites: FOTO 114 and FOTO 214  Lab fee: $15.00

**FOTO 294 Digital Photography Practicum**  4 credits
This practicum offers an opportunity for supervised, on-the-job application of knowledge and skills acquired in the classroom. Student must be a Digital Photography major with GPA of a least 2.5, who has completed 12 hours in the technology and has permission of the instructor.

Lecture: 0 hours Lab: 28 hours
Prerequisites: Corequisites: FOTO 295  Lab fee: $3.00

**FOTO 295 Digital Photography Seminar**  1 credit
This seminar offers an opportunity for supervised on-the-job application of knowledge and skills acquired in the classroom. Student must be a Digital Photography major with GPA of a least 2.5 who has completion of 12 hours in the technology and has the instructor’s permission.

Lecture: 0 hours Lab: 4 hours
Prerequisites: Corequisites: FOTO 294  Lab fee: $3.00

**FOTO 297 FOTO Field Studies ((On Demand))**  1–5 credits
This hands-on course introduces students to a range of natural and man-made subjects that can range from field trips to the local zoo to foreign lands to study the indigenous people of the area, landscapes and architecture. Students learn ways of visualizing and capturing outside subjects at various times of the day or year. Course topics include studying equipment, portable digital storage devices, and other materials necessary to create the best digital photographs in a field environment. Students go on field trips lasting a day or several days depending on the location and topic to be covered. Students are required to have a DSLR and are responsible for the cost of any entrance fees, travel and lodging (if needed) and meal expenses TBA. This course can be repeated.

Lecture: 1–5 hours
Prerequisite: TBA  Lab fee: $15.00

**FOTO 299 Special Topics in Digital Photography (On Demand)**  1–5 credits
This course is a detailed examination of a selected topic in Digital Photography. This course can be repeated.

Lecture: 1 to 5 hours
Prerequisite: TBA  Lab fee: $15.00

---

**Early Childhood Development (ECD)**

**ECD 101 Introduction to ECD (A, W, SP, SU)**  1 credit
This course presents an overview of the early childhood profession with an emphasis on developmentally appropriate practice. Students will be introduced to historical perspectives, philosophies, theories, trends and issues. Focus will be placed on professionalism.

Lecture: 1 hour
Prerequisite: Placement into ENGL 101  Lab fee: $4.00

**ECD 102 Introduction to CDA (W, SU)**  1 credit
This flex-term course focuses on the process to follow to earn the national Child Development Associate (CDA) credential. Students will study the history of the early childhood profession and discuss the role of professionals in this field. They will complete a written autobiography, a requirement for the CDA.

Lecture: 1 hour – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $4.00

**ECD 104 CDA Competencies (W, SU)**  1 credit
This flex-term course focuses on the processes to complete requirements to earn the national Child Development Associate (CDA) credential. Students will select a format for presenting their written competencies and required resource file. They will complete written assignments for CDA competency areas and collect samples for their resource file. Procedures for final steps to earn the CDA will be discussed.
ECD 105 Emotional Development (A, W, SP, SU) 3 credits
This course details the importance of individualizing early childhood practices to meet the needs of children in a manner which develops positive self-image and individual competence. The course explores the impact of a teacher’s self-image, values, and attitudes on the preschool classroom. Also looks at dimensions of self, antecedents of self-concept, relationship of feelings to self-concept, and teaching strategies and classroom arrangements that foster self-esteem. Finally, the class examines the use of positive communication skills for guidance of young children.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ECD 105
Corequisite: ECD 107 or 106
Lab fee: $12.00

ECD 108 Creative Curriculum (A, W, SP, SU) 3 credits
This course deals with the principles of creativity and its importance in the life of the young child. Focus is on the sequence of development in child’s use of creative materials. Techniques for creative arts and music will be explored, demonstrated and implemented. Students will develop and evaluate materials, objectives, and activities in these areas.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 105 and 106
Lab fee: $12.00

ECD 109 Language Experiences in Early Childhood Programs (A, W, SP, SU) 3 credits
This course includes theories and sequence of speech/language development, differentiating between normal and atypical language. Focus is on the teacher as facilitator of communication skill development, planning and implementing language arts activities, and selecting and using literature to enhance language development and provide emotional support. Literacy in young children is stimulated through interactive speech, listening, reading and print activities. Guidelines for establishing a literacy area in the classroom and working with parents also will be included.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 105, 106, 107, 108, PSY 261
Lab fee: $12.00

ECD 110 Infant-Toddler Curriculum (A, W, SP, SU) 3 credits
This course presents an overview of care giving for infants and toddlers in group settings. Programming for infants and toddlers is emphasized across developmental areas through appropriate routines, environment, and experiences. The role of staff and parent relationships is explored, and Ohio Child Care Licensing Rules are reviewed. This course is offered every quarter, with alternating day and evening class times.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 105, 106, 107, 108, PSY 261
Corequisite: ECD 181, ECD 191
Lab fee: $12.00

ECD 112 Physical Development Curriculum (A, SP) 3 credits
This course covers the theoretical foundations for a child’s physical and motor development. It includes assessing an individual child’s motor skills, sequence for the development of motor skills, perceptual-motor development, as well as implementing small and large motor activities in both indoor and outdoor settings. Health, nutrition, and safety education activities and discussion of childhood sexuality are part of this course.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 107 and PSY 261
Lab fee: $12.00

ECD 114 Cognitive Curriculum (W, SP, SU) 3 credits
This course explores the theoretical foundations behind a child’s cognitive development. Techniques for promoting concept development as well as focus on science and math activities for young children are part of the course. Emphasis is on planning activities which encourage questioning, probing, and problem-solving skills appropriate to individual developmental levels and learning styles. The course also includes studying the effects and use of television, computers and technology in settings for young children.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 108, PSY 261
Lab fee: $12.00

ECD 115 School Age Child Care (On Demand) 3 credits
This course will present principles that are important for developing and administering childcare programs for children in Kindergarten through Grade 5. Developmental characteristics of school-aged children will be reviewed and appropriate care, education, and guidance practices identified. Information regarding licensing regulations and parent involvement for school-age childcare programs in Ohio will be disseminated.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 105, 106, 107, 108
Lab fee: $12.00

ECD 120 Interpersonal Communications for Human Services (A, W, SP, SU) 3 credits
This participatory and interactive course teaches principles of interpersonal communication for individuals working in Human Services. It is structured on the premise that the most important resource individuals bring to a helping relationship is their ability to remain self-aware and to communicate honestly and directly. Also covered are managing anger, conflict resolution, and assertive behavior.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: ENGL 101
Lab fee: $12.00

ECD 151 ECD Media Resource I (A, W, SP, SU) 1 credit
This course will provide an overview and orientation to resources, equipment and materials available for creating learning activities and materials to be used with and by children. Students will have opportunities to practice safe, economical, and appropriate skills in creative ways.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: ECD 105 or permission of ECD coordinator
Lab fee: $12.00

ECD 152 ECD Media Resources II (A, W, SP, SU) 1 credit
This course will expand students’ opportunities to learn, implement, and evaluate appropriate materials and methods for creating learning activities for children. Emphasis will be on extensions of appropriate classroom activities and environments through the use of media materials.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: ECD 105 or permission of ECD coordinator
Lab fee: $12.00

ECD 181–285 ECD Seminars I-V (A, W, SP, SU) 1 credit
These seminars offer group discussion of experiences related to ECD field experiences and integration of theory and practice. Seminars are taken as corequisites with ECD Practicums I-V. Seminars focus on observing and recording children’s play and interactions, basic principles of guidance, and application of knowledge. Expectations, objectives and requirements build with each successive experience. Successful completion (“C” or
**Prerequisite:** Placement into ENGL 100  
Lab fee: $4.00

**ECD 191–295 ECD Practicums I-V (A, W, SP, SU)  1 credit**
These courses are an integral part of the ECD program, providing students with the opportunity to apply theory and practice under the guidance of early childhood professionals, who guide and assist in the evaluation of student performance. Students in the field for practicum are observed twice during the quarter by an assigned ECD faculty member. Successful completion with a “C” or better is a prerequisite for the next practicum.

**ECD 190 Activity Plan Seminar (A, W, SP, SU)  1 credit**
This seminar is required for ECD students who have received Prior Learning Assessment credit for Practicum and Seminars I. The class will focus on preparing written documentation of developmentally appropriate activities for preschool-aged children. Students will learn to write concepts, objectives, and procedures for developmentally appropriate activities, consistent with ECD program outcomes. Students will be observed in their work with children one time as a requirement for completing this class on a pass/fail basis.

**ECD 207 Guidance and Discipline in Early Childhood Programs (W, SP, SU)  3 credits**
This course is a study of social learning theories and the guidance of young children. Focus is on preventing problem behaviors and teaching desirable behavior through example, communication, and setting limits. Issues of child behavior and analyzing discipline problems will be discussed. Ways to resolve problem situations, change behavior, and develop moral reasoning are suggested. Strategies for helping children cope with stressful situations and for working with children in special circumstances are presented.

**ECD 208 Young Children with Special Needs (A, SP)  3 credits**
This course presents the rationale and skills necessary for educating and caring for young children with special needs in programs that are inclusive. It describes methods for identifying and assessing children.
Students will have opportunities to discuss their interactions with their inter-relationships in programs for young children and families. Students will analyze the components of the learning environment, and their interrelationships in programs for young children and families. They will plan to integrate theory and practice to facilitate learning and promote quality programming, guidance, health, and safety of pre-Kindergarten children.

ECD 210 Administration and Staff Dynamics (A, W, SP, SU) 3 credits
This course is an in-depth study of the dynamics of staff interaction in a setting for young children. Focus includes personnel rights and responsibilities, ethical implications of teaching, and team functioning. Problem-solving, professional growth and development, evaluation processes, and the legal requirements and responsibilities of Ohio Child Day Care Licensing procedures will be explored.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: ECD 206 and minimum of one year working in a childcare setting Lab fee: $12.00

ECD 212 Family Ecology (A, SP) 3 credits
ECD 212 views the family as an ecosystem and examines its inter-relationships with the environment (biophysical, psychosocial, and technological) through processes of perceiving, valuing, spacing, and deciding. Emphasis is placed on family organizations, family members, and their roles.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: ECD 120 and ECD 205 Lab fee: $12.00

ECD 221–230 Contemporary Issues in Early Childhood (SU) 1–5 credits
These courses will facilitate offerings of special topics related to ECD on an annual basis. Topics may include Children’s Literature, Diversity and Young Children, Intergenerational Care, Music and Movement, Fitness for Children, Nutrition, Sign Language, Leadership, Advocacy, etc. These topics may be for new students in ECD or meet requirements for Pre-K Associate Licensed teachers for renewal purposes.

Lecture: 1-5 hours – Lab: 0 hours
Prerequisite: ENGL 100 or permission of ECD coordinator Lab fee: $4.00 - $12.00

ECD 231 Phonics and the Structure of Language (SU) 5 credits
This course is designed to introduce students to the teaching of phonics and grammar in the context of reading, writing, and spelling. Students will learn basic terminology, apply this terminology to instruction, and develop an understanding of, and appreciation for, the structure and function of language elements. Teacher candidates must achieve a grade of “C” or better.

Prerequisites: ECD 287 and 297 Lab fee: $20.00

ECD 286 ECD Administration Seminar (A, W, SP, SU) 1 credit
This seminar provides opportunities for discussion and activities related to the ECD field experience and for the integration of theory and practice. Focus will be given to the program philosophy, qualifications and roles required to administer programs for young children, and to the planning required to meet the needs of staff, children, families, and the community. Establishing and maintaining sound fiscal practice also will be reviewed.

Lecture: 1 hour
Corequisite: ECD 296
Prerequisites: ECD 284, 294 Lab Fee: $4.00

ECD 287 Student Teaching Seminar (A, W, SP, SU) 2 credits
Students will have opportunities to discuss their interactions with young children, staff, and parents in their assigned practicum settings. Students will analyze the components of the learning environment, and their inter-relationships in programs for young children and families. They will plan to integrate theory and practice to facilitate learning and Students will have opportunities to discuss their interactions with young children, staff, and parents in their assigned practicum settings. Economics (ECON)

Students who enroll in economics courses must have placed in ENGL 101 and are encouraged to either have completed ENGL 101 or be enrolled in that course when scheduling an economics course.

ECON 100 Introduction to Economics (A, W, SP, SU, DL) 5 credits
This course is an issues-based introduction to basic economic concepts. Students will relate principles such as scarcity, opportunity cost, and markets to current events, including changes in the minimum wage, environmental controversies, and the actions of the Federal Reserve. A distance-learning (DL) version of Introduction to Economics is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: MATH 101 (or equivalent) and placement into ENGL 101 Lab fee: $5.00

ECON 200 Principles of Microeconomics (A, W, SP, SU, DL) 5 credits
This course introduces students to the economic decision-making of individuals and firms. Topics include scarcity, opportunity cost, supply and demand, consumer choice, elasticity, market structure, profit maximization, resource markets and international trade. A distance-learning (DL) version of Principles of Microeconomics is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical
to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: MATH 102 (or equivalent) and placement into ENGL 101
Lab fee: $5.00

ECON 240 Principles of Macroeconomics (A, W, SP, SU, DL) 5 credits
This course introduces students to economic decision-making at the aggregate level. Topics include national income analysis, the business cycle, inflation, unemployment, fiscal and monetary policies and objectives. A distance-learning (DL) version of Principles of Macroeconomics is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in ECON 200 and MATH 102 (or equivalent) and placement into ENGL 101
Lab fee: $5.00

ECON 267 Economics of War (A, W, SP, SU, DL) 5 credits
Economics of War is an intermediate composition course that extends and refines skills in writing (objective analysis, persuasive arguments, journalism pieces), oral and visual presentation, critical thinking by having students analyze, discuss, and write about various topics pertaining to the economics of war. An original research paper (based on an approved testable hypothesis) and presentation is also required. Assigned texts address the economics of war with respect to economic growth, debt, costs of a standing armed forces, costs of weapons of mass destruction and terrorism as well as how to write a hypothesis statement. Lecture: 5 hours – Lab: 0 hours
Prerequisites: ECON 240 and Completion of ENGL 102 or ENGL 111
Lab fee: $5.00

ECON 280 Intermediate Microeconomics (W, SP, SU, DL) 5 credits
Sophomore level microeconomics course investigating the theory of consumer behavior including indifference curve analysis and the construction demand curves; income and subsitution effects; income consumption curves; Engel curves; theory of the firm and derivation of all cost curves in short run and long run; factor price determination; dealing with uncertainty; general equilibrium and Edgeworth Box diagrams; and various pricing systems.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in ECON 200 and MATH 102 (or equivalent) and placement into ENGL 101
Lab fee: $5.00

ECON 290 Capstone Experience in Economics (On Demand) 3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have a special interest in continuing a baccalaureate degree program in economics. The course provides a basic introduction to economic research methodologies that students apply in researching a social science topic of interest. Course requirements include the assembly of a portfolio that covers the student’s academic career at Columbus State Community College, and participation in summative testing of academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.

Lecture: 2 hours – Lab: 2 hours
Prerequisites: Completion of A.A./A.S. core requirements and at least 75 hours toward the degree and five credit hours in economics
Lab fee: $5.00

ECON 293 Independent Study in Economics (On Demand) 1–5 credits
ECON 293 is an individual, student-structured course that examines a selected topic in economics through intensive reading or research. The independent study elective permits a student to pursue his/her interests within the context of a faculty-guided program.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisites: Permission of the instructor and the chairperson and one course in Economics
Lab fee: $5.00

ECON 299 Special Topics in Economics (On Demand) 1–5 credits
This course allows students to examine, in detail, selected topics of interest in economics.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Varies
Lab fee: $5.00

Education (EDUC)

EDUC 200 Educational Psychology (A, W, SP, SU) 5 credits
This course offers students interested in becoming teachers an opportunity to consider practical, education-related applications of basic introductory psychology concepts. Teaching and learning topics include effective teaching skills; classroom management; the cognitive, social, and emotional development of learners; learner diversity; teacher and student-centered instructional approaches; assessment of student learning; learning theories; creating optimal learning environments; student motivation; and the technology revolution in education. Methods may include interactive small group work, team presentations, educator communication skill-building exercises, and computer lab experiences including beginning training to use educational databases and Microsoft PowerPoint software. A distance-learning (DL) version of Educational Psychology is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Prerequisites: Placement into ENGL 101 and PSY 100 with a grade of “C” or better
Lecture: 5 hours
Lab fee: $5.00

EDUC 210 Introduction to Education (A, W, SP, SU) 5 credits
This course provides an introduction to the teaching profession with a focus on urban education. Candidates will learn how the historical, philosophical and sociological foundations of education as well as current cultural, economic and political forces impact urban schools through class discussion, inquiry and field experiences. Focusing on understanding themselves, understanding their students, and understanding the teaching profession, candidates work in urban community and school settings and critically reflect on their values, experiences and observations. Specifically, students will gain an educational policy and practice in Columbus City Schools.

Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lecture: 3 hours – Lab: 5 hours
Lab fee: $5.00

EDUC 220 Technology in Education (A, W, SP, SU) 5 credits
This course provides those entering the teaching profession with an understanding of how to effectively enhance modern education with various types of technology. Students will explore the benefits and challenges of using technology and develop the skills to choose and implement technologies that will improve learner understanding and retention. Teaching and learning topics include basic hardware configurations and troubleshooting, operating systems, file types, spreadsheets, presentation software, databases, word processing, audio-visual technologies, and online and distance-learning technologies. Students will be able to find reliable educational resources online and to understand intellectual property and copyright laws.

Prerequisites: EDUC 210 or PSY 200
Lecture: 5 hours
Lab fee: $5.00
EDUC 245 Children with Exceptionalities (A, W, SP, SU)  5 credits
This course is an introductory course that offers teachers, teaching assistants, and students interested in becoming teachers an opportunity to study both the characteristics of children with special needs and the educational practices and programs that work to meet these learners’ needs in inclusive settings. Course topics include causes, prevalence and assessment of specific exceptionalities; historic and current theories, issues, trends, legal rights, and responsibilities in special education; student placement and service options; teaching strategies, modifications, and accommodations; classroom organization and management; and professional and home-school collaboration for lifelong learning.
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lecture: 5 hours  Lab fee: $5.00

Electro-Mechanical Engineering Technology (EMEC)

For other related course descriptions, see Electronic Engineering Technology and Mechanical Engineering Technology.

EMEC 250 Motors and Controls (A, SP)  4 credits
This course presents a study in the basic elements of single-phase and three-phase AC motors and generators, DC motors and generators, transformers, motor controls, and motor protection (fuses and overloads). Students learn how to select, size, and wire three-phase motors and starters as well as do calculations related to sizing, horsepower, and efficiency.
Lecture: 3 hours – Lab: 3 hours  Lab fee: $15.00

EMEC 251 Controls and Control Logic (W, SU)  4 credits
This course is a study in the basic interface circuitry used in electromechanical controls. Students learn about solenoids, relays, ladder logic, ladder diagrams, and how to design and wire controls systems to meet a given set of criteria. Troubleshooting is emphasized at each step.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: EMEC 250  Lab fee: $15.00

EMEC 260 PLC Programming (AU, SP)  4 credits
EMEC 260 is an introduction to Programmable Logic Controllers (PLCs). Students gain knowledge and experience in programming the Allen-Bradley SLC 500 series of PLCs. Students are required to design, wire, and troubleshoot programs to meet a given set of criteria.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: EMEC 251  Lab fee: $20.00

Electronic Engineering Technology (EET)

The EET program is under revision. Please see your advisor for an updated Plan of Study or view the CSCC Web site for current information.

EET 105 Basic Electronic Systems (A, W, SP, SU)  5 credits
Every electrical or electronic device operates using either Direct Current (DC) or Alternating Current (AC) or both. This course is an introduction to DC and AC fundamentals, the systems that use them, and the basic sources of DC and AC electricity.
Lecture: 3.5 hours – Lab: 4.5 hours
Prerequisites: MATH 103 with a grade of “C” or higher, or placement in MATH 111 or higher, and PHYS 100 or high school physics within the last 5 years  Lab fee: $11.00

EET 110 EET Graphics (A, W, SP, SU)  3 credits
EET 110 is an introductory drawing course incorporating the use of instruments, instructions, and practice to produce quality schematics and diagrams using lettering, electronic, and electrical symbols. The student will be given an introduction to computer-aided drafting (CAD).
Lecture: 2 hour – Lab: 3 hours  Lab fee: $4.00

EET 115 Basic Digital Systems (A, W, SP, SU)  5 credits
A digital system is one that uses a precise sequence of discrete voltages, representing numbers or non-numeric symbols such as letters or icons, for input, processing, transmission, storage, or display. This course covers PDAs, cell phones, DVD players, GPS devices, laptops, MP3 players, PCs, and scores of others.
Lecture: 3.5 – Lab 4.5 hours
Prerequisites: EET 105  Lab fee: $11.00

EET 123 PC Tech Essentials I (A, W, SP, SU)  4 credits
The first course in a two-course curriculum based upon the knowledge domains required for the CompTIA A+ certification exam. This exam is vendor neutral and recognized worldwide in the Information Technology industry. The domains of the exam address the skills and responsibilities of computer service and support personnel.
Lecture: 3 hours - Lab: 3 hours
Prerequisites: MECH 112 or CIT 101

EET 125 Electronic Switching Systems (A, W, SP, SU)  5 credits
This course introduces operating characteristics and practical applications of electronic switching systems. It is designed to demonstrate actual systems used to control power. Practically all electronic systems require some form of power conversion. A typical application of a power supply is to convert utility AC voltage into regulated DC voltages required for electronic equipment. Switch mode power supplies can be classified into four types according to the form of input and output voltages: AC to DC (off-line power supply or a rectifier); DC to DC (voltage converter); AC to AC (frequency changer); and DC to AC (inverter). Systems which will be studied in the laboratory setting include Uninterruptible Power Supplies (UPS), Variable-frequency drives (VFD), Intelligent Charging Systems, and Switching-Mode Power Supplies (SMPS).
Lecture: 3.5 – Lab 4.5 hours
Prerequisite: EET 105  Lab fee: $11.00

EET 136 Introduction to Open Source (A, SP)  4 credits
This course introduces the Open Source systems and provides the knowledge necessary to use it and its tools productively each day.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: CIT 101, EET 115  Lab fee: $12.00

EET 143 PC Tech Essentials II (A, SP)  4 credits
This is the second course in a two-course curriculum based upon the knowledge domains required for the CompTIA A+ certification exam. This exam is vendor neutral and recognized worldwide in the Information Technology industry. The domains of the exam address the skills and responsibilities of computer service and support personnel.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: EET 123  Lab fee: $45.00

EET 146 Computer Network Communications Systems (A, W, SP, SU)  3 credits
This course is a computer networking course combining networking software and hardware. Topics include networking protocols and network configurations, circuit analysis of high-speed modems, packet-switching techniques, pulse code and pulse-width modulation techniques. Investigation of high-speed modern transmission lines, microwave transmission, and cellular radio are included. The lab emphasizes network component installations and making measurements on bit-error-rates, system noise, and analysis of error detection/correction codes, synchronous and asym-
EET 252 Microprocessors (W, SU)  
4 credits
EET 252 is an introduction to the fabrication of electronic circuits from assembly through testing. Course includes soldering/desoldering techniques, surface mount technology, printed circuit board design, testing techniques, documentation standards and repair/replacement of parts. Credit also can be earned by life experience or proficiency testing. See advisor for details.
Lecture: 2 hour – Lab: 3 hours  Lab fee: $12.00

EET 203 National Electrical Code (On Demand)  
4 credits
This course gives a brief description of each National Electrical Code article and discusses how to reference information in the code. Changes from the previous code and sample calculations are also covered. Not required for students in the Electronic Engineering Technology. Completion of this course does not guarantee eligibility to sit for any licensing examinations and may not meet electrical contractor or Electrical Safety Inspector refresher course requirements. Check with the College or the Ohio Department of Industrial Relations.
Lecture: 3 hours – Lab: 3 hours

EET 241 Electronic Devices II (W, SU)  
4 credits
This course covers the concepts of small signal voltage amplification of low and high frequencies, the concepts of negative and positive feedback, integrated circuit (IC) differential and operational amplifiers, and IC voltage regulation with emphasis on circuit analysis techniques. Computer solution of problems is stressed where practical.
Lecture: 4 hours – Lab: 0 hours
Prerequisite:  EET 125
Corequisite:  EET 242

EET 242 Electronic Devices II Lab (W, SU)  
2 credits
This course is designed to complement EET 241 by providing physical involvement with the various circuits studied therein. The student will construct the circuits presented in lecture, measure their parameters and compare experimental results with those computed from theory.
Lecture: 0 hours – Lab: 6 hours
Prerequisite:  EET 125
Corequisite:  EET 241  Lab fee: $9.00

EET 243 Digital Electronics II (A, SP)  
4 credits
EET 243 is a continuation of the study of digital electronics covering waveforms, the generation of pulses and study of related circuitry such as multivibrators and one shots. More complex and widely used digital devices such as counters, shift registers, memories, and multiplexers are also presented. The basic units of a computer (bus, ALU) are studied.
Lecture: 4 hours – Lab: 0 hours
Prerequisite:  EET 115
Corequisite:  EET 244

EET 244 Digital Electronics II Lab (A, SP)  
2 credits
This lab course, corequisite with the lecture course EET 243, gives the student an opportunity to learn and design complex and widely used digital devices. Switching and wave shaping circuits are built using IC chips. Different devices used in building a computer are introduced and employed in experiments.
Lecture: 0 hours – Lab: 6 hours
Prerequisite:  EET 115
Corequisite:  EET 243  Lab fee: $9.00

EET 252 Microprocessors (W, SU)  
4 credits
In this course, different building blocks of a microprocessor and their functions are introduced. Methods of data storage and programming of a microprocessor are studied. Use of a microprocessor as a controller and interfacing it to other devices are also studied. A Motorola 68HCII microprocessor is used throughout the course.
Lecture: 4 hours – Lab: 0 hours
Prerequisites:  EET 243, EET 244
Corequisite:  EET 253

EET 253 Microprocessor Lab (W, SU)  
2 credits
This lab course is the practical version of the corequisite lecture course EET 252. Different blocks of a microprocessor studied in lecture are used and experimented on in the lab course. Along with each lab, programming methods for different blocks of the microprocessor are introduced. The practical aspects of using the microprocessor as a controller for other devices are also explored. A 68HCII microprocessor is used.
Lecture: 0 hours – Lab: 6 hours
Prerequisites:  EET 243, EET 244
Corequisite:  EET 252  Lab fee: $9.00

EET 255 Instrumentation and Process Controls (W, SU)  
4 credits
This course presents the basic theories and specific methods of measurement of temperatures, pressure, liquid level, and other parameters which may be measured in industrial and scientific applications. The laboratory part of this course enables the student to gain experience with transducers. Major process control schemes as used in industry are covered along with conditions affecting response and stability of control systems.
Lecture: 2 hours – Lab: 6 hours
Prerequisites:  EET 115, EET 125  Lab fee: $10.00

EET 260 Capstone Experience in Electronic Engineering Technology (A, SP)  
4 credits
EET 260 is a Capstone course focusing on electronic systems. Students will master the skills related to the design, development, fabrication, troubleshooting, implementation and documentation of a system or systems relevant to emerging technologies. The course requirements include preparation of system requirements specifications, proposals, prototyping, troubleshooting, testing, and functional demonstration of a core project. The specific student core project will be based on current emerging technology.
Lecture: 3 hours – Lab: 2 hours
Prerequisites:  EET 241, EET 242, EET 243, EET 244
Lab fee: $9.00

Emergency Medical Services (EMS)

EMS 100 First Responder (SP)  
4 credits
This course is designed to teach the person (public safety officer or other), who arrives first at the scene of an accident, proper life saving procedures. In terms of emergency victim care, the first responder will provide what is needed until qualified emergency medical technicians arrive.
Lecture: 1 hour – Lab: 3 hours  Lab fee: $35.00

EMS 110 EMT–Basic (A, W, SP, SU)  
9.5 credits
This course provides a first phase of training in the career structure of the Emergency Medical Technician (EMT). The course covers all the knowledge and skills required for the state certification examination. Course includes 24 clock hours of clinical experience.
Lecture: 6 hours – Lab: 10 hours
Prerequisites: Placement into ENGL 100 and completed health record required PRIORITY TO registration  Lab fee: $200.00

EMS 111 EMT–Intermediate (A, W, SP, SU)  
11 credits
In-depth study of patient assessment, shock physiology, fluid and intravenous therapy is the direction of this course, and covers the knowledge
and skills required to take the state certification exam.
Lecture: 7 hours – Lab: 9 hours
Prerequisite: State Certified EMT–Basic and completed health record required PRIOR TO registration   Lab fee: $230.00

**EMS 121 Emergency Medical Services Systems (A)  3 credits**
This course deals with the history, development, organization, funding, and control of EMS. It will involve the student in current trends in EMS.
Lecture: 3 hours – Lab: 0 hours   Lab fee: $15.00

**EMS 123 Emergency Psychiatric Intervention (W)  3 credits**
This course deals with the EMT’s approach to victims exhibiting abnormal behavior and provides an in-depth look into methods of evaluation and management of people experiencing behavioral crises.
Lecture: 3 hours – Lab: 0 hours   Lab fee: $20.00

**EMS 125 Disaster Aid (SP)  3 credits**
This course will familiarize the EMT with disaster planning, community needs assessment, organization and control of a community disaster plan, and in developing testing procedures for this plan.
Lecture: 3 hours – Lab: 0 hours   Lab fee: $15.00

**EMS 128 Introduction to Rescue for the EMS Provider (SU 2nd Term)  3 credits**
This combination classroom and hands-on course provides a basic overview of the rescue process and the tools required for rescue as it relates to the EMS provider. The student will learn to effectively manage the initial stages of a rescue incident without becoming a victim themselves.
Lecture: 2 hours – Lab: 2 hours   Lab fee: $70.00

**EMS 130 River Rescue (SU 1st Term)  3 credits**
This course deals with rescuing victims from the water. It will include, but not be limited to, self-rescue, rescue from shore, boat-assisted rescues, rescue from boats and rappelling.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: Intermediate swimming ability   Lab fee: $30.00

**EMS 131 Special Topics for Paramedics (A)  3 credits**
In this course, the paramedic will be required to develop and present an in-depth study in an area of individual interest.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Permission of instructor   Lab fee: $50.00

**EMS 133 Ice and Cold Water Rescue (W)  2 credits**
This course deals with rescuing victims from ice covered and cold water, hypothermia and other related medical concerns.
Lecture: 2 hours – Lab: 0 hours   Lab fee: $40.00

**EMS 137 WMD for Emergency Responders (A, SP, SU)  2 credits**
The course includes basic safety issues for emergency responders and focuses on medical care of people exposed to WMD. Content reflects Department of Homeland Security mandatory training for emergency personnel.
Lecture: 2 hours – Lab: 0 hours   Lab fee: $30.00

**EMS 142 Vertical Rescue (SP)  2 credits**
This course is designed to present the fundamentals of rope rescue, using up-to-date equipment and techniques with a major emphasis on safety. Terminology, selection of proper equipment, essential knots, and current standards will be presented, as well as rope rescue systems and litter packaging. Practical application evolutions will include solving rescue problems and evaluating rope rescue systems and/or techniques. Course work includes rescue of the injured and/or stranded from ledges, cliffs, elevator shafts, etc.
Lecture: 1 hour – Lab: 3 hours   Lab fee: $40.00

**EMS 143 Search and Rescue (A)  2 credits**
This course includes the introduction to job responsibilities, philosophy and concepts of effective search and rescue management. It describes preplanning, resources, investigation, interviewing, determining urgency, subject behaviors, search strategy, area probability, base camp set up and management, briefing and debriefing. The course also introduces map and compass reading.
Lecture: 1 hour – Lab: 3 hours   Lab fee: $40.00

**EMS 144 Confined Space Rescue (SP)  2 credits**
This course is designed to present the learner with OSHA regulations and requirements. Also covered are confined space entry procedures to safely and properly perform a rescue from tanks, pipelines, manholes, caves, etc. The course will address necessary rescue shoring and tunneling equipment required for a confined space rescue.
Lecture: 1 hour – Lab: 3 hours
Prerequisite: EMS 142   Lab fee: $15.00

**EMS 201 Paramedic Preparation Course  4 credits**
This is the course prerequisite for the paramedic certification program. The student will study anatomy, physiology and pathophysiology as they relate to providing paramedic emergency care. The course will cover fluid and electrolyte balance, neuromuscular theory, cardiovascular, respiratory, immune and renal systems, infectious disease, and principles of pharmacology.
Lecture: 4 hours Lab: 0 hours
Prerequisite: EMS 110 or permission of instructor   Lab fee: $25.00

**EMS 211 EMT–Paramedic I (W, SU)  7 credits**
This course encompasses the training of the paramedic in the areas of role, triage and assessment of victims, care of the victim in the areas of shock, respiratory system, intravenous therapy and trauma, as well as principles of communications.
Lecture: 5 hours – Lab:4 hours
Prerequisites: State certified EMT–Basic; EMS 201, successful completion of the Health Occupations Basic Entrance Test and the pre-testing process, and completed health record.
Co-requisite: EMS 281 and EMS 291   Lab fee: $165.00

**EMS 212 EMT–Paramedic II (A, SP)  7 credits**
This course encompasses the training of the paramedic in the areas of cardiovascular, anaphylaxis, and the endocrine and nervous systems.
Lecture: 5 hours – Lab: 4 hours
Prerequisite: EMS 211, EMS 281, and EMS 291
Co-requisite: EMS 282 and EMS 292   Lab fee: $180.00

**EMS 213 EMT–P III (W, SU)  6 credits**
This course encompasses the training of the paramedic in the areas of central nervous system, musculoskeletal system, soft tissue injuries, obstetric and gynecologic emergencies, neonatal and pediatric emergencies, and rescue.
Lecture: 4 hours – Lab: 4 hours
Prerequisites: EMS 212, EMS 282, and EMS 292
Co-requisites: EMS 283 and 293   Lab fee: $165.00

**EMS 214 EMT–P IV (SP, A)  4 credits**
This course encompasses the training of the paramedic in the areas of trauma life support and major incident response, and the continuation of training in ob/gyn/neonatal, behavioral emergencies and rescue.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: EMS 213, EMS 283, EMS 293
Co-requisites: EMS 284 and EMS 294   Lab fee: $180.00

**EMS 265 12–Lead EKG Interpretation and Advanced Cardiac Treatment  3 credits**
This course will teach students to perform and interpret 12-lead EKGs. Students will also learn to integrate advanced cardiac assessment and
12-lead EKG interpretation into treatment plans for critical patients. 
Lecture: 2 hours – Lab: 2 hours 
Prerequisite: ACLS certification or equivalent experience 
Lab fee: $75.00

EMS 275 Critical Care Transport  
7 credits 
This course deals with the special needs of critical patients during transport, including the use of advanced equipment and procedures. The course is designed to prepare paramedics and nurses to function as members of a critical care transport team. (This is the UMBC CCEMT-P course.) 
Lecture: 6 hours – Lab: 3 hours 
Prerequisites: EMT–P or RN with 2 years experience; CPR, ACLS, Trauma Course, Pediatric Course documentation. 
Lab fee: $310.00 (includes $200.00 fee required by UMBC for certification)

EMS 281 Hospital Clinical I (W, SU)  
2 credits 
Hospital clinical observation and supervised experience, encompassing the didactic areas covered in EMS 211. 
Lecture: 0 hours – Lab: 5 hours 
Co-requisites: EMS 211 and 291 
Lab fee: $75.00

EMS 282 Hospital Clinical II (A, SP)  
2 credits 
Hospital clinical observation and supervised experience, encompassing the didactic areas covered in EMS 211 and EMS 212. 
Lecture: 0 hours – Lab: 5 hours 
Prerequisite: EMS 281 
Co-requisites: EMS 212 and 292 
Lab fee: $75.00

EMS 283 Hospital Clinical III (W, SU)  
2 credits 
Hospital clinical observation and supervised experience, encompassing the didactic areas covered in EMS 211, 212 and EMS 213. 
Lecture: 0 hours – Lab: 5 hours 
Prerequisite: EMS 282 
Co-requisites: EMS 213 and 293 
Lab fee: $75.00

EMS 284 Hospital Clinical IV (A, SP)  
2 credits 
Hospital clinical observation and supervised experience, encompassing the didactic areas covered in EMS 211, 212, 213 and EMS 214. 
Lecture: 0 hours – Lab: 5 hours 
Prerequisite: EMS 283 
Co-requisites: EMS 214 and 294 
Lab fee: $75.00

EMS 291 Field Clinical I (W, SU)  
1 credit 
This class offers field clinical observation and experience. 
Lecture: 0 hours – Lab: 5 hours 
Co-requisites: EMS 211, 281 
Lab fee: $125.00

EMS 292 Field Clinical II (A, SP)  
1 credit 
This class offers field clinical observation and experience. 
Lecture: 0 hours – Lab: 5 hours 
Prerequisites: EMS 211, 281 and 291 
Co-requisites: EMS 212 and 282 
Lab fee: $45.00

EMS 293 Field Clinical III (W, SU)  
2 credits 
This class offers field clinical observation and experience. 
Lecture: 0 hours – Lab: 10 hours 
Prerequisite: EMS 292 
Co-requisites: EMS 213 and 283 
Lab fee: $45.00

EMS 294 Field Clinical IV (A, SP)  
2 credits 
This class offers field clinical observation and experience. 
Lecture: 0 hours – Lab: 10 hours 
Prerequisite: EMS 293 
Co-requisites: EMS 214 and 284 
Lab fee: $65.00

EMS 295 Public Safety Services Instructor (W)  
6 credits 
This course is the Ohio curriculum required for current firefighters, EMS providers, or Registered Nurses (RNs) who wish to teach in Fire/EMS programs. 
Lecture: 5 hours – Lab: 2 hours 
Prerequisite: 5 years experience in careers listed above; written and skills pretesting according to O.A.C.

English (ENGL)

(See also Communication, Theater, and, Technical Communication)

Note: Courses taught at a distance (DL) may have a higher lab fee than traditionally taught courses.

ENGL 100 Language Development (A, W, SP, SU, DL)  
5 credits 
Students develop skills in reading and writing in preparation for ENGL 101 by analyzing the writing of students and professionals and by developing paragraphs and short essays using narration, description, exemplification and/or illustration. 
Lecture: 5 hours – Lab: 0 hours 
Prerequisite: DEV 041 with a grade of “C” or higher or placement by test. 
Credit will not count toward graduation in any degree program. 
Lab fee: $1.00

ENGL 101 Beginning Composition (A, W, SP, SU, DL)  
3 credits 
A continuation of ENGL 101, this course helps students refine and assess processes for critically reading, writing and responding to a variety of texts in order to compose clear, concise expository essays. This course, or its equivalent, is required for all degrees. 
Lecture: 3 hours – Lab: 0 hours 
Prerequisite: ENGL 100 with a grade of “C” or higher or placement by test 
Lab fee: $1.00

ENGL 102 Essay and Research (A, W, SP, SU, DL)  
3 credits 
A continuation of ENGL 101, this course helps students refine and assess processes for critically reading, writing and responding to a variety of texts, both traditional and nontraditional. The course includes instruction in research techniques and documentation of sources. 
Lecture: 3 hours – Lab: 0 hours 
Prerequisite: ENGL 101 with a grade of “C” or higher 
Lab fee: $1.00

ENGL 102A MLA/APA Documentation Module (On Demand) 
1 Credit 
Students develop skills in MLA/APA documentation format including quoting, paraphrasing, summarization, works cited, annotated bibliography and electronic sources. Students will complete several documentation exercises and a final exam testing their knowledge of MLA/APA documentation style. 
Lecture: 3 hours – Lab: 0 hours 
Prerequisite: ENGL 101 or transfer credit for ENGL 101 from another school 
Lab fee: $2.00

ENGL 111 English Composition (A, W, SP, SU, DL)  
5 credits 
An accelerated combination of ENGL 101 and 102, this course helps students develop, refine and assess processes for critically reading, writing and responding to a variety of texts, both traditional and nontraditional.

The course includes instruction in research techniques and documentation of sources. 
Lecture: 5 hours – Lab: 0 hours 
Prerequisite: Placement test score 
Lab fee: $1.00
ENGL 119 Tutoring for Literacy (A) 3 credits
Tutoring for Literacy is a methods course that instructs students in basic techniques for teaching reading and writing in community agencies that host programs designed to improve literacy in their respective environments. Students in this course participate in two hours of weekly classroom instruction and provide one-to-one tutoring with assigned agencies six hours per week.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: ENGL 101

ENGL 210 Creative Writing (A, W, SP, SU, DL) 3 credits
Students are introduced to the fundamental techniques of creative writing. Using peer group analysis and workshop techniques, students will develop short pieces in a variety of genres.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 101 or ENGL 111  Lab fee: $3.00

ENGL 215 Magazine Publication: Literary Criticism, Editing and Design (W) 3 credits
Through hands-on practice with Spring Street, students learn the processes and techniques involved in the production of a literary magazine.
Lecture: 1 hour – Lab: 4 hours
Prerequisites: ENGL 101 or ENGL 111 with a grade of “C” or higher and instructor’s permission.  Lab fee: $3.00

ENGL 220 Composition and Literature (A, W, SP, SU, DL) 3 credits
Composition and Literature is an intermediate writing course that focuses on producing expository and critical essays about major literary works and genres. Students are introduced to a variety of works by American and British authors, as well as works in translation in the process of analyzing and writing about them. This course is designed for A.A. and A.S. students transferring to colleges other than Ohio State.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or higher
Lab fee: $1.00

ENGL 225 Introduction to Fiction (SU, DL) 5 credits
The course is an intensive study of selected short stories and novels. Through critical reading, discussion and writing, students will become familiar with important themes and methodologies of fiction. In both short stories and novels, emphasis will be placed upon identifying and analyzing authors’ particular uses of the traditional elements of fiction (structure, setting, point of view, etc.) to develop plot and character.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or higher
Lab fee: $1.00

ENGL 235 Introduction to Poetry (SP, DL) 5 credits
This course will introduce students to the critical process of reading and responding to poetry from historical, cultural and gender-based perspectives. Emphasis will be upon traditional and nontraditional forms, as well as mainstream and marginalized writers. Students will become familiar with appropriate terminology; however, they also will learn to encounter the poem as a whole piece of written discourse between poet and reader. Students will, therefore, conduct an ongoing oral and written dialogue with the poet (Who is the speaker? Who is the audience? What is the purpose?) and the poem (What is the message?). Students will articulate, orally and in writing, their own ideas of interpretation based upon a close reading of the text and an informed perspective concerning the historical and cultural circumstances of its origin.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or better
Lab fee: $1.00

ENGL 240 Introduction to Science Fiction (A, DL) 3 credits
The historical roots and literary forms of science fiction are introduced. From their readings and viewing of films, students will write critiques, reports and research papers about science fiction as a literary genre.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or higher
Lab fee: $1.00

ENGL 250 Writing about the American Experience (A, W, SP, SU, DL) 5 credits
ENGL 250 is an intermediate writing course that extends and refines skills in expository and argumentative writing, critical reading and critical thinking.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Lab fee: $1.00

ENGL 251 The American Identity (A, W, SP, SU, DL) 5 credits
ENGL 251 is an intermediate writing course that extends and refines skills in expository and argumentative writing, critical reading and critical thinking.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Lab fee: $1.00

ENGL 252 Images of Men and Women (A, W, SP, SU, DL) 5 credits
ENGL 252 is an intermediate writing course that extends and refines skills in expository and argumentative writing, critical reading and critical thinking.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Lab fee: $1.00

ENGL 253 Regional American Writing (A, W, SP, SU, DL) 5 credits
ENGL 253 is an intermediate writing course that extends and refines skills in expository and argumentative writing, critical reading and critical thinking.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111
Lab fee: $1.00
and sexual orientation to stimulate writing and facilitate an awareness of the interplay among purpose, audience, content, structure and style. Students plan, draft and revise essays that represent a sophisticated application of expository skills and critical analysis. This course also refines skills in researching a topic, documenting sources, working collaboratively, and preparing and giving oral presentations.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 102 or ENGL 111 with a grade of “C” or higher. Not open to students who have credit for ENGL 250, 251, or 252.  
**Lab fee:** $1.00

**ENGL 254 The American Working-Class Identity (A, W, SP, SU)  
5 Credits**

The student will analyze, discuss, and write about major topics pertaining to the theme of working-class identity in the United States, and the way in which writers, artists, and the media have discovered, defined, celebrated, and criticized what it means to be American. The course addresses the issues of race, culture, ethnicity, disability, class, gender, and sexual orientation, and will stimulate writing and facilitate an awareness of the interplay among purpose, audience, content, structure, and style.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 102 or ENGL 111 with a grade of “C” or higher.

**ENGL 259 Survey of United States Literature to 1865 (A, SP)  
5 credits**

This course examines the works of major writers in U.S. literature from the pre-colonial period to 1865. Genres include essays, short fiction, drama, poetry and the novel. Course activities include reading, class discussion and writing assignments.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 260 Survey of Modern U.S. Literature (SU, DL)  
5 credits**

This course examines the works of major writers in U.S. literature from 1865 to the present with attention to revision of the canon. Genres include essays, short fiction, drama, poetry and the novel. Course activities include reading, class discussion and writing assignments.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 261 Survey of British Literature I (A, W)  
5 credits**

English 261 is a survey of canonical British literary works written before 1789. The course activities will include readings, class discussions and writing assignments.

**Prerequisites:** ENGL 250 or equivalent  
**Lecture:** 5 hours – **Lab:** 0 hours  
**Lab fee:** $1.00

**ENGL 262 Survey of British Literature II (SP, DL)  
5 credits**

Students will study selected master works of 19th and 20th century British literature. The course activities will include readings, class discussion and writing assignments.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 264 Introduction to Shakespeare (W, SU, DL)  
5 credits**

This course will examine representative works of Shakespeare, concentrating on a critical/analytical approach to both the plays and Elizabethan dramaturgy. Emphasis will be placed upon Renaissance/Elizabethan dramaturgy and conventions, upon language and style, upon the elements of history plays, comedies, romances, tragedies, and upon analyses of fundamental human experience.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 265 European Literature in Translation (On Demand)  
5 credits**

The course will examine the works of representative European writers and cultures to develop an appreciation of the international nature of literary subjects, themes and movements. Emphasis will be placed upon understanding the historical, philosophical and social contexts of the various cultures within which European Romanticism, Realism, Naturalism, Existentialism and modern movements developed.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 270 African–American Writers (A, W, SP, SU, DL)  
5 credits**

This course is a survey of Black American literature from 18th century beginnings to the present; it includes a study of slave narratives, folklore, drama, poetry and short fiction. Activities include reading and writing assignments, oral presentations, special performances, guest speakers and field trips.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 272 Introduction to Folklore (SU)  
5 credits**

This course looks at 1) oral folklore, e.g., proverbs, riddles, myths, motifs, legends, folktales; 2) customary folklore, e.g., superstitions, folk customs, folk festivals; and 3) material and folk traditions, e.g., folk foods, architecture, costumes. Course activities include field work, reading and writing assignments and a special project.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 274 Introduction to Non-Western Literatures (A, SP)  
5 credits**

This course introduces students to selected classic and modern literature of the non-Western world, including Asia, Africa, the Middle East and Latin America. Through several literary approaches, students will gain an understanding of the authors, the periods, and the cultures they represent and the various ways they have handled literary themes.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 276 Women in Literature (SP)  
5 credits**

This course explores the history and literature by and about women. The course uses a comparative approach to see how women have treated a variety of themes and how they have worked within the genres of fiction, nonfiction, poetry and drama. Discussions will consider the literature from the perspectives of gender, history, politics and culture. Writing assignments will include response journals, documented critical papers and essay examinations.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 278 The English Bible as Literature (A, W, SP)  
5 credits**

This course offers a literary approach to the Bible in English. Students read, in a modern English translation, much of the Old Testament and the New Testament, as well as parts of the Apocrypha. This is not a course in religion. The approach is literary, historical and cultural. The Bible is read as an anthology of writings composed, compiled, translated and edited over several centuries, by many individuals, and as a book that has had an enormous effect on our culture, art and civilization.

**Lecture:** 5 hours – **Lab:** 0 hours  
**Prerequisite:** ENGL 250 or equivalent  
**Lab fee:** $1.00

**ENGL 280 Publishing Practicum (SP)  
2 credits**

Students who have satisfactorily completed ENGL 215, or who have comparable training and experience from another context, learn magazine production techniques using Spring Street or another college publication as a production laboratory. This practicum may be repeated once and normally taken immediately after completing ENGL 215.

**Lecture:** 0 hours – **Lab:** 4 hours  
**Prerequisite:** ENGL 215 or instructor’s permission  
**Lab fee:** $3.00

**ENGL 281 Writing Fiction (A, W, SP, SU, DL)  
5 credits**

This course introduces students to the art and craft of writing fiction.
Emphasis is on the student's own work; however, students will also be required to study the works and writing processes of established writers, male and female, traditional and nontraditional, ancient and modern, and from diverse cultures. Students will keep a writer’s journal, respond critically to the works of other students, create and revise a final long work (or combination of shorter works) of at least 4,000 words by the end of the quarter. In addition, students will be required to participate in a public reading of their work at least once during the quarter. Course is repeatable to 10 credits.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 210 with a grade of “B” or better or permission of the instructor  Lab fee: $5.00

**ENGL 282 Writing Poetry (A, W, SP, SU, DL)**  5 credits

This course introduces students to the art and craft of writing poetry. Emphasis is on the student’s own work; however, students will also be required to study the works, writing processes, critical commentary on, and oral delivery of established poets, male and female, traditional and nontraditional, ancient and modern, and from diverse cultures. Students will keep a writer’s journal, respond critically to the works of other students, and create and revise a chapbook of 8-10 finished poems (12-20) pages by the end of the quarter. Students will present selected poems from the chapbook at a public reading. Course is repeatable to 10 credits.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 210 with a grade of “B” or better or permission of the instructor  Lab fee: $5.00

**ENGL 284 Writing Creative Nonfiction (A, W, SP, SU, DL)**  5 Credits

This course introduces students to the art and craft of writing creative nonfiction (feature writing, travel writing, memoirs, personal profiles, biographies, public relations, etc.). Emphasis is on the student’s own work; however, students will also be required to study the works, writing processes, critical commentary on, and oral delivery of established nonfiction writers, male and female, traditional and nontraditional, ancient and modern, and from diverse cultures. Students will keep a writer’s journal, respond critically to the works of other students, create and revise a complete longer work (or a combination of shorter pieces) of at least 3,000-4,000 words by the end of the quarter. Students will present a public reading of their work during the quarter. Course is repeatable to 10 credits.

Lecture: 5 hours – Lab: 5 hours
Prerequisite: ENGL 210 with a grade of “B” or better or permission of the instructor  Lab fee: $5.00

**ENGL 285 Writing to Publish (W, S, DL)**  5 credits

This course introduces students to procedures for preparing a manuscript for marketing and publication. Students select a work or works for publication from a genre (fiction, poetry, drama, literary nonfiction), submit manuscripts for peer review at least three times during the quarter, and revise and edit their work throughout the quarter. Students research a market for their work, write the appropriate query or cover letter, and prepare the manuscript for submission. Since length requirements for manuscripts vary according to genre and target market, the instructor will determine the length requirement for successful completion of the course. The final exam for the course is a completed and corrected manuscript package ready for mailing. Students also will have the opportunity to give a public performance of their work. Course is repeatable to 15 credits.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 281, ENGL 282, THEA 283, or ENGL 284 with a “B” or better or permission of the instructor  Lab fee: $5.00

**ENGL 290 Capstone Experience in English (On Demand)**  3 credits

ENGL 290 is a capstone course focusing on English. Paradigms and their underlying assumptions will be explored. Students will work on developing research techniques and methodologies. Students will apply these techniques to a project of their own design, complete a personal portfolio covering their studies at Columbus State and participate in a summative testing of their academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: 75 hours completed toward the degree, including 10 credits in ENGL courses beyond ENGL 220 (or equivalent)  Lab fee: $5.00

**ENGL 297/298/299 Special Topics in English (On Demand)**  1–5 Credits

These courses offer special topics in English language or literature designed to meet specific needs.

Lecture: Hours vary– Lab: Hours vary
Prerequisite: Varies

**Engineering Technologies (ENGT)**

See page 116.

**English as a Second Language (ESL)**

**ESL 044 Fiction for Non-Native Readers (A, W, SP)  4 credits**

This course gives ESL students an opportunity to read various authentic (unedited) literary works in English including short stories, plays and short novels. Students will explore the plot, settings, structures and character development. Students will build vocabulary as well as analyze cultural settings. Analysis will come through journals, presentations, group discussions and class discussions. Credit will not count toward graduation in any degree program.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: ESL 099 or placement into ESL 100  Lab fee: $4.00

**ESL 087 College Vocabulary 1 (A, W, SP)  2 credits**

College Vocabulary 1 is the first in a series of three courses based on the Academic Word List. Students are exposed to academic readings which embed the target vocabulary. Through various oral and written exercises, students work with the vocabulary. Students employ study skills such as vocabulary journals, dictionary use and context clues.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Placement into ESL 097  Lab fee: $6.00

**ESL 088 College Vocabulary 2 (A, W, SP)  2 credits**

College Vocabulary 2 is the second level of the series. Students are introduced to 200 more words from the Academic Word List. Oral and written exercises are used foster mastery of the words.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Placement into ESL 097  Lab fee: $6.00

**ESL 089 College Vocabulary 3 (A, W, SP)  2 credits**

College Vocabulary 3 is the final course of the series. 200 new academic vocabulary words are targeted, with the same study methods employed as in the previous two classes. Vocabulary journals are required.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Placement into ESL 097  Lab fee: $6.00

**ESL 090 Critical Skills for College Success (On Demand) 3 credits**

This course prepares non-native students to achieve their academic goals at a U.S. college or university. They will examine U.S. classroom procedures, professor-student interaction, thinking styles and learning styles. They will also be trained in techniques for effective reading, writing and critical thinking in a variety of academic fields. Students will demonstrate these techniques through the completion of mini-projects derived from a variety of courses currently offered at Columbus State. Students’ final project will be derived from an entry-level course in their chosen field of study. Credit will not count toward graduation in any degree program.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: ESL 099 or placement into ESL 100  Lab fee: $3.00
ESL 092 Basic Oral Communication (A, W, SP, SU) 3 credits
This course will introduce students to the American sound system and quickly expand their working oral vocabulary. It also will equip students to perform vital language-based functions on campus and in the community. The course will be based upon daily classroom participation and the satisfactory completion of each language function. Credit will not count toward graduation in any degree program.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: Placement into ESL 097 Lab fee: $3.00

ESL 093 Intermediate Oral Communication (A, W, SP, SU) 3 credits
This course will help students to increase their effectiveness in social, academic and professional interactions in a U.S. setting. Students will expand their working oral vocabulary, master useful American idioms and improve their pronunciation. Students will examine and practice the conventions of contemporary American communication, both verbal and nonverbal. The course will be based upon daily class participation, oral presentations and evidence of improvement found through a contrast of audio-taped readings. Credit will not count toward graduation in any degree program.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: ESL 098 (may be taken as a corequisite) or placement into ESL 098 Lab fee: $3.00

ESL 094 Advanced Oral Communication (A, W, SP, SU) 3 credits
Students will increase their awareness of the values and beliefs that underlie cultural norms in the U.S. Readings on various aspects of contemporary American culture will provide the springboards to information gathering outside of class (through additional reading and interviews with native speakers), in-class discussions, and four required oral presentations. Students will practice standard American pronunciation and intonation and will master useful vocabulary and idiomatic expressions. Credit will not count toward graduation in any degree program.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: ESL 099 (may be taken as a corequisite) or placement into ESL 099 Lab fee: $3.00

ESL 095 Public Speaking for Non-Natives (A, W, SP, SU) 3 credits
This course will prepare students whose first language is not English to participate effectively in COMM 105 Speech. Students will study and practice public speaking techniques, with particular emphasis on native pronunciation, intonation and delivery. Students will be required to conduct interviews and research in preparation for demonstration and persuasive speeches, presented individually and in groups. Students will receive feedback on their oral production from their instructor and their classmates regularly and will be audio/video taped on occasion. Credit will not count toward graduation in any degree program.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: ESL 100 (may be taken as a corequisite) or placement into ESL 100 Lab fee: $5.00

ESL 097 Basic English as a Second Language (A, W, SP, SU) 10 credits
Students who already have limited command of the English language build upon their vocabulary and begin to eliminate errors through the study of basic grammar, readings, guided discussions, and written and oral exercises. Credit will not count toward graduation in any degree program.
Lecture: 10 hours – Lab: 0 hours
Prerequisite: Placement test Lab fee: $5.00

ESL 098 Developmental English as a Second Language (A, W, SP, SU) 10 credits
Students will continue to develop reading, writing, listening and speaking skills through the study of intermediate grammar, readings, guided discussions, and written and oral exercises. Credit will not count toward graduation in any degree program.
Lecture: 10 hours – Lab: 0 hours
Prerequisite: “C” in ESL 097 or placement test Lab fee: $5.00

ESL 099 ESL: Reading, Grammar, and Composition (A, W, SP, SU) 10 credits
Students will prepare for academic course work through the study of advanced grammar, sentence structure, paragraph organization, and prewriting techniques and will respond to college level readings in guided discussions, oral presentations and paragraph-length essays. Credit will not count toward graduation in any degree program.
Lecture: 10 hours – Lab: 0 hours
Prerequisite: “C” in ESL 098 or placement test Lab fee: $5.00

ESL 100 English as a Second Language: Composition (A, W, SP, SU) 5 credits
Students will polish their writing skill through grammar reviews, written exercises, and the study of sentence structure, rhetoric, and essay organization. Students will respond to both the content and technique of college level readings. Students will write essays using description, narration, cause and effect and comparison/contrast. Credit will not count toward graduation in any degree program.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: “C” in ESL 099 or placement Lab fee: $5.00

ESL 299 Special Topics in English as a Second Language (On Demand) 1–5 credits
ESL 299 offers students a detailed examination of selected topics of interest in English as a Second Language. Special topics courses are offered to meet the special needs or interests of a group of students and pilot new courses.
Lecture: Varies
Prerequisite: Varies Lab fee: $1.00 to $5.00

Environmental Science, Safety and Health (ENVR)

ENVR 101 Introduction to Environmental Science, Safety and Health (A, W, DL, SP) 4 credits
This course is an introduction to the environmental technology field, including an overview of environmental laws and regulations, toxicology, ecology, air pollution, water pollution, hazardous materials, solid and hazardous waste, waste site investigation and remediation, and occupational safety and health.
Lecture: 4 hours – Lab: 0 hours

ENVR 110 Industrial/Municipal Pollution Control (W) 3 credits
This course is an overview of the management, treatment and disposal practices utilized for pollution control. It addresses the nature of pollution and provides an introduction to air pollution control devices, wastewater treatment techniques, solid and hazardous waste management, treatment and disposal, recycling and pollution prevention.
Lecture: 2 hours – Lab: 2 hours Lab fee: $18.00

ENVR 111 Hazardous Materials Management (SP) 3 credits
This class presents an overview of the management practices for hazardous materials and hazardous waste, including principles of science and technology, occupational health and safety concerns and regulatory compliance. An emphasis will be placed on DOT, OSHA and RCRA requirements.
Lecture: 2 hours – Lab: 2 hours Lab fee: $20.00

ENVR 120 Environmental Aspects of Soils (A, SP, SU) 5 credits
This course offers a multi-disciplinary overview of soil science. Topics include soil formation and development, classification systems, soil mechanics, soil chemistry and contamination, soil hydrology, agricultural aspects of soil, soil erosion, soil microbiology and soil sampling techniques. Soil
characteristics will be explored by means of laboratory examination and elementary testing techniques.

Lecture: 4 hours – Lab: 2 hours  Lab fee: $15.00

**ENVR 130 Environmental Laws and Regulations (W)  5 credits**

ENVR 130 presents a study of American political institutions and a brief history of the American environmental movements and the resulting environmental regulations, as well as a study of local, state, and federal codes and regulations as they apply to the handling, treatment, storage, and disposal of hazardous materials and wastes. Emphasis on NEPA, the Clean Water and Air Acts, the Resource Conservation and Recovery Act (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund).

Lecture: 4 hours – Lab: 2 hours  Lab fee: $15.00

**ENVR 158 Environmental Site Assessment (A, SP)  3 credits**

This course explores environmental site assessments, including Phase I ESAs for real estate transactions. Environmental regulations and standard practices will be applied in the analysis of a site-specific project. Additional property assessment issues addressed in this class include Environmental Impact Statements, wetlands, asbestos, lead, mold, and radon.

Lecture: 2 hours – Lab: 2 hours  Lab fee: $12.00

**ENVR 160 OSHA 10-Hour Construction Safety and Health (W, SP)  1 credit**

This course covers the approved Occupational Safety and Health Administration (OSHA) curriculum for the 10-hour Outreach Training Program for Construction Industry Safety and Health. Topics include introduction to OSHA, electrical safety, fall protection, personal protective and lifesaving equipment, materials handling, storage, use and disposal, equipment safety, excavation, stairways and ladder safety and other applicable OSHA standards. Course completion cards will be issued to individuals successfully completing the class.

Lecture: 1 hour  Lab fee: $10.00

**ENVR 167 OSHA 10-Hour General Industry Safety and Health (On Demand)  1 credit**

This course covers the approved OSHA curriculum for the 10-hour Outreach Training Program for General Industry Safety and Health. Topics include introduction to OSHA, walking and working surfaces, exit routes, emergency action plans, fire prevention plans, fire protection, fall protection, electrical safety, and other applicable safety topics as recommended by OSHA. Course completion cards will be issued to individuals successfully completing the class. Not open to students with credit for ENVR 170.

Lecture: 1 hour  Lab fee: $10.00

**ENVR 170 General Industry Safety and Health (A)  4 credits**

This course covers the approved Occupational Safety and Health Administration (OSHA) curriculum for the 30-hour Outreach Training Program. Topics include an introduction to OSHA, hazardous materials, walking and working surfaces, fire protection, personal protective equipment, confined space, lockout/tagout, machine guarding, welding and brazing safety, electrical safety, industrial hygiene and other applicable OSHA standards. Course completion cards will be issued to individuals successfully completing the class.

Lecture: 4 hours  Lab fee: $10.00

**ENVR 220 Environmental Chemistry (On Demand)  5 credits**

Effective solutions to environmental problems require an understanding of the chemical processes that occur in the environment. This course provides a basic knowledge of environmental chemistry including water, soil and atmospheric chemistry. The chemistry of the transport and fate of pollutants in the environment, hazardous material chemistry and toxicology are covered. Related laboratory exercises will be performed including utilizing analytical techniques, instrumentation and quality assurance.

Lecture: 4 hours – Lab: 3 hours  Prerequisite: CHEM 111  Lab fee: $18.00

**ENVR 222 Water Treatment Techniques (SU)  3 credits**

This course is designed to permit the student to attempt the State of Ohio Class One Water Operator’s exam. The course will emphasize water quality methods of water treatment and laboratory processes. Practical experience will be emphasized.

Lecture: 2 hours – Lab: 2 hours  Prerequisites: High school chemistry or any CHEM course, MATH 102 or a higher math course, or permission of instructor  Lab fee: $20.00

**ENVR 223 Wastewater Treatment Techniques (W)  3 credits**

This course is designed to provide the training to permit the student to attempt the State of Ohio Class One Wastewater Operator exam. The course will emphasize types of treatment, equipment, hygiene and public health aspects, sewer systems, and laboratory processes. Practical experiences will be emphasized.

Lecture: 2 hours – Lab: 2 hours  Prerequisite: High school chemistry or any CHEM course, MATH 102 or a higher math course, or by permission of instructor  Lab fee: $20.00

**ENVR 224 Environmental Hydrology (SP)  3 credits**

Course studies the occurrence, movement, and behavior of water in the hydrologic cycle. Also presents an introduction to the concepts of controlling the movement of surface water and ground water, and the ways in which these resources can be exploited and/or contaminated.

Lecture: 1 hour - Lab: 3 hours  Prerequisites: MATH 102  Lab fee: $15.00

**ENVR 240 Environmental Analytical Methods (W)  2 credits**

This course provides an overview of the qualitative and quantitative analysis of environmental, waste and building material samples. An overview of laboratory methods will be provided. The emphasis will be on the application of certain analytical methods commonly used in the environmental industry.

Lecture: 1 hour  Lab fee: $20.00

**ENVR 250 Environmental Sampling (A)  5 credits**

ENVR 250 covers the techniques and methods used in sampling of environmental media, especially for field investigations. Emphasized is the sampling of air, surface water, ground water, soil and hazardous materials. Topics include the regulatory framework, project coordination, drilling techniques, monitoring well installation, field instrument calibration, decontamination, and supplemental investigative techniques.

Lecture: 4 hours – Lab: 3 hours  Lab fee: $20.00

**ENVR 252 Health and Safety Training for Hazardous Waste Operations (40-Hour OSHA Training) (W, SP, DL, SU)  3 credits**

Satisfies 29 CFR Part 1910.120(e) under OSHA. A health and safety training course for individuals who may be involved in the investigation, remediation and operation of hazardous waste sites. Topics include hazardous materials chemistry, toxicology, air monitoring instrumentation, air purifying respirators, self-contained breathing apparatus, supplied air respirator systems, protective clothing, decontamination, simulated hazardous materials response incidents, and appropriate problem sets. Students enrolled in the distance version of this course will be required to come to campus for an orientation meeting, completion of hands-on laboratory exercises, and for the final exam.

Lecture: 2 hours – Lab: 3 hours  Lab fee: $100.00

**ENVR 253 Environmental Systems Analysis (SP)  3 credits**

This course introduces engineered environmental systems and practical applications of their operation and maintenance. Topics include flow diagrams, schematics, plumbing and piping, pumps, blowers, electrical systems, instrumentation, flow measurements, process control, trouble-
shooting and safety for engineered systems.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: ENVR 110   Lab fee: $18.00

ENVR 254 Subsurface Restoration Techniques (SP)    5 credits
This course will address subsurface remediation techniques and treatment
technologies used at hazardous waste sites. Course topics include the
regulatory framework for subsurface restoration, clean-up goals, basic
contaminant chemistry and transport, supplemental subsurface investiga-
tive techniques, soil and groundwater remediation techniques, and water
and air treatment technologies.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: ENVR 250   Lab fee: $20.00

ENVR 255 Air Pollution and Monitoring (W)    3 credits
This course covers the fundamentals of air pollution, such as sources,
important atmospheric aspects and the effects of air pollutants. It also
focuses on EPA methods for stack and ambient sampling of various air
contaminants. Other topics include continuous emission monitoring, air
pollution control options, and applicable permitting and reporting
requirements.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: CHEM 111   Lab fee: $23.00

ENVR 256 Hazardous Materials Refresher Training (W, SU, DL)    1 credit
This course provides refresher training for site workers and emergency
operators who have completed the 24 or 40-hour courses and complies
with the 29 CFR 1910.120 refresher training requirements. Emphasis is
placed on practical exercises and review of relevant changes in OSHA
requirements. Successful completion of the course is based on classroom
participation and completion of a written assignment. Students enrolled
in the distance version of this course will be required to come to campus
to complete the final quiz. This is a repeatable course.
Lecture: 1 hour – Lab: 0 hours   Lab fee: $50.00

ENVR 265 OSHA 30-Hour Construction Safety and Health
(W, SP)    4 credits
This course covers the approved Occupational Safety and Health Admin-
istration (OSHA) curriculum for the 30-hour Outreach Training Program
for the Construction Industry Safety and Health. Topics include an in-
troduction to OSHA, safety and fall protection, health hazards, material
handling, equipment safety, concrete and masonry construction, welding
and cutting, excavation, stairways and ladder safety and other applicable
OSHA standards. Course completion cards will be issued to individuals
successfully completing the class.
Lecture: 4 hours   Lab fee: $10.00

ENVR 275 Industrial Hygiene (SP)    4 credits
This course is an overview of the science of industrial hygiene and de-
scribes the process of investigating and examining workplace hazards
and how those hazards are abated. The laboratory will emphasize the use
of instrumentation ad important calculations. Topics include introduction
to industrial hygiene, principles of toxicology, occupational safety and
health standards, occupational skin and noise disorders, indoor air qual-
ity, ergonomics, engineering and administrative controls, and personal
protective equipment.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: CHEM 111 or permission of instructor
Lab fee: $10.00

ENVR 282 Sustainable Building Strategies (SP)    3 credits
This course is an introduction to the field of environmentally-friendly
construction. Sustainable architecture and building site principles will be
presented, including strategies for energy-efficient heating and cooling,
“green” building materials and methods, alternative energy sources, water
efficiency and waste management. Topics include the need for sustain-
ability, energy efficient design, construction and controls, site selection,
passive solar heating and cooling, “green” building materials and methods,
alternative energy sources and water efficiency and waste management.
Lecture: 3 hours   Lab fee: $10.00

ENVR 283 Ecological Residential Construction (On Demand)    3 credits
This course addresses the important aspects of building green homes.
The topics include environmentally friendly design, the use of alternative
materials, and the utilization of sustainable systems.
Lecture: 2 hours – Lab: 2 hours   Lab fee: $10.00

ENVR 291 Field Experience (SU or On Demand)    3 credits
ENVR 291 offers an off-campus work experience in the environmental
services industry that augments formal education received in the technol-
gy with actual work conditions and job experience. “N” credit will not
be allowed for this course.
Lecture: 0 hours – Lab: 36 hours   Lab fee: $15.00

ENVR 299 Special Topics on Environmental Science, Safety and
Health (On Demand)    1–5 credits
ENVR 299 explores special topics from the environmental industry de-
signed to meet specific needs.
Lecture and/or Lab Hours: Vary

Finance (FMGT)

FMGT 101 Personal Finance (A, W, SP, SU, DL)    4 credits
This course presents a lifetime program of money management for the
individual. Topics such as budgets, savings, job search, buying a house,
insurance, mutual funds, stock market, real estate investments, taxes,
and estate planning are covered. Students will be able to write a basic
personal financial plan.
Lecture: 4 hours   Lab fee: $3.00

FMGT 201 Corporate Finance (A, W, SP, SU, DL)    5 credits
Course is an introduction to the principles of financial management of
private business firms. Topics covered include financial analysis, financial
planning, working capital management, financial leverage, sources of
financing, capital budgeting and capital markets.
Lecture: 5 hours
Prerequisite: ACCT 106   Lab fee: $3.00

FMGT 202 Money and Banking (A, DL)    5 credits
FMGT 202 is a study of the operation, organization, and economics of
U.S. monetary and banking systems. Current trends, the monetary policy
process, and the regulation of financial markets also are covered.
Lecture: 5 hours
Prerequisite: ECON 200   Lab fee: $3.00

FMGT 211 Investments (W, SP, DL)    4 credits
This course examines investments for the individual with emphasis on the
securities markets. Topics presented include risk and return tradeoffs,
Sources of investment information, stocks, bonds, mutual funds, options
and tax considerations.
Lecture: 4 hours   Lab fee: $3.00

FMGT 221 Financial Institutions and Markets (On Demand)    4 credits
This course examines the operation, organization, and structure of the U.S.
financial system. Financial markets will be examined along with financial
institutions with an emphasis on commercial banking. An analysis of
commercial credit will be covered which will include the study of credit
control and the management of collections.
Lecture: 4 hours   Lab fee: $3.00
FMGT 242 International Finance (W, DL) 4 credits
This course covers the multinational firm, globalization, balance of payments, market for foreign exchange, international monetary system, and global capital markets. Also covered is the study of global debt and equity markets to optimize a firm’s financial structure while minimizing foreign exchange exposure.
Lecture: 4 hours Lab fee: $3.00

FMGT 251 Finance Research (A, SP, DL) 4 credits
The student receives exposure to current developments in finance and economics through projects and research papers. FMGT 251 is designed to serve as a capstone course for graduating students.
Lecture: 4 hours
Prerequisite: FMGT 101, 201 and 211 Lab fee: $3.00

FMGT 271 Finance Practicum (On Demand) 3 credits
This course offers a practical work experience in which the student is expected to perform various financial procedures. Emphasis is placed upon analyzing and understanding the work environment
Practicum: 21 hours
Corequisite: FMGT 272

FMGT 272 Finance Seminar (On Demand) 2 credits
This course offers a continued practical work experience in which the student is expected to perform various financial procedures. Emphasis is placed upon analyzing and understanding the work environment, industry and nature of the employing organization.
Seminar: 2 hours
Corequisite: FMGT 271

Fire Science (FIRE)

FIRE 100 Introduction to Firefighting (A, W) 3 credits
This course presents a broad overview of a career in the fire service, including the basics of firefighter safety, fire behavior, etc. Not available to students with Fire 117 or equivalent Firefighter I and II certification.
Lecture: 3 hours — Lab: 0 hours
Prerequisite: ENGL 100 Lab fee: $20.00

FIRE 102 Prevention Practices (On Demand) 3 credits
This course is an overview of inspection programs, with emphasis on fire protection procedures and practices. Relationships of prevention programs with the government, private sector, codes and arson is discussed.
Lecture: 3 hours — Lab: 0 hours
Prerequisite: FIRE 117

FIRE 104 Fire Investigation Methods (SU, A) 4 credits
This course is a study of the principles of fire investigations including recognition, preservation, collection, and presentation of arson evidence. Also covered are arson laws, interrogation of witnesses, application of photography, preparation of reports, and adjustment of insured losses. A look at the estimation of loss due to fire, smoke and water is included.
Lecture: 3 hours — Lab: 2 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification. Lab fee: $25.00

FIRE 106 Protection Systems (SU) 3 credits
This course introduces the design and operation of fire protection systems, including water distribution, direction, alarm, and watchman services and protection systems for special hazards. Carbon dioxide, dry chemical, foam and water spray systems are studied in detail. Also covered are standpipes and sprinkler systems and methods of reestablishment after use.
Lecture: 4 hours — Lab: 0 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification. Lab fee: $20.00

FIRE 108 Command I Basic Concepts (W) 4 credits
This course presents NFPA Incident Management System curriculum concepts. The course content is tailored to the person looking to begin a career in firefighting, and the person at the FF level who has no direct command responsibility, but must understand the principles of incident command and their role within it.
Lecture: 4 hours—Lab: 0 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification. Lab fee: $15.00

FIRE 109 Fire Fighting Command II (SP) 3 credits
This course covers group operations and command strategy at the chief officer level, preplanning of fire fighting operations, and deployment of personnel and equipment. Specific tactical problems are analyzed. Operations and tactics including mutual and outside aid in fire fighting are presented.
Lecture: 0 hours — Lab: 6 hours
Prerequisites: FIRE 108, FIRE 117 or documented Firefighter I and II certification. Lab fee: $25.00

FIRE 117 Firefighter I and II (A, SP, SU) 12 credits
The course covers all of the performance and knowledge objectives in the current NFPA Standard 1001 for Firefighter I and II, including but not limited to: fire department organization, safety, fire alarm, fire behavior, extinguishers, rope, ladders, hose streams, fire control, salvage and rescue. This course is required for employment as a professional firefighter. Successful completion of this course will enable students to take the State of Ohio certification exam for Firefighter I and II levels (240-hour firefighter course).
Lecture: 8 hours — Lab: 14 hours Lab fee: $300.00

FIRE 151 Fire Prevention Codes (On Demand) 4 credits
FIRE 151 is a study of important building construction and fire safety codes, with emphasis on fire prevention and enforcement.
Lecture: 3 hours — Lab: 2 hours
Prerequisites: FIRE 102 and 117

FIRE 153 Fire Hydraulics (SP) 4 credits
This course presents an introduction to hydraulic theory. Drafting of water, velocity and discharge, friction loss, engine and nozzle pressure, fire streams, and pressure loses in flowing hydrants are all discussed. Students receive practice in the application of hydraulic principles. Flow and pump testing, as well as the study of water distribution, are covered.
Lecture: 3 hours — Lab: 2 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification. Lab fee: $8.00

FIRE 156 Building Construction/Collapse: Basic Concepts (A) 4 credits
This course offers an introduction to present and past practices involved in building construction. It deals with important standard elements of buildings, the hidden dangers of old and new buildings, what influences structural stability of walls in fires, and how to look for and judge structural dangers. The relationships between construction materials and fire damage to a building are also presented. This course is tailored for the person seeking to begin a career in firefighting, rather than the experienced firefighter.
Lecture: 4 hours—Lab: 0 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification. Lab fee: $20.00
FIRE 160 Legal Issues for Public Safety Personnel (W) 3 credits
This course presents an introduction to laws, civil and criminal actions, and the judicial system. Topics such as municipal liability for acts of public safety administration and their members, pensions, salary and compensation, and termination are covered, as are the initiation, operation, liability and legal aspects of mutual aid, primary response contracts, and private contracts. Also noted is the duty owed by the public to members of public safety services.
Lecture: 3 hours – Lab: 0 hours  Lab fee: $5.00

FIRE 200 Construction/Collapse for Experienced Firefighters (SP) 4 credits
An introduction to present and past practices of building construction as it relates to firefighting. Discusses the various hazards of building collapse and how to recognize warning signs of impending disaster. Looks at building construction from the Company Officer and Incident Commander’s perspective.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: A minimum of two years active service as a full time, part time, or volunteer firefighter with a recognized fire department. Instructor permission is required for admittance to this class.
Lab Fee: $20.00

FIRE 202 Hazardous Materials II (On Demand) 4 credits
FIRE 202 is a study of the properties and behavior of various hazardous chemicals in our environment. It presents an overview of the physical and chemical characteristics of toxic, flammable, and reactive substances in the forms of solids, liquids, and gases, combined with practical application of methods for responding to emergencies involving such materials. Emphasis will be placed upon safe approach to incident scenes, positive identification of materials, and accurate analysis of the dangers presented by hazardous materials. Simulation and tabletop emergency exercises will be utilized throughout the course.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: FIRE 117  Lab fee: $15.00

FIRE 203 Hazardous Materials III (On Demand) 3 credits
FIRE 203 introduces methods for handling hazardous materials. Examples of disaster and stress involving emergency personnel are discussed.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: A minimum of two years active service as a full time, part time, or volunteer firefighter with a recognized fire department. Instructor permission is required for admittance to this class.
Lab Fee: $15.00

FIRE 204 Fire Service Rating System (Fire Insurance) (A) 2 credits
FIRE 204 covers the history of fire insurance and the principles and practices of inspections by the Insurance Services Office. Course details the rating system as used by I.S.O. to determine premium rates and presents an extensive study of methods used by I.S.O. to classify public protection and individual property fire suppression.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification  Lab fee: $5.00

FIRE 205 Fire Service Company Officer: Supervisory Methods (A) 3 credits
FIRE 205 introduces supervisory techniques as applied to public service personnel. Course covers the need for job descriptions and job procedures, reports, oral and written directions, work evaluation, meetings, discipline, and conference leaders. Also presents effective methods for teaching and motivating personnel.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: FIRE 100 or 117 or documented Firefighter I and II certification  Lab fee: $5.00

FIRE 206 Administration of a Fire Department (SP) 3 credits
FIRE 206 looks at the contemporary fire protection agency, its functions, structure, and operational techniques. Course covers the principles of organization, staffing, budgeting, controlling, coordinating, planning, and research in fire protection. Also suggests ways to develop and maintain liaison/cooperation between fire and police departments.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: FIRE 205, FIRE 100 or FIRE 117 or documented Firefighter I and II certification  Lab fee: $5.00

FIRE 207 Customer Services for the Fire Services: PR (A) 3 credits
This course studies the psychology of relations between public service employees and the general population. It presents the policies and practices of community relations as they apply to public service agencies. Current national and local community problems are explored.
Lecture: 3 hours – Lab: 0 hours  Lab fee: $5.00

FIRE 209 Fire Fighting Problems (On Demand) 3 credits
FIRE 209 introduces procedures for fighting aircraft fires. Course details the procedures for fighting fires involving hydrocarbons and LP gas. It presents the hazards of electrical emergencies and the proper procedures for handling them. Examples of disaster and stress involving emergency personnel are discussed.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: FIRE 117  Lab fee: $3.00

FIRE 211 Incident Command for Experienced Firefighters (SU) 4 credits
This course discusses the strategies for performing as an Incident Commander on a fire scene. Fire-ground tactics, Command and Company Officer responsibilities, managing fire-ground dangers and risks, and Incident Management Systems are also presented.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: A minimum of two years active service as a full time, part time, or volunteer firefighter with a recognized fire department. Instructor permission is required for admittance to this class.
Lab Fee: $15.00

French (FREN)

FREN 101 Elementary French I (A, W, SP, SU) 5 credits
FREN 101 presents an introduction to the fundamentals of the French language with practice in listening, reading, speaking and writing. Course also includes selected studies in French culture. FREN 101 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $6.00

FREN 102 Elementary French II (A, W, SP, SU) 5 credits
This course is a continuation of FREN 101, with further development of listening, reading, speaking and writing skills and further study of French culture. FREN 102 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: FREN 101 with a grade of “C” or better or by placement exam  Lab fee: $6.00

FREN 103 Intermediate French I (A, W, SP, SU) 5 credits
FREN 103 offers continued study of the French language and development of listening, reading, speaking and writing skills. Readings from contemporary French culture and literature are explored. FREN 103 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: FREN 102 with a grade of “C” or better or by placement exam  Lab fee: $6.00

FREN 104 Intermediate French II (W, SP, SU) 5 credits
FREN 104 focuses on the reading and discussion of French short stories, novels, plays, newspapers and magazines, emphasizing literary appreciation and the development of French culture. FREN 104 meets elective requirements in the Associate of Arts and degree program and transfer
requirements in foreign languages and literature.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: FREN 103 with a grade of “C” or better or by placement exam  Lab fee: $6.00.

FREN 290 Capstone Experience in French (On Demand) 3 credits
This is a capstone course focusing on French. Paradigms and their underlying assumptions will be explored. Students will work on developing research techniques and methodologies. Students will apply these techniques to a project of their own design, complete a personal portfolio covering their studies at Columbus State, and participate in summative testing of their academic skills.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Open only to Associate of Arts students preparing to graduate within two academic quarters
Lab fee: $5.00

FREN 299 Special Topics in French (On Demand)  1-5 credits
FREN 299 offers students a detailed examination of selected topics in French.
Prerequisite: Varies  Lab fee: $2.00

Geographic Information Systems (GIS)

GIS 100 Acquiring GIS Data (A, W, SP, SU, DL)  3 credits
This course introduces students to acquiring geographic data and to learning to recognize and understand different data types used in the GIS applications. GIS 100 is designed for the beginning student who has limited knowledge in accessing existing databases. Students also develop skills for participating in distance learning courses and submitting class projects using the Internet.
Lecture: 2 hours – Lab: 2 hours  Lab fee: $10.00

GIS 105 Elements of Photogrammetry (W, DL)  2 credits
This course focuses on concepts and uses of photogrammetry in GIS. Students learn about the basic types of photogrammetry, examining ways of obtaining photographic data, finding points and performing measurements on aerial photographs, and understanding the limitations and applications.
Lecture: 1 hour – Lab: 3 hours  Lab fee: $15.00

GIS 110 Georeferencing and Editing GIS Data (W, DL)  2 credits
This course explores georeferencing existing GIS data so that it can be properly spatially referenced within your current GIS system. Students will also discover different methods of editing and creating GIS data. Students will understand different georeferencing and editing methods and errors associated with each method.
Lecture: 1 hour – Lab: 3 hours
Prerequisites: GEOG 207 or GIS 251 or instructor’s permission
Lab fee: $10.00

GIS 203 Remote Sensing of Environment (W, DL)  4 credits
This course is designed to give students an understanding of the electromagnetic spectrum as used in remote sensing techniques and applications. Students learn to make decisions with remote sensed data.
Lecture: 3 hours – Lab: 3 hours  Lab fee: $30.00

GIS 251 GIS Software I: ArcGIS (A, W, DL)  3 credits
This course is the first in a two-part series of specific application software usage training using ESRI’s ArcGIS. The students will learn the basics of ArcMap, ArcCatalog and ArcToolbox and explore how these applications interrelate in a complete GIS software solution. This course covers the fundamental GIS concepts as well as how to create, edit and work with spatial data. Students will manipulate, query, present data in maps and make decisions from the presented information.
Lecture: 2 hours – Lab: 3 hours  Lab fee: $20.00

GIS 253 GIS Software II (W, SP, DL)  3 credits
This course is the second in a two-part series of specific application software usage training using ESRI’s ArcGIS. The students will learn the basics of ArcMap, ArcCatalog and ArcToolbox and explore how these applications interrelate in a complete GIS software solution. This course covers the advanced applications of the software and reinforces the important concepts and functionality for successfully working with ArcGIS.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: GIS 251  Lab fee: $20.00

GIS 260 Introduction to Spatial Analysis (A, SP, DL)  4 credits
This course explores a range of spatial and analytical techniques and their implementation in GIS software. Students will apply different spatial techniques with the software and become familiar with the essential methodological and practical issues involved in spatial analysis.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: GEOG 207 or GIS251 or instructor’s permission
Lab fee: $20.00

GIS 275 Planning and Implementing GIS (A, DL)  3 credits
This course focuses on the methodology for planning and implementing a GIS. Class examines the procedures and methods for designing a GIS, evaluating data sources, testing, hardware and software planning, cost benefit analysis, staffing, training, legal issues and system implementation.
Lecture: 2 hours – Lab: 2 hours  Lab fee: $20.00

GIS 277 Introduction to ArcIMS (W, DL)  3 credits
This course provides specific application software usage training using ESRI’s ArcIMS. The students learn the basics of ArcIMS, how to create and maintain geography Internet sites, how to install and maintain ArcIMS, and explore and customize ArcIMS viewers.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: GEOG 207 or instructor’s permission  Lab fee: $20.00

GIS 278 Introduction to Programming for GIS (SP, DL)  3 credits
This course focuses on object-oriented programming and the unique issues relating to spatial objects, customization and syntax. Students learn how to use, find and modify scripts for us in ArcGIS. Students should have some familiarity with ArcGIS.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: GEOG 207 or instructor’s permission  Lab fee: $20.00

GIS 279 Introduction to GIS Databases (A, SP, DL)  3 credits
This course focuses on the design, use and maintenance of a GIS database. Students will be introduced to structured query language (SQL) and SQL server as they relate to GIS databases. The course covers ArcGIS personal geodatabase and SDE software. Student should have some familiarity with ArcGIS.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: GEOG 207 or instructor’s permission  Lab fee: $20.00

GIS 280 Advanced GIS Applications (SP, DL)  4 credits
This is a capstone course utilizing the skills and knowledge learned throughout the curriculum. Students perform research, identify issues, find data and develop a solution to a problem or project in a specific industry or area.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: GIS 253  Lab fee: $20.00

GIS 281 Introduction to ArcGIS Server (W, DL)  3 credits
This course provides specific application software training for ESRI’s ArcGIS Server. Students will learn the components of ArcGIS Server,
about the available libraries and APIs and server development guidelines, and the development of different types of Web applications. In the course, students will also learn how to install and configure ArcGIS Server. The course concludes with a project in which students will build a centrally managed GIS applications using ArcGIS Server.

GEOG 200 World Regional Geography (A, W, SP, SU, DL) 5 credits
This course serves as an introduction to the study of regional geography at the global scale. Students will become familiar with the basic concepts in geography, the topic of uneven development, and the factors (landforms, climate, population, resources, culture, economic activity and historical evolution) that affect uneven development within and among all the world's major regions. A distance-learning (DL) version of World Regional Geography is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

GEOG 207 Introduction to Geographic Information Systems (A, W, SP, SU, DL) 5 credits
This course introduces the fundamentals of Geographic Information Systems (GIS) including basic cartographic principles, map scales, coordinate systems and map projections. The uses of hardware and software elements that emphasize vector-based data structures using ArcView Spatial Analysis extension are explored. Various applications of GIS technology used in science, business and government are presented. Specific topics addressed include GIS terminology, raster and vector data structures, data sources and accuracy, methods of data conversion and input, requirements for metadata, working spatial databases (map features and attribute tables), spatial analysis (map overlays, buffers, networks). The above topics are reinforced in a laboratory with hands-on exercises on the use of map scales, coordinate systems, data sources and accuracy, data structures, working with spatial data, map features and attributes, map overlays, manipulation of data bases, creation of charts and graphs, and presentation of data in map overlays. A distance-learning (DL) version of Introduction to GIS is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

GEOG 280 Elements of Cartography (A, W, SP, SU, DL) 5 credits
This course provides an in-depth introduction to the basic concepts and methods of cartography necessary to design and construct digital maps. Upon completion of the course, students should have a basic understanding of maps and how to design and construct them in order to provide a tool useful for other courses and later professional work. A distance-learning (DL) version of Elements of Cartography is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

GEOG 290 Capstone Experience in Geography (On Demand) 3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have a special interest in continuing a baccalaureate degree program in geography. The course presents a basic introduction to geography research methodologies that students apply in
researching a social science topic of interest. Course requirements include the assembly of a portfolio that covers student’s academic career at Columbus State Community College and participation in summative testing of academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.

Lecture: 2 hours – Lab: 2 hours
Prerequisites: Completion of A.A./A.S. core requirements and at least 75 hours toward the degree with five credit in Geography Lab fee: $5.00

GEOL 293 Independent Study in Geology (On Demand) 1–5 credits
GEOL 293 is an individual, student-structured course that examines a selected topic in geology through intensive reading or research. The independent study elective permits a student to pursue his/her interests within the context of a faculty-guided program.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Permission of the instructor and the chairperson and one course in geography Lab fee: $5.00

GEOG 299 Special Topics in Geography (On Demand) 1–5 credits
GEOG 299 allows students to examine, in detail, selected topics of interest in geography.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Varies Lab fee: $5.00

Geology (GEOL)

Students must complete 60% of the laboratories in a course to receive credit. Courses in this area may require additional hours outside of the scheduled class times.

GEOL 101 Earth Systems I: Geologic Environment (A, W, SP, SU) 5 credits
GEOL 101 is a general geology course covering the materials of the Earth’s crust, the processes that produce and modify them, and the development of the Earth and its life forms through time. Related laboratory and demonstrations.

Lecture: 4 hours – Lab: 3 hours
Prerequisite: Placement into ENGL 101; not open to students with credit for GEOL 121 Lab fee: $21.00

GEOL 121 Physical Geology (A, W, SP, SU) 5 credits
This course covers geologic processes and the development of land forms. Topics include the development of the Earth, the nature and origin of minerals and rocks, land forms and the agents that produce and modify them, structural features of the Earth’s crust, and the environmental effects of changes in the Earth. Related laboratory and demonstrations.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: MATH 103 and placement into ENGL 101 Lab fee: $20.00

GEOL 122 Historical Geology (W, SU) 5 credits
GEOL 122 presents the history of the Earth and its inhabitants through geologic time. It is the recommended second course in geologic science for a two-course sequence in physical sciences for the A.S. degree. Related laboratories and demonstrations. Field trips outside normal class time may be required.

Lecture: 4 hours – lab 3 hours
Prerequisites: GEOL 121 Lab fee: $26.00

GEOL 293 Independent Study in Geology (On Demand) 1–5 credits
GEOL 293 is an opportunity for a detailed examination of selected topics of interest in geology.

Lecture: 1 to 5 hours – Lab: 0 to 6 hours
Prerequisite: Permission of instructor Lab fee: Varies

GEOL 299 Special Topics in Geology (On Demand) 1–5 credits
GEOL 299 is an opportunity for a detailed examination of selected topics of interest in geology.

Lecture: 1 to 5 hours – Lab: 0 to 6 hours
Prerequisite: Permission of the instructor Lab fee: Varies

German (GERM)

GERM 101 Elementary German I (A, W, SP, SU) 5 credits
GERM 101 is an introduction to the fundamentals of the German language with practice in listening, reading, speaking and writing. It also includes selected studies in German culture. GERM 101 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $6.00

GERM 102 Elementary German II (A, W, SP, SU) 5 credits
This course is a continuation of GERM 101 with further development of listening, reading, speaking, and writing skills and further study of German culture. GERM 102 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: GERM 101 with a grade of “C” or better or by placement exam Lab fee: $6.00

GERM 103 Intermediate German I (A, SP) 5 credits
GERM 103 continues the study of the German language and the development of listening, reading, speaking, and writing skills. It also highlights readings from contemporary Germanic culture and literature. GERM 103 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: GERM 102 with a grade of “C” or better or by placement exam Lab fee: $6.00

GERM 104 Intermediate German II (W, SU) 5 credits
GERM 104 focuses on the reading and discussion of German short stories, novels, plays, newspapers, and magazines, emphasizing literary appreciation and the development of Germanic culture. GERM 104 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: GERM 103 with a grade of “C” or better or by placement exam Lab fee: $6.00

GERM 105 German Conversation and Composition (On Demand) 1 credit
GERM 105 is conversation course designed to provide students completing the 104 level an opportunity to continue practicing the language. Students discuss current events and personal experiences in the target language. Readings are taken from literary texts, journals, magazines, and newspapers. The course is repeatable for a total of 5 hours of credit.

Lecture: 1 hour – Lab 0 hours
Prerequisite: GERM 104 Lab fee: $4.00
Health Information Management (HIMT)

HIMT 111 Introduction to Health Information Management Tech (A, WI, SP, SU, DL) 3 credits
The student will be introduced to the various roles of the health information management technician within the health care system and professional organizations in which the health information management technician is affiliated. The educational and credentialing requirements for the HIM professional will be studied. The student will explore the various functions performed under the auspices of health information management. An overview of the health care delivery system in the United States will also be discussed.

This course is the entry point into the Health Information Management Technology (HIMT) degree program and the Medical Coding Certificate program. Therefore, students will be required to complete a drug screening and background check by the end of the second week of the quarter as a requirement for acceptance into the HIMT degree program or Medical Coding certificate program. Students enrolling in this course will be accepted into one of the above mentioned programs contingent upon clear results on a drug screening, a clear background check, and a grade of “C” or above in this course.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: High school biology within the past 5 years or BIO 100 or equivalent college credit; high school chemistry within the past 3 years or CHEM 100 or equivalent college credit; HIMT 121; and CIT 094. A grade of “C” or higher must be achieved in all prerequisite coursework.

Lab fee: $5.00

HIMT 112 Electronic Health Concepts (SU, DL) 2 credits
This course discusses electronic health concepts as they relate to safety and quality of health care, homeland security, HIPAA and escalating health care costs. These national concerns have brought the electronic health record (EHR) to the forefront of the health care industry and have created several initiatives that are driving the standardization and implementation of the EHR and EHR systems.

Lecture: 1 hour – Lab: 2 hours Lab fee: $20.00

HIMT 113 Managed Care Trends (A, DL) 2 credits
This course will provide students with an understanding of various issues regarding managed care that have been instrumental in the redesign and remodeling of patient care delivery. Topics discussed include types of plans, analysis of data to determine effects of managed care, evaluation of managed care plans, rules and regulations affecting managed care, implementation of plans and clinical outcomes management.

Lecture: 2 hours – Lab: 0 hours

HIMT 121 Advanced Medical Terminology (A, W, SP, SU, DL) 3 credits
The student will study medical terminology as it relates to word parts, human body structure, procedural terms, abbreviations, directional terms, anatomical planes and regions, and the following: integument system, musculoskeletal system, hematology, immune system, endocrine system, nervous system, special senses, respiratory system, cardiovascular system, gastrointestinal system, urinary system, male reproductive system, female reproductive system, obstetrics and neonatology, mental health and oncology. Recommended: Completion of MULT 101 Medical Terminology

Lecture: 3 hours – Lab: 0 hours Lab Fee: $5.00

HIMT 133 Legal Aspects of Health Information (SP, DL) 3 credits
The student will study the policies and procedures for processing health records for legal purposes. The importance of the maintenance of confidentiality of health information (both paper and electronic records and databases), the proper handling of requests for, and the transfer of health information will be discussed.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: HIMT 111 with a grade of “C” or higher. Lab fee: $25.00

HIMT 135 Health Data Management (A, DL) 5 credits
The student will be introduced to filing systems as well as to the computer-based patient record (CPR). The student will study the policies and procedures required to collect, analyze, interpret, report, and maintain health care data. The student will gain knowledge of health record content required to perform chart reviews for quality assessment and abstracting functions.

Lecture: 4 hours – Lab: 2 hours
Prerequisite: HIMT 111 with a grade of “C” or higher. Lab fee: $25.00

HIMT 141 Pharmacology and Health Information Management (W, SP, DL) 3 credits
This course will survey the major classifications of drugs. The indications and contraindications for use will be presented. Emphasis will be placed on the correlation between drug therapy and disease. The student will be required to use various desk references efficiently. Recommended: Completion of HIMT 121

Lecture: 3 hours – Lab: 0 hours
Prerequisite: BIO 121 or (BIO 261 and BIO 262) with a grade of “C” or higher Lab Fee: $5.00

HIMT 243 Comparative Health Settings in HIM (SP, DL) 3 credits
The student will study health information systems in nonhospital health care facilities, along with the sources of data for these systems and their uses and users. The appropriate technical aspects and functions within these various systems will be discussed along with the various reporting and accrediting requirements for each of the specific health care facilities discussed. Field trips to various health care facilities may be scheduled.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: HIMT 111 and HIMT 135 with a grade of “C” or higher Lab Fee: $5.00

HIMT 245 ICD-9-CM Coding (A, SP, DL) 5 credits
The student will be introduced to the nomenclature and major classification and indexing systems in ICD-9-CM utilized in coding medical information. Laboratory experiences will emphasize the application of the related skills with accuracy and completeness.

Lecture: 3 hours – Lab: 4 hours
Prerequisites: BIO 122 or (BIO 261, BIO 262, and BIO 263), HIMT 111 and HIMT 121 with a grade of “C” or higher Lab fee: $80.00

HIMT 245A Introduction to ICD-9-CM Coding (A, SP, DL) 1 credit
HIMT 245A is the first module of HIMT 245. In this module, students are introduced to basic ICD-9-CM coding guidelines and conventions.

Lecture: 1 hour – Lab: 0 hours Lab fee: $5.00
HIMT 255 CPT-4 Coding (W, SU, DL)  5 credits
The student will be introduced to ambulatory coding and payment systems emphasizing CPT-4 coding. Laboratory experiences will emphasize the application of the related skills with accuracy and completeness.
Lecture: 3 hours – Lab: 4 hours
Prerequisites: BIO 122 or (BIO 261, BIO 262, and BIO 263), HIMT 111 and HIMT 121 with a grade of “C” or higher. Lab fee: $80.00

HIMT 255A Intro to CPT-4 Coding and Evaluation and Management (W, SU, DL)  1.5 credits
HIMT 255A is the first module of HIMT 255. In this module, students are introduced to basic CPT-4 coding guidelines and Evaluation and Management coding.
Lecture: 1 hour – Lab: 1 hour  Lab fee: $10.00

HIMT 256 Clinical Data Analysis (W, DL)  3 credits
The student will study clinical information used to support diagnoses and services provided to patients as it pertains to health care data management in coding for reimbursement of health care services, the evaluation of practice patterns, the assessment of clinical outcomes, and the analysis of cost-effectiveness of services provided.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: HIMT 121 with a grade of “C” or higher  Lab Fee: $5.00

HIMT 257 Introduction to Health Statistics (SP, DL)  3 credits
The student is introduced to procedures for properly collecting, organizing, displaying and interpreting health care data to meet the needs of various users while complying with the standards of the health care facility. The users of data can include the patient, medical staff, nursing and allied health staff, state and federal regulatory agencies, JCAHO and insurance companies.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: CIT 102, HIMT 111, and HIMT 135 with a grade of “C” or higher, or permission from the instructor for those not enrolled in the HIMT  Lab Fee: $5.00

HIMT 259 Quality and Resource Management (A, DL)  3 credits
The student will be introduced to the internal and external requirements for establishing, operating, and maintaining quality improvement and utilization management programs. Accreditation standards pertaining to the quality of health information will be discussed, along with methods used in benchmarking, credentialing, critical pathways, monitoring and evaluation, occurrence screening, peer review and risk management.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: CIT 102, HIMT 111, and HIMT 257 with a grade of “C” or higher  Lab Fee: $25.00

HIMT 265 Medical Reimbursement (A, DL)  3 credits
Students are introduced to basic terminology regarding medical insurance and how coding systems used in outpatient and inpatient health care settings are used to obtain payment for health care services. A discussion of various third-party payers will be presented, as well as reimbursement methodologies used by these payers. Students are introduced to claims processing in the physicians’ office setting. Topics discussed include CMS 1500 and office procedures for posting payments and claims follow-up.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: HIMT 245, HIMT 255 with a grade of “C” or higher  Lab Fee: $5.00

HIMT 267 Principles of Management (W, DL)  3 credits
The student will be introduced to the functions related to planning, organizing, controlling, and evaluating human resources and health information management services. Other topics include the direction and documentation necessary for the supervision of personnel.
Lecture: 3 hours – Lab: 0 hours  Lab Fee: $5.00

HIMT 270 Case Management in Health Care (W, DL)  2 credits
This course is designed to introduce the student to the role of the case manager. The five major areas of discussion include coordination and service delivery, physical and psychological factors, benefit systems and cost benefits analysis, case management concepts, and community resources.
Lecture: 2 hours  Lab Fee: $5.00

HIMT 274 Issues in Health Information Management Technology (SP, DL)  1-3 credits
This special topics course is designed to provide presentation of topics pertinent topics and current trends in the health information management field.
Lecture: 1-3 hours – Lab: 0 hours
Prerequisite: HIMT 111, varies with topic offered

HIMT 275 Intermediate Coding (A, DL)  5 credits
This course provides the students with continued experience in ICD-9-CM and CPT-4 Coding. An emphasis is placed on practical applications of professional coders. The students will code from case studies and patient medical records.
Lecture: 3 hours – Lab: 4 hours
Prerequisites: HIMT 111, 245, 255, and 256 with a grade of “C” or higher  Corequisite: HIMT 265  Lab fee: $130.00

HIMT 290 Capstone for HIMT (W)  2 credits
This course is designed to provide opportunities for students to work individually or in groups on HIM projects for community organizations or healthcare facilities. Students incorporate knowledge gained throughout the HIMT curriculum in the completion of the assigned project(s). Project management skills, continuous quality management skills (CQI), and/or other management concepts are incorporated into the project(s). Students are required to match the appropriate AHIMA competencies (e.g., domains, tasks, subtasks, and knowledge clusters) to the project completed before presenting the project results to facility contacts and/or peers.
Lecture: 1 hour – Lab: 2 hours
Prerequisites: HIMT 292 and HIMT 294 with a grade of “C” or higher

HIMT 292 Practical Applications in HIMT I (SU)  4 credits
Students are provided with practical applications in HIMT they can apply to health information storage and retrieval, record completion, and release of information. Students are required to participate in an orientation to an actual health information management department and/or facility. Students will begin preparatory work for the RHIT certification examination and will complete assignments requiring them to apply the fundamentals of English grammar and the writing process.
Lecture: 1 hour – Lab: 6 hours
Prerequisites: CIT 102, HIMT 111, HIMT 121, HIMT 133, HIMT 135, HIMT 243 and HIMT 245 with a grade of “C” or higher and permission from the instructor. Completion of a health record, a 2-step TB test, a clear BCI check, and a clear drug screen are also required.
Corequisite: HIMT 255  Lab fee: $50.00

HIMT 294 Practical Applications in HIMT II (A)  4 credits
Students will be further exposed to the HIM functions and software applications used in HIM. Students will be assigned projects to complete that require the application of concepts studied throughout the HIMT curriculum. Students continue preparatory work for the RHIT certification examination and will complete assignments requiring them to apply the fundamentals of English grammar and the writing process.
Lecture: 1 hour – Lab: 6 hours
Prerequisites: HIMT 245, HIMT 255, HIMT 257 and HIMT 292 with a grade of “C” or higher and permission from the instructor. Completion of a health record, a 2-step TB test, a clear BCI check, and a clear drug screen are also required.
Corequisites: HIMT 259 and 265  Lab fee: $50.00
Students are provided continued experience with practical applications in HIMT. Medical coding and reimbursement activities are emphasized in this course. Students will begin preparatory work for the CCA certification examination. Students will complete assignments requiring them to apply the fundamentals of English grammar and the writing process.

Lecture: 1 hour – Lab: 6 hours
Prerequisites: HIMT 275 and HIMT 294 with a grade of “C” or higher and permission from the instructor. Completion of a health record, a 2-step TB test, a clear BCI check, and a clear drug screen are also required.
Lab fee: $50.00

Heating, Ventilating and Air Conditioning Technology (HAC)

HAC 116 Piping Systems (W, SU) 3 credits
This course is a comprehensive study of the UPC, water supply, water treatment, and distribution, to include waste water disposal and sanitation standards. Emphasis will be placed upon mechanical piping design, nomenclature, the physics of metal pipe, tubing, fittings, valves, joining methods, pumps, pump sizing, water flow principles, pressure loss, sizing and terminal units. Boilers, furnaces, chillers and refrigerator systems will be discussed in detail.
Lecture: 1 hour – Lab: 5 hours  Lab fee: $12.00

HAC 141 Principles of Refrigeration (A, W) 4 credits
HAC 141 is a basic refrigeration cycle theory course covering heat thermodynamics, temperature-pressure relationships, mechanical operations of refrigeration equipment and representative application and selection data for Class I refrigerants.
Lecture: 3 hours – Lab: 3 hours  Lab fee: $10.00

HAC 152 Instrumentation/Combustion Process (A, W) 4 credits
This is a course about basic combustion processes, using all the fossil fuels and psychrometric chart work to track the thermal heat transfer. The instruments used to test these processes will also be explained along with the fan laws and psychrometric chart procedures. Instruments used in energy auditing are then explained and preventative maintenance programs written.
Lecture: 2 hours – Lab: 4 hours  Lab fee: $15.00

HAC 161 Hand Tools Laboratory (A, SP) 4 credits
This is an entry-level course building elementary skills in brazing, soldering, threading, cutting, swaging, and other skills that relate to service, installation and maintenance processes in the HAC field. Basic hand tools and meters will be demonstrated and used in lab exercises.
Lecture: 2 hours – Lab: 4 hours  Lab fee: $15.00

HAC 183 HAC Wiring Circuits I (A, W) 4 credits
This course is designed to teach a new student how to read, draw, interpret and understand residential heating and cooling wiring diagram symbols, devices and wire size identification, basic circuit distribution concepts and schematic applications of same.
Lecture: 2 hours – Lab: 4 hours  Lab fee: $10.00

HAC 222 Load Calculations I (A, W) 4 credits
This course is a comprehensive study of the fundamentals of environmental conditioning, energy consumption and operating cost analysis, the properties of air, insulation materials, heat loss and gain calculations, to include the methods of air conditioning, heating and ventilation. Load calculations will be performed using the applicable ACCA manuals and the Right-J, Windows Version 2, computer software program.
Lecture: 2 hours – Lab: 4 hours  Lab fee: $12.00

HAC 231 Load Calculations II (W, SP) 4 credits
HAC 231 covers commercial heat gain/loss calculations, design of systems, and selection of equipment. The systems used in commercial applications will be discussed and compared, along with correct balancing procedures. The factor of sound as it applies to these types of systems will also be included. This course is one of six that prepares the student to take the HAC Contractor’s License Exam.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: HAC 222  Lab fee: $12.00

HAC 242 HAC Mechanical Standards/Safety (A, SP) 3 credits
HAC 242 is a basic introduction to HAC safety considerations, first aid, and CPR as well as emergency procedures for on-the-job accidents. Course also introduces the various codes that affect the workplace and jobsite, such as OSHA, NFPA, state and local building codes. In addition, NEC, energy codes and ASHRAE standards will be covered.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: HAC 141 and HAC 152  Lab fee: $12.00

HAC 244 Heat Pump Systems (SP, SU) 4 credits
This is a course designed for the student with a fundamental knowledge of the refrigeration cycle. Previous training in refrigeration theory, wiring diagrams, control circuits, and tools used in the trade is necessary to enroll in this course. The course is designed around hands-on training and testing of the various component parts of a vapor compression split system.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: HAC 116, HAC 141 and, HAC 183  Lab fee: $20.00

HAC 253 Automatic Controls I (A, SP) 3 credits
This course introduces HAC residential and light commercial control systems and the components that make up the systems. Emphasis will be placed on operators, sensors, controllers and various pneumatic and electrical devices used in modern control systems along with the logic used to develop their control sequences.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: HAC 116, HAC 141, 161, 183 and 253  Lab fee: $20.00

HAC 254 Heating Systems (A, SU) 4 credits
HAC 254 is designed for the student with a fundamental knowledge of heat transfer characteristics and air movement properties. The course is designed around hands-on training and testing of the various component parts and accessories that make up gas, electric and fuel oil type forced air furnaces, along with accessories such as humidifiers, air filtration systems, and set-back thermostats.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: HAC 141, HAC 152 and HAC 183  Lab fee: $20.00

HAC 256 Automatic Controls II (W, SU) 3 credits
HAC 256 is a hands-on laboratory course designed to build practical understanding of control circuit logic and sequence of operation theory. Representative circuits from major environmental control devices employing various forms of energy will be included in the lab exercises.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: HAC 253  Lab fee: $15.00

HAC 258 Pneumatic Controls I (On Demand) 4 credits
This course is designed to take a senior level HAC student and teach him/her the fundamentals, installation practices and common application
parameters of representative pneumatic controls systems.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: HAC 253 Lab fee: $15.00

**HAC 266 Advanced Problems (On Demand) 4 credits**
HAC 266 presents a simulation that will allow the student to use his/her educational knowledge on a problem(s) that emphasizes the design or practical service aspects of a heating and cooling system. The instructor will need to give prior approval of the project or projects to be completed by the student. A tutorial course form must be completed by the student.
Lecture: 0 hours – Lab: 8 hours
Prerequisite: Permission of instructor Lab fee: $8.00

**HAC 284 HAC Wiring Circuits II (W, SP) 4 credits**
This course will concentrate on lab experiments designed to teach a student how to properly wire up typical heating and cooling devices into working circuits. Devices such as motors, controllers, contactors, compressors and safety devices will be covered.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: HAC 284 Lab fee: $10.00

**HAC 285 HAC Electronic Controls I (On Demand) 4 credits**
This course uses basic electronic knowledge from EET 101 and EET 102, plus electrical knowledge from HAC 183 and HAC 284, to build a basic understanding of HAC solid state computer controls. This theory course will cover controllers, sensors, relays and HAC electronic operational devices.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: HAC 183 and HAC 152 Lab fee: $10.00

**HAC 287 Boiler Systems (On Demand) 5 credits**
This course uses basic combustion knowledge from HAC 152 and piping system knowledge from HAC 116, along with codes from course HAC 242, to build a basic understanding of boiler types, systems, safety procedures and codes that will prepare a person to take the High Pressure Boiler License Examination.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: HAC 116 and HAC 152 Lab fee: $10.00

**HAC 288 Commercial A/C Systems (On Demand) 4 credits**
This course uses basic piping knowledge from HAC 116, refrigeration cycle theory from HAC 141, codes from HAC 242, and control knowledge from HAC 253 to build a basic understanding of the operational theory and safe operating practices for an industrial Class II ammonia refrigeration system. Entering students should have HAC 161 course content or proficiency credit before enrolling in this class.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: HAC 116, HAC 141, HAC 242 and HAC 253 Lab fee: $10.00

**HAC 291 Field Experience (On Demand) 4 credits**
HAC 291 offers an opportunity for an off-campus work experience in heating, ventilating and air conditioning industry that augments formal education received in the technology with actual work conditions and job experience. “N” credit will not be allowed for this course.
Lecture: 0 hours – Lab: 40 hours Lab fee: $15.00

**HAC 299 Special Topics in Heating and Air Conditioning (On Demand) 1–5 credits**
This course offers a refresher maintenance training class covering refrigeration systems, mechanical tools and methods, heating and boilers, electrical, air handling and ventilation, controls and safety. Please see your advisor before scheduling for this course.
Lecture: Hours vary – Lab: Hours vary (depends upon topic)

**History (HIST)**

**HIST 290 Capstone Experience in History (On Demand) 3 credits**
HIST 290 is a capstone course in which students will work on developing techniques and methodologies in the field of history. Students will apply these techniques to a project of their own design and participate in summative testing of their academic skills.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: Open only to AA and AS students preparing to graduate within two academic quarters Lab fee: $2.00

**Hospitality Management**

**Dietetic Technician Major (DIET)**

**DIET 191 Dietetic Technician Practicum I (A) 1.4 credits**
Practical application of information presented in the classroom from MLT 100, HOSP 102, and HOSP 122 to related health care facilities. Skills are developed through supervised learning situations to understand the organizational structure of health care facilities and pertinent regulations, to define the roles of dietetic practitioners, and to maintain and evaluate standards of sanitation and safety. Student must be enrolled in or have completed MLT 100, HOSP 102, HOSP 122.
Lecture: 1 hour – Lab: 2.5 hours
Prerequisite: Permission of instructor Lab fee: $60.00

**DIET 192 Dietetic Technician Practicum II (W) 2 credits**
Practical application of information presented in the classroom from HOSP 107 and HOSP 109 in related health care facilities. Skills are developed through supervised learning situations to operate and maintain foodservice equipment, to assist in food production and service, and to maintain food quality and portion control. Student must be enrolled in or have completed HOSP 107 and HOSP 109.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: DIET 191 with a “C” grade or higher and permission of instructor Lab fee: $20.00

**DIET 193 Dietetic Technician Practicum III (SP) 2 credits**
Practical application of information presented in the classroom from HOSP 123 and HOSP 153 in related health care facilities. Skills are developed through supervised learning situations to procure and store food, supplies, and equipment, to calculate food costs, to participate in quantity food production, to develop and/or test products, and to provide for the nutritional needs of customers. Student must be enrolled in or have completed HOSP 123 and HOSP 153.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: DIET 192 with a “C” grade or higher and permission of instructor Lab fee: $15.00

**DIET 261 Community Nutrition: A Life Cycle Approach (A) 2 credits**
Course provides an introduction to community nutrition programs. Nutrition interventions targeted toward various population groups throughout the human life cycle are identified. Food and nutrition requirements for specific age groups and cultural preferences for foods are examined. The course explores overall program goals, delivery and evaluation, target audiences, funding sources, legislation, and nutrition goals for a variety of community programs. Local, state, and federal food and nutrition programs are addressed. The various roles of the nutritionist/nutrition educator in the community setting are identified.
Lecture: 2 hours
Corequisite: DIET 297 Lab fee: $10.00
DIET 263 Nutrition Care Process (A) 2 credits
DIET 263 is an introduction to the study of nutritional assessment, diet modification, and nutritional care plans. Methods and management of clinical documentation will be emphasized. The student will utilize appropriate nutritional assessment tools and techniques and develop care plans and chart notes for various disease states utilizing the Nutrition Care Process and model.
Lecture: 2 hours
Prerequisite: HOSP 153 Nutrition for a Healthy Lifestyle with a minimum grade of “C”
Corequisite: DIET 275 Lab Fee: $10.00

DIET 265 Dietetic Technician Seminar (SP) 1 credit
This course is an in-depth study of recent developments and areas of concern related to providing nutrition care. Each student will select a nutrition topic of current concern, write a research paper, and present an oral report. Information about professional organizations and the ethical practice of dietetics will be discussed. A written exam to assess knowledge attained throughout the seven quarter program will be administered. A grade of “C” or higher is required for graduation.
Lecture: 1 hour
Prerequisite: DIET 298 with a “C” grade or higher and permission of instructor Lab fee: $2.00

DIET 275 Medical Nutrition Therapy I (A) 5 credits
DIET 275 is an introduction to the study of nutritional assessment, diet modification, and nutritional care plans. The rationale for nutritional intervention and related medical conditions and terminology is presented. Calorie controlled and consistent nutrient modified diets for a variety of medical and/or life cycle-related conditions are studied. The student will identify and utilize appropriate nutritional assessment tools and techniques for specific medical and/or life cycle-related conditions. The student will plan, prepare and/or evaluate menus, meal plans, meals, and nutritional supplements related to these diet modifications. BIO 262 or BIO 122 must be completed or taken as a corequisite.
Lecture: 4 hours – Lab: 2 hours
Prerequisite: HOSP 153 with a “C” grade or higher and permission of instructor Lab fee: $10.00

DIET 276 Medical Nutrition Therapy II (W) 5 credits
This course is a continuation of the study of nutritional assessment, diet modification, and nutritional care plans presented in DIET 275. The rationale for nutritional intervention and related medical conditions and terminology is presented. Calorie and protein supplemented and nutrient modified diets for a variety of medical conditions are studied. The student will identify and utilize appropriate nutritional assessment tools and techniques for specific medical conditions. The student will plan, prepare and/or evaluate menus, meal plans, meals, and nutritional supplements related to these diet modifications. BIO 262 or BIO 122 must be completed before enrolling.
Lecture: 4 hours – Lab: 2 hours
Prerequisite: DIET 275 with a “C” grade or higher and permission of instructor Lab fee: $10.00

DIET 297 Dietetic Technician Practicum IV (A) 3 credits
DIET 297 provides an opportunity for practical application of information presented in the classroom from HOSP 153 and DIET 275 in community health programs. Skills are developed through supervised learning situations to understand the services offered by community based organizations, to develop the ability to utilize their services, to meet and serve clients, to obtain and evaluate nutritional data from individuals, and to establish good working relationships with clients and other personnel. Student must be enrolled in or have completed HOSP 225 and DIET 275.
Lecture: 2 hours – Lab: 7 hours
Prerequisite: DIET 193 with a “C” grade or higher and permission of instructor Lab fee: $104.00

DIET 298 Dietetic Technician Practicum V (W) 2 credits
This is an opportunity for further practical application of information presented in the classroom from HOSP 225, DIET 275, and DIET 276 to clients in related health care facilities. Skills are developed through supervised learning situations to interview clients, to evaluate nutritional data collected, to understand the rationale for dietary modification for nutrient and consistency modification, to understand associated medical terminology and to assist in the planning, preparation and service of modified diet meals. Student must be enrolled in or have completed DIET 276 and HOSP 224.
Lecture: 1 hour – Lab: 7 hours
Prerequisite: DIET 297 with a “C” grade or higher and permission of instructor Lab fee: $10.00

DIET 299 Dietetic Technician Practicum VI (SP) 2.6 credits
DIET 299 is another opportunity for practical application of information presented in the classroom from all technical courses to clients in related health care facilities. Opportunities are provided through supervised learning situations to demonstrate proficiency in client interviewing, to evaluate nutritional data, to understand associated medical terminology and the rationale for dietary intervention, and to assist in the planning, preparation and service of modified diet meals. A grade of “C” or higher is required for graduation.
Lecture: 1 hour – Lab: 11.5 hours
Prerequisite: DIET 276 and DIET 298 and permission of instructor Lab fee: $10.00

Dietary Manager (DMGR)

DMGR 101 Dietary Manager Seminar I (A) 4 credits
This course offers a study of the types of health care facilities, typical health care organizational structures, and roles of the health care team members. Regulations and how they affect food service in health care facilities are examined. Methods and records used in purchasing, receiving, storing, preparing and serving food are explained. Management principles and employment issues are discussed. The student must have passed the ServSafe examination before enrolling.
Lecture: 4 hours
Corequisite: DMGR 194 and permission of instructor

DMGR 102 Dietary Manager Seminar II (W) 4 credits
Course presents the principles for planning menus to meet the nutritional needs of people in health care operations. Nutrient requirements, functions and sources of nutrients, and digestion and absorption of food are studied. Diet modification for a variety of health conditions is studied.
Lecture: 4 hours
Prerequisite: DMGR 101 with a “C” grade or higher
Corequisite: DMGR 195 and permission of instructor

DMGR 103 Dietary Manager Seminar III (SP) 4 credits
In this class, methods and records used to gather nutrition histories, to determine food needs and preferences, to establish care plans and to do charting are presented. Control measures for maintaining quality, quantity, and cost of nutrition care are discussed. Supervisory characteristics are reviewed. Facility evaluation and plans for improvement are presented. Continued professional development is emphasized. The student must earn a grade of “C” or higher to receive a certificate of completion.
Lecture: 4 hours
Prerequisite: DMGR 102 with a “C” grade or higher
Corequisite: DMGR 196 and permission of instructor

DMGR194 Dietary Manager Cooperative Work Experience I (A) 2 credits
Course provides an opportunity for supervised, work-related learning experiences to be performed on the job following material presented in the classroom from DMGR 101. Employment in a health care facility
with a qualified preceptor on the staff is required.
Lab: 20 hours/week
Corequisite: DMGR 101 and permission of instructor.
Lab fee: $12.00

DMGR 195 Dietary Manager Cooperative Work Experience II
(W) 2 credits
Course offers supervised, work-related learning experiences to be performed on the job following materials presented in the classroom from DMGR 102. Employment in a health care facility with a qualified preceptor on the staff is required.
Lab: 20 hours/week
Prerequisite: DMGR 194 with a “C” grade or higher
Corequisite: DMGR 102 and permission of instructor Lab fee: $12.00

DMGR 196 Dietary Manager Cooperative Work
Experience III (SP) 2 credits
Opportunity for more supervised, work-related learning experiences to be performed on the job following materials presented in the classroom from DMGR 103. Employment in a health care facility with a qualified preceptor on the staff is required. The student must earn a grade of “C” or higher to receive a certificate of completion.
Lab: 20 hours/week
Prerequisite: DMGR 195 with a “C” grade or higher
Corequisite: DMGR 103 and permission of instructor Lab fee: $12.00

School Foodservice Manager (SMGR)

SMGR 101 Introduction to School Foodservice Management (W) 3 credits
This course presents a study of the history of school meals, typical organizational structures, and roles of the foodservice team members. Regulations and how they affect foodservice in schools are examined. Foodservice safety and sanitation principles, utilization and care of equipment are studied. Foodservice systems, marketing, customer service and merchandising techniques are examined.
Lecture: 3 hours
Prerequisites: HOSP 122

SMGR 102 School Nutrition and Menu Planning (SP) 4 credits
Course presents the principles for planning menus to meet the nutritional needs of school age children. Nutrition requirements, functions and sources of nutrients and the digestion and absorption food are studied. Diet modification for a variety of health conditions is studied. Food preparation techniques for menu components are studied.
Lecture: 4 hours
Prerequisite: SMGR 101 with a grade of “C” or higher

SMGR 103 School Foodservice Management/Human Resources (SU) 4 credits
Course provides an explanation of the methods and records used in procurement, receiving, and storage of food and related items. Inventory control/methods are studied. Control measures for maintaining quality, quantity, and cost of food production are discussed. Financial management, record keeping and budgets are studied. Management principles, interpersonal skills, employee development and supervisory characteristics are discussed. Facility evaluation and planning for improvements is presented.
Lecture: 4 hours
Prerequisite: SMGR 102 with a grade of “C” or higher

Hospitality Management (HOSP)

HOSP 101 Researching the Hospitality and Tourism Industry (A, W, SP, SU) 3 credits
HOSP 101 offers a comprehensive look at the fascinating and challenging related fields in the hospitality industry: travel and tourism; lodging; food service, meetings, conventions and expositions; leisure and recreation. Customer service is emphasized, while guest speakers, field trips, and study of trade publications provide information on industry trends and career opportunities.
Lecture: 3 hours

HOSP 102 Foodservice Equipment (A, W, SP, SU) 2 credits
In this course, students will learn to operate, clean and describe preventive maintenance of commercial foodservice equipment and apply that knowledge in a laboratory setting. Basic knife skills and cooking techniques, following sanitation and safety guidelines, will be practiced. Appropriate uses for equipment and general equipment layout for safety, sanitation and efficiency will be discussed.
Lecture: 1 hour – Lab: 2 hours Lab fee: $17.00

HOSP 106 Food Laboratory I (W, SU) 3 credits
This is a laboratory course for registered Chef Apprentices. The course includes preparation of stocks, soups, sauces, entrees, stashes, vegetables, fruits and breakfast items. Also includes butchery, fish filleting and poultry de-boning. Students will develop and cost recipes, plan menus, requisition food, and prepare menu items.
Lecture: 1 hour – Lab: 4 hours
Prerequisites: HOSP 102, HOSP 122, and HOSP 107
Lab fee: $100.00

HOSP 107 Food Principles (A, W, SP) 5 credits
This is a course in basic food preparation, including the terminology and definitions used and the scientific principles involved in preparing food products. The course includes a detailed study of the principles of preparation and selection criteria for all categories of foods served in foodservice operations.
Lecture: 5 hours Lab fee: $5.00

HOSP 109 Food Production (SP) 3 credits
In this laboratory course, students will produce and serve marketable food products according to standardized recipes using food production equipment in a commercial kitchen environment. The products will be served in a dining room setting, with emphasis on customer service. The principles of safety and sanitation will be applied.
Lecture: 1 hour – Lab: 7 hours
Prerequisites: HOSP 102, HOSP 122
Corequisite: HOSP 107 Lab fee: $100.00

HOSP 110 Baking Principles (A) 3 credits
HOSP 110 is a course in the fundamentals of baking terminology, principles of baking, the characteristics and functions of the main ingredients used in bakery production, and an introduction to the equipment used for baking.
Lecture: 3 hours Lab fee: $5.00

HOSP 111 Principles of Baking Operations (SP) 3 credits
This course introduces the principles involved in operating a bakery department including recipe adjustment, recipe costing, purchasing of baking ingredients, storage procedures, and customer service.
Lecture: 3 hours Lab Fee: $5.00
Prerequisites: HOSP 110, 122

HOSP 112 Basic Yeast and Quick Breads (W) 4 credits
This is a laboratory course in which the fundamentals of producing basic yeast-raised and quick breads are studied. White breads, rolls, variety grain breads, specialty breads, sweet yeast-raised products and quick
breads are produced. Emphasis will be given to sanitation, safety, and equipment usage.
Lecture: 1 hour – Lab: 9 hours
Prerequisite: HOSP 110, 122 Lab fee: $60.00

HOSP 113 Pies and Pastries (W) 3 credits
This is a laboratory course in which the fundamentals of preparing a variety of pies and pastries are studied. A variety of pastry doughs and fillings are produced and finishing techniques are practiced. Emphasis will be given to sanitation, safety, and equipment usage.
Lecture: 1 hour – Lab: 4 hours
Prerequisites: HOSP 110, 122 Lab fee: $60.00

HOSP 114 Advanced Breads (SP) 4 credits
This course builds on the skills learned in HOSP 112 Basic Yeast and Quick Breads. Emphasis will focus on the principles and preparation of complex breads, e.g., artisan bread, Danish dough, puff dough, and pâte à choux using safe and sanitary methods. Industry standard products for commercial production will be introduced.
Lecture: 1 hour – Lab: 9 hours
Prerequisite: HOSP 112 Lab fee: $60.00

HOSP 115 Cakes, Cookies and Other Desserts (SU) 3 credits
HOSP 115 is a laboratory course in which the fundamentals of preparing a variety of cakes, cookies and other desserts are studied and produced, utilizing both scratch and convenience techniques. Production of restaurant style desserts, along with specialty or celebration styles, will be emphasized.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: HOSP 110, HOSP 122 Lab fee: $60.00

HOSP 116 Baked Goods and Dessert Presentation (SU) 3 credits
A laboratory course in which the styles of decorating and presenting baked goods is studied. Plate, buffet, and retail presentations are demonstrated and practiced.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: HOSP 110, HOSP 122 Lab fee: $60.00

HOSP 122 Hospitality Sanitation and Safety (A, W, SP, SU) 3 credits
This course presents a detailed study of the HACCP (Hazard Analysis Critical Control Points) procedures which include the control of bacteria, materials handling and safety practices to maintain a safe and healthy environment for the consumer in the food and lodging industry. Examination of laws and regulations related to safety, fire, and sanitation. Students must pass the applied Foodservice Sanitation examination from the National Restaurant Association Educational Foundation. Students will receive certificates from the National Restaurant Association Educational Foundation and from the Ohio Department of Health.
Lecture: 3 hours
Lab fee: $15.00

HOSP 123 Food Purchasing (A, SP) 3 credits
This course offers a working knowledge of procurement methods and procedures and record keeping (manual methods and computer applications) when purchasing, receiving, and storing food, equipment and nonfood supplies. Special emphasis is given to writing specifications, determining order quantities, evaluating product quality, and selecting suppliers. Field trips allow the student to see food processing operations and wholesale food markets.
Lecture: 3 hours
Prerequisites: HOSP 107 and DEV 031 or MATH 101 or MATH 102
Lab fee: $5.00

HOSP 143 Hospitality and Travel Law (A, SP, DL) 3 credits
This class provides a general knowledge of the law as it applies to the hospitality and tourism industry.
Lecture: 3 hours

HOSP 145 Lodging Operations (A, SP) 5 credits
This course provides students with a basic understanding of the lodging industry. It covers the activities of various hotel operating departments: front office, housekeeping, food and beverage, hotel purchasing, marketing, yield management, engineering, security, and hotel accounting. Emphasis will be placed on guest satisfaction.
Lecture: 4 hours – Lab: 2 hours Lab fee: $5.00

HOSP 153 Nutrition for a Healthy Lifestyle (A, W, SP, SU, DL) 5 credits
HOSP 153 explores the role of nutrition in establishing, promoting and maintaining good health. The composition and functions of foods, nutrition needs throughout the life cycle, and contemporary nutrition concerns are included in the course.
Lecture: 5 hours
Prerequisites: DEV 031 and placement into ENGL 101
Lab fee: $10.00

HOSP 154 Destination Geography (SU, W) 5 credits
This course provides a geographical and cultural study of all major regions of the world with emphasis on the most popular travel destinations. It includes lodging, points of interest, customer profile, and transportation types for each destination.
Lecture: 4 hours – Lab: 2 hours
Prerequisite: HOSP 154 Lab fee: $35.00

HOSP 157 Travel and Tourism Operations (A, SP) 5 credits
This course provides students with a basic understanding of the travel and tourism industry. Travel agency operations are covered, with students using a variety of reference materials to develop air and rail itineraries, reserve cars and hotels, calculate fares, and create tours and cruises. Government agencies and organizations that affect the industry are described. Also included is a framework for the development of tourism in the community and region.
Lecture: 5 hours

HOSP 203 Beverage Management (W, SU, DL) 3 credits
This course covers the classification, history and control of beer, wines and spirits. It includes Ohio liquor and legal regulations, inventory control, liquor dispensing systems, cash control, drink merchandising and alcohol responsibility. The art of mixology and wine and food affinity are also explored.
Lecture: 3 hours Lab fee: $20.00

HOSP 205 Records and Cost Control (A, SP) 4 credits
HOSP 205 covers the principles and procedures involved in an effective system of food, beverage, labor and sales control. Class emphasizes development and use of standards and calculation of actual costs.
Prerequisite: MATH 101 OR MATH 102
Lecture: 4 hours

HOSP 206 Management Accounting for Hospitality (W) 4 credits
This course looks at accounting theory and use of the Uniform System of Accounting as applied to the hospitality industry. It emphasizes development and use of financial statements and provides an overview and understanding of the need for budgets and budgeting.
Prerequisite: ACCT 106
Lecture: 4 hours

HOSP 214 International Cuisine (W, SU) 3 credits
This course focuses on the cuisines of the world. Students will research diverse countries and regions and cook from recipes that represent a variety of cultures, native foods, seasonings and flavors.
Lecture: 1 hour – Lab: 4 hours
Prerequisites: ENGL 102, HOSP 216 Lab fee: $100.00

HOSP 216 Food Laboratory II (A, SP) 3 credits
This is a laboratory course to follow HOSP 106 Food Laboratory I for
registered Chef Apprentices. It focuses on proper roasting, grilling, poaching, sautéing and braising of meats, seafood, and poultry with appropriate sauces. Classical preparation of consommé, bisque, and cream soups as well as starch and vegetable preparation are presented. Plated desserts are covered, too. Students will research and develop recipes and prepare and serve four-course menus in the required amount of time.

Lecture: 1 hour – Lab: 4 hours
Prerequisites: HOSP 106 and HOSP 107  Lab fee: $100.00

HOSP 217 Garde Manger (W, SU)  3 credits
A laboratory course including preparation and presentation of cold food items commonly produced in a garde manger station. Students will prepare garnishes, appetizers, salads, sandwiches, marinades, relishes, cold sauces and forcemeat items. Course introduces ice carving. Buffet presentation, including platters, bowls and plates, and culinary show guidelines and practices are covered.

Lecture: 1 hour – Lab: 4 hours
Prerequisite: Permission of instructor/chair  Lab fee: $100.00

HOSP 218 Fundamentals of Baking (A, SP)  3 credits
This class covers the fundamentals of baking and functions of ingredients for production of baked goods and dessert specialties. Proper use and care of equipment, as well as principles of safety and sanitation are emphasized.

Lecture: 1 hour – Lab: 4 hours
Prerequisite: Permission of instructor/chair  Lab fee: $60.00

HOSP 219 Food Production Management (W)  4 credits
This is a capstone laboratory course in which application of foodservice management will occur in a simulated restaurant. Students will plan menus, prepare food items, and serve the public to gain experience in various managerial positions in the front and back of the house. A grade of “C” or higher is required for graduation.

Lecture: 1 hour – Lab: 8 hours
Prerequisite: Permission of instructor/chair  Lab fee: $100.00

HOSP 223 Sports Nutrition (W, SP, DL)  3 credits
This course studies the role of sports nutrition in establishing, promoting and maintaining, optimal health for enhanced performance throughout the life cycle. The science of food nutrients, bioenergetics, and current recommendation specific to human performance are also included in this course.

Lecture: 3 hours
Prerequisite: HOSP 153 or equivalent

HOSP 224 Hospitality Supervision and Quality Management (W, SU)  5 credits
This course applies supervisory skills and quality management principles to the hospitality/tourism industry and includes the study of organization structures, performance standards, employee selection and retention processes, orientation and training programs, employee appraisal and performance improvement, and quality improvement techniques. A grade of “C” or higher is required for graduation.

Lecture: 5 hours
Prerequisite: BMGT 102  Lab fee: $5.00

HOSP 225 Menu Development (A, SP, SU)  3 credits
This course covers the principles of menu planning for a variety of foodservice operations. It includes merchandising techniques, layout and design, and pricing strategies. Consideration is given to food selection; nutritional requirements; food, labor, and other costs; equipment utilization, and computer application.

Lecture: 3 hours
Prerequisites: HOSP 153 and HOSP 107  Lab fee: $5.00

HOSP 226 Event Menu Planning (W)  3 credits
This course studies the role of nutrition in promoting good health. The composition and functions of foods, and a variety of nutrition concerns and restrictions are incorporated into the course. Principles of menu planning for a variety of events are reviewed. Course includes factors that impact menu item selection, merchandising techniques, layout and design and pricing strategies. Consideration is given to nutritional requirements, food, labor and other factors in menu design. (Does not replace HOSP 225)

Lecture: 3 hours

HOSP 227 Garde Manger II (W, SU)  3 credits
Students will acquire knowledge and develop competency skills in the preparation and artistic presentation of savory mousses, terrines, pates, galantines, and ballotines. The standards used in this regard are those specified in the Garde Manger section of the Training Log of the National Apprenticeship Training Program for Cooks, published by the American Culinary Federation (ACF).

Lecture: 1 hour – Lab: 4 hours
Prerequisites: HOSP 217  Lab fee: $100.00

HOSP 246 Hospitality Sales and Marketing (W, SP)  3 credits
This course covers selling theory, including all phases of the selling process, from initial contact to closing the sale in a variety of hospitality and tourism settings. Students will be presented with the basic knowledge and skills necessary to work within the marketing plan of a hospitality or tourism organization.

Lecture: 3 hours  Lab fee: $5.00

HOSP 257 Global Distribution Systems (W, SU, DL)  3 credits
This course is designed to combine student reading materials with hands-on computer experience in a simulated travel agency setting. The state-of-the-art CBL Viasonic GDS Training System APOLLO will be used to develop student skills in the utilization of the Global Distribution System. Working in the networked Windows environment, students will learn how to search for travel information, make airline reservations, and issue tickets.

Lecture: 1 hour – Lab: 5 hours
Prerequisite: HOSP 157 and CIT 101  Lab fee: $40.00

HOSP 270 Event Management (A, SP)  3 credits
This course will describe how event managers design, plan, market, and stage an event of any size. The course will describe the managing of staff and how to handle staffing problems. The course will describe the safety requirements that ensure staff and attendees’ safety. This course will also describe the legal compliance, risk management, financial control, and evaluations of the success of the event. This course will be coordinated with the catering events in HOSP 272 to put into action the planning, marketing, and contracting lessons discussed in HOSP 270.

Lecture: 3 hours
Prerequisites: MATH 101 and ENGL 100  Lab fee: $15.00

HOSP 272 Catering Services (A, SP)  2 credits
Class presents principles of and practice experiences in catered functions, on and off-premise. Students plan, organize and execute catering functions to meet the needs of clients and guests.

Lecture: 1 hour – Lab: 2 hours
Prerequisites: HOSP 122 and ENGL 101  Lab fee: $20.00

HOSP 273 Casino and Gaming Operations (On Demand)  3 credits
This course covers the history of the gaming industry, from its beginning to the present. HOSP 273 familiarizes students with gaming trends and emphasizes the operation and management of the gaming and casino industry. Upon completion of this course, the student should see the necessity of the intricate workings of all departments in a casino organization including marketing, accounting and finance, and customer relations.

Lecture: 3 hours
HOSP 286 Apprenticeship Final Project (SU, W)  2 credits
This is a capstone course required for students registered in the three-year American Culinary Federation National Apprenticeship Training Program. It involves preparation for and completion of national practical and written examinations. Evaluation of 6000 hours on-the-job training and documentation of completion of all required training objectives. Lecture: 2 hours
Prerequisite: Permission of instructor/chair  Lab fee: $100.00

HOSP 291 Hospitality Cooperative Work Experience I  (A, W, SP, SU, DL)  3 credits
This course offers work experience in the hospitality/tourism industry. A minimum of 200 hours will be spent in cooperative work experience, with one classroom hour per week in an on-campus seminar. This course is designed for Travel/Tourism/Hotel Management and Foodservice/Restaurant Management majors.
Lecture: 1 hour – Lab: 20 hours

HOSP 292 Hospitality Cooperative Work Experience II  (A, W, SP, SU, DL)  3 credits
This is a continuation of HOSP 291 offering work experience in the hospitality/tourism industry. A minimum of 200 hours will be spent in cooperative work experience, with one classroom hour per week in a seminar. This course is designed for Travel/Tourism/Hotel Management and Foodservice/Restaurant Management majors.
Lecture: 1 hour – Lab: 20 hours
Prerequisite: HOSP 291

HOSP 293 Hospitality Cooperative Work Experience I  (A, SP)  3 credits
This class presents work experience in the hospitality/tourism industry. A minimum of 200 hours will be spent in cooperative work experience, with one classroom hour per week in an on-campus seminar.
Lecture: 1 hour – Lab: 20 hours
Prerequisite: Chef Apprentice major  Lab fee: $100.00

HOSP 294 Hospitality Cooperative Work Experience II  (A, SP)  3 credits
This is a continuation of HOSP 293, providing work experience in the hospitality/tourism industry. A minimum of 200 hours will be spent in cooperative work experience, with one classroom hour per week in an on-campus seminar.
Lecture: 1 hour – Lab: 20 hours
Prerequisites: HOSP 293 and Chef Apprentice major  Lab fee: $100.00

HOSP 295 Hospitality Cooperative Work Experience III  (A, SP)  3 credits
This course is a continuation of HOSP 293 and HOSP 294 and is required for third-year chef apprentices. It offers on-the-job training in the foodservice industry following guidelines of the American Culinary Federation National Apprenticeship Training Program. One classroom hour per week will be spent in an on-campus seminar.
Lecture: 1 hour – Lab: 20 hours
Prerequisite: Permission of instructor/chair  Lab fee: $100.00

Human Resources Management (HRM)

HRM 121 Human Resources Management  (A, W, SP, SU, DL)  4 credits
This is an introductory course in Human Resources Management including the philosophy, principles, and legal aspects of human resources management and the roles of the manager and the human resources professional/department in this management function. The course focuses on the laws governing policymaking, recruiting, selection, training, evaluation, wage and salary administration, benefit programs, representation, and safety, and the employer’s obligations and the employee’s rights under these laws. Students use the Internet to research human resources issues. Distance Learning Students: Course content is provided online via streaming audio lectures. Other course materials are provided online and in a packet mailed to the beginning of the quarter; graded assignments are returned via mail. Fees course mailings are included in the distance learning lab fee.
Lecture: 4 hours
Prerequisite: BMGT 111 or LAWE 252 (Law Enforcement students only) or BMGT 218 (Supply Chain Management students) and ENGL 102
Lab fee: $10.00  Distance Learning Lab fee: $20.00

HRM 122 Human Resource Policy and Procedure Writing  (W, SU)  4 credits
The course provides an in-depth study of employment law, the recruiting process, and the selection process. It promotes a transition from “term paper writing” to formal policy writing, and from the basic application of employment law, business grammar, and policy writing skills through the development of an employment policy, procedure, and employee handbook summary of the policy. The course is offered at night winter quarters and during the day summer quarters.
Lecture: 2 hours – Lab: 5 hours
Prerequisites: HRM 121 and BOA 101 completed with a minimum grade of “C,” CIT 102 and ENGL 102  Lab fee: $10.00

HRM 124 Personnel Interviewing  (A, W, SP, SU)  4 credits
The course provides an in-depth study of the legal aspects of interviewing, the various types of interviews conducted in business, and interviewing techniques. Students participate, as both an interviewer and an interviewee, in selection, counseling, disciplinary, exit, and performance appraisal interview simulations. Interviewing techniques and skills are evaluated using videotape playback.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: HRM 121 (BMGT and HRM Technology students only) and COMM 105 or COMM 110  Lab fee: $10.00

HRM 220 Labor Relations  (A, W, SP, SU, DL)  5 credits
The course provides a study of labor relations including the history of the labor movement; the legislative history of labor law; in-depth study of the four major pieces of private sector collective bargaining legislation; a discussion of the State of Ohio collective bargaining law; the union organizing process and management responses; the collective bargaining process, grievance process, and arbitration process; and the differences in these processes in the public and private sectors. Students participate, as members of labor and management teams, in contract negotiations, a third-step grievance meeting, and grievance arbitration simulations. Distance Learning Students: Course content is provided online via streaming audio lectures. Other course materials are provided online and in a packet mailed to the beginning of the quarter; graded assignments are returned via mail. The fees for the rental audio tapes and course mailings are included in the distance learning lab fee.
Lecture: 3 hours – Lab 4 hours
Prerequisites: HRM 121 and MATH 102 or MATH 103  Lab fee: $10.00  Distance Learning Lab fee: $20.00

HRM 221 Staffing Under the Law  (A, SP)  4 credits
The course provides an in-depth study of the laws governing affirmative action, sexual and other forms of harassment, discipline, and termination, and the application of these laws through the development of policies, procedures, rules, regulations, and summary postings for the organization. The course is offered in the afternoon during autumn quarters and at night during spring quarters.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: HRM 121 and HRM 122 completed with a minimum grade of “C,” CIT 102, and MATH 135  Lab fee: $10.00
HRM 222 Monetary Compensation (A, SP) 4 credits
The course provides an in-depth study of the history, principles, and theories of a compensation package; the laws governing monetary compensation; and the application of these principles, theories and laws through the development of internal and external equity in monetary compensation including the job analysis process, the development of job descriptions and job specifications, and the job evaluation process. The course also addresses the development of monetary compensation policies and procedures. The course is offered in the afternoon during autumn quarters and at night during spring quarters.
Lecture: 4 hours
Prerequisites: HRM 121 and HRM 122 completed with a minimum grade of “C,” CIT 102, MATH 135 Lab fee: $10.00

HRM 224 Human Resources Records Management (W, SU, DL) 3 credits
This course provides an in-depth study of the records governing the employment relationship required by federal and state laws and the legal aspects of those records. The course also explores approaches to developing record keeping systems that meet professional and industry standards. Students are required to demonstrate skills through the development of legally sound records management policies and procedures.
NOTE: This course is offered exclusively in an online format.
Lecture: 3 hours
Prerequisites: HRM 121 and HRM 122 completed with a minimum grade of “C,” and CIT 102 Lab fee: $10.00

HRM 225 Workplace Safety (W, SU, DL) 3 credits
This course provides the student in the Human Resources Management Technology with an in-depth study of alcohol and drug use as they relate to contemporary workplace issues, violence in the workplace, AIDS and other communicable diseases as workplace issues, and management’s obligations and options under OSHA and other safety regulations. The course also focuses on the legal aspects of safety and the development of policies and procedures necessary for a company to address these issues.
NOTE: This course is exclusively in a hybrid format with class meetings occurring 5 Saturdays during the quarter, usually from 9:00 a.m. – 4:00 p.m.
Lecture: 3 hours
Prerequisites: HRM 121 and HRM 122 completed with a minimum grade of “C” Lab fee: $4.00

HRM 226 Mandatory Benefits (A, SP) 4 credits
This course provides an in-depth study of benefits mandated by federal law, including Social Security, Worker’s Compensation, Unemployment Compensation, Family and Medical Leave (FMLA), the Health Insurance Portability and Accountability Act (HIPAA), and the Consolidated Omnibus Budget Reconciliation Act (COBRA).
Lecture: 4 hours
Prerequisites: HRM 121 and HRM 122 completed with a minimum grade of “C,” MATH 103, ENGL 101, ENGL 102, and COMM 200 Lab fee: $10.00

HRM 227 Voluntary Benefits (A, SP, DL) 4 credits
This course provides an in-depth study of voluntary benefits: those benefits employers most commonly choose to offer to help attract and retain employees. The course will focus on health insurance options (medical, dental, vision, prescription drug, catastrophic illness) and the types of providers of these options (HMOs, PPOs, traditional carriers, HSAs), life insurance options (basic life, supplemental life, term life, and accidental death and dismemberment), short-term and long-term disability options, pension/retirement plan options, paycheck-not-worked options (holidays, vacations, sick leave, personal leave, bereavement leave, jury duty, military leave, and other PTO options), and miscellaneous benefit options (tuition reimbursement, child/elder care, safety equipment, social and sports programs).
Lecture: 4 hours
Prerequisites: HRM 121 and HRM 122 completed with a minimum grade of “C,” MATH 103, ENGL 101, ENGL 102, and COMM 200 Lab fee: $10.00

HRM 228 Employee Training (W, SU) 2 credits
This course provides students with the tools needed to develop and present effective training programs for an organization or to identify and evaluate the services of an outside training provider to meet the needs of the organization.
NOTE: This course is offered only at night during Winter Quarter and only during the day Summer Quarter.
Lecture: 1 hour – Lab: 3 hours
Prerequisites: HRM 121, CIT 102, ENGL 101, ENGL 102, and COMM 200 (all completed with a minimum grade of “C”)
Lab fee: $5.00

HRM 240 Administration of Human Resources Management (W, SU) 5 credits
As a part of the capstone sequence for the Human Resources Management Technology, this course provides a hands-on application environment wherein students serve as a “Board of Directors,” developing the full range of human resources policies, procedures, and programs. To demonstrate the depth and breadth of their knowledge, understanding, and skill, students are assigned three to six individual projects, in the major topic areas (employment, compensation, benefits, performance appraisal, discipline, safety, and training), in the form of presentations, the development of policies and/or procedures as appropriate to the presentation, and the development/submitting of documents as appropriate to the presentation. As a group, students review, revise, and approve or reject policy, procedure, and program recommendations made by the presenter.
NOTE: This course is offered only at night during winter and summer quarters.
Lecture: 0 hours – Lab: 10 hours
Prerequisites: HRM 121, 122, 124, 220, 221, 222, 224, 225, 226, 227, and 228 (all completed with a minimum grade of “C”)
Lab fee: $5.00

HRM 242 Human Resources Management Practicum (A, W, SP, SU) 2 credits
As a part of the capstone sequence for the Human Resources Management Technology, the course provides a guided work experience (minimum of 14 hours per week) in a human resources office or work environment providing human resources services. The student and the employer/place of employment determine exact duties. Students are responsible for securing their own practicum position.
Lecture: 0 hours – Lab: 14 hours
Prerequisites: HRM 121, 122, 124, 220, 221, 222, 224, 225, 226, 227, and 228 (all completed with a minimum grade of “C”), and with permission of Department Chair, requested two quarters in advance.
Corequisite: HRM 243 Lab fee: $2.00

HRM 243 Human Resources Management Practicum Seminar (A, W, SP, SU) 2 credits
As a part of the capstone sequence for the Human Resources Management Technology, the course provides for a discussion of the work experience (minimum of 14 hours per week) in a human resources office or work environment providing human resources services. The student and the employer/place of employment determine exact duties. Students are responsible for securing their own practicum position.
Lecture: 0 hours – Lab: 14 hours
Prerequisites: HRM 121, 122, 124, 220, 221, 222, 224, 225, 226, 227, and 228 (all completed with a minimum grade of “C”), and with permission of Department Chair, requested two quarters in advance.
Corequisite: HRM 242 Lab fee: $1.00
Humanities (HUM)

Students who enroll in humanities courses must have placed in ENGL 101 and are encouraged to either have completed ENGL 101 or to be enrolled in that course when scheduling a humanities course.

HUM 111 Civilization I (A, W, SP, SU, DL) 5 credits
Civilization I is a survey of the culture, ideas and values of human civilization from its origins in the Ancient World through the 15th century. Emphasis is on the intellectual and artistic achievements of the ancient Middle East, Classical Greece and Rome, the Christian and Arab-Islamic Middle Ages, and Renaissance Italy showing how culture reflects and influences economic, social and political development. Students are exposed to the creative process by reading from primary works of literature and philosophy and critically reviewing works of art, music, theater and dance, both in and out of class. Classes meet three hours per week in small groups for lecture and discussion and in combined sections for two hours per week for group cultural experiences.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 112 Civilization II (A, W, SP, SU, DL) 5 credits
Civilization II is a study of the development of the culture, ideas and values of the early modern world. Emphasis is on the Protestant Reformation, initial contacts between Europe and other cultures, the rise of modern science, the Enlightenment, the American and French Revolutions, the Industrial Revolution, Baroque, Classical, and Romantic styles in art, music and literature and the revolutionary theories of Karl Marx. Students are exposed to the creative process by reading from primary works of literature and philosophy and critically reviewing works of art, music, theater and dance, both in and out of class. Classes meet three hours per week in small groups for lecture and discussion and in combined sections for two hours per week for group cultural experiences.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 113 Civilization III (A, W, SP, SU, DL) 5 credits
Civilization III is a survey of the triumphs and failures of modern culture, ideas and values from 1850 to the present. Emphasis is on the conflicts and contradictions between the prevailing spirit of Liberalism, Capitalism, Nationalism and Imperialism from the perspective of the European and non-European worlds, the crises of Western capitalism and democracy and the Fascist and Communist responses, and the major issues confronting world civilization at the turn of the 21st century. Students are exposed to the creative process by reading from primary works of literature and philosophy and critically reviewing works of art, music, theater and dance, both in and out of class. Classes meet three hours per week in small groups for lecture and discussion and in combined sections for two hours per week for group cultural experiences.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 131 Chinese Civilization (W) 5 credits
This survey course is an introduction to the study of the history and intellectual, social, cultural and economic values of China. It explores the origins of the Chinese culture, the expansion and retrenchment of its dynasties, and the upheavals in the political system after 1911. It looks at scientific and technological developments as well as intellectual traditions (especially Confucianism) and how Buddhism influenced those traditions.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 132 Japanese Civilization (SP) 5 credits
This survey course is an introduction to the study of the history and intellectual, social, cultural, artistic and military values of Japan. It explores the origins of Japanese culture, the adaptation of Chinese culture to Japanese needs, the warrior class, Shinto and Buddhist religions, literature and the visual arts, and Japan’s place in the modern world.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 151 American Civilization to 1877 (A, W, SP, SU, DL) 5 credits
This course is a survey of American History from settlement through the Civil War and Reconstruction. HUM 151 places major emphasis on the relationship between historical events and the literature, art, music, major ideas, and popular culture which made up the American intellectual tradition. Students are exposed to the creative process by reading from primary works of literature and philosophy and critically reviewing works of art, music, theater and dance, both in and out of class.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 152 American Civilization Since 1877 (A, W, SP, SU, DL) 5 credits
HUM 152 is a survey of the development of the United States from a frontier society to an industrial world power in the 20th century. The course places major emphasis on the relationship between historical events and the literature, art, music, major ideas, and popular culture which have made up the American intellectual tradition. Students are exposed to the creative process by reading from primary works of literature and philosophy and critically reviewing works of art, music, theater and dance, both in and out of class.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 181 World Civilization I: Non-Western, Non-American Civilization to 1500 (A, SP) 5 credits
This course is a survey of non-Western, non-American civilization to 1500. It serves as an introduction to the study of history and to the intellectual, social, cultural and artistic values of the Far East, India, Middle East, Africa and South America.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 182 World Civilization II: Non-Western, Non-American Civilization from 1500 (W, SU) 5 credits
This course is a survey of non-Western, non-American civilization since 1500. It serves as an introduction to the study of history and to the intellectual, social, cultural and artistic values of the Far East, India, Middle East, Africa and South America.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 222 Classical Mythology (A, W, SP, SU, DL) 5 credits
HUM 222 is an introduction to the world of mythology, the human and the supernatural, the real and the fantastic through a study of myths from Greece and Rome. The course explores some of the religious ideas, traditions and values that distinguish one civilization from another, while also indicating universally shared themes. Attention will be given to cultural expressions of mythical themes in literature and art.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $7.00

HUM 224 African-American History from Emancipation (On Demand) 5 credits
This course is a survey of African-American history from the Civil War to present. Emphasis will be placed on the struggle for political, social and economic freedom as well as the contributions of African-Americans to the music, art, and literature of the United States. HUM 224 meets Humanities requirement for A.A.S. students.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $3.00
HUM 245 Music and Art Since 1945 (On Demand) 5 credits
This course presents a survey of the styles and subject matter of important contemporary works of music and visual art. Students will examine the wide spectrum of aural and visual expression that has developed since the Second World War such as aleatoric music, electronic music, abstract expressionism, performance art, pop and op art, minimalism, etc. Students also will examine the major intellectual and social issues of the day and the relationship between these issues and the styles and expressive content of contemporary music and art.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $3.00

HUM 251 Latin American Civilization (On Demand) 5 credits
This course is a general introduction to the history and cultures of Latin America through the study of literature, film and primary historical texts. HUM 251 will employ an interdisciplinary approach to explore the relationship between culture and the major historical, political and socioeconomic developments in Latin America from 1492 to the present.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $3.00

HUM 252 The Islamic World and the Middle East (On Demand) 5 credits
HUM 252 presents a survey of Islamic civilization from the birth of Muhammad to the destruction of the Ottoman Empire in the 20th century. Emphasis is placed on developing an understanding of the nature and diversity of the Islamic religion, an appreciation of the great cultural achievements of medieval Islam, and an awareness of the complexities of the problems of the contemporary Middle East. HUM 252 meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in history, social sciences and non-Western studies.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $3.00

HUM 253 History of China and Japan (On Demand) 5 credits
This course is a survey of the economic, social, political and cultural development of China and Japan from earliest times to present. HUM 253 meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in history, social sciences and non-Western studies.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $2.00

HUM 254 Introduction to African Literature (On Demand) 5 credits
HUM 254 offers a general survey of sub-Saharan African literature including the oral traditions that formed its background. Students will examine traditional African artistic expressions such as dance, drama, poetry and short story as well as novels produced by European-educated writers. Students will read literary texts originally written in English or in English translation.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $3.00

HUM 270 Comparative Religions (A, W, SP, SU, DL) 5 credits
This course introduces the study of religion through a historical overview and comparison of the major world religions of Judaism, Christianity, Islam, Buddhism and Hinduism through readings in their sacred texts in translation. Attention will be focused on the concepts, categories, theories and methods used by the various religious disciplines and how each of them addresses basic issues of the human condition. Also included will be an examination of Sectarianism and contemporary sects in America and the World. HUM 270 meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in comparative studies, religion and philosophy.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $3.00

HUM 290 Capstone Experience in the Humanities (On Demand) 3 credits
HUM 290 is a capstone course focusing on synthesis among the disciplines of the humanities, including but not limited to, history, classics, art history, music history and philosophy. Students will work on developing research techniques and methodologies and will apply these techniques to a project of their own design.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: Open only to A.A. and A.S. students preparing to graduate within two academic quarters. Lab fee: $2.00

HUM 299 Special Topics in Humanities (On Demand) 1–5 credits
Students explore special topics in humanities designed to meet specific needs.
Lecture: variable hours – Lab: 0 hours Lab fee: $2.00

Interactive Media (IMMT)

IMMT 100 Digital Literacy (DL) 2 credits
Several noted experts and organizations throughout the world have examined what it means to be ‘Digitally Literate’ in today’s society. Many have come to the same conclusion that we have in this course. Today, to be ‘Digitally Literate’ is to know how to use a computer for a few basic application skills such as word processing, presentations and spreadsheet operations as well as know how to safely use the Internet with its various parts and pieces. To that end, we have tailored our IMMT 100 Digital Literacy course after the well-known and accepted IC³ (Internet and Computing Core Certification) curriculum. Although this course does not automatically lead to certification, successful students who complete this course should be able to participate in one or all three certification test areas offered by IC³.
Lecture: 1 hour – Lab: 3 hours
Prerequisites: None Lab Fee: $20.00

IMMT 101 Principles of Interactive Media (A, W, SP, SU, DL) 3 credits
This is the first of the two course series introducing students to the products, tools, and environment of the interactive multimedia profession. This first course covers elements of communication, marketing, the Internet, Web development, digital media and graphic design. This course relies on industry Web sites to bring state-of-the-art information directly to the student in a timely manner.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: None Lab fee: $20

IMMT 102 Fundamentals of Video and Sound 2 credits
This course is designed to introduce students about how to use the power of audio and video to communicate. Instruction is delivered using a standard Macintosh computer and powerful Web 2.0 creation programs. Topics covered include media creation using sound, photo production, simple web page design, slide shows and basic video editing. This course is not intended for Interactive Media majors.
Lecture: 1 hours – Lab: 2 hours
Prerequisite: none Lab fee: $20

IMMT 111 Foundations of Digital Media (A, W, SP, SU) 3 credits
The second of a two-course series that expands on the required disciplines needed to function in the interactive multimedia industry. The primary focus in this course centers on designing, choosing software and scripting the interactive media project. This course details
IMMT 112 Fundamentals of Interactive Design 3 credits
This course deals with the basics of interactive media software including Fireworks, Dreamweaver and Flash. In Fireworks, students learn how to use the tools of Fireworks to create and edit web graphics, both vector and bitmap, work with layers, interactive buttons, components, symbols, optimization and web page layout. In Dreamweaver, students will learn how to use tables, basic CSS, layout and design for web. In Flash, students will learn to develop a working knowledge of various tools plus critical interface elements such as layers, scenes, nested symbols, and movie clips.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: IMMT 101 Lab Fee: $10

IMMT 115 Survey of the Digital Gaming Industry (A, SP) 3 credits
This course is a comprehensive examination of the digital games industry. Topics include: history, economics and structure of the industry, roles and skill sets of practitioners, creative processes and business practices, testing, publishing and marketing.
Lecture: 3 hours
Prerequisite: None Lab Fee: $5.00

IMMT 116 Storytelling for Games (W, SP) 3 credits
This course deals with common writing principles and theories used in the video gaming industry. In addition to basic writing principles students will learn the history of the story, game storytelling devices, character types, and verbal character development. Students will develop an appropriate story line for a game and a three act structured game story with appropriate cut-scenes and dialogue.
Lecture: 3 hours
Prerequisite: None Lab Fee: $5.00

IMMT 122 Digital Media Preparation (W, DL) 3 credits
This is the second of the two-course series on the required disciplines needed to function in the interactive multimedia profession. Primary focus in this course centers on planning, design and the software required in the completion of a multimedia project. This course is not intended for Interactive Media majors.
Lecture: 3 hour – Lab: 0 hours Lab Fee: $33.00

IMMT 123 Video Basics 2 credits
This course deals with basic digital editing. Students are introduced to the concepts of digitizing and editing video as well as output and distribution of edited media. This course will also examine basic audio and video editing techniques. Students will learn to successfully edit and distribute simple videos. Components include digital media file types, digitizing, basic editing techniques, compression standards and output options. IMMT 123 is for non-IMMT majors only.
Lecture: 2 hours- Labs: 0 hours
Prerequisite: Only non-IMMT majors may take this course Lab Fee: $20.00

IMMT 150 Videography and Editing (A, SP) 4 credits
This course deals with the use of audio and video production techniques to prepare output for various multimedia formats (e.g. DVDs, PDAs, interactive CDs, etc.) so as to achieve integrated marketing communications goals. Students are introduced to basic theories and practices of audio and video production. The audio component includes the use of microphones, mini disc recorders, mixing consoles, and digital audio workstations for a variety of sound collection and processing applications. The video component introduces basic concepts and skills in digital video productions and nonlinear video editing. Students will learn the theory and practice of digital nonlinear editing, including edit list management, off-line and online editing techniques.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: IMMT 101 Lab Fee: $36.00

IMMT 151 Audio Editing and Voice Over (W) 4 credits
This course is designed to develop an understanding of the relationship of audio production to various related media including multimedia and broadcast. Sound design and the creation and recording of audio assets are stressed. The course is structured around editing in a nonlinear environment and the associated standard digital editing practices. Students will learn how to utilize a digital audio workstation in a typical production environment.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: IMMT 150 Lab Fee: $36.00

IMMT 152 Narrative Storytelling and Production (W) 4 credits
This course provides students with an overview of genre storytelling. Students will analyze specific genres, write an appropriate script for the genre, storyboard, and produce a genre-focused video. In addition to genre storytelling, students will learn the proper video and audio aesthetics for telling a specific story (dialogue framing, planning action scenes, using boom mics, scoring a video). Image capture/digitizing and editing at a digital workstation will be highlighted.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: IMMT 150, IMMT 153 Lab Fee: $36.00

IMMT 153 Screenwriting for Digital Video and Sound (A, SP) 3 credits
This course deals with writing principles and theories used in the digital audio and video fields. In addition to basic writing principles, students will learn to develop a treatment, plan characters, write effective scenes, and a screenplay for use in both audio and video.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: IMMT 101 Lab Fee: $22.00

IMMT 155 Foley Art and Sound Design (SP) 4 credits
This course will cover both the production and post-production techniques associated with the creation of audio assets for use in digital media. Students will be required to plan and produce multimedia programs with audio assets that the individual student creates. The course provides an advanced understanding of audio equipment for digital production in the field and in the recording studio. The use of ProTools technology is emphasized.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 151 Lab Fee: $20.00

IMMT 157 Sports Broadcasting (A) 4 credits
This course provides students with an overview of sports broadcasting. Students will analyze sporting events, write an appropriate treatment for the video, create an appropriate blocking plan, and produce videos of Columbus State Sporting events that are broadcast ready. In addition to sport storytelling, students will learn the proper video and audio aesthetics for creating videos of sporting events (action shots, finding drama in the event, shooting live footage, adding proper announcing tracks). Image capture/digitizing, editing at a digital work station, and broadcast video will be highlighted.
Lecture: 4 hours - Lab: 0 hours
Prerequisite: IMMT 150 Lab Fee: $36.00

IMMT 158 Motion Graphics (After Effects) (SP) 3 credits
In this course students will learn fundamentals of how to use After Effects to create motion graphics by integrating interactive media, sound, and video into interesting compositions. Students will learn how to set keyframes on a timeline and work with transform properties, motion paths, masks, and effects.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: IMMT 150, 240 Lab Fee: $20.00
IMMT 159 Music Video Production (SP) 4 credits
This course provides students with an overview of music video production. Students will analyze music genre specific videos, write an appropriate treatment for the video, storyboard, and produce two music videos (one for a local musician/group). In addition to music video storytelling, students will learn the proper video and audio aesthetics for creating a music video (group shoots, directing the band, shooting live footage, adding proper audio tracks). Image capture/digitizing, editing at a digital work station, and web conversion will be highlighted.
Lecture: 4 hours - Lab: 0 hours
Prerequisite: IMMT 150 Lab Fee: $36.00

IMMT 188 Introduction to 3D Game Production (W, SU) 4 credits
This course is a nondigital introduction to the concepts of game design. Topic covered include what makes a good game, brainstorming game concepts, setting game parameters, allocating point systems and gameplay mechanics. Through a variety of individual and group-oriented design challenges, students will develop a better understanding of game theory.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: IMMT 115 and IMMT 116 Lab Fee: $15.00

IMMT 213 Designing an e-Commerce Website (A, SP) 3 credits
(See Computer Information Technology CIT 213.)

IMMT 214 Web Database Development (W) 3 credits
(See Computer Information Technology CIT 214.)

IMMT 215 Introduction to Video Game Development (W) 4 credits
Students will be introduced to the open architecture of a working 3D game engine through lessons in programming, as it applies to the implementation of 3D art and animation. The course will also introduce students to the production pipeline for video game projects. Creating basic levels of design and interactivity in 2D and 3D will also be covered.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: IMMT 188 Lab Fee: $15.00

IMMT 216 Media Graphics and Optimization (A, W, SP, SU) 4 credits
Image input, storage and retrieval using the industry standard Adobe Photoshop/Fireworks are the focus of this course. Each electronic photograph must be handled from digitization, through augmentation and final storage or utilization phases. Files will be transported over the Internet utilizing industry-standard file compression and transmission technologies.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: IMMT 111 or GRPH 251 Lab Fee: $30.00

IMMT 217 Video Editing (W, SU) 3 credits
The basic principles of digital video are presented. Course covers the standards and methods for recording/editing and the interconnection of digital video. Concepts of digital conversation, video coding and processing, and digital audio with video are presented.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: IMMT 111 Lab fee: $33.00

IMMT 233 3D Environment Design and Development (SP) 4 credits
This course covers the process through which video game environments are designed and executed for use in a suitable game engine - from the 2-dimensional concept phase to 3-dimensional modeling, surfaced, creating triggerable events and lighting.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 242 & GRPH 116 Lab fee: $30.00

IMMT 236 3D Modeling (W, SP) 4 credits
This course provides students with an overview of how to model, render, light, and animate in 3D environments using industry standard software.

IMMT 237 Beginning Flash [Design] (A, SP) 4 credits
This course provides students with an overview of how to begin, storyboard, create and design a fully functional Flash Web site. This course surveys the major sources of businesses that use Flash. Topics covered include becoming familiar with the palettes and tool box, new design, and drawing techniques, using Flash as an authoring tool, and understanding and applying Flash's expanded actions and scripting capabilities.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: IMMT 216 or GRPH 243 Lab fee: $33.00

IMMT 238 Intermediate Flash [User Interaction with ActionScript] (W) 4 credits
Scripting is an accessible and powerful form of computer programming that designers and multimedia developers can use to increase the level of interactivity, optimize, and enhance their multimedia web projects. The purpose of the course is to teach the core concepts of scripting as they apply to multimedia and Web development.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 237

IMMT 239 Advanced Flash [Interactive Development-Gaming] (A) 4 credits
Building on the previous two courses (IMMT 237, 238), students learn deeper interactive scripting capabilities of Flash. This course briefly details the science of game development using the Flash software, including design, story character development, the physics and motion of a game, and audio issues. Many of the latest features of Flash CS3 are covered, including the new sound channels, bitmap caching, texture pages, and more. Some other important issues will be discussed including, how to add effects to games, including motion blur and depth blur, flow effects, drop shadow, bevel with highlights, and video with alpha. Through this course, a variety of games are created using the power of Flash and the most recent advancements in ActionScript 3.0. With a basic knowledge of Flash and the techniques provided here, developers will be able to enhance their productivity and produce high quality games that make a real impact.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: IMMT 238 Lab fee: $33.00

IMMT 240 Documentary Storytelling and Production (SP) 4 credits
This course provides students with an overview of documentary storytelling. Students will analyze documentaries, write appropriate scripts for the documentary, storyboard, and produce a documentary video that has relevance to the local area. Students will also learn the proper video and audio aesthetics for telling the documentary (interviewing, developing a narrative from footage, framing shots, documentary assets, etc.). Image capture/digitizing and editing at a digital workstation will be highlighted.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 150, IMMT 153 Lab Fee: $36.00

IMMT 241 Cascading Style Sheets 4 credits
This course deals with basic and intermediate understanding of developing sites using Cascading Style Sheets. Components include CSS essentials, learning to build effective navigation and page layouts, working with typography, colors, backgrounds, and white space. The basics of HTML should be understood before entering this class.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 111 Lab Fee: $15.00
IMMT 242 Advanced 3D Computer Modeling--MAYA II (A, SP) 4 credits
This course extends beyond both the 3D computer modeling and animation courses to introduce students to advanced methods and features within the Maya 3D software. Upon completion of this course, students will understand more complex modeling, texturing, lighting, animation, and rendering principles found within this program. Techniques taught within this class will offer more skills to provide them with an understanding of what is to be expected within the game development industry and how they operate. Finally, a movie short will be produced through rendering a camera fly-thru within Maya and compiling the rendered frames in a non-linear editing program.
Lecture: 3 hours - Lab: 2 hours
Prerequisite: IMMT 236 Lab Fee: $15.00

IMMT 243 3D Character Design and Development (SP) 4 credits
This course focuses on the production process of character creation for video games – from concept and 3D modeling to surfacing, normal mapping, rigging and animating. Finally, students will explore the use of a scripting language as it applies to character setup and animation. A complete character will be developed for the final project.
Lecture: 3 hours - Lab: 2 hours
Prerequisites: IMMT 245 and GRPH 216 Lab Fee: $15.00

IMMT 245 3D Animation (AU, SP) 4 credits
This course extends beyond the 3D computer-modeling course and introduces students to an overview of animation and rendering through using Maya. Upon completion of this course, students will understand basic animation principles, how to apply technical animation techniques to 3D objects, and create a sense of life within the 3D environment. Finally, a movie short will be produced through rendering their characters within Maya and compiling them in a non-linear editing program.
Lecture: 2 hours - Lab: 4 hours
Prerequisites: IMMT 236 and GRPH 116 Lab Fee: $30.00

IMMT 248 Programming for Video Games (A) 4 credits
This course introduces students to the basics of 2D game programming using the JAVA language. It starts out by explaining the basics of writing a simple 2D vector-based game (i.e., using lines and filled polygons) that evolves into a fully featured sprite-based game by the end of the course. Students will learn about Java’s graphics classes, and how to get input from the user and how to play sound effects and music – all within the context of an online game. Previous knowledge of Java is recommended, but not required; students who have never used Java before should be able to keep up if they keep a Java primer or reference book handy.
Lecture: 3 hours – Lab: 2 hours
Prerequisites: IMMT 215 and IMMT 239 Lab Fee: $15.00

IMMT 249 Corporate and Instructional Video Production (SU) 4 credits
This course is designed to expand student understanding of video production in a corporate environment. Students will learn how to tell appropriate corporate and instructional stories. Techniques and aesthetics for corporate videos will be a main focus (framing, steadicam movement, costumes, casting, etc.). Advanced skills in image capture/digitizing, titles, and editing at a digital workstation will be developed through the creation of comprehensive video projects for internal and nonprofit organizations.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 150, IMMT 153 and IMMT 152
Lab Fee: $36.00

IMMT 250 Document Transfer Using Acrobat (A, SP, DL) 3 credits
Adobe Acrobat facilitates the creation of PDF documents, the industry-standard format for cross platform document delivery. This course will present an overview of Adobe Acrobat, its use and application in production, with emphasis on generating Acrobat PDF files for integration and delivery in a pre-press environment and on the Web. Students must have access to Adobe Acrobat 6.0 software (not just the reader).
Lecture: 3 hours – Lab: 0 hours Lab Fee: $22.00

IMMT 251 Multimedia Practicum (A, W, SP, SU, DL) 4 credits
This practicum offers supervised, on-the-job application of knowledge and skills acquired in the classroom. Internship applications must be filed with the department at least 2 months prior to internship start date.
Lecture: 0 hours – Lab: 28 hours
Prerequisites: IMMT 101, IMMT 111, IMMT 216, and permission of instructor; contact the Interactive Media Dept. for details
Corequisite: IMMT 252 Lab fee: $3.00

IMMT 252 Multimedia Seminar (A, W, SP, SU, DL) 1 credit
IMMT 252 explores the application of business knowledge to specific areas of on-the-job practicum experience. Internship applications must be filed with the department at least 2 months prior to internship start date.
Seminar: 1 hour
Prerequisites: IMMT 101, IMMT 111, IMMT 216 and permission of instructor; contact the Interactive Media Dept. for details.
Corequisite: IMMT 251 Lab fee: $3.00

IMMT 256 DVD Development (SU) 4 credits
Students will develop a DVD demo reel with the use of Avid software. Topics will include DVD workflow, preparing video assets, compressing video for DVD, DVD menus, and promotion using DVD covers. At the end of the course, students will be able to develop their own DVD demo reel for external use in locating a professional position.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: IMMT 151, IMMT 155, IMMT 249 Lab Fee: $36.00

IMMT 260 Web Publishing Site Design (W, SP, SU) 4 credits
This course provides the student with an overview of how to begin, storyboard, create and design a fully functional Web site. The software Dreamweaver is a professional authoring tool for creating and managing Web pages. Topics covered include becoming familiar with the palettes and tool box, design techniques, using Dreamweaver as an authoring tool, understanding and applying Dreamweaver’s expanded scripting capabilities.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: IMMT 101, IMMT 111 Lab fee: $30.00

IMMT 263 Video Game Development I (W) 3 credits
Using the technical skills introduced in IMMT 215, the students in this capstone course will experience a real-world environment of team-based production. Students will practice their communication and collaboration skills in designing and executing a basic game concept.
Lecture: 1 hour - Lab: 4 hours
Prerequisites: IMMT 215 Lab Fee: $15.00

IMMT 264 Video Game Development II (SP) 3 credits
The second capstone course is the continuation of IMMT 263. Team-based projects will continue development and features will be added. Emphasis will be placed on evaluation of code, as well as refinement of placeholder art and animation.
Lecture: 1 hour – Lab: 4 hours
Prerequisites: IMMT 263 Lab Fee: $15.00

IMMT 271 Interactive Portfolio Development (A, SP) 4 credits
Thirty weeks of Flash design and development will assist students in building confidence and focus when marketing themselves. Students will take that knowledge and author their own interactive CD resume for external use in locating a professional job.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: IMMT 239 Lab fee: $33.00

IMMT 280 Rich Media Communications (Adobe Flash) 4 credits
Adobe Flash is one of, if not the leading, Internet technology tool for creating "Rich Media" Web pages. Statistics show that over 95% of Internet users have Flash-capable Web browsers and designers take advantage of that ubiquity. This course follows the guidance of the Adobe Certified Associate program objectives for their 'Rich Media Communications'
Media Communications (Adobe Dreamweaver) 4 credits
Adobe Dreamweaver is one of the leading Web page/site software tools used in the industry today. This course follows a curriculum directed by Adobe, which centers on the Adobe Dreamweaver software application. This course prepares students for testing in the \textit{Adobe Certified Associate ‘Web Communications’} program. Upon successful conclusion of this course material, students will participate in a certification test from Adobe. The fee for this test is included in the lab fee. Successful test takers receive a certificate of accomplishment directly from Adobe in their Adobe Certified Associate program for Web Communications. The course does not guarantee success for students taking the certification test, but is a useful and targeted preparatory tool for them prior to taking that certification test. Students taking this course should have \textit{FAMILIARITY WITH COMPUTERS, INTERNET, EMAIL, AND BLACKBOARD} and receive permission of instructor (call IM Department \{614\} 287-5010).
Lecture: 2 hours – Lab: 4 hours Lab fee: $52.00

Interpreting /ASL Education (ITT)

ITT 110 Introduction to Interpreting (A) 5 credits
This course is designed to provide students with an overview of the field of interpreting. Topics of study include a historical overview, culture and communication, terminology, interpreter’s role, ethics and decision-making, and career options.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Acceptance into the ITT program after attending one Mandatory Information Session with the program coordinator and completing application Corequisite: ITT 143 Lab fee: $15.00

ITT 123 Specialized Interpreting/Transliterating (SP) 3 credits
This course introduces the student to special vocabulary, skills, and knowledge needed to interpret in special situations. It looks at the ethical considerations in these settings as well. These situations include artistic interpreting, interpreting for deaf/blind persons, and video relay interpreting.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: ITT 217 Lab fee: $15.00

ITT 125 Ethics and Decision Making for Interpreters (W) 2 credits
This course is a continuation of the ethics and decision-making topic introduced in ITT 110. Students will continue to explore the role that ethical decision-making has on them as they enter the interpreting profession. Students will focus on how the RID Code of Professional Conduct and interpreting theories will impact their decision-making.
Lecture: 1 hour – Lab: 2 hours
Prerequisites: ITT 110, 143, 150 Corequisites: ITT 144, 129, 205 Lab fee: $5.00
ITT 101   Lab fee:  $15.00

Lecture:  4 hours – Lab: 2 hours

of this unique community is expanded.

Based on cultural values of the deaf community, the students' knowledge to a greater variety of interaction activities. Whereas these activities are

In Intermediate ASL II, students' production and comprehension skills expand their ability to produce and comprehend the language as used in the two languages.

In Intermediate ASL II, students' production and comprehension skills continue to be emphasized. Additional information about the deaf community is introduced via outside readings, class discussion and required cultural experiences outside of class time. This class is an Entrance Requirement for admission into the Interpreting Associate Degree program.

Lecture:  4 hours – Lab: 2 hours

Prerequisite: ITT 141
Corequisite: ITT 142   Lab fee: $15.00

ITT 142 Beginning American Sign Language II (W, SU)   5 credits

As the final course in this five-course series, ITT 145 provides students with opportunities to expand their production and comprehension skills with American Sign Language. Communication activities focus on advanced functions of language usage. Study of the cultural aspects of the deaf community is continued.

Lecture:  4 hours – Lab: 2 hours
Prerequisite: ITT 144 (grade of “C” or better) and placement into ENGL 101   Lab fee: $15.00

ITT 145 Advanced American Sign Language I (A, SP)   5 credits

This course begins with a series of visual readiness activities as a way of introducing the students to, and preparing them for, a language in a visual modality. The course utilizes a practical approach to teaching vocabulary, grammar, and the cultural aspects through “real life” conversational experiences. The student is further acclimated to the new modality of this language via classroom experiences conducted without voice. Additional information about the deaf community is introduced via outside readings, class discussion and required cultural experiences outside of class time. This class is an Entrance Requirement for admission into the Interpreting Associate Degree program.

Lecture:  4 hours – Lab: 2 hours
Prerequisite: Placement into ENGL 101   Lab fee: $15.00

ITT 143 Intermediate American Sign Language I (A, SP)   5 credits

This course offers students the opportunity to work on expressive and receptive fingerspelling. The emphasis of this course is on using fingerspelling in context. Opportunities are provided for the students to work with videotaped materials as well as live models.

Lecture:  1 hour – Lab: 2 hours
Prerequisite: ITT 141
Corequisite: ITT 142   Lab fee: $15.00

ITT 130 Fingerspelling (W, SU)   2 credits

ITT 110, 120, 143 (grades of “C” or better)

Corequisites: ITT 125, 205, and 144   Lab fee: $15

As interpreting students begin to learn the skill of interpreting, their knowledge of current interpreting theory is critical. The most relevant and up-to-date research will be examined and discussed as it applies to the profession. Topics will include models of interpreting, processing, prosody, and discourse analysis.

Prerequisites: ITT 110, 120, 143 (grades of “C” or better)

Corequisites: ITT 125, 205, and 144   Lab fee: $15

ITT 140 Interpretive Analysis (W, SU)   3 credits

This course examines the challenges that are unique to religious interpreting settings. Students will learn about the basic beliefs, terminology, sacred texts, and worship behaviors of a variety of denominations. Specialized vocabulary for these denominations is emphasized.

Lecture:  2 hours – Lab: 1 hour
Prerequisite: ITT 144 or permission of instructor   Lab fee: $10.00

ITT 172 History of the Deaf Community (On Demand)   2 credits

This course offers an introduction to general linguistics, and provides an in-depth analysis of the major grammatical features of American Sign Language. Comparisons are made between English and American Sign Language, noting how grammatical functions are performed differently in the two languages.

Lecture:  2 hours – Lab: 2 hours
Prerequisite: ITT 143 or permission of instructor   Lab fee: $5.00

ITT 170 Conversational ASL (On Demand)   2 credits

This course continues to expand the ASL skills of students beyond ASL V. Students will focus on topics such as narratives, turn-taking, classifiers, and use of space as they apply to ASL conversations.

Lecture:  2 hours – Lab 0 hours
Prerequisite: ITT 145 or permission of instructor   Lab fee: $5.00

ITT 171 Gesturing and Visual Readiness (On Demand)   1 credit

This course gives interpreting majors the opportunity to further develop their visual readiness and ability to think in pictures, instead of words. The focus is on using the body and face to give meaning.

Lecture:  1 hour – Lab: 0 hours   Lab fee: $5.00

ITT 173 Script Analysis and Translation (On Demand)   2 credits

Using a play script, students will learn the process required to translate the script from written English to signed ASL. Analyzing the script for meaning, examining sign choices, considering character development, and incorporating artistic presence will be developed. For the final project, students perform the translation that they have completed.

Lecture:  1 hour – Lab: 1 hour
Prerequisite: ITT 143 or permission of instructor   Lab fee: $10.00

ITT 174 Religious Interpreting (On Demand)   3 credits

Using a play script, students will learn the process required to translate the script from written English to signed ASL. Analyzing the script for meaning, examining sign choices, considering character development, and incorporating artistic presence will be developed. For the final project, students perform the translation that they have completed.

Lecture:  3 hours – Lab: 0 hours
Prerequisite: ITT 202 or permission of instructor   Lab fee: $10.00

ITT 175 Text Preparation and Analysis (On Demand)   3 credits

This course gives interpreting majors the opportunity to further develop their ability to prepare and analyze text for interpreting. Topics include comprehension of the source material, multiple meaning, discrimination, and inference as they pertain to determining appropriate message transfer.

Lecture:  3 hours – Lab: 0 hours
Prerequisite: ITT 202 or permission of instructor   Lab fee: $10.00

ITT 205 Consecutive Interpreting I (W)   4 credits

This course is a theoretical and practical “hands-on” approach to the process of consecutive sign language interpreting. The student will be
actively learning how to identify the message in the source language and convey it accurately into the target language.

Lecture: 3 hours – Lab: 2 hours
Prerequisites: ITT 110, 150, 143 (grades of “C” or better)
Corequisites: ITT 125, 129, 144 Lab fee: $15.00

ITT 206 Consecutive Interpreting II (SP) 4 credits
This course is a continuation of ITT 205. As such, the students continue the process of actively learning how to identify the meaning of the source message and convey it accurately into the target language. This course places more emphasis on the practical “hands-on” dialogue setting and increasing the accuracy and complexity of the interpreting process.
Lecture: 3 hour – Lab: 2 hours
Prerequisites: ITT 205, 125, 129, 144 (grades of “C” or better)
Corequisite: ITT 234 and ITT 145 Lab fee: $15.00

ITT 207 Consecutive Interpreting III (SU) 2 credits
This course continues to increase students’ knowledge and skills of consecutive interpreting. An increased focus is placed on “real life” situational experiences involving more complex interpreting settings.
Lecture: 1 hour – Lab: 2 hours
Prerequisites: ITT 206, 145 and 234 (grades of “C” or better)
Corequisite: ITT 215, 221 Lab fee: $15.00

ITT 215 Simultaneous Interpreting I (SU) 2 credits
This course is a theoretical and practical hands-on approach to the process of simultaneous interpreting. The student will actively learn how to identify the meaning of the source language message and render that meaning appropriately into the target language. An emphasis on “real life” situational experiences is used.
Lecture: 1 hour – Lab: 2 hours
Prerequisites: ITT 234, 145, 206 (grades of “C” or better)
Corequisite: ITT 207, 221

ITT 216 Simultaneous Interpreting II (AU) 3 credits
This course is a continuation of ITT 215. Students continue to improve their simultaneous interpreting skills in a variety of “real life” situational experiences.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: ITT 207, 215, 221 with grades of “C” or better
Corequisites: ITT 222, 235 Lab fee: $15.00

ITT 217 Simultaneous Interpreting III (W) 3 credits
This course is a continuation of ITT 216. Students will continue to apply their simultaneous interpreting skills to more complex and demanding interpreting situations.
Lecture: 2 hour – Lab: 2 hours
Prerequisites: ITT 216, 222, 235 (grades of “C” or better)
Lab fee: $15.00

ITT 221 Sign to Voice Interpreting/Transliterating I (SU) 3 credits
This course provides students with additional experience with the process of sign to voice interpreting... Students will practice with a variety of deaf and hard of hearing individuals to enhance team and solo voicing skills.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: ITT 234, 145, 206, (grades of “C” or better)
Corequisite: ITT 207, 215 Lab fee: $15.00

ITT 222 Sign to Voice Interpreting/Transliterating II (AU) 3 credits
As a continuation of ITT 221, students continue to improve their Sign to Voice skills as they experience more complex and demanding settings with a variety of deaf and hard of hearing individuals.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: ITT 207, 215, 221 (grades of “C” or better)
Corequisite: 216, 235 Lab fee: $15.00

ITT 234 Health Care Interpreting (SU) 2 credits
This course introduces the student to special vocabulary, skills, and knowl-
**Japanese (JAPN)**

**JAPN 101 Elementary Japanese I (A, W, SU)**  5 credits  
Course introduces elements of standard modern colloquial Japanese grammar, with emphasis on oral communications and culture. Students will learn to hear and reproduce the sounds of modern Japanese accurately; handle basic interactive skills such as greetings, invitations and apologies; and learn about cultural factors that are reflected in the language.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: Placement into ENGL 101  Lab fee:  $6.00

**JAPN 102 Elementary Japanese II (W, SP, SU)**  5 credits  
This course is a continuation of JAPN 101, with further development of reading and writing skills and further study of culture. JAPN 102 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: “C” or higher in JAPN 101  Lab fee:  $6.00

**JAPN 103 Intermediate Japanese I (SP)**  5 credits  
This course is a continuation of JAPN 102, with further development of reading and writing skills and further study of culture. JAPN 103 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: “C” or higher in JAPN 102  Lab fee:  $6.00

**JAPN 104 Intermediate Japanese II (SU)**  5 credits  
JAPN 104 is a continuation of JAPN 103, with further development of reading and writing skills and further study of culture. JAPN 104 meets elective requirements in the Associate of Arts and Associate of Sciences degree programs and transfer requirements in foreign languages and literature.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: “C” or higher in JAPN 103  Lab fee:  $6.00

**JAPN 109 Special Topics in Japanese (On Demand)**  1–5 credits  
This course offers students an opportunity to examine selected topics in Japanese in detail.  
Prerequisite: Varies  Lab fee:  $2.00

---

**Italian (ITAL)**

**ITAL 101 Elementary Italian I (A, W, SP)**  5 credits  
ITAL 101 presents language instruction through the use of texts, audio/visual, and other selected materials to actively and proficiently communicate in the targeted language. This course also operates on developing student’s historical, and cultural consciousness through the use of film, art, music and a wide range of cultural activities particular to the Italian culture. Encourages analytical thinking, individual and group participation and strengthens writing, reading and comprehension skills.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: Placement into ENGL 101  Lab fee:  $6.00

**ITAL 102 Elementary Italian II (W, SP, SU)**  5 credits  
This course is a continuation of ITAL 101, with further development of listening, reading, speaking, and writing skills and further study of Italian culture. It meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: ITAL 101 with a grade of “C” or better  Lab fee:  $6.00

**ITAL 103 Intermediate Italian I (SP)**  5 credits  
ITAL 103 offers continued study of the Italian language and development of listening, reading, speaking, and writing skills. Readings from contemporary Italian culture and literature are employed. ITAL 103 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: ITAL 102 with a grade of “C” or better  Lab fee:  $6.00

**ITAL 104 Intermediate Italian II (SU)**  5 credits  
ITAL 104 focuses on the reading and discussion of Italian short stories, novels, plays, newspapers, and magazines, emphasizing literary appreciation and the development of Italian culture. Course meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature programs.  
Lecture:  5 hours – Lab: 0 hours  
Prerequisite: ITAL 103 with a grade of “C” or better  Lab fee:  $6.00

**ITAL 299 Special Topics in Italian (On Demand)**  1–5 credits  
ITAL 299 offers students an opportunity to examine selected topics in Italian in detail.  
Prerequisite: Varies  Lab fee:  $2.00

---

**Landscape Design/Build (LAND)**

**LAND 100 Introduction to Landscape Profession (A, W, SP, SU)**  2 credits  
This course is an overview of the American Landscape movement with historical, environmental, design, horticultural and professional applications.  
Lecture:  2 hours  Lab fee:  $10.00

**LAND 101 Landscape Principles (A, W, SP, SU)**  3 credits  
LAND 101 Landscape Principles will study the basic components of landscape design and those elements, that when combined together create such designs.  
Lecture:  2 hours – Lab: 3 hours

**LAND 102 Residential Landscape Design (A, W)**  4 credits  
This course will study the application of landscape design principles to construction situations, design vs. style, performing site inventory and analysis, and drafting basic projects.  
Lecture:  2 hours – Lab: 6 hours  
Prerequisites:  ARCH 110, ARCH 112 and LAND 101  Lab fee:  $20.00

**LAND 104 Specialty Gardens (W)**  3 credits  
LAND 104 Specialty Gardens will study the history, development and basic design of gardens including Estate, Victorian, Colonial, Patio, Water, etc. The class will combine both in-class and field experience.  
Lecture:  2 hours – Lab: 3 hours  
Lab fee:  $15.00

**LAND 105 Spring Landscape Plants (SP, SU)**  4 credits  
This course will study the identification parameters, landscape features and growing conditions of trees and shrubs of the Midwest climate zone. This class will combine both in-class and field experience.  
Lecture:  3 hours – Lab: 3 hours  
Lab fee:  $10.00

**LAND 107 Landscape Maintenance (W, SP)**  3 credits  
LAND 107 Landscape Maintenance will be discussed with an emphasis on procedures best suited to promote optimum growth and aesthetic qualities of landscape plants. Other areas include soil structure, amendments, pruning and fertilization.  
Lecture:  2 hours – Lab: 3 hours  
Lab fee:  $10.00

**LAND 108 Herbaceous Plants (SP, SU)**  3 credits  
This course will study the identification parameters, landscape features and growing conditions of herbaceous flowering plants such as annuals,
perennials, bulbs, and herbs. Design of perennial gardens will also be covered.
Lecture: 2 hours – Lab: 3 hours Lab fee: $15.00

LAND 109 Landscape Arboriculture (A, W) 3 credits
This course introduces the basic principles of tree biology and care. Arboricultural practices will be discussed and performed
Lecture: 2 hours – Lab: 2 hours
Prerequisite: LAND 205 Lab fee: $15.00

LAND 110 Landscape Computer Applications (A, SP) 3 credits
This course will explore current computer applications as they relate to the landscape industry
Lecture: 2 hours – Lab: 3 hours
Prerequisites: LAND 102, ARCH 112 Lab fee: $10.00

LAND 111 Survey of the Landscape Industry (A, W) 2 credits
This course introduces the student to career possibilities in the landscape industry.
Lecture: 0 hours - Lab: 4 hours

LAND 117 Landscape Maintenance Laboratory (SP) (On Demand) 2 credits
This course will expose the student to practical uses in the application of maintenance procedures in commercial and residential landscapes.
Lecture: 0 hours - Lab: 4 hours Lab fee: $20.00

LAND 152 Site Planning (A, SP) 4 credits
This course identifies the elements of a site and covers influences, methods and examples of site planning for environmental design projects. Emphasis is on the interdisciplinary nature of site planning. Regulatory and technical requirements are presented. Creation and evaluation of prototypical site planning projects is included.
Lecture: 2 hours – Lab: 6 hours
Prerequisite: LAND 102 or ARCH 111 or SURV 141 or permission of instructor Lab fee: $20.00

LAND 201 Landscape Pest Control (A, SU) 3 credits
This course will study basic control methods as they apply to insects, fungi, and bacteria, biotic and other pests in the landscape. Identification of pests as well as mechanical, cultural, biological and chemical controls will be discussed.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: LAND 105 or LAND 205 or permission of instructor Lab fee: $5.00

LAND 202 Planting Design (W, SU) 4 credits
This course builds on skills learned in LAND 102 and emphasizes graphic representations of plant materials and landscape structures.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: LAND 152, 206 and 105 and/or 205 Lab fee: $20.00

LAND 203 Landscape Irrigation (A, W) 3 credits
This course will study the design principles of landscape irrigation systems. Cost/estimation factors will also be discussed.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: LAND 102 and MATH 104 or permission of instructor. Lab fee: $12.00

LAND 204 Turfgrass Management (W, SP) 3 credits
Students will learn the basic principles of turfgrass science and culture, specifically turfgrass identification, turf disease diagnosis, turf insect pest control, turf weed control and specific turfgrass cultural and management practices.
Lecture: 2 hours – Lab: 3 hours
Prerequisites: LAND 101, LAND 201 and BIO 125 or LAND 107 or permission of instructor. Lab fee: $10.00

LAND 102, LAND 203, LAND 207 and BMGT 111 Lab fee: $15.00

LAND 205 Autumn Landscape Plants (A, SU) 4 credits
The plants in this course are not the same as those covered in LAND 105. This course will study the identification parameters, landscape features and growing conditions of trees and shrubs of the Midwest climate zone. This class will combine both in-class and field experience.
Lecture: 3 hours – Lab: 3 hours Lab fee: $10.00

LAND 206 Landscape Graphics (A, SP) 4 credits
This course will study the graphic symbols used to create landscape drawings. Included will be such information as color renderings, graphic representation of trees and shrubs, and shadowing.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: LAND 102 Lab fee: $15.00

LAND 207 Landscape Construction (A, SP) 4 credits
This course will study the design and construction principles of landscape decks, patios, site fixtures, etc., and design. Projects of each will be created.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: LAND 152 Lab fee: $15.00

LAND 208 Interior Plants (W) 3 credits
This course will study the features and growing conditions of indoor plant materials and maintenance procedures for same.
Lecture: 2 hours – Lab: 3 hours Lab fee: $10.00

LAND 210 Evergreen Landscape Plants (W) 4 credits
This course will study the identification parameters, landscape features and growing conditions of evergreen trees and shrubs of the Midwest climate zone.
Lecture: 3 hours – Lab: 3 hours Lab fee: $10.00

LAND 217 Landscape Construction Laboratory (SU, On Demand) 2 credits
This course will expose the student to the practices and application of landscape construction.
Lecture: 0 hours – Lab: 4 hours Lab fee: $20.00

LAND 222 Landscape Operations (W, SU) 4 credits
This is a capstone course in the Landscape major; students will receive an overview of the technical operations of a landscape design/build firm. Students will work on group and individual class projects simulating the day-to-day business operations of a landscape firm.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: LAND 202, LAND 203, LAND 207 and BMGT 111 Lab fee: $15.00

LAND 291 Field Experience (A, WI, SP, SU) 4 credits
Course provides an opportunity for an off-campus field experience in the landscape industry. The field experience reinforces formal education received in the landscape program, with actual work conditions and job experience. “N” credit will not be allowed for this course.
Lecture: 0 hours – Lab: 48 hours
Prerequisite: Permission of instructor Lab fee: $10.00

LAND 295/296/297 Special Topics (On Demand) 1–5 credits
These courses allow for landscape special topics to be offered in a timely and responsive way.
Lecture and/or Lab Hours: Vary
Prerequisite: Permission of instructor.

**Course Descriptions**

- **LATN 101:** Elementary Latin I (A) (5 credits)
  - LATN 101 is an introduction to the fundamentals of Latin with practice in reading and writing. It includes selected studies in culture. LATN 101 meets elective requirements in the Associate of Arts Degree program and transfer requirements in foreign languages and literature.
  - Lecture: 5 hours – Lab: 0 hours
  - Prerequisite: Placement into ENGL 101  Lab fee: $6.00

- **LATN 102:** Elementary Latin II (W) (5 credits)
  - This course is a continuation of LATN 101, with further development of reading and writing skills and further study of culture. LATN 102 meets elective requirements in the Associate of Arts Degree program and transfer requirements in foreign languages and literature.
  - Lecture: 5 hours – Lab: 0 hours
  - Prerequisite: LATN 101 with a grade of “C” or better  Lab fee: $6.00

- **LATN 103:** Intermediate Latin I (SP) (5 credits)
  - LATN 103 is a continuation of LATN 102. This course meets elective requirements in the Associate of Arts Degree program and transfer requirements in foreign languages and literature.
  - Lecture: 5 hours – Lab: 0 hours
  - Prerequisite: LATN 102 with a grade of “C” or better  Lab fee: $6.00

- **LATN 104:** Intermediate Latin II (SU) (5 credits)
  - This course is a continuation of LATN 103. It meets elective requirements in the Associate of Arts Degree program and transfer requirements in foreign languages and literature.
  - Lecture: 5 hours – Lab: 0 hours
  - Prerequisite: LATN 103 with grade of “C” or better  Lab fee: $6.00

- **LATN 290:** Capstone in Latin (On Demand) (3 credits)
  - This course is offered for students wishing to fulfill the capstone requirement in Latin.
  - Lecture: 2 hours – Lab: 2 hours
  - Prerequisite: LATN 104  Lab fee: $5.00

- **LATN 299:** Special Topics in Latin (On Demand) (1-5 credits)
  - LATN 299 provides individual study opportunities in special topics in Latin.
  - Lab fee: $2.00

- **LAWE 101:** Introduction to Criminal Justice (A, SP) (3 credits)
  - This course examines the development of law and the systems and procedures developed by society for dealing with law violations. Emphasis will be placed on the three major components of the system: the police, courts, and corrections. This course examines the development of law, and the systems and procedures developed by society for dealing with law violations. Emphasis will be placed on the three major components of the system: the police, courts, and corrections.
  - Lecture: 3 hours – Lab: 0 hours

- **LAWE 102:** Patrol Procedures (A, SP) (3 credits)
  - This course covers the basic concepts of police patrol. The purpose of patrol and various patrol strategies will be examined. Calls for service and response tactics as well as arrest techniques, vehicle stops, and prisoner booking and handling are covered.
  - Lecture: 2 hours – Lab: 2 hours  Lab fee: $7.00

- **LAWE 104:** Government and the Law (A, W, SP, SU) (3 credits)
  - The role of local government in the community, its structure, organization, and responsibility are covered. Local government politics and the community also are reviewed. Urban, suburban, rural and community structure will be discussed in relationship to delivery of services.
  - Lecture: 3 hours – Lab: 0 hours

- **LAWE 110:** Criminal Investigation I (A, SP) (4 credits)
  - LAWE 110 presents the principles and techniques of criminal investigation, including those used in the investigation of major crimes such as homicide, burglary, robbery, auto theft, arson, and sex offenses.
  - Lecture: 3 hours – Lab: 2 hours  Lab fee: $5.00

- **LAWE 111:** Criminalistics I (A, SP) (3 credits)
  - This course serves as an introduction to criminalistics laboratory techniques, includes the recognition, collection, and preservation of evidence and its preparation for court presentation. An introduction to fingerprint comparison also is presented.
  - Lecture: 1 hour – Lab: 4 hours  Lab fee: $10.00

- **LAWE 112:** Criminal Investigation II (W, SU) (4 credits)
  - This course continues LAWE 110. Emphasis will be placed on the scientific analysis of evidence and proper methods for collection and preservation of trace evidence.
  - Lecture: 3 hours – Lab: 2 hours
  - Prerequisite: LAWE 110  Lab fee: $5.00

- **LAWE 113:** Criminalistics II (On Demand) (3 credits)
  - This course advances the study of criminalistics laboratory techniques to include examination techniques for blood, hair and fiber, firearms identification, toolmark comparisons, latent fingerprints, questioned document examination, and trace evidence.
  - Lecture: 0 hours – Lab: 4 hours  Lab fee: $15.00

- **LAWE 115:** Community and Personal Relations (W, SU) (3 credits)
  - This course examines the complex relationship between the police and the public they serve. Areas of potential problems will be discussed and programs and procedures for enhancing the relationship will be presented.
  - Lecture: 2 hours – Lab: 2 hours  Lab fee: $5.00

- **LAWE 120:** Criminology (A, SP) (3 credits)
  - This course explores the issue of crime in the United States. Theories of causation will be analyzed and critiqued.
  - Lecture: 3 hours – Lab: 0 hours

- **LAWE 121:** Juvenile Delinquency (SP) (3 credits)
  - This course studies the nature and causes of delinquent activity by juveniles. Appropriate criminal justice responses can be developed once law enforcement and judicial personnel understand the factors giving rise to juvenile delinquency.
  - Lecture: 3 hours – Lab: 0 hours

- **LAWE 122:** Criminal Law (On Demand) (3 credits)
  - This course studies the development of criminal law in the United States. The common law theories upon which the laws of this country are based will be explored. Specific topics will include parties to crime, capacity to commit crimes, defenses, and the laws defining specific crimes.
  - Lecture: 2 hours – Lab: 2 hours

- **LAWE 124:** Penology (A, SP) (3 credits)
  - This course offers an introduction to the field of corrections. The history and goals of corrections will be explored, and students will receive an overview of the processing of offenders from arrest through final release.
  - Lecture: 3 hours – Lab: 0 hours

- **LAWE 125:** Traffic Accident Investigation (A, SP) (3 credits)
  - LAWE 125 is an in-depth study of the procedure and objectives in accident investigations, including gathering facts from the road, vehicle and witnesses, hit and run investigation, measurements and diagrams,
utilization of skid mark evidence, proper recording of accident data, use of accident templates, and a practical application of the recommended method of submitting the Ohio state traffic crash report.

Lecture: 2 hours – Lab: 2 hours Lab fee: $3.00

LAWE 128 Special Category Offenders 3 credits
This course will focus on six subject areas: treatment of sex offenders, mentally disordered offenders, mentally retarded offenders, inmates with AIDS, inmates with disabilities, and the substance abuse offender. Further attention will be directed to correctional personnel, impact of political influences, perceptions, training, problems and corrective actions.
Lecture: 3 hours – Lab: 0 hours

LAWE 135 Terrorism 3 credits
This course will examine the underlying issues of the terrorist threat, including an overview of terrorism goals, methods of attack, weapons of mass destruction, and how law enforcement can assess and deal with threats.
Lecture: 3 hours

LAWE 145 Self-Defense for Women (On Demand) 2 credits
Students will learn to recognize threatening behavior and situations and their appropriate responses. Simple-to-learn, basic physical defense techniques are taught. In addition, defensive devices will be discussed and demonstrated.
Lecture: 1 hour – Lab: 2 hours

LAWE 150 The Administration of Justice (A) 3 credits
The major institutions and processes in the administration of justice will be covered. The role and function of the courts, the progress of criminal and civil cases, and methods for development of cooperative arrangements with other criminal justice professionals are discussed.
Lecture: 3 hours – Lab: 0 hours

LAWE 153 Civil Liability in Law Enforcement (SP) 4 credits
Course covers potential areas of liability such as tort law, vicarious liability, and civil rights legislation. Course covers potential areas of liability such as tort law, vicarious liability, and civil rights legislation.
Lecture: 4 hours – Lab: 0 hours

LAWE 155 Managing Police Operations (W) 4 credits
LAWE 155 discusses managing police operational units such as investigations, patrol, internal investigations, and traffic.
Lecture: 4 hours – Lab: 0 hours

LAWE 204 Juvenile Procedures (A, SP) 3 credits
This course covers the organization, functions, and jurisdiction of juvenile agencies. Topics include processing and detention of juveniles, statutes and court procedures relating to juveniles, rights and liabilities of minors and their parents, and police services for juveniles and neglected children.
Lecture: 2 hours – Lab: 2 hours

LAWE 208 Community Based Corrections (W) 3 credits
This course will investigate alternative models of corrections. Various alternatives to incarceration or institutionalization, and the benefits that derive from placing the offender back in the community, will be discussed.
Lecture: 3 hours – Lab: 0 hours

LAWE 210 Crisis Intervention (A, SP) 3 credits
This course provides the student with intervention strategies for dealing with persons in crisis. The areas of domestic disputes, suicide prevention, and special problems of crime victims will be emphasized.
Lecture: 3 hours – Lab: 0 hours
Lab fee: $10.00

LAWE 211 Institutional Corrections (A) 3 credits
This course explores the development and purposes of correctional institutions. Emphasis will be placed on major correctional facilities at the state and federal levels. Operation of such facilities and the care and treatment of prisoners will be examined.
Lecture: 3 hours – Lab: 0 hours

LAWE 212 Ohio Criminal Code (A, SP) 4 credits
This course studies the Ohio Code statutes that apply to crime and criminal procedures, with emphasis on the specific elements necessary to constitute individual crimes.
Lecture: 3 hours – Lab: 2 hours

LAWE 215 Introduction to Cyberlaw (W) 3 credits
The technological advancements associated with computers and the World Wide Web have led to increased criminal activity involving such technology. In addition, laws regulating computer usage, the Web, and intellectual property issues, have become very complex. This course examines these issues and the difficulties associated with investigating such activities.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: CIT 101

LAWE 219 Correctional Law (W) 4 credits
This course will cover the various Supreme Court rulings that deal with the care and treatment of prisoners confined in institutions. It will include the use of force, the right to have visitors, receive mail, attend religious functions, and the right to treatment. The course will also cover due process of law.
Lecture: 4 hours – Lab: 0 hours

LAWE 220 Constitutional Law (A, SP) 3 credits
This course is a study of federal and state constitutional law and the Bill of Rights, with emphasis on due process of law, equal protection of the law, jury trial, and assistance of counsel. Course will review interpretations of the Constitution by the U.S. Supreme Court as given in their decisions.
Lecture: 3 hours – Lab: 2 hours

LAWE 221 Counseling: Probation and Parole (SP) 4 credits
This course covers the responsibilities and duties of the correctional counselor and case worker. Emphasis is placed upon the application of professional standards to casework in the correctional setting. Emphasis is also placed on the functions of the parole and probation officers.
Lecture: 4 hours – Lab: 0 hours

LAWE 223 Correctional Administration (SP) 3 credits
This course will cover the various phases of administration as they relate to corrections. Three basic stages are covered: executive, mid-management and line operations. Each of these levels will be discussed as they relate to institutions, community-based institutions, and the operation of probation and parole. Problems and their possible solutions will be covered for each division of corrections.
Lecture: 3 hours – Lab: 0 hours

LAWE 241 Correctional Internship I (On Demand) 1 credit
This course offers an opportunity for on-the-job training as the student works in a correctional agency. Activities will include interviewing convicted felons, verification of the information received, and various other duties connected with probation and parole.
Lecture: 0 hours – Lab: 10 hours
Prerequisite: LAWE 205
Corequisite: LAWE 249

Corequisite: LAWE 249
LAWE 242 Community Policing (SP)  4 credits
Contemporary community policing issues such as crime prevention, community education, and police deployment strategies will be explored.
Internal departmental changes and methods of obtaining cooperation and commitment by department personnel will also be examined.
Lecture: 4 hours – Lab: 0 hours

LAWE 249 Corrections Seminar I (On Demand))  1 credit
This seminar will cover the pre-sentence investigation report, its purpose, and how it is compiled. Members of the internship program will be able to discuss the problems and events that they have encountered during their work at the probation office with each other and the instructor.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: LAWE 205
Corequisite: LAWE 241

LAWE 250 Police Administration (A)  3 credits
This course will explore the contemporary local law enforcement agency, its functions, structure, and operational techniques. Principles of organization, staffing, budgeting, controlling, coordination, planning and research will be presented as well as the development and maintenance of liaison between agencies.
Lecture: 3 hours – Lab: 0 hours

LAWE 252 Law Enforcement Practicum II (On Demand)  2 credits
This is another guided work experience in a law enforcement agency.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: Permission of the chairperson
Corequisite: LAWE 259

LAWE 253 Criminal Procedure (W, SU)  3 credits
This course presents a study of the rules of procedure as they apply to criminal cases and how they affect the ability of the officer to have the evidence he/she collects or prepares presented in court.
Lecture: 2 hours – Lab: 2 hours

LAWE 254 Correctional Internship II (On Demand))  1 credit
LAWE 254 offers another opportunity for on-the-job training in the corrections setting. The student will work in a correctional agency performing tasks such as background investigations for a parole board, checking on inmates at various halfway houses, and interviewing persons on parole.
Lecture: 0 hours – Lab: 10 hours
Prerequisite: LAWE 241
Corequisite: LAWE 255

LAWE 255 Corrections Seminar II (On Demand))  1 credit
This course discusses what occurred during the student’s internship and clarifies any problems that arose. Student looks at assignment of project and explanation for the project.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: LAWE 249
Corequisite: LAWE 254

LAWE 256 Law Enforcement Practicum I (A, W, SP, SU)  2 credits
LAWE 256 offers a guided work experience in a law enforcement agency. Students will observe and participate in a variety of law enforcement functions. Exact duties will be decided by agreement between student and the law enforcement agency.
Lecture: 0 hours – Lab: 14 hours
Prerequisite: Permission of the chairperson
Corequisite: LAWE 257

LAWE 257 Law Enforcement Practicum Seminar I (A, W, SP, SU)  1 credit
LAWE 257 presents seminar discussions concerning the work experience and on developing strategies to improve work performance.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: Permission of the chairperson
Corequisite: LAWE 256

LAWE 258 Law Enforcement Practicum II (On Demand)  2 credits
This is another guided work experience in a law enforcement agency. Students will observe and participate in a variety of law enforcement functions. Exact duties will be decided upon by agreement between student and the law enforcement agency.
Lecture: 0 hours – Lab: 14 hours
Prerequisite: Permission of the chairperson
Corequisite: LAWE 259

LAWE 259 Law Enforcement Practicum Seminar II (On Demand)  1 credit
LAWE 259 facilitates seminar discussions on the work experience and the development of strategies to improve work performance. Prerequisite:
Lecture: 1 hour – Lab: 0 hours
Corequisite: LAWE 258
Lab fee: $5.00

LAWE 260 Criminal Evidence and Trial (A, SP)  3 credits
In this course, the student will study the rules of evidence as they relate to the introduction of evidence at trial. In addition to the study of rules, students will participate in a mock trial in which evidence they have collected, preserved and processed will be presented.
In this course, students will study the rules of evidence as they relate to the introduction of evidence at trial. In addition to the rules study, students will participate in a mock trial in which evidence they have collected, preserved, and processed will be presented.
Lecture: 2 hours – Lab: 2 hours
Lab fee: $5.00

LAWE 261 Defensive Driving and Emergency Response (SP)  2 credits
Defensive driving is driving to prevent accidents from occurring in spite of the actions of others or the presence of adverse conditions. Students will learn recommended driving principles and practices through vehicle operation. The student will also learn the skills necessary to administer emergency aid until assistance can be obtained.
Lecture: 0 hours – Lab: 4 hours
Lab fee: $35.00

LAWE 263 Arrest and Control (SU)  4 credits
In this course, the student will learn the basic principles and tactics of unarmed self-defense, how to defend against physical attack, and control of aggressive behavior in effecting an arrest using minimum force.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: LAWE 102

LAWE 264 Police Firearms (SU)  3 credits
Students will learn to use police firearms safely, including the pistol and shotgun. Shooting decisions and alternatives to firearm use are covered.
Successful completion of the course requires compliance with current Ohio Peace Officers Training Council qualification standards.
Lecture: 0 hours – Lab: 6 hours
Lab fee: $50.00

LAWE 265 Police Physical Fitness (A)  3 credits
This course will utilize the proven methods developed by the Aerobic Institute in measuring and attaining fitness. A baseline of fitness will be established for each student and an individual exercise program will be decided upon. Class activities may include aerobics, jogging, and if needed, weight training.
Lecture: 1 hour – Lab: 4 hours

LAWE 266 High Rise Safety (A)  2 credits
Discussions of the particular problems related to fire safety in high-rise buildings. Students will research and establish life-safety plans for a building. Information gained from previous incidents in high-rise buildings will be utilized.
Lecture: 1 hour – Lab: 2 hours
Lab fee: $5.00

LAWE 268 Hazardous Materials I (A)  3 credits
Course offers an introduction to the properties and behaviors of hazardous chemicals in our environment. Students will learn about the physical and chemical characteristics of toxic, flammable, and reactive substances in the forms of solids, liquids, and gases and receive an overview of methods for safely responding to emergencies involving such materials. Emphasis
will be placed on safe approach to incident scenes, positive identification of materials, and accurate analysis of the hazards presented by hazardous materials.

Lecture: 2 hours – Lab: 2 hours Lab fee: $6.00

LAWE 271 Contemporary Issues in Law Enforcement (SP, A) 3 credits
This course offers a review of important facts in modern law enforcement along with an examination of current topics and trends.
Lecture: 3 hours – Lab: 0 hours

LAWE 277 Emergency Aircraft Assault (On Demand) 3 credits
The course trains tactical personnel in aircraft familiarization tubular hostage rescue and negotiation and emergency bomb threat interdiction and evacuation.
Lecture: 2 hours – Lab: 2 hours

LAWE 272 Alcohol Detection, Apprehension and Prosecution (SP) 2 credits
ADAP is the process of identifying and gathering evidence to determine if a suspect should be arrested for a DWI violation. This course is necessary to meet state requirements for Peace Officer Training in Ohio. LAWE 272 is open only to Academy Track students.
Lecture: 1 hour – Lab: 2 hours Lab fee: $25.00

LAWE 273 Legal Computing 2 credits
Course is designed to focus on legal-style microcomputing for law enforcement and legal assisting personnel. Emphasis is on history, copyright, computer crimes, computer security and legal computer systems.
Lecture: 2 hours – Lab: 1 hour
Prerequisite: CIT 101/Optional LEGL 251

LAWE 276 Criminalistics III (On Demand) 3 credits
This course presents an advanced study of forensic laboratory techniques. The student will perform or view examination techniques for blood, “DNA Profile Analysis”, questioned document examination, autopsy, trace evidence, drug identification, toxicology, and the forensic examination of arson and explosion trace evidence.
Lecture: 1 hour – Lab: 4 hours Lab fee: $25.00

LAWE 299 Special Topics in Law Enforcement (On Demand) 3 credits
Special Topics in Law Enforcement is a course that utilizes a variety of instructional techniques to meet the needs of the constantly changing law enforcement, corrections, and legal community. The course will be designed with the advice of the particular group requesting the course and/or the Law Enforcement faculty and department chairperson.
Lecture: 3 hours – Lab: 0 hours

Legal Assisting - See Paralegal Studies (LEGL)

Marketing (MKTG)

MKTG 101 Introduction to Retailing (A, W, SP, SU, DL) 5 credits
This course provides the student with an overview of current and evolving retailing trends and practices. Merchandising, sales promotion, finance, store operations and control are addressed. Special emphasis is given to the growing importance of international retailing, e-Commerce and multi-channel retailing. In addition, the course examines the impact of innovative technologies and methods used by retailers to improve store operating efficiencies and improve customers’ shopping experiences.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: None Lab fee: $5.00

MKTG 102 Branding (W, SU, DL) 3 credits
This course provides the student with an overview of current and evolving branding trends and practice. The primary focus is on the importance of brands, their impact on corporate profitability, and effective principles of brand management. In addition, the course describes a disciplined process to create and implement effective brand design, identity and positioning.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: None Lab fee: $5.00

MKTG 111 Marketing Principles (A, W, SP, SU, DL) 5 credits
This course explores the fundamentals of product planning, pricing, promotion and distribution of goods and services with an emphasis on the impact of a global economy and technology on marketing activities. Additional attention is given to consumer behavior, market research and market strategies. Students taking the video version of Marketing Principles may choose to rent the videos for the quarter from the ERC with pre-payment to the Discovery Exchange Bookstore.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ECON 200 Lab fee: $5.00

MKTG 122 Web and Electronic Marketing (A, SP, DL) 3 credits
An overview of how to use the Internet to gather and evaluate primary and secondary sources of business information for product development, market research, sales, advertising and promotion, and customer service/retention.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: None Lab fee: $15.00

MKTG 125 Social Networking (W) 3 credits
Introduction to emerging Web 2.0 technologies with particular emphasis on the role of the various social networking tools used in the process of marketing to and communicating with consumers. The contemporary marketing toolset has expanded electronically with the mainstreaming of Web 2.0 tools and tactics. Components of the course include online viral (word-of-mouth) marketing, target audience(s) selection, and the integration of Web 2.0 technologies into an Integrated Marketing Communications program. Examples of Web 2.0 features and tools to be explored include online communities, wikis, blogs, vlogs, podcasts, RSS feeds, and mobile communication devices. At the completion of the course, students will have a well-developed understanding of the tools available to marketers in the Web 2.0 environment.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: None Lab fee: $5.00

MKTG 131 Market Research Principles (A, SU, DL) 3 credits
This course introduces the field of market research with particular emphasis on how to use research data to make better marketing decisions. Topics covered include the market research process, research design and data sources, data collection, and the analysis of marketing research data.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: MKTG 111 and MATH 101 (or a higher math) or instructor approval Lab fee: $5.00

MKTG 140 Introduction to Advertising and Promotion (A, SP, DL) 4 credits
Course introduces students to the critical role that advertising and promotion play in marketing activities. Topics covered include promotional program development and analysis, the communications process, and evaluating an integrated marketing communications program.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval Lab fee: $5.00

265
**MKTG 141 Interactive Marketing Media (W, DL) 4 credits**
This course covers the fundamentals of interactive marketing media (IMM). Emphasis will be on understanding how IMM plans are developed and executed as well as the various factors and considerations that influence this process. Students will learn how to set goals, objectives, and budgets. Also highlighted will be direct marketing, Internet and interactive marketing, sales promotion, publicity and public relations, and personal selling.

Lecture: 4 hours – Lab: 0 hours
Prerequisites: MKTG 111 and MKTG 140 or instructor approval
Lab fee: $5.00

**MKTG 142 Media Buying (SU, DL) 3 credits**
Course introduces media buying and selling with particular emphasis on the role of the various participants in the process: clients, advertising and media agencies, media sales companies, media companies, etc. Current industry selling practices for print and electronic media will be discussed. Components of the course include media plan development, target audience(s) selection, and integration of a media plan into an advertising plan. At the completion of the course, students will have developed portfolio-ready examples of work.

Lecture: 3 hours – Lab: 0 hours
Lab fee: $5.00

**MKTG 145 Services Marketing (SU, DL) 3 credits**
This course studies the characteristics of services, their contribution to an economy, service quality, service customer behavior and the relationship between organizational performance and customer retention. Emphasis will be placed on customer satisfaction measurement, coordination issues between marketing and operations in the design and implementation of service delivery, and the utilization of emerging technology.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: MKTG 111
Lab Fee: $5.00

**MKTG 146 Nonprofit Marketing (SP, DL) 3 credits**
This course will give students an understanding of the basic organizational structures, systems and practices of nonprofit organizations. Emphasis will be placed on identifying the various types of nonprofit organizations, nonprofit marketing mixes, and nonprofit marketing strategies. The role of technology in the delivery of effective service and administration for nonprofit organizations will also be examined.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: MKTG 111
Lab Fee: $5.00

**MKTG 150 Introduction to e-Commerce (A, SP, SU, DL) 3 credits**
This course offers an overview of the marketing and technical aspects of e-Commerce. Students are introduced to basic network concepts and protocols; how various markets (consumer, business-to-business, and government) make use of e-Commerce; the four fundamental marketing considerations of product, price, distribution/place and promotion as informed by interactive media; and the design and financial and ethical aspects of e-Commerce.

Lecture: 2 hours – Lab: 2 hours
Lab fee: $5.00

**MKTG 205 Quantitative Methods for Retailing (A, DL) 5 credits**
This course provides the student with an overview of the impact of merchandising strategies on the fiscal management of store operations. Special emphasis is given to the mathematical tools that aid in merchandise planning, selection, and pricing. Students will use basic math formulas that are used by buyers, department managers and store owners in order to operate their businesses, stores or departments profitably.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: MKTG 101
Lab fee: $5.00

**MKTG 213 Merchandise Buying and Management (SP, DL) 4 credits**
An in-depth review of the many different duties of a buyer and the role the buyer plays in assuring profitability. Topics covered include the buyer’s role in risk management, inventory shortage control, people management, promotion and the legal environment that impacts retailing.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: MKTG 101
Lab fee: $5.00

**MKTG 221 Consumer Behavior (W, SU, DL) 3 credits**
Consumer Behavior will assist the student in developing a fuller understanding of the influences, both internal and external, that determine consumer behavior.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval
Lab fee: $5.00

**MKTG 223 Sales Principles and Practices (A, SP, DL) 4 credits**
This course presents the practical application of selling theory in a variety of personal selling situations. All phases of the selling process (from initial contact to the close of the sale) are taught.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval
Lab fee: $5.00

**MKTG 224 Public Relations (A, DL) 3 credits**
MKTG 224 Public Relations examines both the theoretical and practical factors that contribute to a firm’s image among its many publics. The emphasis is on public relations as a function of management as well as an adjunct of promotion.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval
Lab fee: $5.00

**MKTG 226 Customer Service Principles and Practices (A, SP, DL) 4 credits**
MKTG 226 offers a study of the customer service principles used in business. Concepts and key elements will be explored. Techniques will be developed for small business applications. Topics include customer service overview, key elements of customer service, trends, industry examples, business impact, and legal implications.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval
Lab fee: $5.00

**MKTG 229 Organizational Marketing (A, SP, DL) 3 credits**
MKTG 229 is a comprehensive overview of marketing principles and practices utilized in business-to-business marketing. An empirical approach is taken to analyzing marketing strategy in business to business environments. Additional emphasis is placed on organizational marketing, future trends and the impact of technology on business-to-business marketing.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval
Lab fee: $5.00

**MKTG 236 Direct Marketing (SP, DL) 3 credits**
This course presents a survey of the direct marketing process including the theory and practice of direct marketing, its function and organization. Topics covered include direct response television/radio, database marketing, list selection and evaluation, direct marketing media and planning. Special emphasis is placed on how to integrate direct marketing into the overall marketing mix.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: MKTG 111 or instructor approval
Lab fee: $5.00

**MKTG 237 Database Marketing (W, DL) 3 credits**
This course provides an overview of the use of databases in consumer promotion and the legal environment that impacts retailing.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: MKTG 101
Lab fee: $5.00

**MKTG 241 Marketing Practicum I (A, W, SP, SU, DL) 4 credits**
This course offers a chance for a supervised, on-the-job application of knowledge and skills acquired in the classroom. Internship applications
must be filed with the Department at least 2 months prior to the internship start date. This course is graded on a Satisfactory/Unsatisfactory basis. Lecture: 0 hours – Lab: 28 hours  
Prerequisite: 12 hours in technology and permission of instructor  
Corequisite: MKTG 242  
Lab fee: $5.00

MKTG 242 Marketing Seminar I (A, W, SP, SU, DL) 1 credit 
MKTG 242 allows for the application of marketing knowledge to specific areas of an on-the-job internship. Internship applications must be filed with the Department at least 2 months prior to the internship start date. This course is graded on Satisfactory/Unsatisfactory basis. 
Seminar: 1 hour – Lab: 0 hours 
Prerequisite: Open to Marketing students only with permission of instructor 
Corequisite: MKTG 241 
Lab fee: $5.00

MKTG 251 Marketing Practicum II (On Demand, DL) 4 credits 
This course is a continuation of MKTG 241 and is open to Marketing students only. Internship applications must be filed with the department at least 2 months prior to the internship start date. This course is graded on a Satisfactory/Unsatisfactory basis. 
Lecture: 0 hours – Lab: 28 hours 
Prerequisite: MKTG 241 and advisor approval required the quarter before the student actually begins the internship; open to Marketing students only 
Corequisite: MKTG 252 
Lab fee: $5.00

MKTG 252 Marketing Practicum II (On Demand, DL) 2 credits 
This course allows for the application of marketing knowledge to specific areas of and on-the-job internship. Internship applications must be filed with the department at least 2 months prior to the internship start date. This course is graded on a Satisfactory / Unsatisfactory basis. 
Lecture: 0 hours – Lab: 4 hours 
Prerequisite: MKTG 242, open to Marketing students only 
Corequisite: MKTG 251 
Lab fee: $5.00

MKTG 263 Direct Marketing Creative and Financial Analysis (A, DL) 4 credits 
Course surveys methods for creating and evaluating direct response materials. Topics covered include establishing a “unique selling proposition,” effective copywriting, how to use graphic support, offer development, and the inclusion of token/stamps to increase audience interaction. Special attention is given to selecting appropriate formats including computerized letters, self-mailers, broadsides, and brochures. 
Lecture: 4 hours – Lab: 0 hours 
Prerequisite: MKTG 236 or permission of instructor 
Lab fee: $5.00

MKTG 265 Understanding Interactive Users (SP, DL) 3 credits 
This course presents a comprehensive model for understanding consumer decision making in an interactive environment. Emphasis is placed on the differences and similarities between classic research techniques and traditional consumer behavior models and their interactive complements. Particular emphasis is placed on the techniques and trends used to conduct online research, including how to leverage existing sources, online chat-based sessions, e-mail feedback, and online focus groups. 
Lecture: 2 hours – Lab: 2 hours  
Lab fee: $5.00

MKTG 266 Marketing Communications on the Web (W, DL) 3 credits 
This course explores the marketing communications opportunities and challenges facing Web marketers. Topics covered include developing an online marketing strategy, online selling, Web-based promotion, customer service and publicity. Special emphasis is placed on emerging E-Commerce strategies, such as auditing effective of online advertising, permission marketing, affiliate programs and e-mail strategies. 
Lecture: 2 hours – Lab: 2 hours  
Lab fee: $5.00

MKTG 270 Global Marketing (A, SP, DL) 5 credits 
This is a capstone course designed to develop a broader understanding of the marketing function and its relationship to business strategy in the context of a global marketing environment. 
Lecture: 5 hours – Lab: 0 hours 
Prerequisites: 12 hours of Marketing or Supply Chain Management courses, CIT 101, FMGT 201 or ACCT 106 and permission of instructor 
Lab fee: $5.00

MKTG 285 Advertising and Promotion on the Web (A, SP, DL) 1 credit 
This course provides the student with an overview of how the Internet can be used as part of an organization’s advertising and promotional strategy. The focus is on the Internet as another means of communicating with an organization’s various target markets. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 286 Customer Service on the Web (A, SP, DL) 1 credit 
This course provides the student with an opportunity to see how the Internet can be used to improve the basic delivery of customer service and to improve customer relations for business organizations. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 287 Public Relations on the Web (A, SP, DL) 1 credit 
The focus in this course is on the real world use of the Internet in developing organizational objectives. Students will use the Internet to examine trends, basic concepts and current practices in public relations. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 288 Marketing Research on the Web (A, SP, DL) 1 credit 
Students will use the Internet to gather information on customers, business organizations, and nonprofit institutions. Attention will be given to using the Internet as a tool to find the best sources of information to solve real-world marketing problems. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 289 Direct Marketing on the Web (A, SP, DL) 1 credit 
Students will use the Internet as a tool in the direct marketing process. The focus will be on using the Internet as a vehicle to create databases and as a direct response mechanism for target markets. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 290 Government Marketing on the Web (SP, DL) 1 credit 
This course studies government characteristics and its use of emerging technology to market services to, and communicate with, citizens. The course will examine the relationships between government and citizens with an emphasis on the use of Web-based technology to enhance those relationships. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 292 Nonprofit Marketing Using the Web (SU, DL) 1 credits 
A study of the characteristics of nonprofit organizations and their use of emerging technology to market services, raise funds, and communicate with people. The course will examine the relationships between nonprofit organizations and service consumers and funding agents with an emphasis on the use of Web-based technology to enhance those relationships. 
Lecture: 1 hour – Lab: 0 hours 
Lab fee: $5.00

MKTG 297/298 Special Topics in Marketing (On Demand, DL) 1–3 credits 
These courses offer an opportunity for detailed examination of various topics in marketing. 
Prerequisites: Vary 
Lab fees: Vary 
Lecture: 1 to 3 hours – Lab: 0 hours
Massachusetts Institute of Technology

Computer Science and Artificial Intelligence Laboratory

**Massage Therapy (MASS)**

**MASS 235 Principles of Massage Law and Business**  
(AU, W, SP, SU, DL)  
4 credits
This course provides a general overview of the legal system, including criminal and civil law. An in-depth review of the statutes and administrative rules that govern massage therapy in Ohio are provided. The course also will study basic business principles as they apply to the massage therapist.
Prerequisites: Acceptance into the program
Lecture: 4 hours

**MASS 236 Medical Ethics for Massage Therapy**  
(A, SP)  
3 credits
This course is an introduction to the professional practice of health care including the role of the practitioner, relationships with other health care providers, privacy and confidentiality, the concepts of liability, malpractice and negligence.
Prerequisite: MASS 262
Lecture: 3 hours – Lab: 0 hours  Lab fee: $5.00

**MASS 251 Massage Technique I**  
(A, SP)  
6 credits
MASS 251 is an introduction to the professional practice of massage therapy including hygiene, touch, stroking, friction, kneading, vibration, and percussion.
Lecture: 3 hours – Lab: 6 hours
Prerequisite: Acceptance into the program
Corequisite: MASS 271  Lab fee: $50.00

**MASS 252 Massage Technique II**  
(W, SU)  
6 credits
MASS 252 is an introduction to the professional practice of massage therapy including the effects, indications, and contraindications of massage upon various body systems.
Lecture: 3 hours – Lab: 6 hours
Prerequisite: MASS 261
Corequisite: MASS 272  Lab fee: $50.00

**MASS 253 Massage Anatomy and Physiology I**  
(A, SP)  
5 credits
This course provides an investigation of the various human body systems, their structure and function as required by the State Medical Board of Ohio for licensure as a Massage Therapist.
Lecture: 4 hours – Lab: 3 hours
Prerequisites: BIO 261 and acceptance into the program
Corequisite: MASS 261  Lab fee: $25.00

**MASS 254 Massage Anatomy and Physiology II**  
(W, SU)  
5 credits
MASS 254 offers an investigation of the various human body systems, their structure and function as required by the State Medical Board of Ohio for licensure as a Massage Therapist.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: MASS 271  Lab fee: $25.00

**MASS 255 Massage Anatomy and Physiology III**  
(AU, SP)  
5 credits
MASS 255 is an investigation of the various human body systems, their structure and function as required by the State Medical Board of Ohio for licensure as a Massage Therapist.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: MASS 272  Lab fee: $25.00

**MASS 256 Massage Anatomy and Physiology IV**  
(W, SU)  
5 credits
This course offers an investigation of the various human body systems, their structure and function as required by the State Medical Board of Ohio for licensure as a Massage Therapist.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: MASS 273  Lab fee: $25.00

**MASS 257 Nationwide Children's Hospital Advanced Studies**  
(A, W, SP, SU)  
3 credits
This course is a clinical experience conducted in connection with Nationwide Children's Hospital. The student will have the opportunity to

work with the massage therapy staff of Nationwide Children's Hospital in the care and treatment of patients of the hospital in a variety of the clinical specialty units. The care unit students may work in include but are not limited to: General Surgery, Burns, Hematology/Oncology, Pulmonary Rehabilitation, Cardiac Rehabilitation, Heart & Lung Transplant, Pediatric Intensive Care, Physical Medicine & Rehabilitation and Pain Clinic. The course will also discuss issues surrounding death and dying of patients.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Permission of instructor and completion of Massage Therapy Certificate program.

**MASS 258 Hot Stone Massage**  
(A, SP )  
3 credits
This course is designed to offer the massage therapist the opportunity to gain skill and understanding in the efficient, systematic use of hot and cool stones in a full body therapeutic massage, as well as the specified use of stones for deep tissue work. Tools and equipment are discussed in detail to instill confidence in its use, safety and sanitany procedures.
Lecture: 3 hours
Prerequisite: MASS 262 and MASS 272  Lab fee: $50.00

**MASS 259 Trigger Point I**  
(W, SU)  
3 credits
Introduction to trigger point therapy including fascial release, stretch and spray, post isometric muscle release, and advanced Swedish techniques.
Lecture: 3 hours
Prerequisite: MASS 292  Lab Fee: $ 50.00

**MASS 260 Trigger Point II**  
(A, SP )  
3 credits
Continuation of trigger point therapy including fascial release, stretch and spray, post isometric muscle releases, and advanced Swedish techniques.
Lecture: 3 hours
Prerequisite: MASS 282  Lab fee: $50.00

**MASS 261 Hot Stone Massage**  
(A, SP )  
3 credits
This course is designed to offer the massage therapist the opportunity to gain skill and understanding in the efficient, systematic use of hot and cool stones in a full body therapeutic massage, as well as the specified use of stones for deep tissue work. Tools and equipment are discussed in detail to instill confidence in its use, safety and sanitation procedures.
Lecture: 3 hours
Prerequisite: MASS 262 and MASS 272  Lab fee: $50.00

**MASS 262 Trigger Point I**  
(W, SU)  
3 credits
Introduction to trigger point therapy including fascial release, stretch and spray, post isometric muscle release, and advanced Swedish techniques.
Lecture: 3 hours
Prerequisite: MASS 292  Lab Fee: $ 50.00

**MASS 263 Trigger Point II**  
(A, SP )  
3 credits
Continuation of trigger point therapy including fascial release, stretch and spray, post isometric muscle release, and advanced Swedish techniques.
Lecture: 3 hours
Prerequisite: MASS 282  Lab fee: $50.00

**MASS 264 Sports Massage**  
(A, SP )  
3 credits
This course serves to bring together concepts discussed in previous program courses. Topics of discussion will revolve around exercise prescription for special populations including some disease states. Development and modification of institutional programming based on individual and group needs. Resources, content and delivery of health promotion programs will also be discussed.
Lecture: 3 hours
Prerequisite: MASS 262 and MASS 272  Lab fee: $ 50.00

**MASS 265 Aromatherapy Basics for Massage Therapy**  
(W, SU)  
3 credits
This course is designed for the massage therapist/massage student that has an interest in aromatherapy in combination with massage.
Lecture: 3 hours
Prerequisite: MASS 262 and MASS 272  Lab fee: $50.00

**MASS 266 Spa Services for Massage Therapists**  
(W, SU)  
3 credits
This course is designed to familiarize the massage therapist with treatments offered in a spa setting. Wet-room techniques and equipment are discussed, but the focus is on the delivery of spa treatments in a dry-room setting allowing the student to use spa treatments in a variety of settings (i.e. private practice or day spa) without the need for expensive wet-room equipment.
Lecture: 3 hours
Prerequisite: MASS 262  Lab fee: $50.00

**MASS 267 Massage Practicum I**  
(A, SP)  
5 credits
This course is an introduction to the clinical practice of massage therapy. The student will learn new techniques with specific applications for clinical situations. Students will have the opportunity to hone their clinical skills with experience gained in the student clinic.
Lecture: 3 hours – Lab 6 hours
Prerequisites: Successful completion of MASS 262 and MASS 272 or permission of the instructor  Lab fee: $50.00
MASS 294 Massage Practicum II (W, SU)  5 credits
This course is a continuation of MASS 292. The topics to be covered include, but are not limited to, different therapeutic approaches to the treatment of conditions that may benefit from the application of massage. This course includes additional clinical experience affording students the opportunity to refine their treatment skills and professional approach to the practice of massage therapy.
Lecture: 3 hours – Lab 6 hours
Prerequisites: Successful completion of MASS 292 and MASS 273 or by permission of the instructor  Lab fee: $50.00

MASS 296 Massage Therapy Board Review (A, SP)  2 credits
This course provides an overview of the Basic Sciences and Limited Branch sections of the Massage Therapy Program. The course is designed to assist in a massage student’s preparation for the State of Ohio Medical Board licensure exam for Massage Therapy.
Lecture: 2 hours - Lab: 0 hours
Prerequisite: MASS 274
Corequisite: MASS 294  Lab fee: $0

MASS 298 Special Topics in Massage (On Demand)  3 credits
This course brings together concepts discussed in previous program courses. Topics of discussion will revolve around massage therapy techniques other than Swedish Massage. Also covered will be the development and modification of institutional programming based on individual and group needs.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: MASS 262
Co-requisite: MASS 272  Lab fee: $50.00

MASS XXX Massage Therapy Electives (A, W, SP, SU)  5 credits
These courses provide massage therapy students with the ability to personalize their training program to better aid them once in the workforce. The approved technique elective courses are SES 231 and 236, SES 241, MULT 103, NURC 175, NURC 176, NURC 177, and MASS 298.
Lecture: 2–5 hours – Lab: 0
Prerequisites: Acceptance into the program

Mathematics (MATH)

MATH 100 Calculations and Dosages (A, W, SP, SU)  2 credits
Course presents a review of the fundamental operations of arithmetic with fractions and decimal fractions; ratio and proportion calculations; an introduction to the metric and apothecary systems of measures; metric-apothecary conversions; strengths of solutions; oral dosages and parenteral dosages; pediatric dosages by body weight; intravenous calculations.
Lecture: 2 hours – Lab: 0 hours
Prerequisite: DEV 030 with a grade of “C” or higher  Lab fee: $2.00

MATH 101 Business Mathematics (A, W, SP, SU, DL)  5 credits
Course covers percents and the percent formula; gross earnings; FICA and withholding; trade discounts; mark-up and mark-down; simple and compound interest and present value; simple discount notes; annuities and loan amortization; inventory valuation methods and depreciation schedules. Also offers an introduction to descriptive statistics, mean, median, mode, and graphs. MATH 101 includes applications labs using Excel. This course has traditional, hybrid, and Web section offerings and meets degree requirement for the A.A.S. degree in several technical programs.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: DEV 031 with a grade of “C” or higher, or by placement  Lab fee: $6.00

MATH 102 Beginning Algebra I (A, W, SP, SU, DL)  4 credits
This course is a remedial preparatory course designed to improve the student’s algebra and problem solving abilities. The course includes the real number system; order of operations; simplifying expressions; solving linear equations and inequalities in one variable; applications and modeling; an overview of graphing; linear equations in two variables; and relations and functions. These topics are taught using an approach that integrates algebraic, graphic and numeric methods whenever possible. This course has traditional, hybrid, and Web section offerings. It is not open to students with credit for MATH 103 or above. A TI-83/84 graphing calculator is required.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: DEV 031 with a grade of “C” or higher, or by placement  Lab fee: $4.00

MATH 103 Beginning Algebra II (A, W, SP, SU, DL)  4 credits
This course is a continuation of MATH 102 and is a remedial preparatory course designed to improve the student’s algebra and problem-solving abilities. MATH 103 includes functions; systems of equations in two variables; applications and modeling; properties of exponents; scientific notation; polynomial arithmetic, factoring and equation solving; rational expression arithmetic and simplification; and complex fraction simplification. These topics are taught using an approach that integrates algebraic, graphic and numeric methods whenever possible. This course has traditional, hybrid and Web section offerings. It is not open to students with credit for MATH 104 or above. A TI-83/84 graphing calculator is required.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: MATH 102 with a grade of “C” of higher, or by placement  Lab fee: $4.00

MATH 104 Intermediate Algebra (A, W, SP, SU, DL)  5 credits
This course is a remedial preparatory course designed to improve the student’s algebra and problem-solving abilities. The course includes interval notation; absolute value, rational, radical and quadratic equations; absolute value and polynomial inequalities in one variable; linear inequalities in two variables; compound inequalities in one and two variables; operations on radical expressions and expressions containing rational exponents; complex number system introduction; and applications and modeling. These topics are taught using an approach that integrates algebraic, graphic and numeric methods whenever possible. This course has traditional, hybrid, and Web section offerings. Not open to students with credit for MATH 110, 111, 112, 113, 116, 125, 130, or 148 and above. A TI-83/84 graphing calculator is required.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 103 with a grade of “C” or higher, or by placement  Lab fee: $4.00

MATH 105 Fundamental Mathematics Concepts for Teachers I (A, W, SP, SU,)  5 credits
This course is designed to introduce the basic concepts of arithmetic and problem solving as appropriate for primary and middle school teachers. Development of these concepts will focus on the Ohio Standards and the Grade Level indicators. Instruction will also focus on the development of these concepts through the use of hands-on manipulatives, calculators and other appropriate technology. The role of technology and the NCTM Standards for the teaching and learning mathematics will be demonstrated, explored and discussed.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 104 or MATH 110 with a grade of “C” or higher, or by placement  Lab fee: $3.00

MATH 106 Fundamental Mathematics Concepts for Teachers II (A, W, SP, SU)  5 credits
MATH 106 is a continuation of MATH 105. This course develops the basic concepts of inductive geometry, deductive geometry, measurement, and informal logic as appropriate for primary and middle school teachers. Development of these concepts will focus on the Ohio Standards and the Grade Level indicators. Instruction will also focus on the development
of these concepts through the use of hands-on manipulatives, calculators, and other appropriate technology. The role of technology and the NCTM Standards for the teaching and learning of mathematics will be demonstrated, explored and discussed.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 105 with a grade of “C” or higher Lab fee: $3.00

MATH 110 Condensed Algebra II (A, W, SP, SU) 5 credits
This course is intended for those students who need a quicker review of algebra than provided in MATH 102 and 103. MATH 110 is a remedial preparatory course designed to improve the student’s algebra and problem-solving abilities. This course includes the real number system; order of operations; simplifying expressions; solving linear equations and inequalities in one variable; applications and modeling; overview of graphing; linear equations in two variables; relations and functions; compound inequalities in one and two variables; absolute value equations and inequalities in one variable; linear inequalities in two variables; systems of equations in two variables; properties of exponents; scientific notation; and polynomial arithmetic. These topics are taught using an approach that integrates algebraic, graphic and numeric methods whenever possible. A TI-83/84 graphing calculator is required. MATH 107 is not open to students with credit for MATH 110, 111, 112, 113, 116, 125, 130 or 148 and above.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: DEV 031 with a grade of “A”, or by placement
Lab fee: $4.00

MATH 111 Technical Mathematics I (A, W, SP, SU) 4 credits
A brief review of scientific notation and other algebraic concepts; dimensional analysis; significant digits; introduction to complex numbers; solutions to quadratic equations and applications of the quadratic function; solving formulas; ratio and proportion; direct and inverse variation; algebraic functions and rectangular coordinates; solutions to 2 x 2 linear systems; right triangle trigonometry. Lab work with the TI-83/84 Plus graphing calculator will be included. Not open to students with credit for MATH 102 and 103. This course meets degree requirement for Mechanical Engineering, Quality Assurance, and Electro-Mechanical Technologies.

Lecture: 3 hours – Lab: 2 hours
Prerequisite: MATH 111 with a grade of “C” or higher Lab fee: $3.00

MATH 112 Technical Mathematics II (W, SU) 4 credits
MATH 112 explores periodic functions with emphasis on graphing the sine and cosine curves; exponential and logarithmic functions; finding products, quotients, and roots of complex numbers in rectangular, polar, and exponential form; vectors and oblique triangles using the Law of Sines and the Law of Cosines; sequences, series, and summation notation; solving radical equations and equations in quadratic form; the equations of lines and circles and parabolas as conic sections. Lab work with the TI-83/84 Plus graphing calculator will be included. Not open to students with credit for MATH 150. Course meets degree requirement for Mechanical Engineering, Quality Assurance, and Electro-Mechanical Technologies.

Lecture: 3 hours – Lab: 2 hours
Prerequisite: MATH 111 with a grade of “C” or higher Lab fee: $3.00

MATH 116 Mathematics for the Liberal Arts (A, W, SP, SU, DL) 5 credits
MATH 116 is a survey of modern mathematical topics relevant to everyday life intended for students who are not majoring in the physical sciences. This course applies critical thinking and problem solving skills to topics such as elementary graph theory, the mathematics of voting and apportionment, and probability. A TI-83/84 graphing calculator is required. This course is designed for the student who does not intend to take additional courses in mathematics. This course has traditional and Web section offerings. Course meets the general education requirement for the A.A. degree.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 104 with a grade of “C” or higher, or by placement
Lab fee: $4.00

MATH 130 Mathematical Analysis for Business (A, W, SP, SU) 5 credits
MATH 130 presents a review of applications of equations, inequalities and function notation. Course serves as an introduction to: graphs of functions, translations and reflections of graphs of functions; modeling of linear, quadratic, exponential, and logarithmic functions; matrices; addition, subtraction, multiplication, row reduction, and solving linear systems using row reduction; and the mathematics of finance: compound interest, annuities, amortization and sinking funds. Business applications evidenced throughout. A TI-83/84 graphing calculator is required. Not open to students with credit for MATH 116, 148, or MATH 150. Course meets the general education requirement for the A.A. degree for a student planning to transfer to a business college at a four-year university.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 104 or MATH 110 with a grade of “C” or higher, or by placement
Lab fee: $3.00

MATH 131 Business Calculus I (A, W, SP, SU) 5 credits
MATH 131 offers an introduction to differential calculus: limits, continuity, derivatives, rules for differentiation, derivatives of logarithmic and exponential functions, extrema, concavity and applied maxima and minima problems. Business applications evidenced throughout. A TI-83/84 graphing calculator is required. Not open to students with credit for MATH 151. Course meets the general education requirement for the A.A. degree for a student planning to transfer to a business college at a four-year university.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 130 or MATH 148 with a grade of “C” or higher
Lab fee: $3.00

MATH 132 Business Calculus II (A, W, SP, SU) 5 credits
This course is an introduction to integral calculus and multivariable calculus; anti-derivatives, definite integrals, areas under a curve; Fundamental Theorem of Calculus; techniques of integration; differential equations; functions of several variables; partial derivatives; and extrema of functions of two variables. Business applications are evidenced throughout. A TI-83/84 graphing calculator is required. Not open to students with credit for MATH 152. Course meets general education requirement for the A.A. degree for a student planning to transfer to a business college at a four-year university.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: MATH 131 with a grade of “C” or higher
Lab fee: $3.00

MATH 135 Elementary Statistics (A, W, SP, SU, DL) 5 credits
This course is designed to acquaint students with statistical methods used in gathering and analyzing data. The course includes sampling methods
and data classification; descriptive statistics; percentiles and z-scores; basic concepts in probability; binomial and normal probability distributions; the Central Limit Theorem; estimating population parameters; hypothesis testing; and linear correlation and regression. A TI-83/84 graphing calculator is required. Not open to students with credit for MATH 233. This course has traditional, hybrid, and Web section offerings. Course meets basic related requirements for several A.A.S. degree technical programs. MATH 135 may be available as an honors class.

**MATH 151 Calculus and Analytic Geometry I (A, W, SP, SU)** 5 credits

Introduction to differential calculus: functions, limits, continuity, derivatives, differentiation rules, derivatives of the trigonometric and transcendental functions, related rates, extrema, curve sketching, optimization, and antiderivatives. Course topics have applications to problems in science and engineering. Course meets general education requirement for A.S. and A.A. degrees.

**MATH 152 Calculus and Analytic Geometry II (A, W, SP, SU)** 5 credits

MATH 152 is an introduction to integral calculus: antiderivatives, definite integral, areas under a curve, Fundamental Theorem of Calculus, integration of exponential, logarithmic, trigonometric, inverse trigonometric and hyperbolic functions; volume and surface area of solids of revolution, arc-length, and methods of integration. Also includes L'Hôpital's Rule and improper integrals. Course topics have applications to problems in science and engineering. Course meets general education requirement for A.S. and A.A. degrees.

**MATH 153 Calculus and Analytic Geometry III (A, W, SP, SU)** 5 credits

MATH 153 presents a study of the trigonometric functions, vectors, and analytic geometry in space. Course topics have applications to problems in science and engineering. An introduction to vector valued functions is included. MATH 153 meets general education requirement for A.S. and A.A. degrees.

**MATH 207 Topics in Mathematics for Teachers (A, W, SP, SU)** 5 credits

MATH 207 is a continuation of MATH 106. It develops basic concepts of number theory, combinatorial counting, probability, statistics, functions, sequences and series as appropriate for primary and middle school teachers. Development of these concepts will focus on the Ohio Standards and the Grade Level indicators. Instruction will also focus on the development of these concepts through the use of hands-on manipulatives, calculators, and other appropriate technology. The role of technology and the NCTM Standards for the teaching and learning of mathematics will be demonstrated, explored, and discussed. Course meets general education requirements for the A.S. and A.A. degrees.

**MATH 233 Statistics for Business (A, W, SP, SU)** 5 credits

MATH 233 is an introduction to statistics. This course is designed to acquaint students with statistical methods used in gathering and analyzing data. The course includes: designing samples and experiments; descriptive statistics with graphs and numbers; correlation and regression; concepts in probability binomial, normal, and other probability distributions; the Central Limit Theorem; confidence intervals; tests of significance; and hypothesis testing. Applications in business, management and economics are emphasized. A TI-83/84 graphing calculator is required. MATH 233 meets general education requirement for A.S. and A.A. degrees.

**MATH 254 Multivariable Calculus (A, W, SP, SU)** 5 credits

MATH 254 presents an introduction to multivariable calculus. Topics include vector valued functions and motion in the plane and in space, functions of several variables, partial derivatives, directional derivatives, gradients, extrema, multiple integrals, line integrals and Green’s Theorem. Course topics have applications to problems in science and engineering. Course meets general education requirement for the A.S. and A.A. degrees.

**MATH 255 Elementary Differential Equations (SU)** 5 credits

MATH 255 is a study of the basic concepts and methods of solving ordinary differential equations, first and second order, higher order linear equations, Laplace transform methods, series solutions, and numerical solutions of
students will learn about linear systems, matrices, and determinants; MATH 268 Elementary Linear Algebra (W, SU) 5 credits This course covers mathematical formalization and reasoning; logic; sets, functions; methods of proof, recursive definitions; mathematical induction; elementary counting techniques, probability theory; relations; equivalence relations, Boolean algebra, logic gates and elementary counting principles. Course meets general education requirements for the A.S. and A.A. degrees. Lecture: 5 hours – Lab: 0 hours Prerequisite: MATH 254 with a grade of “C” or higher Lab fee: $2.00

MATH 268 Elementary Linear Algebra (W, SU) 5 credits Students will learn about linear systems, matrices, and determinants; vector spaces, the R^n and its subspaces; eigenvalues, eigenvectors, and applications; orthogonal matrices; linear transformations; complex scalars and applications. MATH 268 meets general education requirement for the A.S. and A.A. degrees. Lecture: 5 hours – Lab: 0 hours Prerequisite: MATH 254 with a grade of “C” or higher, or department chairperson approval Lab fee: $2.00

MATH 277 Probability and Statistics I (W, SP) 5 credits MATH 277 introduces probability theory, discrete and continuous random variables, probability distributions, expected value, the Normal Distribution, and descriptive statistics. Applications to problems in science, engineering, computer science, and related areas explored. The MATH 277-278 sequence is intended primarily for students majoring in science, engineering, mathematics, or computer science, or for any student needing a calculus-based sequence in probability and statistics. Lecture: 5 hours – Lab: 0 hours Prerequisite: MATH 254 with a grade of “C” or higher Lab fee: $2.00

MATH 278 Probability and Statistics II (SP) 5 credits MATH 278 continues MATH 277 and covers statistical estimation and sampling distributions, one and two sample hypothesis tests for proportions, means, variances; simple linear regression and correlation; discrete data analysis; analysis of variance; and selected topics from nonparametric statistics, multiple linear regression; and statistical quality control. Topics have applications to problems in engineering, computer science, and related areas. The MATH 277-278 sequence is intended primarily for students majoring in science, engineering, mathematics, or computer science, or for any student needing a calculus-based sequence in probability and statistics. Lecture: 5 hours – Lab: 0 hours Prerequisite: MATH 254 with a grade of “C” or higher Lab fee: $2.00

MATH 285 Ordinary and Partial Differential Equations (A, W, SP, SU) 6 credits Course covers ordinary and partial linear and nonlinear differential equations, Fourier series, separation of variables in partial differential equations. Applications to physics and the physical sciences are noted. Not open to students with credit for MATH 255. Course meets general education requirement for the A.S. and A.A. degrees. Lecture: 6 hours – Lab: 0 hours Prerequisite: MATH 254 with a grade of “C” or higher or department chairperson approval Lab fee: $2.00

MATH 290 Capstone in Mathematics (On Demand) 3 credits MATH 290 is a capstone course focusing on mathematics. This course is intended to provide the student with an introduction to a baccalaureate major in the mathematical sciences. Topics include the historical and philosophical developments of mathematics and how they affect the advancements of mathematics; the interdependence of science, technology, and mathematics; mathematical methods and how they are used in modeling problems in science and engineering; and majoring in mathematics and professional career opportunities. The laboratory utilizes a scholarly approach to reviewing research in mathematics or the history of mathematics, taking students through the process of identifying a research topic, conducting a literature review, writing a paper, and presenting the results. Lecture: 2 hours – Lab: 2 hours Prerequisite: MATH 152 with a grade of “C” or higher Lab fee: $2.00

Mechanical Engineering Technology (MECH)

MECH 112 Computer Applications in Manufacturing (A, W, SP, SU) 3 credits This is an introductory level computer course for Engineering Technology students. The course introduces computer technology critical to the subsequent success in studies of CAD, CAM, Numerical Control Machining and Computer Programming for Technicians. Students will complete assignments in Microsoft Office as well as cover DOS commands and applications, Windows, the Web and the basic hardware of the computer. Lecture: 2 hours – Lab: 3 hours Lab fee: $10.00

MECH 115 Engineering Graphics (A, SP) 4 credits This course is designed to give the beginning engineering technology student a basic foundation in blueprint reading, manual drafting, and beginning AutoCAD. Lecture: 2 hours – Lab: 4 hours Lab fee: $15.00

MECH 120 Mechanical Drafting I (W, SU) 3 credits This course is an introductory drafting and blueprint reading course that teaches students how to draw and interpret orthographic and isometric views of various objects and components. Dimensioning, fasteners, section views, assembly and sub-assembly drawings, and Bills of Material are examined in depth. Emphasis is placed on interpretation of drawings as well as being able to do simple manual construction of views. Lecture: 1 hour – Lab: 5 hours Lab fee: $10.00

MECH 130 Statics (A, SP) 4 credits This course deals with the principles of trusses, frames, machines and machine components. The course will offer the student experience in dealing with coplanar load systems that are concurrent, parallel and noncoplanar. Lecture: 2 hours – Lab: 4 hours Prerequisite: PHYS 117 Lab fee: $15.00

MECH 145 2D Computer Aided Drafting (W, SU) 4 credits This course introduces students to Computer Aided Drafting using AutoCAD software. Two-dimensional drafting techniques are utilized to teach fundamental and intermediate concepts of computer aided drafting. Course presents commands and functions applicable to all computer aided drafting systems. Students apply this knowledge to drawings related to the field of mechanical engineering, alternative energy, and other two-dimensional drawings. Lecture: 2 hours – Lab: 4 hours Prerequisites: MECH 115

MECH 150 Manufacturing Materials and Processes (W, SU) 4 credits This is a course that will acquaint the technician with the nature, properties, performance, characteristics, manufacturing processes, and practical uses of various engineering materials. Materials such as ferrous and nonferrous metals as well as polymers, ceramics, and composites will be covered. Both primary and secondary processes with be covered. Lecture: 2 hours – Lab: 4 hours Lab fee: $15.00
MECH 175 3D Computer Aided Drafting (A, SP) 4 credits
This course is an extension of MECH 145. Course includes the study of practical applications of computer graphics with isometric and three-dimensional drawing techniques to solve mechanically related problems and to produce mechanical drawings.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: MECH 145

MECH 215 Parametric CAD (A, SP) 4 credits
This is an advanced course in 3D design and production oriented information. Students will create production drawings and documentation required to take a product from concept to design, sales, prototyping, production, and final assembly. Students will be utilizing AutoCAD, Inventor, and additional software operating in conjunction with AutoCAD. Lecture: 2 hour– Lab: 4 hours
Prerequisite: MECH 175 Lab fee: $30.00

MECH 240 Machine Tools (A, W, SP, SU) 4 credits
This course features hands-on operation of mills, lathes, shapers, and grinders in addition to instruction in safety practices and related theory needed for operating these machines. Additional instruction will be given on cutting tool materials and geometry, feeds and speeds, and associated bench practices.
Lecture: 2 hours – Lab: 6 hours Lab fee: $30.00

MECH 242 Strength of Materials (W, SU) 4 credits
This course is a study of the application of external loads to rigid bodies and the analysis of the resulting stresses produced within those bodies. Study will be devoted to thermal expansion, bolted and welded joints, thin-walled pressure vessels, beam stresses and deflection, beam design, column stresses and column design.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: MECH 112 Lab fee: $10.00

MECH 243 Robotics (A, SU) 4 credits
This course presents robotic operations and system configurations. Students are required to flowchart, code, compile, and debug programs using the Fanuc Karel programming language. Hands-on experience with robotic systems is gained through teaching and executing the programs on an articulated 6 axis Fanuc S-6 robot.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: MECH 112 Lab fee: $10.00

MECH 252 Computer Programming for Technicians (W, SU) 3 credits
A course designed to instruct students in the use of QBASIC in solving engineering problems. Students will design, flowchart, code, compile, and debug programs in this course. Hands-on experience is gained through interfacing digital I/O boards to QBASIC.
Lecture: 1 hour – Lab: 5 hours
Prerequisites: MECH 112 and placement into MATH 103 or higher Lab fee: $10.00

MECH 253 Numerical Control (W) 4 credits
This course is designed for the beginning student and covers manual computer numerical control programming. Each student will prepare numerical control programs in both absolute and incremental positioning systems using standard industrial G and M codes. Students will program for state-of-the-art computerized numerical control equipment including mills and lathes. Each student will prepare and debug programs and setup and operate computer numerical controlled equipment in the lab.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: MATH 112 and MECH 240 Lab fee: $25.00

MECH 260 Basic Mechanisms (WI, SU) 4 credits
This course offers a graphical and mathematical study of the displacement, velocity, and acceleration of typical industrial mechanisms such as link-ages, cams, and gears. Additional topics such as bearings and lubrication are also discussed.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: MECH 115 Lab fee: $10.00

MECH 261 Machine Design (SP, SU) 4 credits
This course is designed as a capstone experience for Mechanical Engineering Technology students. Students are required to demonstrate their ability to solve engineering problems using skills and knowledge gained through their course work. The class, as a team, will participate in designing and prototyping a machine or mechanism related to the field.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: MECH 242 Lab fee: $25.00

MECH 270 Engineering Statistics (A, SP) 4 credits
This course provides a broad overview of statistical methods in data analysis and process control practices in the industrial environment. Course includes presentation of the philosophy and practices of modern quality control principles, sampling methods and data classification, descriptive statistics, percentiles and z-scores, linear correlation and regression, basic probability, control chart applications, acceptance sampling, frequency distributions, and process capability studies.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: Math 103

Medical Assisting (MAT)

MAT 101 Introduction to Medical Assisting (A) 3 credits
This course provides an overview of the medical assisting profession, introducing the student to the history of medicine. Emphasis is placed on professionalism, communication, medical specialties, and medical law and ethics. The importance of professional organizations at the national, state and local levels is examined, as well as the credentialing of the medical assistant.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Placement into MATH 102 or completion of MATH 101 with a grade of ‘C’ or higher and acceptance into the program

MAT 111 Clinical Procedures–Lecture (A) 3 credits
This course introduces the student to the entry-level skills typically performed by the medical assistant in the clinical area of the medical office. Discussion of the Standard Precautions and compliance with federal regulatory agencies is included. Competency-based skills are instructed through theoretical presentations and will include infection control, sanitization, sterilization using the autoclave, hand-washing, measuring and recording vital signs, measuring height and weight, setting up the physical examination tray, positioning patients and assisting the physician in examinations. The guidelines for OSHA compliance are discussed.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Acceptance into the program

MAT 113 Clinical Procedures–Lab (A) 2 credits
This course will demonstrate the entry-level skills and allow the students to perform them hands-on to a competency level. The students will be expected to explain the theory and demonstrate the practical aspects of the clinical skills following a check-off format outlined by the instructor.
Lecture: 0 hours – Lab: 4 hours
Prerequisite: Acceptance into the program Lab fee: $45.00

MAT 121 Advanced Medical Assisting (W) 5 credits
This course will instruct the medical assisting student in the skills beyond the basic entry-level. The advanced skills will include electrocardiography, minor surgery in the medical office, rehabilitation and physical
therapy, radiology in the medical office, nutrition and diet therapy and the importance of accurate patient education. The student will explain and demonstrate the practical aspects of the advanced skills following a checkoff format outlined by the instructor. Diseases, medical conditions and illnesses treated in the medical office by the various medical specialties will be studied.

Lecture: 3 hours – Lab: 4 hours
Prerequisite: MAT 100, MAT 100  Lab fee: $70.00

MAT 122 Advanced Office Procedures–Lecture (W)  3 credits
This course will instruct the student on the administrative skills expected of the entry-level medical assistant through theoretical presentations. Topics to be covered and demonstrated to competency-level are communications, computer concepts, medical records management, screening and processing mail, scheduling and monitoring appointments, office inventory and supplies, operating office equipment, telephone technique and managing practice finances. Application of ICD (diagnosis) and CPT (procedural) coding and insurance claim submission will be included. Discussion and application of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) will be included as well as the importance of patient confidentiality.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: MAT 100

MAT 123 Advanced Office Procedures–Lab (W)  1 credit
This course introduces the student to advanced aspects of the medical office through practical presentations. Topics include communications, computer concepts, medical records management, screening and processing mail, scheduling and monitoring appointments, operating office equipment and managing practice finances.

Lecture: 0 hours – Lab: 3 hours
Prerequisites: MAT 100  Lab fee: $18.00

MAT 230 Pharmacology (SP)  4 credits
This course introduces the pharmacology of commonly prescribed drugs in the medical office. The lecture portion allows the student to learn drug laws, brand and generic drug names, prescription abbreviations, prescription format, drug uses and body reactions. The laboratory section will include the demonstration, technique and theory of administration of medications in the medical office setting; included will be intradermal, subcutaneous, and intramuscular routes as well as oral, topical, sublingual, vaginal and rectal administration. The theory and principal of IV medication therapy is discussed. The accuracy of recording medications in the medical record is emphasized. Student will be expected to perform to competency level the pharmacological skills in check-off format outlined by the instructor.

Lecture: 3 hours – Lab: 3 hours
Prerequisites: MATH 100 with a grade of “C” or better, MAT 111/113, MAT 121  Lab fee: $60.00

MAT 238 Computer Application for the Medical Office (SP)  3 credits
This course introduces the medical office computer package to the student. The theory of the utilization of a medical office computer package is demonstrated and includes creating a physician data base, preparing patient demographics and daily appointment scheduling, as well as preparing daily, monthly and yearly billing cycles. A complete review of coding diagnosis and procedures and insurance claim submissions is included. Internet research of physician and medical practices Web sites is demonstrated. The lab portion includes allowing the student to practice the principals of the medical office computer package through hands-on production of office simulations discussed in the lecture portion. The student will be expected to prepare a portfolio of the medical office package to competency level in check-off format as directed by the instructor.

Lecture: 1 hour – Lab: 4 hours
Prerequisite: MAT 100, MAT 122/123  Lab fee: $10.00

MAT 240 Physician's Office Laboratory (SP)  5 credits
This course provides the student with an overview of the procedures utilized to collect and process specimens in a physician’s office setting. Emphasis is placed on methods of collection, processing of specimens and quality control. Additionally, the student is introduced to the microscope, the techniques of capillary puncture and venipuncture (vacutainer method), urinalysis, blood typing, microbiology procedures, and understanding the normal ranges and the various laboratory reports.

Lecture: 3 hours – Lab: 6 hours
Prerequisite: MAT 111/113, MAT 121, BIO 121/122  Lab fee: $150.00

MAT 260 Ethical and Professional Principles in the Medical Office (SU)  2 credits
MAT 260 examines the medical ethical, legal and bioethical issues encountered in today’s medical office. The course will focus on legal/ethical aspects of medicine. Additional focus will be placed on current legislative statutes that affect the practicing medical assistant.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: MAT 122/123, MAT 236/237

MAT 290 Practicum (SU)  2.5 credits
MAT 290 offers an opportunity for practical experience in a physician’s office combining the administrative, clinical and laboratory skills of patient care under the supervision of a licensed physician or a certified medical assistant. Students will be placed in various health care facilities and will serve 180 unpaid externship hours.

Lecture: 0 hours – Lab: 18 hours
Prerequisites: Completion of all administrative and clinical MAT courses.  Lab fee: $50.00

MAT 296 Seminar (SU)  2 credits
MAT 296 offers group discussion of topics related to practicum experiences as well as current trends and topics in the medical assisting profession. Students will be responsible for projects and simulations of daily medical office activities. Students will participate with a review of the CMA exam and present a professional portfolio of individual competency check-off sheets and completed projects.

Lecture: 2 hours – Lab: 0 hours
Prerequisites: MAT 122, MAT 123, MAT 238, MAT 230, MAT 240  Lab Fee: $7.50

Medical Laboratory Technology (MLT)

Lab fees: Lab supply fees are waived for Distance Learning courses.

MLT 100 Introduction to Health Care (A, W, SP, SU, DL)  3 credits
This course provides a general introduction to health care in the U.S., covering topics such as the history of Western medicine, legal and ethical issues, alternative medicine, safety issues, and the evolution of hospitals, medical education, and insurance. The course is taught through a combination of in-class and online materials and will provide students in health-related fields with the background necessary to pursue further studies.

Lecture: 3 hours
Prerequisite: Placement into ENGL 100

MLT 120 Introduction to MLT (SU, DL)  2 credits
This course will provide an in-depth examination of the role and responsibilities of the Medical Laboratory Technician as an important professional in the delivery of quality health care. Discussions will include such topics as quality assurance, the general organization and operational activities of a clinical laboratory, and career opportunities for MLT graduates. In addition, students will be introduced to specimen collection and processing.
techniques, equipment used in the clinical laboratory, safety policies and procedures, and the application of laboratory mathematics.

**Lecture**: 2 hours  
**Prerequisites**: Acceptance into the MLT program  
**Corequisite**: MLT 121

**MLT 121 Introduction to MLT Lab (SU, DL) 1 credit**  
This course provides lab component to complement MLT 120. Students will have an opportunity to visit a clinical laboratory and meet with practicing laboratory personnel. Students will be introduced to specimen collection and processing procedures, principles of math, quality assurance, safety and the laboratory operational activities.  
**Lab**: 3 hours  
**Prerequisites**: Acceptance into the MLT program  
**Corequisite**: MLT 120  
**Lab fee**: $50.00

**MLT 130 Immunology (SU, DL) 3 credits**  
This course studies the immune system, the nature of immune responses, and the application of immunological reactions to a variety of diagnostic laboratory procedures including but not limited to: Cold Agglutinin Titer Tests, Heterophile Testing, Serological Tests for Syphilis, Anti-Streptolysin O Tests, Tests for C-Reactive Protein and the Rheumatoid Factor, and various tests for Pregnancy. Also included are discussions of precipitation tests, labeled immunoassays, and the etiology and diagnosis of immunologically mediated diseases.  
**Lecture**: 3 hours  
**Prerequisites**: MLT 141, MLT 142  
**Corequisite**: MLT 131

**MLT 131 Immunology Lab (SU, DL) 2 credits**  
This course provides a lab component to complement MLT 130. Emphasis is placed on commonly performed serological tests including but not limited to: Cold Agglutinin Titer Tests, Heterophile Testing, Serological Tests for Syphilis, Anti-Streptolysin O Tests, Tests for C-Reactive Protein and the Rheumatoid Factor, and various tests for Pregnancy. Students will also learn the basics of laboratory glassware, pipetting, and making dilutions and cell suspensions.  
**Lab**: 4 hours  
**Prerequisites**: MLT 141, MLT 142  
**Corequisite**: MLT 130  
**Lab fee**: $175.00

**MLT 141 Hematology I (SP, DL) 3 credits**  
This course is an introduction to theoretical concepts in Hematology that includes basic laboratory techniques and procedures; the study of the origin, formation, and differentiation of blood formed elements, and an introduction to the process of hemostasis. Included are the manual and automated techniques and principles used in evaluating red blood cells, white blood cells, platelets, reticulocytes, erythrocyte sedimentation rate, hemoglobin, hematocrit, and normal white blood cell differentials. The basic process of coagulation will be discussed, and will include the principles and methods of the prothrombin time (INR), and activated partial thromboplastin time screening tests.  
**Lecture**: 3 hours  
**Prerequisites**: Acceptance into the program  
**Corequisite**: MLT 142

**MLT 142 Hematology Lab (SP, DL) 3 credits**  
This course presents the application of introductory Hematology laboratory skills that include basic laboratory techniques and procedures; the study of the origin, formation, and differentiation of blood formed elements, and an introduction to the process of hemostasis. Included are techniques (manual and automated) used in evaluating red blood cells, white blood cells, platelets, hematocrit, hemoglobin, and normal white blood cell differentials. Reticulocytes, erythrocyte sedimentation rate, and the basic coagulation screening tests prothrombin time (INR), and activated partial thromboplastin time are also included.  
**Lab**: 9 hours  
**Prerequisite**: Admission to program  
**Corequisite**: MLT 141  
**Lab fee**: $175.00

**MLT 180 Special Topics in Medical Laboratory (On Demand) 1 credit**  
Students work independently on a research project related to the field of clinical laboratory science and present their findings.  
**Lecture**: 1 hour  
**Prerequisite**: Permission of coordinator

**MLT 181 Special Topics in Medical Laboratory (On Demand) 2 credits**  
Students work independently on a research project related to the field of clinical laboratory science and present their findings.  
**Lecture**: 2 hours  
**Prerequisite**: Permission of coordinator

**MLT 182 Special Topics in Medical Laboratory (On Demand) 3 credits**  
Students work independently on a research project related to the field of clinical laboratory science and present their findings.  
**Lecture**: 3 hours  
**Prerequisite**: Permission of coordinator

**MLT 220 Immunohematology (SP, DL) 4 credits**  
MLT 220 presents the theory (lecture) portion of Immunohematology that must accompany the laboratory skills used to accurately perform, interpret, and report the routine serological procedures used in pretransfusion testing according to AABB (American Association of Blood Banks) standards. These procedures include: ABO and Rh phenotyping, antibody screening, and the proper selection and crossmatching of donor blood. Also included are discussions of other common blood group systems, identification of unexpected antibodies, and resolution of the most commonly encountered serological difficulties. In addition, time is spent studying donor blood collection and processing for component therapy, blood transfusion practices, adverse effects of blood transfusion, investigation of transfusion reactions, Hemolytic Disease of the Newborn, and the administration of Rh Immune Globulin.  
**Lecture**: 4 hours  
**Prerequisites**: MLT 130, MLT 131  
**Corequisite**: MLT 223

**MLT 223 Immunohematology Lab (SP, DL) 3 credits**  
MLT 223 presents the actual hands on (laboratory) portion of Immunohematology to teach the laboratory skills needed to accurately perform, interpret, and report the routine serological procedures used in pretransfusion testing according to AABB (American Association of Blood Banks) standards. These procedures include: ABO and Rh phenotyping, antibody screening, and the proper selection and crossmatching of donor blood. Also included is laboratory application of other common blood group systems, identification of unexpected antibodies, and resolution of the most commonly encountered serological difficulties. In addition, students perform and interpret case studies involving the investigation of transfusion reactions, Hemolytic Disease of the Newborn, and the administration of Rh Immune Globulin.  
**Lab**: 9 hours  
**Prerequisites**: MLT 130, MLT 131  
**Corequisite**: MLT 220  
**Lab fee**: $250.00

**MLT 240 Hematology II (SU, DL) 2 credits**  
This course presents an advanced theoretical study of Hematology. Anemias, hemoglobin disorders, benign disorders of leukocytes, leukemias, cytochemistry, and hemostasis will be covered. Abnormal morphologic characteristics of cells will be correlated with other laboratory results and disease processes. The study of Hematology instrumentation will include interpretation of abnormal histograms and scatterplots that are correlated clinically. Clinical interpretation and correlation is also included in the study of instrumentation that evaluates coagulation status and platelet function.  
**Lecture**: 2 hours  
**Prerequisites**: MLT 141, MLT 142  
**Corequisite**: MLT 245
MLT 242 Body Fluids (W, SU, DL)   2 credits
This course presents the theoretical study of the physical, chemical, and microscopic evaluation of urine, feces, cerebrospinal fluid, synovial fluid, serous fluid, amniotic fluid, and seminal fluid. Results of the physical, chemical, and microscopic evaluation of these body fluids will be correlated clinically.
Lecture: 2 hours
Corequisite: MLT 243

MLT 243 Body Fluids Lab (SU, DL)   2 credits
This course presents the application of the physical, chemical, and microscopic evaluation of urine, feces, cerebrospinal fluid, synovial fluid, serous fluid, amniotic fluid, and seminal fluid. Results of the physical, chemical, and microscopic evaluation of these body fluids will be correlated clinically.
Lab: 4 hours
Corequisite: MLT 242  Lab Fee: $100.00

MLT 244 Medical Laboratory Case Studies (SU, DL)   3 credits
This course presents an introduction to the theoretical study of laboratory medicine and the understanding of the human in health and disease. Analytical procedures utilized to determine chemical constituents in blood, urine and other body fluids will be presented. The chemical principles of the methods will be discussed as well as the correlation of test results as indicators of presence or absence of disease.
Lecture: 3 hours
Prerequisite: CHEM 113 or CHEM 111

MLT 245 Hematology II Lab (SU, DL)   2 credits
This course presents the application of the advanced study of Hematology. Anemias, hemoglobin disorders, benign disorders of leukocytes, leukemias, cytology, and hemostasis will be covered. Abnormal morphologic characteristics of cells will be correlated with other laboratory results and disease processes. The study of Hematology instrumentations will include interpretation of abnormal histograms and scatterplots that are correlated clinically. Clinical interpretation and correlation is also included in the study of instrumentations that evaluates coagulation status and platelet function.
Lab: 4 hours
Prerequisites: MLT 141, MLT 142
Corequisite: MLT 240  Lab fee: $150.00

MLT 250 Clinical Microbiology (W, DL)   4 credits
This course presents an introduction to the theoretical study of laboratory identification and correlation of microbial agents associated with disease in man. Techniques utilized to isolate, identify, and evaluate the presence of clinically significant microorganisms will be presented. The course also includes an introduction into the study of medical mycology, parasitology, and virology.
Lecture: 4 hours
Prerequisite: BIO 215
Corequisite: MLT 251

MLT 251 Clinical Microbiology Lab (W, DL)   4 credits
This course is a practical introduction to the laboratory identification of microbial agents associated with disease in man. Techniques utilized to isolate, identify, and evaluate the presence of clinically significant microorganisms will be presented and practiced. The course also includes an introduction into the study of medical mycology and parasitology.
Lab: 12 hours
Prerequisite: BIO 215
Corequisite: MLT 250  Lab fee: $250.00

MLT 260 Clinical Chemistry (A, DL)   3 credits
This course presents the theory of biochemistry to laboratory medicine and the understanding of the human in health and disease. Analytical procedures utilized to determine chemical constituents in blood, urine and other body fluids will be presented. The chemical principles of the methods will be discussed as well as the correlation of test results as indicators of presence or absence of disease.
Lecture: 3 hours
Prerequisite: Placement into ENGL 101 or 111, placement out of DEV 044 and 031  Lab fee: $12.00

MHCR 114 Introduction to Chemical Dependency (A, W, SP, SU) 4 credits
This entry-level course provides the student with an overview of chemical dependency. Historical and cultural influences and models utilized to understand substance abuse and dependency are discussed. The ASAM/NCADD levels of care definition and the DSM-IV criteria of substance dependence are explored. Common drugs of abuse and their impact on the individual, family and society are presented. Students explore community resources available to persons with chemical dependency and their families. This course must be completed with a “C” or better.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 or 111, placement out of DEV 044 and 031  Lab fee: $12.00

MHCR 115 Introduction to Counseling (A, W, SP, SU) 4 credits
This introductory course focuses on the development of basic interviewing, rapport building, and active listening skills for the beginning student. The student gains a beginning understanding of the process and principles in establishing effective helping relationships using attending behaviors, effective questioning, empathy, and self-awareness. This course must be completed with a “C” or better.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 or 111, placement out of DEV 044 and 031  Lab fee: $12.00

MHCR 117 Introduction to Documentation Skills (A, W, SP, SU) 2 credits
The emphasis in this introductory course is on the use of behavioral writing to document services delivered to clients. Students learn beginning skills needed to maintain records, including writing progress notes. This course must be completed with a “C” or better.
Lecture: 2 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 or 111, placement out of DEV 044 and 031  Lab fee: $15.00

MHCR 191A Fundamentals in Human Service Practice: Helping Process (A, W, SP, SU) 4 credits
Emphasis in this core course is on understanding and applying the helping process. Students learn to apply data collection, data assessment, action planning, action/implementation, and evaluation skills. This course must be completed with a “C” or better.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: Admission to the program  Lab fee: $12.00
This course must be completed with a “C” or better.
Lecture: 2 hours – Lab: 0 hours
Practicum: 10 hours
Prerequisite: MHCR 237  Lab fee: $35.00

MHCR 241 Counseling Skills (A, W)  4 credits
This core course focuses on theoretical and practical aspects of effective helping through the counseling relationship with clients who have MH/CD and/or MR issues. Following a microtraining model, skills which form the foundation of effective communication are emphasized. Motivational Interviewing is introduced. Critical thought and creativity is also stressed. Course emphasizes practicing skills in small groups and in role play/simulations. This course must be completed with a “C” or better.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: MHCR 191A and B  Lab fee: $18.00

MHCR 245 Chemical Dependency I (A, W)  4 credits
This course is offered as part of the CD track only. Course content includes exploration of various philosophies and approaches to the treatment of addictions, recognition of signs and symptoms of substance dependence, assessing client’s stage of change, and the appropriate level of care for treatment. Issues and treatment for families and significant others are reviewed. Students complete a bio-psycho-social assessment, diagnostic summary, and didactic presentation. The 12 Core Functions of a substance abuse counselor are interwoven throughout the quarter. Students participate in, explore, and evaluate community support groups. Legal and ethical issues in the field of chemical dependency counseling are discussed. This course must be completed with a “C” or better.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: MHCR 191A and B  Corequisites: MHCR 241 and MHCR 293  Lab fee: $18.00

MHCR 274 Special Studies in MH/CD/MR (On Demand)  1–12 credits
This course provides an overview and analysis of service coordination/case management delivery field. This course must be completed with a “C” or better.
Lecture: 4 hours – Lab: 0 hours
Prerequisites: MHCR 253 and 295  Corequisite: MHCR 298  Lab fee: $18.00

MHCR 275 Special Populations in Human Services (On Demand)  2 credits
This course familiarizes the student with the cultural perspectives of specific client populations as it relates to working with clients and families in specific settings. The student participates as a member in a peer group to complement classroom theoretical constructs. This course must be completed with a “C” or better.
Lecture: Varies – Lab: Varies  Lab fee: $20.00
the field of human services. Students will explore specific aspects related to their professions (i.e., chemical dependency counseling, substance abuse prevention, mental health and case management services, or mental retardation and developmental disabilities. This course must be completed with a “C” or better.

**MHCR 284 Special Studies in MH/CD/MR (On Demand) 1–4 credits**

This course is designed to meet specific needs of students who wish to pursue in-depth training in the MH/CD/MR field. Typical subject areas include theory and skills in helping individuals who are chemically dependent, severely mentally disabled, dually-diagnosed, or persons with mental retardation/developmental disabilities. Instructional methods may include clinical experience, seminar format, field placement, lecture, research, videotape and role play. Students enroll in this course with permission of faculty or clinical coordinator. This course must be completed with a “C” or better.

Lecture: 2 hours – Lab: 0 hours  Lab fee: $20.00

**MHCR 290 Special Topics in Prevention (On Demand) 2 credits**

This course familiarizes the student with various aspects of prevention. Evidence-based practice standards will be utilized including risk and protection measures. Topics will rotate and include the prevention of various health related issues, violence, crime, delinquency, teen pregnancy, mental health issues, sexually transmitted diseases and other emerging issues.

Lecture: 2 hours – Lab: 0 hours  Lab fee: $4.00

**MHCR 291 Practicum in Teaching and Supporting Strategies (A, W) 4 credits**

This is a clinical experience for the student specializing in the Mental Health and Mental Retardation tracks which takes place in a community agency. The student practices the skills needed to teach and support people in vocational or community settings with an emphasis on habilitation/rehabilitation programming, self-determination, person centered planning, community connecting, teaching plans and job coaching. The student is expected to assume the role of service provider and is responsible for professional conduct and appropriate work habits. The student processes practicum experiences in a weekly seminar. This course must be completed with a “C” or better.

Lecture: 2 hours – Lab: 14 hours  Prerequisites: MHCR 191A and B  Corequisite: MHCR 247  Lab fee: $45.00

**MHCR 293 Practicum in Chemical Dependency I (A, W) 4 credits**

This is a required clinical experience for students in the Chemical Dependency track. The student is placed in an agency that provides chemical dependency treatment services. Students begin to participate in services that relate to the 12 core functions of a substance abuse counselor. Focus is on assessment, symptom identification and engaging clients in the treatment process. The student assumes the role of service provider demonstrating professional conduct and appropriate work habits. The student processes practicum experiences in a weekly seminar. This course must be completed with a “C” or better.

Lecture: 2 hours – Lab: 14 hours  Prerequisites: MHCR 191A and B  Corequisite: MHCR 245  Lab fee: $45.00

**MHCR 295 Practicum in Therapeutic Group Work (W, SP) 4 credits**

This is a clinical experience for the student in all three tracks in the MH/CD/MR program. In a community agency, the student leads or co-leads a group using skills learned in the classroom, in addition to maintaining one-on-one contact with an identified agency client. The student assumes the role of service provider, demonstrating professional conduct and appropriate work habits. This course must be completed with a “C” or better.

Lecture: 2 hours – Lab: 14 hours  Prerequisites: MHCR 241 and MHCR 247/291 or MHCR 245/293  Corequisite: MHCR 253  Lab fee: $50.00

**MHCR 296 Practicum in Chemical Dependency II (SP, SU) 4 credits**

This advanced clinical experience is required for the student in the Chemical Dependency track and continues to engage students in the 12 Core Functions of a substance abuse counselor. Emphasis is on co-occurring disorders and relapse prevention utilizing motivational enhancement and stage wise treatment throughout the practicum experience. The student assumes the role of service provider, demonstrating professional conduct and appropriate work habits. The student processes practicum experiences in a weekly seminar. This course must be completed with a “C” or better.

Lecture: 2 hours – Lab: 14 hours  Prerequisite: MHCR 253 and 295  Corequisite: MHCR 265  Lab fee: $50.00

**MHCR 298 Practicum in Service Coordination/Case Management (SP, SU) 4 credits**

This is a clinical experience for the Mental Health and Mental Retardation track student. The student practices service coordination and case management skills with emphasis on interdisciplinary treatment planning, assessment writing, and the implementation of appropriate referrals. The student assumes the role of service provider and is responsible for professional conduct and acceptable work habits. This course must be completed with a “C” or better.

Prerequisites: MHCR 253 and 295  Corequisite: MHCR 258  Lab fee: $35.00

**MHCR 299 Portfolio Completion Capstone Course in MH/CD/MR (SP, SU) 1 credit**

This course will provide the student with the opportunity to assemble, edit, and ready for presentation in portfolio format the collected assignments from each course in the major. Feedback regarding each course is solicited from the student. In addition, the content areas of ethical concerns in human services, effective team participation and avoiding “burnout” are addressed. This course must be completed with a “C” or better.

Lecture: 1 hour – Lab: 0 hours  Corequisite: Fourth and last technical course paired with practicum  Lab fee: $40.00

---

**Multi-Competency Health (MULT)**

**MULT 101 Medical Terminology (A, W, SP, SU, DL) 2 credits**

This introductory online course provides an overview of medical language. Emphasis will be placed on terms that are practical and commonly found in the day-to-day work of all allied health professions. This concise course gives basic principles for understanding the language with an overview of terms from many areas of medicine.

Lecture: 2 hours – Lab: 0 hours  Prerequisite: Placement into ENGL 101  Lab fee: $5.00

**MULT 102 Cardiopulmonary Resuscitation (CPR) (A, W, SP, SU) 1 credit**

Cardiopulmonary resuscitation and foreign body airway obstruction removal for adults, children and infants. This course includes training on the use of bag valve masks, automated external defibrillators (AED) and cricoid pressure. Students completing this course are eligible for American Heart Association Healthcare Provider certification. This course follows 2005 Emergency Cardiac Care (ECC) guidelines and is professional level CPR, only students in a pre-health or health program may take this course.

This is a one-day course held on main campus. Certification is good for two years. It may be repeated only with an instructor/coordinator signature.

Lecture: 1 hour – Lab: 0 hours  Prerequisite: Placement into ENGL 101  Lab fee: $40.00
MULT 103 Responding to Emergencies (A, W, SP, SU)  2 credits
Requirements for Red Cross Certification including artificial respiration, bleeding control, treatment of shock, and care of fractures are presented. This course includes MULT 102, American Heart Association CPR-Basic Life Support.
Lecture: 1 hour – Lab: 2 hours
Lab fee: $55.00

MULT 104 Adult and Pediatric CPR (for Non-Health Care Providers) (A, W, SP, SU)  1 credit
This course is based on the guidelines and standards set forth by the American Heart Association (AHA) in Heartsaver AED CPR. This course covers Adult and Pediatric Cardiopulmonary Resuscitation (CPR), Automated External Defibrillation (AED) and care to relieve a foreign body airway obstruction (FBAO) for the non-health care professional audience. Guidelines 2005 for CPR and Emergency Cardiovascular Care are presented and practiced by the student.
Lecture: 1 hour – Lab: 2 hours
Lab fee: $40.00

MULT 105 Exploring the Healthcare Professions (A, W, SP, SU, DL)  1 credit
This course encourages the learner to explore a personal interest in the health care field. The health care profession has many career pathways to consider and this course is designed to help the learner to understand his/her personal and professional interest as a health professional. The course will also address special topic and current issues related to health care.
Lecture: 1 hour
Prerequisite: Placement into ENGL 101

MULT 110 Basic Electrocardiography (EKG) (A, SP)  6 credits
This course is designed to provide basic entry-level skills in cardiovascular technology. The course covers an introduction to health care, anatomy and physiology of the heart, operation of the electrocardiograph and recording of EKG’s, cardiac pathologic and basic cardiac rhythm recognition skills. Completion of the course qualifies the student to function as an EKG technician, a skill ordinarily utilized in an acute health care setting or physician’s office. This course includes 24 hours of clinical experience.
Lecture: 5 hours – Lab: 2 hours
Lab fee: $38.00
Prerequisites: Placement into ENGL 101 and completion of a health record.

MULT 114 Phlebotomy Practicum II (A, W, SP)  1.5 credits
This course is designed to be a continuation of MULT 115 by providing an additional 60 hours clinical phlebotomy experience and requiring an additional 60 successful blood collections in a hospital in central Ohio or surrounding county. Phlebotomy Practicum II is designed for students who intend to be a professional phlebotomist and will be arranged individually. MULT 114 and MULT 115 completes the NAACLS approved program.
Lecture: 0 hours – Clinical: 60 hours total
Prerequisites: Completed health record and completion of MULT 115 with a “C” or better
Lab fee: $10.00

MULT 115 Phlebotomy (W, SU)  4.75 credits
This is the first course in a 2-quarter sequence of the NAACLS approved Phlebotomy program. In both the classroom and hospital setting, students will perform blood collection using various equipment and employing venipuncture and capillary puncture techniques. Professional ethics and liability, composition and appearance of blood, safety, anticoagulants and clinical relevance of laboratory tests are studied. Problems encountered in phlebotomy are reviewed in phlebotomy, In addition to special specimen collection for transfusion services, blood cultures, coagulation tests, timed tests and the nursery also are reviewed. This course includes a 40-hour clinical experience and at least 40 successful blood collections in a health care facility in central Ohio or a surrounding county. Student must be available for an 8-hour daytime shift, one time per week during the last half of the quarter for the clinical experience. Fingerprinting for a background check and drug screen are requirements for the clinical experience.
Lecture: 3 hours – Lab: 3 hours – Clinical: 40 hours total
Prerequisites: Completed health record, fingerprinting, attendance at a mandatory information session, MULT 101, and placement above or credit for ENGL 100
Lab fee: $55.00

MULT 116 Venipuncture for Health Care Providers (A, SP)  2 credits
Basic blood collection techniques using vacuum tubes and syringes will be covered and practiced in a laboratory and clinical setting. Emphasis is on basic skills, safety and infection control. Not open to students who have credit for MULT 114 and MULT 115 This course includes a 30-hour clinical experience and at least 50 successful blood collections in a central Ohio health care facility.
Lecture: 1 hour – Lab: 4 hours
Prerequisite: Completed health record and be enrolled in Medical Laboratory Technology Program. MLT 250
Lab fee: $28.00

MULT 127 Patient Care Assistant for the Workforce (A, W, SP, SU)  5 credits
This is a workforce training course for employees of health care systems which have a partnership with CSCC. Students gain knowledge and skills to function as patient care assistants.
Lecture: 3 hours – Lab: 6 hours
Prerequisite: Employee of health care system having a partnership with CSCC
Lab fee: $30.00

MULT 128 Introduction to Patient Care Assistant for the Workforce (A, W, SP, SU)  5 credits
This is a workforce training course for employees of health care systems which have entered into a partnership with CSCC. The student learns nurse aide training skills (basic patient care skills such as bathing, feeding, etc.) in order to work with patients prior to taking the Basic PCA/MSP training.
Lecture: 2 hours – Lab: 6 hours
Prerequisite: Employee of health care system having a partnership with CSCC

MULT 135 Basic PCA/MSP Training for the Workforce (A, W, SP, SU)  4 credits
This is a workforce training course for employees of health care facilities which have entered into a partnership with CSCC. In classroom, laboratory and clinical settings, students learn sterile techniques and patient care skills.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: NATP or MULT 128 and current employee of health care facility having a partnership with CSCC

MULT 136 Advanced Patient Care Assistant for the Workforce (A, W, SP, SU)  2 credits
This is a workforce training course for employees of health care systems which have entered into a partnership with CSCC. In classroom, laboratory, and clinical settings, students learn advanced patient care skills such as tracheostomy care.
Lecture: 1 hour – Lab: 2 hour
Prerequisite: MULT 135 and employee of health care facility having a partnership with Columbus State

MULT 137 Phlebotomy Training for the Workforce (A, W, SP, SU)  4 credits
This is a workforce training program for employees of health care facilities which have entered into a partnership with Columbus State. In classroom, laboratory and clinical settings, students learn the skills of drawing blood.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: MULT 135 or permission of instructor and employee of health care facility having a partnership with Columbus State
MULT 138 EKG Training for the Workforce (A, W, SP, SU)  
2 credits
This is a workforce training program for employees of health care facilities which have entered into a partnership with Columbus State. In classroom and laboratory settings, students learn the skills of performing electrocardiograms.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: MULT 135 or permission of instructor and employee of facility having a partnership with Columbus State

MULT 139 Basic PCA Training for the Workforce (A, W, SP, SU)  
4 credits
This is a workforce training program for employees of health care facilities which have entered into a partnership with Columbus State. In classroom and laboratory settings, students learn basic patient care skills.
Lecture: 2 hours – Lab: 4 hours
Prerequisite: Employee of facility having a partnership with Columbus State

MULT 140 Patient Care Technician Training for the Workforce (A, W, SP, SU)  
3 credits
This is a workforce training program for employees of health care facilities which have entered into a partnership with Columbus State. In classroom and laboratory settings, students learn sterile technique and advanced patient care skills.
Lecture: 2 hour – Lab: 2 hours
Prerequisite: MULT 139 or permission of instructor and employee of health care facility having a partnership with Columbus State

MULT 150: Histologic Techniques (A, DL)  
3 credits
This course provides an examination of all of the procedures that take place at the beginning of preparing a tissue sample for examination by the pathologist. These procedures include embedding techniques, tissue fixation, principles of microtomy and tissue processing.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: “C” or better in MATH 102, MULT 101, BIO 261, and CHEM 113, placement into ENGL 101, and acceptance into the Histology Program
Corequisite: MULT 151, 152

MULT 151: Histologic Techniques Clinical (A)  
2 credits
In this course, the student will apply the theory of the basic histologic techniques examined in MULT 150 in an authentic clinical setting.
Practicum: 15 hours/week
Prerequisites: “C” or better in MATH 102, MULT 101, BIO 261, and CHEM 113, placement into ENGL 101, and acceptance into the Histology Program
Corequisite: MULT 150, 152 Lab fee: $25.00

MULT 152 Tissue Identification (A, DL)  
3 credits
The structure and identification of tissue systems is emphasized at a cellular level. The student will develop skills that will assist them in identification of different tissue sources. Subsequently, the tissue source will be correlated with tissue function.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: “C” or better in MATH 102, MULT 101, BIO 261, and CHEM 113 and acceptance into the Histology Program.
Corequisite: MULT 150, 151

MULT 154 Chemistry of Stains I (W, DL)  
3 credits
This course addresses the fundamentals and clinical significance of routine and special histological staining.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: MULT 150 and MULT 152 with a “C” or better and MULT 151 with an “S”
Corequisite: MULT 155 Lab fee: $25.00

MULT 155 Chemistry of Stains I Clinical (W)  
2 credits
In this course, students will apply the concepts from MULT 154 in an authentic clinical setting.
Practicum: 15 hours/week
Prerequisites: MULT 150 and MULT 152 with a “C” or better, and MULT 151 with an “S”
Corequisite: MULT 154 Lab fee: $25.00

MULT 156 Chemistry of Stains II (SP, DL)  
3 credits
This course is a continuation of MULT 154 and will include special histology staining procedures including immunohistochemistry, and basic and advanced troubleshooting techniques.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: MULT 154 with a “C” or better and MULT 155 with an “S”
Corequisite: MULT 157

MULT 157 Chemistry of Stains II Clinical (SP)  
2 credits
In this course, students will apply the concepts from MULT 156 in an authentic clinical setting.
Practicum: 15 hours/week
Prerequisites: MULT 154 with a “C” or better and MULT 155 with an “S”
Corequisite: MULT 156 Lab fee: $25.00

MULT 171 Current Issues: HIV Infection (A, W, SP, SU)  
1 credit
MULT 171 is an introductory course covering the psychological, social, legal, and epidemiologic issues surrounding HIV infection. MULT 171 is offered as a term course.
Lecture: 1 hour – Lab: 0 hours Lab fee: $9.00

MULT 270 Human Resource Management for Health Services (W, SU, DL)  
4 credits
The focus of this course is the application, analysis, synthesis, and evaluation of human resource management principles and practices for health care managers. Practical application to past and current life/work experience is provided and emphasized. Case studies are used as simulations to provide future application in the real work setting.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $5.00

MULT 272 Health Care Resource Management (W, S, DL)  
4 credits
This course is designed to provide management approaches to health care resources (budget, equipment, supplies, etc.). It is intended for health care managers with limited financial skills.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $5.00

MULT 274 TQM/UM/Accreditation (A, SP, DL)  
4 credits
This course prepares health care professionals to apply, analyze, synthesize, and evaluate principles and practices of Total Quality Management (TQM), Utilization Management (UM), and Accreditation. TQM focuses on methods and systems to identify and resolve problems that interfere with optimal care and explore continuous quality improvement processes. UM enlightens the health care manager to their essential involvement in the review process and examines the meaning of utilization review to institutional performance. Accreditation process is presented in a practical manner to approach a very complex concern of health care managers. Health care managers will be more knowledgeable of and compliant with external accreditation processes.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $5.00
MUL 276 Legal Aspects and Risk Management (A, SP, DL) 3 credits
This course is designed to provide the student with an overview of the legal aspects and risk management of the health care system. It is intended for health care practitioners preparing to enter supervisory positions.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 101  Lab fee: $5.00

MUL 290 Special Topics in Health Care (A, W, SP, SU) 1–5 credits
This is a workforce training course for employees of health care facilities which have entered into a partnership with CSCC. Various current and timely topics will be offered to give students an opportunity to expand their knowledge and/or skill level in a special area of interest.
Lecture: 1-5 hours (maximum of 10) – Lab: 0 hours
Prerequisite: Permission of instructor and employee of facility having a partnership with CSCC

MUL 291 Special Topics in Health Care for the Workforce (A, W, SP, SU) 1–5 credits
This is a workforce training program for employees of health care facilities which have entered into a partnership with CSCC. Students will discuss various current and timely topics related to patient care.
Lecture: 1-5 hours (maximum of 10) – Lab: 0 hours
Prerequisite: Permission of instructor and employee of facility having a partnership with CSCC

Music (MUS)

MUS 101 History of Western Music (A, W, SP, SU) 5 credits
Course offers a survey of Western music from earliest times to the present, including the development of notation in music, the development and limitations of standard instruments, the role of patronage in musical developments, the relationship of changes in music to changes in society, and a consideration of the attributes of “great” music in any time or age. MUS 101 meets elective requirements in the Associate of Arts and Associate of Science degree programs and distributive transfer requirements in history, humanities and the arts.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $3.00

MUS 102 Introduction to Vocal Technique (A, W, SP, SU) 1 credit
MUS 102 provides an introduction to vocal technique for nonmusic majors. This class will develop basic skills for both solo and group singing through the use of traditional song materials. Course is repeatable for a total of 2 credits.
Lecture: 0 hours – Lab: 2 hours  Lab fee: $2.00

MUS 103 Vocal Technique II (A, W, SP, SU) 1 credit
This class is a continuation of MUS 102, offering continued development of skills for solo and group singing through traditional song material. Course is repeatable for a total of 2 credits.
Lecture: hours – Lab: 2 hours
Prerequisite: Admission by audition  Lab fee: $2.00

MUS 110 Basic Keyboard and Music Fundamentals I (A,W, SP, SU) 2 credits
MUS 110 introduces the fundamentals of keyboard technique combined with the development of music reading and basic aural skills. This course is for those without prior musical experience.
Lecture: 1 hour – Lab: 2 hours  Lab fee: $2.00

MUS 111 Basic Keyboard and Music Fundamentals II (A, W, SP, SU) 2 credits
MUS 111 continues the development of keyboard technique and basic musical theory.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: MUS 110 or permission of instructor  Lab fee: $2.00

MUS 120 Intro to Electronic Music (On Demand) 3 credits
This course will introduce students to the fundamentals of synthesized music. The origin, development and present day applications of computerized sound manipulations will be studied. Prototypical synthesizing, MIDI sequencing and digital sampling will be discussed, demonstrated and used in class. Instruction is through a combination of lecture and hands-on experience.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: MUS 110 or permission of instructor  Lab fee: $3.00

MUS 121 Fundamentals of Music Theory (On Demand) 5 credits
MUS 121 introduces the elements of music for nonmusic majors, including notation and the basic skills necessary for listening and performance. This class is designed to acquaint students with the elements and procedures necessary for the composition and performance of music.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $2.00

MUS 130 Electronic Music Lab (On Demand) 2 credits
This course is a continuation of MUS 120. The emphasis here is more on hands-on studio experience. Repeatable up to a total of 6 credits.
Lecture: 1 hour – Lab: 2 hours  Lab fee: $3.00

MUS 135 Electronic Music Ensemble (On Demand) 1 credit
Admission is through audition or permission of instructor. Class consists of a select group of musicians rehearsing, arranging, and performing music on electronic instruments. Repeatable for a total of 6 credits.
Lab: 2 hours  Lab fee: $3.00

MUS 140 World Music (On Demand) 5 credits
This course presents a survey of non-Western musical traditions, including forms of music, instrumental development and function, and the role of music and the musician in society. MUS 140 meets elective requirements in the Associate of Arts Degree program and distributive transfer requirements in history, humanities and the arts.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $2.00

MUS 160 Concert Band (A, W, SP) 1 credit
Admission is by audition. Participants prepare a variety of wind literature for performance. Prior experience in instrumental music is expected. Elective credit offered for Associate of Arts degree. Repeatable for a total of 6 credits.
Lecture: 0 hours – Lab: 2 hours  Lab fee: $5.00

MUS 165 Small Instrumental Ensemble (A, W, SP) 1 credit
Placement is through audition. MUS 165 allows a specialized ensemble to concentrate on specific instrumental techniques and/or to explore specialized musical literature. Prior experience in instrumental music is expected. Elective credit offered for Associate of Arts degree. Repeatable for a total of 6 credits.
Lecture: 0 hours – Lab: 2 hours  Lab fee: $5.00
MUS 170 Gospel Vocal Ensemble (A, W, SP) 1 credit
MUS 180 Vocal Ensemble (A, W, SP) 1 credit
MUS 217 Electronic Sound (On Demand) 4 credits
MUS 221 Musicianship I (A) 5 credits
MUS 222 Musicianship II (W) 5 credits
MUS 223 Musicianship III (SP) 5 credits
MUS 224 Contemporary and Jazz Theory (On Demand) 5 credits
MUS 230 The Business of Music (On Demand) 5 credits
MUS 241 Music History I (A) 3 credits
MUS 242 Music History II (W) 3 credits
MUS 243 Music History III (SP) 3 credits
MUS 244 History of Jazz and Popular Music (On Demand) 3 credits
MUS 245 American Music (On Demand) 3 credits
MUS 246 African American Music (On Demand) 3 credits
MUS 247 World Music (On Demand) 3 credits
MUS 249 Music History IV (SP) 3 credits
MUS 250 Music History V (SP) 3 credits
MUS 251 Audio Production I (On Demand) 4 credits
MUS 252 Audio Production II (On Demand) 4 credits
MUS 253 Audio Production III (On Demand) 4 credits
MUS 254 Special Topics in Audio (On Demand) 1–5 credits
MUS 255 Special Topics in Audio Production (On Demand) 1–5 credits
MUS 256 Special Topics in Music Technology (On Demand) 1–5 credits
MUS 257 Special Topics in Recording Engineering (On Demand) 1–5 credits
MUS 258 Special Topics in Musical Acoustics (On Demand) 1–5 credits
MUS 259 Special Topics in Music Research (On Demand) 1–5 credits
MUS 260 Special Topics in Music Education (On Demand) 1–5 credits
MUS 261 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 262 Special Topics in Music Business (On Demand) 1–5 credits
MUS 263 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 264 Special Topics in Music Business (On Demand) 1–5 credits
MUS 265 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 266 Special Topics in Music Business (On Demand) 1–5 credits
MUS 267 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 268 Special Topics in Music Business (On Demand) 1–5 credits
MUS 269 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 270 Special Topics in Music Business (On Demand) 1–5 credits
MUS 271 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 272 Special Topics in Music Business (On Demand) 1–5 credits
MUS 273 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 274 Special Topics in Music Business (On Demand) 1–5 credits
MUS 275 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 276 Special Topics in Music Business (On Demand) 1–5 credits
MUS 277 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 278 Special Topics in Music Business (On Demand) 1–5 credits
MUS 279 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 280 Special Topics in Music Business (On Demand) 1–5 credits
MUS 281 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 282 Special Topics in Music Business (On Demand) 1–5 credits
MUS 283 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 284 Special Topics in Music Business (On Demand) 1–5 credits
MUS 285 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 286 Special Topics in Music Business (On Demand) 1–5 credits
MUS 287 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 288 Special Topics in Music Business (On Demand) 1–5 credits
MUS 289 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 290 Special Topics in Music Business (On Demand) 1–5 credits
MUS 291 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 292 Special Topics in Music Business (On Demand) 1–5 credits
MUS 293 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 294 Special Topics in Music Business (On Demand) 1–5 credits
MUS 295 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 296 Special Topics in Music Business (On Demand) 1–5 credits
MUS 297 Special Topics in Music Therapy (On Demand) 1–5 credits
MUS 298 Special Topics in Music Business (On Demand) 1–5 credits
MUS 299 Special Topics in Music Therapy (On Demand) 1–5 credits

Admission is by audition. Participants practice and prepare for concert performance of music. Admission is by audition. Participants practice and prepare for a variety of music for concert performance. Ability to read music is helpful but not required. It is suggested that new Ensemble members take MUS 102 concurrently. Repeatable for a total of 6 credits.

This course is part of the Time Arts curriculum and will explore the history of electronic music as well as introduce the techniques and methods for structuring sound digitally.

Course covers the elements of music and musical notation; analytical concepts and terminology; major and minor scales; fundamentals of harmony and melody as well as the development of basic aural skills, sight singing and dictation. MUS 221 is for students intending to major in music or those with strong interest in music.

This course surveys the origins and development of jazz, the uniquely American musical idiom. 19th century origins of jazz, Dixieland, Chicago sound and evolution of the 1920s and 1930s big bands, cool jazz, and the influence of jazz on other popular music of the 20th century will be explored through listening to recordings by major innovators and studying the written forms. Ability to read music is assumed.

This course offers students an opportunity for a detailed examination of the Rococo through the Early Romantic (1850) periods. Student ability to read music is assumed.

This course surveys the development of music from earliest times to the 18th century. Student ability to read music is assumed.

Natural Science (NSCI)

A mandatory safety lesson (normally given in the laboratory) must be completed before the student is admitted to certain natural science laboratory sessions. Approved safety goggles are required for some laboratory sessions and may be purchased through the bookstore. Attendance during the first week of class is mandatory and may affect a student’s continued enrollment in these classes. Students must complete 60% of the laboratories in the course to receive credit.

NSCI 101, NSCI 102, and NSCI 103 are offered in both distance learning (DL) and hybrid formats. Students enrolled in hybrid sections of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus. For the DL sections of this course, students will be mailed a laboratory kit which requires a refundable deposit and on-campus participation is limited. Check the Global Campus site for more information on each format.

Note: Courses taught at a distance (DL) may have a higher lab fee than traditionally taught courses and DL sections will require a refundable deposit on laboratory kits. Laboratory kits are available to be picked up on campus or mailed to the student.

NSCI 101 Natural Science I (A, W, SP, SU, DL) 5 credits
This course covers the evolution of the physical and biological sciences from antiquity to the modern era. Topics include early ideas of the physical world, the principles of mechanics and optics, microscopy and its role in the development of cell and germ theory, germ theory, the atomic nature of matter, and the classification and bonding of the elements. Related laboratory and demonstrations. Safety training and goggles are required for the laboratory. This course is offered in a distance learning (DL) and hybrid format.
Lecture: 4 hours – Lab: 3 hours
Prerequisites: Placement into ENGL 101 and placement into MATH 102 or higher Lab fee: $19.00

NSCI 102 Natural Science II (A, W, SP, SU, DL) 5 credits
NSCI 102 is a continuation of NSCI 101. Topics include the laws of chemical combination, chemical reactions, evolution and natural selection, the diversity of life and ecology, the concept of energy, heat and thermodynamics, kinetic theory, electricity and magnetism, the nature of light and quantum mechanics. Related laboratory and demonstrations. Safety training and goggles are required for the laboratory. This course is offered in a distance learning (DL) and hybrid format.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: NSCI 101 or equivalent Lab fee: $19.00

NSCI 103 Natural Science III (A, W, SP, SU, DL) 5 credits
This course integrates the study of chemistry and biology with an emphasis on topics which have had an impact on the development of science in the twentieth century. Topics include early ideas of the physical world, the principles of mechanics and optics, microscopy and its role in the development of cell and germ theory, germ theory, the atomic nature of matter, and the classification and bonding of the elements. Related laboratory and demonstrations. Safety training and goggles are required for the laboratory. This course is offered in a distance learning (DL) and hybrid format.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: NSCI 102, equivalent, or permission of instructor Lab fee: $19.00

NSCI 110 Science and Ethical Thought (On Demand) 5 credits
An introduction to the complex relationship between science and ethics and how it relates to today’s political and social climate. After briefly discussing the history of ethics, students will research and discuss important topics centered on social issues, environmental issues, technological issues and medical issues. The student will be responsible for readings, handouts, writing and opinion assignments, and group projects.
Lecture: 5 hours
Prerequisite: ENGL 101 Lab Fee: $6.00

Nuclear Medicine Technology (NUC)

NUC 149 Introduction to Clinical Nuclear Medicine Technology (W) 3 credits
This course is a basic introduction to nuclear medicine principles and clinical procedures. Areas of emphasis include fundamentals of nuclear medicine imaging, radiation safety, patient care and venipuncture.
Lecture: 1 hour – Lab: 0 hours
Prerequisites: Completed health record, acceptance into the Nuclear Medicine Technology program and NUC 200.

NUC 200 Introduction to Nuclear Medicine Technology (AU) 3 credits
This course is a prerequisite for all other Nuclear Medicine Technology courses. Areas of emphasis include fundamentals of nuclear medicine imaging, medical ethics, quality control testing, and radiopharmaceuticals.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Admission to program

NUC 213 Physics and Nuclear Imaging I: Lecture (W) 3 credits
This course will introduce the basic concepts of the atom, nuclear physics, interactions between radiation and matter, and nuclear imaging and counting devices. Lectures will emphasize the fundamentals of radioactivity and radioactive decay, radionuclides, basic statistics and quantitative measurements used in nuclear medicine, and computers and computer programming.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: NUC 200

NUC 214 Physics and Nuclear Imaging I: Lab (W) 1 credit
This course will introduce the basic concepts of the atom, nuclear physics, interactions between radiation and matter, and nuclear imaging and counting devices. Lab exercises will emphasize the fundamentals of radioactivity and radioactive decay, radionuclides, basic statistics and quantitative measurements used in nuclear medicine, and computers and computer programming.
Lecture: 0 hours – Lab: 2 hours
Prerequisite: NUC 200 Lab fee: $10.00

NUC 215 Physics and Nuclear Imaging II: Lecture (SP) 3 credits
This course serves as a continuation of NUC 213 and 214 Physics and Nuclear Imaging I. This course will consist of a lecture series that will provide an in-depth study of the electronics of imaging and counting devices, fundamentals of collimation, operational characteristics of radiation detector systems and imaging devices including Anger type single and multichannel crystals. Single photon emission computerized tomography (SPECT), positron emission tomography (PET) detectors, and scintillation probe, survey meter, and dose calibrator type counting devices. Lecture: 3 hours – Lab: 0 hours
Prerequisites: NUC 213, NUC 214

NUC 216 Physics and Nuclear Imaging II: Lab (SP) 1 credit
This course serves as a continuation of NUC 215 Physics and Nuclear Imaging II Lecture. This course will consist of a lab series that will provide an in-depth study of the electronics of imaging and counting devices, fundamentals of collimation, operational characteristics of radiation detector systems and imaging devices including Anger type single and multichannel crystals.
cameras, single photon emission computerized tomography (SPECT), positron emission tomography (PET) detectors, and scintillation probe, survey meter, and dose calibrator type counting devices.

**NUC 217 Physics and Nuclear Imaging III**: Lecture (SU) 3 credits
This course is a continuation of NUC 215 and 216 Physics and Nuclear Imaging II. Through lecture, it will emphasize record keeping, nuclear regulations and licensure, and an advanced study of the operational characteristics of single photon emission computerized tomography (SPECT), Positron Emission Tomography (PET), and single and multicrystal camera operations and performance. This course will also provide an in-depth knowledge of nuclear imaging and counting device quality control, quality assurance, and acceptance testing programs.

- Lecture: 3 hours
- Prerequisite: NUC 215, NUC 216

**NUC 218 Physics and Nuclear Imaging III: Lab (SU) 1 credit**
This course is a continuation of NUC 215 and 216 Physics and Nuclear Imaging II. Through lab exercises, it will emphasize record keeping, nuclear regulations and licensure, and an advanced study of the operational characteristics of single photon emission computerized tomography (SPECT), Positron Emission Tomography (PET), and single and multicrystal camera operations and performance. This course will also provide an in-depth knowledge of nuclear imaging and counting device quality control, quality assurance, and acceptance testing programs.

- Lecture: 0 hours – Lab: 2 hours
- Prerequisite: NUC 215, NUC 216 Lab fee: $10.00

**NUC 232 Radiation Safety and Protection (A) 2 credits**
This course enables students to understand the duties of a Radiation Safety Officer (RSO) and a radiation safety program. The radiation safety program outlines the radiation protection of technologists and the public by teaching the basis of radiation measurement, the practical methods of radiation protection (time, distance, and shielding), use of personnel monitoring devices, compliance with federal, state, and local regulations including ALARA, maintenance of required records, compliance with receipt and disposal regulations of all radionuclides, supervision of a quality management program for therapeutic dosages and follow-up procedures, performance of appropriate radiation surveys and decontamination procedures, disposal of radioactive waste, and conduction of in-service education programs.

- Lecture: 2 hours – Lab: 0 hours
- Prerequisite: Accepted into program

**NUC 234 Radiochemistry and Radiopharmacy I (W) 3 credits**
This course will present the basics of operating a hospital or commercial-based nuclear pharmacy by emphasizing radiopharmaceutical receipt and storage, physical and biological characteristics of radiopharmaceutical generators, preparation, quality control, activity unit calculations, administration of diagnostic and therapeutic radiopharmaceuticals, and FDA, NRC, and State Regulations. All commonly used radiopharmaceuticals will be discussed along with their associated methods of localization.

- Lecture: 3 hours – Lab: 0 hours
- Prerequisites: NUC 232, CHEM 113

**NUC 235 Radiochemistry and Radiopharmacy II (SP) 4 credits**
This course is a continuation of NUC 234 Radiochemistry and Radiopharmacy I and will review and practice during lecture and lab exercises the basics of operating a hospital or commercial nuclear pharmacy by emphasizing radiopharmaceuticals, generators, radiopharmaceutical preparation, radiopharmaceutical quality control, radiopharmaceutical activity and unit calculations, administration of diagnostic and therapeutic radiopharmaceuticals and FDA, NRC, and State regulations. All commonly used radiopharmaceuticals will be discussed along with their associated methods and localization.

- Lecture: 3 hours – Lab: 2 hours
- Prerequisites: NUC 234, CHEM 113 Lab fee: $75.00

**NUC 240 Seminar I (A) 1 credit**
This class will devote class sections to the discussion of new technology including techniques, imaging modalities, and equipment. In addition the students will prepare a literature search project that will review the nuclear medicine literature for pertinent changes in the nuclear medicine core areas.

- Lecture: 1 hour – Lab: 0 hours
- Prerequisite: NUC 252

**NUC 241 Seminar II (W) 1 credit**
This class will continue to devote class sections for the discussion of new technology including techniques, imaging modalities, and equipment. This class will also discuss responsibilities including the preparation of a nuclear medicine budget, the purchase/lease of new equipment, and administrative duties including a review of the insurance and governmental reimbursement process.

- Lecture: 1 hour – Lab: 0 hours
- Prerequisite: NUC 240

**NUC 242 Seminar III (SP) 1 credit**
This class is a continuation of Seminar II and, in addition, will include a comprehensive review of the content areas covered by the American Registry of Radiological Technologists (ARRT [N]), and the Nuclear Medicine Technology Certification Board (NMTCB) examinations.

- Lecture: 1 hour – Lab: 0 hours
- Prerequisite: NUC 241

**NUC 251 Clinical Theory and Procedures I (SP) 5 credits**
This course sequence introduces to the student how a diagnostic study is completed from start to finish. Pre-study preparations will be emphasized including scheduling of patients, choosing the proper radiopharmaceutical, basic patient preparations, and providing patient care and maintaining communication. General study procedures will then be introduced by reviewing the applicable anatomy/physiology and methods of pharmaceutical localization, discussing the performance of imaging procedures including selecting the proper camera or instrument, introducing proper patient and camera positioning, utilizing imaging techniques and methodologies, and performing data manipulation, image processing, and image critique. Adult/pediatric considerations and procedures will be discussed.

- Lecture: 4 hours – Lab: 2 hours
- Prerequisites: NUC 200, NUC 234 Lab fee: $20.00

**NUC 252 Clinical Theory and Procedures II (SU) 5 credits**
This course will continue to emphasize the fundamentals previously introduced in Section I while covering procedures that study the cardiovascular, central nervous, endocrine, gastrointestinal, genitourinary, pulmonary, and musculoskeletal systems. Adult/pediatric considerations and procedures will be discussed. Cross sectional or SPECT images will be emphasized.

- Lecture: 4 hours – Lab: 2 hours
- Prerequisite: NUC 251 Lab fee: $20.00

**NUC 254 Clinical Theory and Procedures III (SU) 5 credits**
This course will continue to emphasize the fundamentals previously introduced in Sections I and II while covering additional procedures that study the hematological system, infection imaging, and tumor imaging. Special emphasis will be placed on Positron Emission Tomography (PET) methodologies including fusion technologies that allow the superimposition of PET with CT or MRI Images. Adult/pediatric considerations and procedures will be discussed. Therapeutic procedures will also be studied including therapies of the endocrine, hematological, intracavitary and skeletal systems. An in-depth study of federal (NRC and FDA) and state regulations regarding therapy procedures will be reviewed.

- Lecture: 4 hours – Lab: 2 hours
- Prerequisite: NUC 252 Lab fee: $20.00

**NUC 260 Clinical Practicum I (SP) 3 credits**
In this first clinical practicum, the student will rotate through clinical hospitals and private offices and, while accompanied by a registered Nuclear
Medicine Technologist, will become familiar with the care and positioning of the patient and camera. Proficiency requirements are completed using a competency-based format. Students are required to complete a portion of the “Required and Elective Procedures” list that will be reviewed at the completion of each practicum course. This “Required and Elective Procedures” list will need to be 100% completed by the end of Clinical Practicum V. A special form will be utilized to allow the student to list how the study was conducted. This same form will be utilized in the “Projects in Nuclear Medicine” class. Technologist film critique and physician interpretation are incorporated into the form to provide a correlation of all factors that comprise a finished nuclear medicine image(s) to include an analysis of the structure or organ that was imaged/counted, patient positioning, radiation protection, and date processing.

Lecture: 0 hours – Lab: 0 hours – Clinical: 16 hours
Prerequisite: NUC 234 Lab fee: $75.00

NUC 261 Clinical Practicum II (SU) 2 credits
As a continuation of Clinical I, Clinical II provides the practical experience for the student to work more independently as a technologist and is designed to enhance and compliment didactic/lab studies. Nuclear medicine imaging/counting procedures, instrumentation, radiopharmaceutical injection/patient preparation, data and image processing, and assisting with quality assurance procedures will be emphasized.

Lecture: 0 hours – Lab: 0 hours – Clinical: 16 hours
Prerequisite: NUC 260 Lab fee: $75.00

NUC 262 Clinical Practicum III (A) 3 credits
As a continuation of Clinical II, Clinical III provides the practical experience for the student to work more independently as a technologist, and is designed to enhance and complement didactic/lab studies. Nuclear medicine imaging/counting procedures, instrumentation, radiopharmaceutical preparation under supervision, radiopharmaceutical injection/patient preparation, data and image processing, and performing/critiquing quality assurance procedures are emphasized. Film critique and physician review are continued.

Lecture: 0 hours – Lab: 0 hours – Clinical: 24 hours
Prerequisite: NUC 261 Lab fee: $75.00

NUC 263 Clinical Practicum IV (W) 3 credits
As a continuation of Clinical III, Clinical IV provides the practical experience for the student to work more independently as a technologist, and is designed to enhance and complement didactic/lab studies. In addition to the hospital rotations, students are to begin rotational shifts in the commercial/hospital based radiopharmacies, radiation safety offices, radiologist/nuclear medicine physician reading rooms, and human resource departments. They are to prepare radiopharmaceuticals, communicate to patients, conduct imaging/counting/therapeutic studies, perform data and SPECT analysis, conduct image processing, and perform quality assurance procedures with little supervision. Film critique and physician review are continued.

Lecture: 0 hours – Lab: 0 hours – Clinical: 24 hours
Prerequisite: NUC 262 Lab fee: $75.00

NUC 264 Clinical Practicum V (SP) 3 credits
As a continuation of Clinical IV, Clinical V provides the practical experience for the student to work more independently as a technologist, and is designed to enhance and complement didactic/lab studies. Students in addition to the hospital rotations are to continue to rotate through commercial/hospital based radiopharmacies, radiation safety offices, radiologist/nuclear medicine physician reading rooms, and human resource departments. Students will be required to present their completed “Required and Elective Procedures” list in which they will prove their competency to perform the preparation of radiopharmaceuticals, communicate to patients, conduct imaging/counting/therapeutic studies, perform data and SPECT analysis, conduct image processing, and perform quality assurance procedures with little supervision. Film critique and physician review are continued.

Lecture: 0 hours – Lab: 0 hours – Clinical: 24 hours
Prerequisite: NUC 263 Lab fee: $75.00

NUC 265 Case Studies I (A) 1 credit
This course will enable the student to conduct a project that will contribute to what the student will utilize in his/her future career. In most cases, a procedure manual will be required to be completed that will be 75% prepared from the completion of the “Required and Elective Procedures” list that was utilized in Clinical Practicum classes I-V. A special form will be utilized that will standardize the manual. This form will be given to the student beginning in Clinical Practicum I, which will enable the student to accumulate these procedures as they progress through their Clinical Practicum courses.

Lecture: 1 hour – Lab: 0 hours
Prerequisite: NUC 270

NUC 266 Case Studies II (W) 1 credit
This class will be a continuum of NUC 265 Case Studies I. The students will conduct the case studies in this course by completing a predetermined number of mandatory and elective case studies. The students will be responsible for conducting the patient exam from start to finish, and to complete a form for each case study. Conduction of the exam is to include taking the patient history, determining the pre-test diagnosis, preparing and administering the radiopharmaceutical, preparing, positioning, computing, and completing the exam on a camera/computer/counting device, critiquing the exam, displaying/presenting the exam to a radiologist or nuclear medicine physician, and explaining the post-test diagnosis and problems encountered while conducting the examination. Presentations to the class will be an integral part of the course.

Lecture: 1 hour – Lab: 0 hours
Prerequisite: NUC 265

NUC 267 Case Studies III (A) 1 credit
This course will be a continuum of NUC 266 Case Studies II. The student will be involved in holistic assessments of clients across the life span with consideration given to ethnic variations. Developmental considerations in geriatric and pediatric clients will be discussed. Legal ramifications of nursing assessment will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hour – Lab: 3 hours
Prerequisite: Admission to Nursing or permission of instructor
Corequisites: BIO 261, ENGL 101 or 111, NURS 110
Lab fee: $80.00

Nursing (NURS)

NURS 100 Health Assessment in Nursing (A, SP) 3 credits
The student will be involved in holistic assessments of clients across the life span with consideration given to ethnic variations. Developmental considerations in geriatric and pediatric clients will be discussed. Legal ramifications of nursing assessment will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hour – Lab: 3 hours
Prerequisite: Admission to Nursing or permission of instructor
Corequisites: BIO 261, ENGL 101 or 111, NURS 110
Lab fee: $80.00
NURS 109 Student Transition (A, W, SP, SU) 1 credit
This course is designed to assist the student who has life experience credit for one or more designated nursing courses with transition into the nursing sequence. The components of the course include socialization into the Associate Degree Nursing student role at Columbus State, nursing process, communications skills, and selected psychomotor skills.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: Acceptance into Nursing via LPN route or transfer student route
Lab fee: $57.00

NURS 110 Introduction to Nursing (A, SP) 3 credits
The student will examine the historic and current role of the nurse in the health care delivery system. The nursing process is introduced as a method for planning care and self-care activities that promote, maintain, and restore health in adult and geriatric clients. Communication techniques, teaching/learning principles, and computer skills used by the nurse in delivery of care will be discussed. The student will examine the economics and services available within the health care delivery system. Ethical and legal issues related to the practice of nursing are introduced. Safe implementation of technical skills with a holistic approach and attention to cultural consideration is stressed. Beginning principles of critical thinking are discussed. Clinical experiences are provided in a variety of community settings 4 hours each week. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 1 hour – Lab: 6 hours
Prerequisite: Admission to Nursing
Corequisites: BIO 261, ENGL 101 or ENGL 111, and NURS 100
Lab fee: $79.00

NURS 111 Health Promotion of Women and Families (W, SU) 6 credits
The student will focus on the role of the nurse as a provider of care in the promotion of health for women and families. The influence of cultural diversity and health care economics on women and families will be included. The student will use the nursing process in providing care and promoting self-care activities. Emphasis will be placed on the teaching/learning process. Concepts of mental and spiritual health will be introduced. Community resources available to women and families will be examined. Clinical experiences will be provided in a variety of community settings 7 hours each week. The student will begin application of critical thinking principles. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 2 hours – Lab: 9 hours
Prerequisites: NURS 100, NURS 110, ENGL 101 or ENGL 111, BIO 261
Corequisites: BIO 262, PSY 240, NURS 123, and NURS 132
Lab fee: $57.00

NURS 112 Introduction to Nursing Concepts of Health Maintenance and Restoration (A, SP) 6 credits
The student will focus on the role of the nurse as a provider of care for persons in need of maintenance and/or restoration of health. The student will study the impact of developmental levels and the effect of acute, chronic, or terminal conditions as they relate to the ability of the person and family to care for themselves. The physical, psychological, and spiritual well being of the person and family during the dying and death process will be emphasized. The concepts studied include perioperative nursing, pain management, infectious processes, cancer, fluid and electrolyte imbalances, and altered nutrition. A variety of community settings for adults and children will be utilized for the clinical experience scheduled 10 hours each week. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 2 hours – Lab: 12 hours
Prerequisites: NURS 111, NURS 123, NURS 132, BIO 262, and PSY 240
Corequisites: NURS 124, NURS 133, BIO 263 Lab fee: $78.00

NURS 113 Concepts of Pharmacology I (W, SU) 2 credits
This is the first of two courses where the focus will be on the nurse’s role in drug administration to persons of all ages and the effects of medications on patients. Drug classifications and their relationship to promotion, maintenance, and restoration of health will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 2 hours – Lab: 0 hours
Prerequisites: NURS 110, NURS 100
Lab fee: $57.00

NURS 114 Concepts of Pharmacology II (A, SP) 2 credits
This is the second of two courses where the focus will be on the nurse’s role in drug administration to persons of all ages and the effects of medications on patients. Drug classifications and their relationship to promotion, maintenance, and restoration of health will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 2 hours – Lab: 0 hours
Prerequisites: NURS 113, 132
Corequisite: NURS 133 Lab fee: $57.00

NURS 123 Nursing Skills I (W, SU) 2 credits
This is the first of two nursing skills courses. In this course, the student is introduced to the principles and concepts underlying the performance of select nursing skills as the technical aspects necessary in performing those skills will be discussed. Critical thinking and communication techniques, which are integral components of the application of these skills in nursing practice, are included. In each unit of instruction the legal, ethical, and economic issues related to the skills will be presented.
Lecture: 1 hour – Lab: 3 hours
Prerequisites: NURS 110, NURS 100
Corequisites: NURS 111, NURS 132 Lab fee: $68.00

NURS 124 Nursing Skills II (A, SP) 2 credits
This is the second of the nursing skills courses. Principles and concepts underlying the performance of select nursing skills, as well as the technical aspects necessary in performing those skills, will be discussed. Critical thinking and communication techniques, which are integral components of the application of these skills in nursing practice, are included. As a provider of care, the nurse implements nursing skills with consideration to the developmental level of the person and to the venue in which they practice. In each unit of instruction, the legal, ethical, and economic issues related to the skills will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 1 hour – Lab: 3 hours
Prerequisites: NURS 123, 132
Corequisite: NURS 133 Lab fee: $73.00

NURS 132 Concepts of Pharmacology I (W, SU) 2 credits
The student is introduced to the general principles of pharmacology. This is the first of two courses where the focus will be on the nurse’s role in drug administration to persons of all ages and the effects of medications on patients. Drug classifications and their relationship to promotion, maintenance, and restoration of health will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 2 hours – Lab: 0 hours
Prerequisites: NURS 110, NURS 100
Lab fee: $62.00

NURS 133 Concepts of Pharmacology II (A, SP) 2 credits
This is the second of two courses where the focus will be on the nurse’s role in drug administration to persons of all ages and the effects of medications on patients. Drug classifications and their relationship in promotion, maintenance, and restoration of health will be presented. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.
Lecture: 2 hours – Lab: 0 hours
Prerequisites: NURS 132 or permission of instructor.
Corequisite: NURS 124 Lab fee: $64.00

NURS 181 Spiritual Nursing Care (W, SU) 3 credits
This course is designed to introduce the student to the basic concepts of spiritual nursing care. The focus of the course will be to help students understand their own spirituality and to develop skills necessary to provide effective spiritual nursing care across the life span while being sensitive to cultural, religious, and ritual practices. Students will be introduced to assessment tools and interventions used to meet the patient’s spiritual nursing care needs.
Lecture: 3 – Lab: 0 hours
Prerequisites: NURS 110, NURS 100

NURS 182 Neonatal Nursing (W, SU) 2.5 credits
The student will focus on the role of the nurse as the provider of care for the high risk neonate and their families. This course examines neonatal development and potential complications in the antepartum and postpartum periods. The student will gain specialized knowledge and skills to provide care ranging from pre-hospitalization through post-discharge and follow up. Students must receive a grade of “C” or better in this course as a prerequisite for subsequent courses.
a prerequisite for subsequent courses. This course may be used to fulfill the elective requirement for nursing.

Lecture: (Online) 2 hours – Lab: 1 hr (on campus [5 two-hour labs])
Prerequisite: NURS 112  Lab Fee: $15.00

NURS 189 Principles of Basic Trauma Nursing (SU, W) 3 credits
This course is designed to introduce the student to the basic concepts of trauma nursing. The focus of the course will be the exploration of major concepts and issues underlying the specialty of trauma nursing. Through an organized and standardized approach, students will review the mechanisms of injury, problems arising from these injuries, and related nursing care. The course will include content about adult trauma nursing, triage, airway management, shock/cardiac arrest, trauma to specific anatomic and physiologic systems, psychosocial impact of trauma, and organ donation. Learning opportunities will include use of the Human Patient Simulator. Students must receive a grade of “C” or better in this course as a prerequisite for subsequent courses. This course may be used to fulfill the elective requirement for nursing.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: Nursing 211 or permission of the instructor
Lab fee: $25.00

NURS 190 Holistic Interventions for Health Care Practitioners (A, SP) 2 credits
The student will be introduced to various healing modalities and complementary therapies that are used by health care practitioners to provide holistic care to a patient. Included will be an overview of the body/mind paradigm and a survey of commonly used techniques such as guided imagery, meditation and therapeutic touch. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Admission to a health technology or permission of instructor
Lab fee: $5.00

NURS 191 Basics of Gerontological Nursing (W, SP, DL) 3 credits
The student is introduced to the concepts of gerontological nursing. The focus is on meeting the needs of the elderly. Assessment, maintenance, and restoration of health for those over the age of 65 are presented. The nursing process is used as the framework for the development of thinking skills. Content will reflect on the influence of the legal, ethical, cultural, and economic issues related to the health care needs of the elderly. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Admission to a health technology or permission of instructor
Lab fee: $5.00

NURS 192 Introduction to Community Nursing (On Demand) 3 credits
The course introduces students to the basic concepts and issues underlying Community Health Nursing. Course is intended to assist students in clarifying conceptual issues in the specialty and in developing positions on critical issues related to access to care and analysis of existing delivery systems. The course will also provide the tools of practice necessary for the registered nurse already working in a community setting. Assessment, promotion, maintenance, and restoration of health are presented for families, communities, and common community health problems. The nursing process is used as the framework for critical thinking skills. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: NURS 112 or permission of instructor
Lab fee: $5.00

NURS 193 End of Life Care (A, SP, DL) 2 credits
The student will be introduced to various nursing interventions appropriate at the end of life. Included will be an overview of commonly experienced problems. Nine critical areas including palliative care, quality of life, pain symptom management, communication needs of caregivers, the dying process, ethics and bereavement will be explored. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Admission to a Health Technology or permission of the instructor
Lab fee: $10.00

NURS 194 Using Advanced Nursing Skills to Manage the Care of Critically Ill Adult Patients (A, SP) 3 credits
The student will be exposed to the advanced theory and skills needed to manage the care of individuals in a variety of critical care areas. The focus will be on identifying critical situations and potential problems and selecting and implementing the appropriate interventions. Students will apply theory and skills to case studies and clinical situations. Students will be exposed to such advanced skills as cardiac monitoring, hemodynamic monitoring, ventilator support, critical care drugs, emergent and code situations using case studies and simulated patient care situations. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: NURS 112 or permission of instructor
Lab fee: $25.00

NURS 195 Nursing Concepts Enhancement I (W, SU) 1 credit
The course is designed to assist the student to meet the outcomes of the nursing curriculum through enhanced test-taking skills. Students will apply nursing concepts to formulating responses in testing situations. This course can be used to fulfill the elective requirement for nursing.

Lecture: 1 hour – Lab: 0 hours
Prerequisites: NURS 112 and Nursing Outcome Exam I completed
Lab fee: $34.00

NURS 196 Nursing Concepts Enhancement II (A, SP) 1 credit
The course is designed to assist the student to meet the outcomes of the nursing curriculum through enhanced test-taking skills. Students will apply nursing concepts to formulating responses in testing situations. This course can be used to fulfill the elective requirement for nursing.

Lecture: 0 – Lab: 3 hours
Prerequisite: NURS 212 and exit Nursing Outcome Exam completed
Lab fee: $28.00

NURS 197 Current Trends in Pediatric Nursing (W) 3 credits
The course builds on the foundation from previous nursing courses. The focus of the course is to explore the health care needs of pediatric clients and their families. The nursing process will be the framework to study the physical, psychological, and social aspects of pediatric nursing care. The course will provide students with the opportunity to apply knowledge and skills by using simulated pediatric care situations. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: NURS 111
Lab fee: $20.00

NURS 198 Information Technology in Healthcare (A, SP, DL) 3 credits
This introductory course in computer applications will help to stimulate the attainment of knowledge and skills needed to function in today’s computerized environment. While the emphasis is placed on the application of information technology used in health care, IT’s impact on society also will be considered. Legal, ethical and social issues as they relate to technology will be explored. Learning activities will include using standard software applications such as word processing, graphics and presentation software. This course may be used to fulfill
of health are presented in relation to mental health, and the neurologi-
is on meeting the holistic needs of clients. Maintenance and restora-
ing care and promoting the health of pediatric and adult clients. The focus
The student continues to develop the role of manager of care while provid-
ing skills to deliver outpatient health care to Mexican clients of all ages. Travel expenses will be paid by the student and will be approximately $600.00. Students, who will be in Texas and Mexico for 4 days and 3 nights, should have a valid U.S. passport. This course may be used to fulfill the elective requirement for nursing. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 12 hours
Prerequisites: Nursing 112 and permission of the instructor following an interview, review of applicant’s essay, and recommendations from prior clinical instructors. Lab fee: $5.00

NURS 210 Nursing Concepts of Health Maintenance and Restoration (W, SU) 6 credits
The student is introduced to the concepts of care management while continuing to function as a provider of care and promoter of health for pediatric and adult clients. The focus is on meeting the holistic needs of the client. Maintenance and restoration of health are presented in relation to the integumentary, gastrointestinal, urinary, sensory, and endocrine systems. The nursing process is the framework for continued development of critical thinking skills. Each unit of instruction will contain content on the influence of legal, ethical, cultural, and economic issues related to health care. In the clinical component of the course, which meets 10 hours each week and is conducted in a variety of community settings, the student is accountable for his/her nursing practice. The Nursing Outcome Exam, covering the first three quarters of nursing, will be given during the initial weeks of the quarter. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 12 hours
Prerequisites: NURS 112, NURS 124, NURS 133, and BIO 263
Corequisites: BIO 115 and ENGL 102 or ENGL 111 Lab fee: $109.00

NURS 211 Nursing Concepts of Health Maintenance and Restoration II (A, SP) 6 credits
The student continues to develop the role of manager of care while providing care and promoting the health of pediatric and adult clients. The focus is on meeting the holistic needs of clients. Maintenance and restoration of health are presented in relation to the respiratory, cardiovascular, hematological, and reproductive systems. The nursing process is the framework for continued development of critical thinking skills. Each unit of instruction will contain content on the influence of legal, ethical, cultural, and economic issues related to health care. In the clinical component of the course, which meets 10 hours each week and is conducted in a variety of community settings, the student is accountable for his/her nursing practice. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 12 hours
Prerequisites: NURS 210, a passing score on Nursing Outcome Exam I, and BIO 215 Lab fee: $103.00

NURS 212 Nursing Concepts of Health Maintenance and Restoration III (W, SU) 6 credits
The student continues to develop the role of manager of care while providing care and promoting the health of pediatric and adult clients. The focus is on meeting the holistic needs of clients. Maintenance and restoration of health are presented in relation to mental health, and the neurologi-
cal, musculoskeletal, and immune systems. The nursing process is the
framework for continued development of critical thinking skills. Each unit of instruction will contain content on the influence of legal, ethical, cultural, and economic issues related to health care. In the clinical component of the course, which meets 10 hours each week and is conducted in a variety of community settings, the student is accountable for his/her nursing practice. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 12 hours
Prerequisites: NURS 211 Lab fee: $109.00

NURS 213 Concepts of Nursing Management (A, SP) 8 credits
The student will synthesize concepts of care management to develop leadership skills inherent in the profession of nursing. The student will assume the roles of provider of care, manager of care, and member within the discipline of nursing. Ethical, legal, political, and economic issues as they relate to professional nursing will be presented. Current trends in nursing practice are analyzed. The student will focus on holistic care of clients and their families in the promotion of self-care activities. The clinical experience will be conducted in a variety of community settings 16 hours each week. Lab hours include the total number of hours for clinical and seminar. Students must receive a “C” or better in this course as a prerequisite for subsequent courses.

Lecture: 2 hours – Lab: 18 hours
Prerequisites: NURS 212 and MATH 135 Lab fee: $103.00

Nursing Outcome Exam
Students must successfully complete this exam in order to graduate.

Nursing Certificate (NURC)

NURC 101 Nurse Aide Training Program (A, W, SP, SU) 5 credits
The Nurse Aide Training Program is designed to instruct students in the knowledge and skills needed to provide basic care for clients in long-term care settings. The 76-hour course includes 60 hours of classroom/lab instruction and 16 hours of clinical preparation, which meet the requirements for nurse aide training in Ohio. Students who complete this course are eligible to state test.

HOWEVER, the online hybrid NURC 101 does NOT meet the requirements for the state approved nurse aide class in Ohio. Students who complete the hybrid version of this class will NOT receive a “certificate of class completion” and will NOT be eligible to take the state test for nurse aides. Both the traditional and hybrid versions of this course satisfy the NURC 101 prerequisite for specific health technologies at Columbus State Community College.

Lecture: 3 hours – Lab: 6 hours
Prerequisites: Completed health record, placement into ENGL 101, and placement into DEV 031, or permission of instructor. Lab fee: $38.00

NURC 102 Patient Care Skills (A, W, SP, SU) 4 credits
This course presents the rationale for and practice of skills commonly used by patient care technicians in an acute care setting. It is a combination of lecture and laboratory skills demonstration and practice. Major topics include wound care, specimen collection, airway care, oxygen administration, enteral nutrition, and elimination assistance. Because this is a skills-based course, classroom and laboratory attendance is mandatory.

Lecture: 2 hours – Lab: 6 hours
Prerequisites: NURC 101 with a grade of “C” or better, placement into ENGL 101, and placement into DEV 031. Lab fee: $35.00

NURC 150 Special Topics in Health Care (On Demand) 1–5 credits
This course offers students the opportunity to explore current issues and topics in health care.
NURC 175 Principles of Homeopathy (A, W, SP, SU)  4 credits
This course is designed to introduce students to the principles and theories behind the use of homeopathic preparations to treat most disease and disorders.
Lecture:  4 hours – Lab: 0 hours   Lab fee:  $5.00

NURC 176 Fundamentals of Herbology (A, W, SP, SU)  4 credits
This course outlines the uses of herbs in the healing process from ancient history to the present day. Herbs will be discussed in relation to both flower and in cooking. Emphasis will be on therapeutic self-care first aid.
Lecture:  4 hours – Lab: 0 hours   Lab fee:  $5.00

NURC 177 Holistic Healing Methods (A, W, SP, SU, DL)  4 credits
This course offers an introduction to the fundamentals of holistic healing, which includes philosophical and theoretical foundations, alternative methods and their uses for health maintenance and development of personal healing capacities.
Lecture:  4 hours – Lab: 0 hours   Lab fee:  $5.00

NURC 179 Pranic Healing Level I (A, W)  2 credits
This course provides an introduction to the theory and skills of the MCKS Pranic Healing System. Course topics include principles of self-recovery and life force, energetic anatomy, the relationship of energy centers to body systems, energy field scanning techniques, procedures for correcting energy imbalances associated with pain, stress and common ailments, breathing/physical exercises to restore well-being, energetic hygiene for practitioners, stress reduction through meditation, as well as self-healing, environmental healing and long-distance healing.
Lecture:  2 hours – Lab: 0 hours   Lab fee:  $75.00

NURC 245 RN First Assistant Program (A, SP)  5 credits
This is an intensive training program which is designed to provide the experienced perioperative nurse with the advanced preparation and study necessary to assume the role of first assistant. The course is based on AORN’s official statement of the RNFA role.
Lecture:  3 hours – Directed Practicum: 10 hours
Prerequisites: Current RN licensure; two years current perioperative experience; CNOR certified or eligible; current ACLS or CPR; liability insurance; two letters of recommendation   Lab fee: $125.00

NURC 246 RNFA Experiences in the Operating Room (W, SU)  5 credits
This course provides the student with continued practicum for completion of the RN First Assistant Program.
Lecture:  3 hours – Directed Practicum: 10 hours
Prerequisite: NURC 245   Lab fee:  $8.00

NURC 250 NATP Train the Trainer (A, W, SP, SU)  3 credits
This course prepares qualified nurses to teach, coordinate, and supervise a Nurse Aid Training Program, meeting federal and state of Ohio requirements.
Lecture:  3 hours – Lab: 0 hours
Prerequisites: Current RN/LPN licensed in Ohio; minimum of two years experience in caring for elderly or chronically ill.   Lab fee:  $39.00

Practical Nursing Certificate (PNUR)

PNUR 100 Introduction to Practical Nursing (W, SU)  1 credit
The student is introduced to the role, responsibilities, and the scope of practice for the practical nurse. The framework for the practical nursing curriculum is introduced, including major concepts and threads.
Lecture:  1 hour
Prerequisite: Admission into the Practical Nursing Program   Lab fee:  $74.00

PNUR 101 Foundations of Practical Nursing (A, SP)  2 credits
This course continues to explore the foundations of practical nursing based on the CSCC Practical Nursing Program conceptual framework of nursing, person, health and environment. The student will be introduced to the role of the practical nurse in applying the nursing process to patient care. Cultural, developmental, and spiritual aspects of care, legal and ethical issues, and concepts of communication including documentation of patient care will be introduced within the framework of the nursing process. Economic concerns related to health care will be integrated. Safe performance of basic nursing skills including asepsis, personal care of patients, vital signs, and wound care will be practiced in the laboratory.
Lecture:  1 hour – Lab: 3 hours
Prerequisites: PNUR 100, ENGL 101, BIO 261   Lab fee:  $60.00

PNUR 102 Introduction to Practical Nursing Concepts (W, SU)  6 credits
The practical nurse role in observation and assessment is presented with emphasis on observing the physical, psychosocial, and developmental components of adult and geriatric clients. Observation of the client’s ability to adapt to stress is also explored. Practical nursing concepts related to nutritional health, fluid, electrolyte and acid/base balance, perioperative care, the infectious process, cancer, pain management, mental health, and end of life care will also be presented. Emphasis will be placed on the practical nurse’s use of the nursing process to promote, maintain, and/or restore health. Students will practice assessment/observational skills and basic nursing skills in the laboratory. Clinical experience will be in adult and/or geriatric settings.
Lecture:  3 hours – Lab: 3 hours; Clinical 6 hours
Prerequisites: PNUR 101, PNUR 121, BIO 262   Lab fee:  $100.00

PNUR 103 Practical Nursing Concepts Related to Health Promotion, Maintenance, and Restoration (W, SU)  6 credits
The student will be introduced to commonly occurring alterations of the body systems. The course focuses on application of the nursing process by the practical nurse to promote, maintain, and restore health of clients experiencing alterations in functioning of the body systems. The goal of care is to promote use of self-care activities to assist clients in attaining an optimal level of health. Skills learned in the skills laboratory will consist of nursing interventions that assist clients in achieving optimal health of the body systems. Clinical experiences will be conducted in a variety of adult acute or subacute health care facilities.
Lecture:  3 hours – Lab: 3 hours; Clinical: 6 hours
Prerequisites: PNUR 102, PNUR 122   Lab fee:  $103.00

PNUR 104 Practical Nursing Concepts Related to Maternal and Child Health (A, SP)  6 credits
The student will continue to apply the practical nursing concepts from previous courses to the care of women and children. Health promotion through the antepartal, intrapartal, and postpartal stages of pregnancy will be a focus. Complications occurring during pregnancy will be presented. Issues related to promotion of health of women and normal growth and development of the child will be discussed. Information on common health alterations of the child from the newborn through adolescence will be included. Students will perform those nursing skills in the laboratory that relate to care of maternal and pediatric clients. Clinical experiences will be provided in a variety of obstetrical and pediatric settings.
Lecture:  3 hours – Lab: 3 hours; Clinical: 6 hours
Prerequisites: PNUR 102, PNUR 122   Lab fee:  $73.00

PNUR 105 Concepts Related to Practical Nursing Practice (A, SP)  5 credits
The student is introduced to the concepts of leadership and management including styles of leadership, assertive versus aggressive communication, appropriate delegation, conflict management, change theory, and motivational concepts. Course content and discussion includes concepts related to the legal scope of practice of the LPN in Ohio, entry into practice
including resume writing and interviewing for a position. The clinical experience provides for a practicum which includes the opportunity for the students to apply these concepts while caring for groups of clients while under the supervision of a registered nurse instructor or registered or licensed practical nurse preceptor. In addition, content will be presented on caring for clients in community-based health care facilities. To enhance knowledge of continuity of care and the role of the practical nurse in the community, students will have observation experiences in various community healthcare settings as a part of the practicum. Transition of the student into the practice of practical nursing with information about the NCLEX-PN and application for licensure is included.

Lecture: 2 hours – Seminar: 1 hour; Practicum: 16 hours
Lab fee: $115.00

PNUR 121 Pharmacology I for the Practical Nurse (A SP) 2 credits
This is the first of two courses in which the focus will be on the practical nurse’s role in medication administration to persons of all ages. Basic concepts, dosage calculations, drug classifications, and nursing implications will be presented for medications prescribed to affect various organs and systems in the body. Vitamins, minerals, and herbs will also be discussed in relation to interactions with prescribed medications. Safe analgesic administration and documentation of oral, topical, and injectable medications will be presented in the laboratory setting. Also, a comprehensive review of math for medication administration will be completed.

Lecture: 1 hour – Lab: 3 hours
Prerequisites: Admission into Practical Nursing Program, MATH 100, BIO 261
Lab fee: $58.00

PNUR 122 Pharmacology II for the Practical Nurse (W, SU) 3 credits
This is the second of two courses in which the focus will be on the practical nurse’s role in medication administration to persons of all ages. Intravenous therapy theory and regulations governing this therapy will be presented. Dosage calculations, drug classifications, and nursing implications will be presented for cardiovascular system medications, immune system medications, respiratory, digestive and renal system medications, musculoskeletal and integumentary system medications and medications for acid-base and electrolyte disorders. In the laboratory, safe medication administration skills and documentation will be practiced. Basic phlebotomy and IV infusion skills will be presented and practiced. Skills check-offs will be performed to demonstrate mastery and competence.

Lecture: 2 hours – Lab: 3 hours
Prerequisites: PNUR 121, BIO 269
Lab fee: $88.00

PNUR 190 Special Topics in Practical Nursing 1 credit
The student will examine current topics and issues as they relate to practical nursing practice and roles.

Lecture: 1 hour
Prerequisites: PNUR 101

PNUR 191 Introduction to Relaxation Techniques 1 credit
The student will be introduced to various relaxation, stress reduction and coping techniques.

Lecture: 1 hour
Prerequisites: Admission to Practical Nursing Program

PNUR 192 Issues in Gerontological Nursing 1 credit
The student will explore selected issues relevant to the licensed practical nurse working with older adults in a variety of settings. Societal issues related to aging are addressed as well. Physiological and psycho-social issues that impact the health of older adults are explored within the context of a variety of environments of care. Community resources for older adults are also identified.

Lecture: 1 hour
Prerequisites: PNUR 101

PNUR 193 Mental Health Nursing and YOU 1 credit
The student is introduced to the role, responsibilities and the scope of practice for the practical nurse in dealing with patients who have mental health alterations. The concepts of therapeutic milieu, communication and the use of the nursing process in relation to various mental health disorders will be addressed. The thread running throughout these discussions will be the importance of actively choosing to optimize their own mental health.

Lecture: 1 hour
Prerequisites: PNUR 102

PNUR 194 Transcultural Nursing 1 credit
Students will explore how their interactions with patients are affected by their own culturally-influenced values and communication styles, the values of the nursing subculture, and the patients’ cultural values and communication styles. The students will learn communication styles and patterns that will enhance their nursing skills to communicate more effectively with patients and families from diverse cultures. They will explore the values and traditions of immigrant cultures most commonly found in the Central Ohio area.

Lecture: 1 hour
Prerequisites: PNUR 101

PNUR 195 Use of the PDA 1 credit
The student is briefly introduced to nursing informatics. Then assessment of their attitudes and abilities with computers is completed. Researching various resources, types of devices, and operating systems will be done. Students will perform activities on the devices and will journal their use in the clinical setting.

Lecture: 1 hour
Prerequisites: PNUR 102

PNUR 196 Ethical Issues in Healthcare and Nursing 1 credit
The student is introduced to major ethical theories and principles as they relate to issues in healthcare and nursing. Course content and discussion include the theories of deontology and utilitarianism, the principles of nonmaleficence, beneficence, autonomy, and justice. The student will explore the application of these theories and principles to the role of a student and to issues in nursing practice. Case studies are used to illustrate strategies for ethical decision making.

Lecture: 1 hour
Prerequisites: PNUR 101

PNUR 197 LPN Role with ECG’s 1 credit
This course will include content related to the beginning interpretation of 5-lead cardiac monitor strips for normal and selected abnormal cardiac rhythms. Correct procedure to obtain 5-lead and 12-lead ECG tracings will be demonstrated and practiced. Students will discuss appropriate interventions for patients experiencing various abnormal cardiac rhythms.

Lecture: 1 hour
Prerequisites: PNUR 102

Office Administration (See Business Office Applications)

Paralegal Studies (LEGL)

LEGL 101 Introduction to Paralegal Studies (A, W, SP, SU) 4 credits
The role of the legal assistant and his/her ethical responsibilities and legal restrictions are the main focus of this course. Students will also be introduced to the function of statutes, case law, administrative regulations, and constitutions within the legal system.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: ENGL 101 or placement into ENGL 101
Lab fee: $5.00
LEGL 102 The Legal System (A, W, SP, SU)  2 credits
This course explores the federal and state civil law systems, federal and state criminal law systems, appellate process, and such concepts as jurisdiction and venue.
Lecture: 2 hours – Lab: 0 hours Lab fee: $5.00

LEGL 103 Law Office Procedures and Management (A, W, SP, SU)  3 credits
This course is an introduction to the day-to-day operation of a law office. Emphasis will be placed on the development of accurate record-keeping skills and an understanding of office management procedures unique to law offices, including computerized time keeping and billing programs.
Lecture: 3 hours – Lab: 0 hours Lab fee: $5.00

LEGL 111 Legal Research and Writing I (A, W, SP, SU)  4 credits
An introduction to conducting legal research and the proper methods for preparing briefs, pleadings and memoranda of law. Locating, analyzing, and checking of case law is emphasized. Students will learn proper citation methods and legal writing style, as well as become familiar with the Ohio Rules and Federal Rules of Appellate Procedure.
Lecture: 3 hours – Lab: 2 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 112 Legal Research and Writing II (A, W, SP, SU) 4 credits
This course is a continuation of LEGL 111, developing advanced research skills with an emphasis on preparing legal documents. Students will be familiar with primary and secondary sources, computer assisted research and a variety of legal documents. The student will also participate in a brief-writing competition.
Lecture: 3 hours – Lab: 2 hours Prerequisite: LEGL 111

LEGL 113 Legal Research and Writing III (A)  5 credits
This course is an intense production-oriented research and writing course designed to prepare the student to function under the requirement of rapid completion of research and writing assignments commonly made in law offices and other legal environments. The student will encounter a variety of opportunities including motions, pleadings and briefs, the production of which will require both speed and accuracy and will incorporate both printed and computer-based research strategies.
Lecture: 4 hours – Lab: 2 hours Prerequisites: LEGL 112 and LEGL 251 Lab fee: $5.00

LEGL 114 Family Law (W, SU)  3 credits
LEGL 114 will explore domestic relations matters including marriage, divorce, dissolution, child custody and support, visitation and adoption. The law regulating such matters, and the drafting of appropriate documents, will be emphasized.
Lecture: 3 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 119 Real Estate Transactions (A, SP)  3 credits
LEGL 119 is a study of the law governing real property, its ownership, sale, lease or other conveyance. The instruments utilized in conveyance or lease of such property will be examined and drafted. Title searching and abstracts of title are included.
Lecture: 3 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 201 General Practice (A, SP)  4 credits
This course will acquaint the student with a variety of matters that may be encountered in a law practice. The basic elements of torts and contracts will be covered as well as judgments and civil collection actions.
Lecture: 4 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 205 Litigation Practice and Procedure I (A, SP)  3 credits

The basic elements of a tort claim will be discussed and the initial phases of an action, the complaint pleadings and discovery and pretrial phases will be examined.
Lecture: 2 hours – Lab: 2 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 210 Criminal Law and Procedure (A, SP)  3 credits
The Ohio Criminal Code and Rules of Criminal Procedure will be the foundation of this examination of the pretrial and post-trial procedures in a criminal case. Students will be exposed to the criminal justice system from the elements of the offenses through post-conviction remedies. The drafting of motions and other documents associated with criminal matters will be included.
Lecture: 3 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 215 Paralegal Studies Practicum I (A, W, SP, SU)  2 credits
This course offers a guided work experience in an office or agency providing legal services. Exact duties are decided upon by agreement of the student and administrators of the placement site.
Lecture: 0 hours – Lab: 14 hours Prerequisite: Permission of instructor

LEGL 216 Paralegal Practicum Seminar I (A, W, SP, SU)  1 credit
This seminar course discusses the work experiences and explores strategies to improve work performance.
Lecture: 1 hour – Lab: 0 hours Prerequisite: Permission of instructor

LEGL 220 Business Organizations (A, SP)  3 credits
LEGL 220 covers the fundamentals of the formation of business entities including sole proprietorships, partnerships, and corporations. Students will prepare documents regarding the formation of such organizations.
Lecture: 3 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 222 Immigration Law (On Demand)  3 credits
LEGL 222 is an overview of Immigration Law and practices for assisting immigrants and illegal aliens.
Lecture: 3 hours – Lab: 0 hours

LEGL 224 Probate Law and Practice I (A, SP)  3 credits
LEGL 224 is a study of the law of wills, estates and estate administration including estate taxation. Testate and intestate estates, law of descent and distribution, estate planning and other probate processes will be discussed.
Lecture: 3 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 226 Administrative Law (A, SP)  3 credits
Statutory law, case law, and administrative rules will be utilized to develop an understanding of the role and authority of administrative agencies. Particular attention will be paid to social security and workers compensation claims.
Lecture: 3 hours – Lab: 0 hours Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 227 Paralegal Practicum II (A, W, SP, SU)  2 credits
This course provides additional work experience in an office or agency providing legal services. Exact duties will be decided upon by the student and administrators of the placement site.
Lecture: 0 hours – Lab: 14 hours Prerequisite: Permission of instructor

LEGL 228 Paralegal Practicum Seminar II (A, W, SP, SU)  1 credit
This course presents seminar discussions of current work experiences and helps develop further strategies for improvement.
Lecture: 1 hour – Lab: 0 hours Prerequisite: Permission of instructor
LEGL 229 Certified Legal Assistants Exam Review (On Demand)  
This course is designed as a review course for the student/graduate wishing to take the Certified Legal Assistant Exam. It will examine all areas of procedural and substantive law included on the CLA exam as well as the ethics section of the test. Students taking the course must successfully pass a mock CLA exam to complete the course.
Lecture: 2 hours – Lab: 0 hours
Prerequisite: LEGL 228 Lab fee: $10.00

LEGL 230 Special Problems in Legal Assisting (On Demand)  
This course is a special topics course designed to allow the student to research and develop an understanding of legal-assisting issues unique to the interests of the student and for which there is no other course available. LEGL 230 is offered on an independent study basis only.
Lecture: 2 hours – Lab: 0 hours
Prerequisite: Permission of chairperson

LEGL 232 Taxation (On Demand)  
This course studies the fundamentals of state, local and federal tax laws. The agencies and tribunals involved in tax matters will be examined. Specific research strategies and document preparation relative to tax issues are explored.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 101 Lab fee: $ 5.00

LEGL 234 Litigation II (W)  
Building on the knowledge gained in Litigation I, students will examine the role of the attorney in the trial process, case preparation and organization of materials for trial. Students will prepare a hypothetical case for trial.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: LEGL 205 Lab fee: $5.00

LEGL 235 Survey of Legal Software (W)  
LEGL 235 introduces the various legal software packages to students using laptops. Students will have hands-on experiences by applying the software to typical law office tasks.
Prerequisites: LEGL 111, LEGL 112
Lecture: 1 hour – Lab: 2 hours

LEGL 236 Probate Law II (On Demand)  
This course examines the law of guardianship and trusts with emphasis on guardianship administration, land sales and trust accounting.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 224 Lab fee: $5.00

LEGL 238 Insurance Law (W, SU)  
LEGL 238 is an introduction to insurance law. The course will include principles of indemnity, interests protected, the transfer of risk, and claims processes.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 101 Lab fee: $5.00

LEGL 240 Professional Malpractice (W)  
This course is an examination of the law of malpractice with an emphasis on malpractice in health professions. It also examines risk management methods in health care. The course will focus on informed consent, vicarious liability of health professionals and health care facilities, negligence, the doctrine of res ipsa loquitur; mandatory arbitration, defenses, and medicolegal ethics.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 201 Lab fee: $5.00

LEGL 243 Alternative Dispute Resolution Issues Seminar (A, SP, SU)  
This course examines the legal, ethical, and policy issues that arise in the use of mediation, arbitration, mini-trials, summary jury trial and conciliation. It also can help develop mediation skills.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 244 Creditor Debtor Relations (W, SU)  
This course will ensure that the student is aware of the respective rights of creditors and debtors. Also introduces the pre-legal and legal procedures of debt collection.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 220 Lab fee: $5.00

LEGL 248 Searching and Closing the Real Estate Title (On Demand)  
This course is designed to examine the process of real estate title searches and to prepare the student to perform commercial and residential real estate title closings.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of chairperson Lab fee: $5.00

LEGL 250 Intellectual Property (On Demand)  
Because businesses spend millions of dollars to build consumer confidence in product names and logos, this course explores the world of patents, trademarks, copyrights, trade secrets, registration and protection of these business assets. The course includes a review of federal laws and case law that cover these areas. It also includes a discussion of issues relating to cyberlaw and the Internet. The student will consider the future implications of these contemporary topics for the business owner and the consumer.
Lecture: 4 hours – Lab: 0 hours

LEGL 251 Computer Assisted Legal Research (A, W, SP, SU)  
This course will expose the Paralegal Studies student to the ever expanding and utilized area of computer assisted research, an alternative to traditional, manual legal research. The student will be required to complete a series of projects within the different libraries of LEXIS in which the student will become proficient with the various uses and functions of electronic legal information retrieval.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: LEGL 111 Lab fee: $25.00

LEGL 252 Survey of Advanced Legal Technology (W, SU)  
The course will provide the student with computer training in document management, litigation support, billing, the Internet and advanced computer assisted legal research. The student will become acquainted with Internet user groups where questions are asked and answered via e-mail and listserv. Legal software that supports legal administration, case management and internal network applications will be emphasized. The course will use CD-ROM, extensive computer lab sessions and each student will manage a complete case on an automated platform. The goals of the course will be to provide the student with certain computer competencies that go beyond the basics and allow them to be proactive in the use of technology while at the same time utilizing creative thinking skills.
Lecture: 2 hours – Lab: 1 hour
Prerequisite: LEGL 112, LEGL 251 or by permission of chairperson Lab fee: $25.00

LEGL 255 Introduction to Workers’ Compensation Law (On Demand)  
This course is an introduction to the Bureau of Workers’ Compensation. The focus of the course is the structure of the bureau, with an emphasis on the purpose of the agency, the hierarchy, the authority under which it operates, and basic concepts of workers’ compensation benefits.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00
LEGL 256 Introduction to BWC Claims Processing (On Demand) 4 credits
This course will acquaint the student with how the Bureau of Workers’ Compensation processes claims including self-insured of state fund (BWC) claims, the calculation of wages and compensation, payment of medical bills, and authorization of medical treatment. Also will cover how the bureau addresses motions made, application to reactivate, and permanent partial disability settlements, from injury to resolution.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 257 Workers’ Compensation Adjudication (On Demand) 4 credits
This course is designed to acquaint the student with how to deal with state agencies, in particular the Bureau of Workers’ Compensation from the claimant position. The emphasis of this course is on how to acquire information available through state files and computer systems. Violations of specific safety requirements, applications for permanent total disability and the hearing process will be examined.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 258 Workers’ Compensation Rating System (On Demand) 4 credits
This course is designed to acquaint the student with the different rating plans available through the Bureau of Workers’ Compensation to establish appropriate premiums. The emphasis is on the bureau’s underwriting process.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 259 Workers’ Compensation Practice and Procedure (On Demand) 4 credits
This course is designed to acquaint the student with the procedures to complete the hearing process in a claim against the Bureau of Workers’ Compensation, from both the bureau and claimant perspectives.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 261 Business Law I (A, W, SP, SU, DL) 3 credits
LEGL 261 offers students a survey of the legal framework of business, the nature of legal systems and the law, including contracts, criminal, and the law of torts.
Lecture: 3 hours – Lab: 0 hours Lab fee: $1.00

LEGL 262 Business Law II (On Demand) 3 credits
This course offers a continuation of LEGL 261, exploring the law of agency, corporation, partnerships, and property.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 261 Lab fee: $1.00

LEGL 263 Business Law III (On Demand) 3 credits
This course provides an advanced examination of law as it pertains to business. The emphasis is on the specialty areas of the law designed for the protection of business assets including the law of sales, commercial paper and secured transactions under the Uniform Commercial Code; debtor/creditor rights under the laws of bankruptcy, and the use of wills, trusts and estate planning techniques for the protection and transfer of business interest.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 262 Lab fee: $1.00

LEGL 264 Legal Environment of Business (A, W, SP, SU, DL) 4 credits
This course presents an overview of the American legal system with an introduction to the legal concepts and principles that form its foundation. The course will examine the judicial system and methods of dispute resolution, while focusing on business crimes and torts, including product liability, ethics, contract formation and enforcement, consumer protection, employment law, environmental regulations, business organizations, particularly sole proprietorship, partnerships, and corporations. Students will be able to understand the legal ramifications of their business decisions.
Lecture: 4 hours – Lab: 0 hours Lab fee: $2.00

LEGL 265 Business Law for Accountants (A, W, SU, DL) 5 credits
This course will introduce the student to the origination of Social Security, its jurisdiction and regulation, and the practice and procedure within the Social Security Administration.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of chairperson Lab fee: $5.00

LEGL 266 Liability Issues in Health Occupations (On Demand) 3 credits
This course presents an examination of liability concerns in health occupations and of risk management methods in health care. The course will focus on informed consent, medical malpractice and vicarious liability issues.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $5.00

LEGL 267 Consumer Law (On Demand) 4 credits
This course is an examination of the various state and federal statutes and regulations that govern the relationship of debtor and creditor. Statutes discussed include, but are not limited to, the Fair Debt Collection Act, Uniform Consumer Credit Code (UCCC) and Article 9 of the Uniform Commercial Code (UCC).
Lecture: 4 hours – Lab: 0 hours
Corequisite: LEGL 228 or by permission of chairperson Lab fee: $5.00

LEGL 268 Liability Issues in Health Occupations (On Demand) 4 credits
This course is an intensive overview of the mediation process. Students will study both statutory and private mediation processes. Students will review domestic relations mediation, employment fact-finding and labor mediation processes. Additionally, the student will learn the different models of mediation with particular emphasis on the Seven Step Model. Each student will be involved in preparing and conducting several mediation role playing sessions as both mediator and participants. The fundamentals of researching arbitration decisions and legal resources in arbitration will be examined with special emphasis on Internet resources. Each student will conduct a mediation in class and prepare a mediation notebook as a final project.
Lecture: 4 hours – Lab: 4 hours
Prerequisite: LEGL 228 or by permission of chairperson Lab fee: $5.00

LEGL 269 Consumer Law (On Demand) 4 credits
This course is designed to acquaint the student with how to deal with state agencies, in particular the Bureau of Workers’ Compensation from the claimant position. The emphasis is on how to acquire information available through state files and computer systems. Violations of specific safety requirements, applications for permanent total disability and the hearing process will be examined.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 270 Overview of Bankruptcy Law and Practice (On Demand) 4 credits
This course will acquaint the student with the statutory and regulatory structure, location and jurisdiction of bankruptcy law and bankruptcy courts and their nonjudicial officers. Parties and proceedings will be discussed and students will receive an overview of the bankruptcy chapters.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of chairperson Lab fee: $5.00

LEGL 271 Mediation (On Demand) 4 credits
This course is designed to acquaint the student with how to deal with state agencies, in particular the Bureau of Workers’ Compensation from the claimant position. The emphasis is on how to acquire information available through state files and computer systems. Violations of specific safety requirements, applications for permanent total disability and the hearing process will be examined.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 272 Social Security Practice and Procedure (On Demand) 4 credits
This course is designed to acquaint the student with how to deal with state agencies, in particular the Bureau of Workers’ Compensation from the claimant position. The emphasis is on how to acquire information available through state files and computer systems. Violations of specific safety requirements, applications for permanent total disability and the hearing process will be examined.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 273 Labor Law (On Demand) 4 credits
This course is designed to acquaint the student with how to deal with state agencies, in particular the Bureau of Workers’ Compensation from the claimant position. The emphasis is on how to acquire information available through state files and computer systems. Violations of specific safety requirements, applications for permanent total disability and the hearing process will be examined.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of instructor Lab fee: $5.00

LEGL 274 Legal Environment of Business (A, W, SP, SU, DL) 4 credits
This course presents an overview of the American legal system with an introduction to the legal concepts and principles that form its foundation. The course will examine the judicial system and methods of dispute resolution, while focusing on business crimes and torts, including product liability, ethics, contract formation and enforcement, consumer protection, employment law, environmental regulations, business organizations, particularly sole proprietorship, partnerships, and corporations. Students will be able to understand the legal ramifications of their business decisions.
Lecture: 4 hours – Lab: 0 hours Lab fee: $2.00

LEGL 275 Business Law for Accountants (A, W, SU, DL) 5 credits
This course will introduce the student to the origination of Social Security, its jurisdiction and regulation, and the practice and procedure within the Social Security Administration.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LEGL 228 or by permission of chairperson Lab fee: $5.00

LEGL 276 Business Law III (On Demand) 3 credits
This course offers a continuation of LEGL 261, exploring the law of agency, corporation, partnerships, and property.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 261 Lab fee: $1.00

LEGL 277 Business Law IV (On Demand) 3 credits
This course provides an advanced examination of law as it pertains to business. The emphasis is on the specialty areas of the law designed for the protection of business assets including the law of sales, commercial paper and secured transactions under the Uniform Commercial Code; debtor/creditor rights under the laws of bankruptcy, and the use of wills, trusts and estate planning techniques for the protection and transfer of business interest.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LEGL 262 Lab fee: $1.00
Prerequisite: Placement into ENGL 101
Lab fee: $2.00

Lecture: 5 hours – Lab: 0 hours

PHIL 150. This course meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in philosophy and humanities.

PHIL 150 Introduction to Logic (A, W, SP, SU, DL) 5 credits
This course introduces students to critical thinking and the methods of inductive, deductive and symbolic logic. PHIL 150 meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in philosophy and humanities.

PHIL 100 Introduction to Physics (A, W, SP, SU, DL) 4 credits
This course is a survey of the basic concepts of physics with emphasis on energy and its various forms. Topics include mechanics, heat, electricity, and waves, with related laboratory and demonstrations. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus.

PHIL 101 Introduction to Philosophy (A, W, SP, SU, DL) 5 credits
This course offers an introduction to the problems, methods and terminology of philosophy, the types of questions addressed by philosophers, and the pivotal thinkers and systems of Western civilization from the Greeks to the 20th century. PHIL 101 meets elective requirements in the Associate of Arts and Associate of Science degree programs and distributive transfer requirements in philosophy and humanities.

LEGL 285 Estate Administration (On Demand) 4 credits
This course will familiarize the student with the various methods of estate administration, including full administration of testate and intestate estates and the process of completing the same, including introduction to tax forms and relief from administration.

PHIL 130 Ethics (A, W, SP, SU, DL) 5 credits
This course introduces students to moral reasoning, examining theories of right and wrong, good and bad, justice and injustice as they have been viewed in the past and as they shed light on contemporary ethical issues. PHIL 130 meets elective requirements in the Associate of Arts degree program and distributive transfer requirements in philosophy and humanities.

PHIL 101 Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $3.00

PHIL 130 Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $3.00

PHIL 150 Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $3.00

PHIL 290 Capstone Experience in Philosophy (On Demand) 3 credits
PHIL 290 is a capstone course focusing on philosophy. Paradigms and their underlying assumptions will be explored. Students will work on developing research techniques and methodologies and then will apply these techniques to a project of their own design. Students will participate in summative testing of their academic skills.

PHIL 290 Lecture: 2 hours – Lab: 2 hours
Prerequisite: Open only to Associate of Arts students preparing to graduate within two academic quarters.

PHIL 299 Special Topics in Philosophy (On Demand) 1–5 credits
This course provides students an opportunity for a detailed examination of selected topics in philosophy.

PHIL 299 Lecture: Variable hours – Lab: 0 hours
Prerequisite: Permission of instructor  Lab fee: $2.00

Physics (PHYS)

PHYS 100 Introduction to Physics (A, W, SP, SU, DL) 4 credits
This course is intended for nonscience majors, especially for those pursuing degrees in education. The lab activities are designed to help students gain a better understanding of aspects of physical science. Check with an academic advisor.

PHYS 100 Lecture: 3 hours – Lab: 3 hours
Prerequisites: MATH 102 or equivalent and placement into ENGL 100.
Not open to students with credit for PHYS 117, 118, 177, 178, 181, 182, 183, or 185. Lab fee: $10.00

PHYS 106 Physics by Inquiry: Intro to Properties of Matter (On Demand) 5 credits
PHYS 106 is an introduction to experimental science and the properties of matter for undergraduates contemplating a teaching career. This course is intended for nonscience majors, especially for those pursuing degrees in education. The lab activities are designed to help students gain a better understanding of aspects of physical science.

PHYS 106 Lecture: 4 hours – Lab 3 hours
Prerequisites: Placement into MATH 102 and ENGL 101 or higher
Lab fee: $19.00

PHYS 117 College Physics (Mechanics and Heat) (A, W, SP, SU) 5 credits
This course is a study of classical mechanics, including statics and kinematics, Newton's laws of motion, linear and angular momentum, work and energy, and properties of solids and fluids. Elementary concepts of heat are introduced, including temperature and thermal expansion, the ideal
gas law, calorimetry, and heat transfer. Related laboratory and demonstrations. This course and PHYS 118 provide a two-quarter sequence in physical science that will fulfill the elective requirement for the Associate of Science degree.

Lecture: 4 hours – Lab: 3 hours
Prerequisites: MATH 148 or MATH 111 or equivalent and placement into ENGL 101. Not open to students with credit for PHYS 177 or 178.
Lab fee: $11.00

PHYS 118 College Physics (Electricity, Magnetism and Light) (A, W, SP, SU) 5 credits
This course is a continuation of PHYS 117. Topics in classical electricity and magnetism include electric potential, current and resistance, DC circuits, magnetic forces and fields, and electromagnetic induction. The nature of light is introduced and the principles of geometrical and physical optics, including optical instruments, are treated. Related laboratory and demonstrations.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: PHYS 117; not open to students with credit for PHYS 177, 178 or 179 Lab fee: $10.00

PHYS 119 College Physics (Modern Physics) (A, W, SP) 5 credits
PHYS 119 is a continuation of PHYS 118. Topics include alternating current, electromagnetic waves, kinetic theory of gases, thermodynamics, and modern physics. The major emphasis of the course is on topics in modern physics, including special relativity, quantum mechanics, atomic and nuclear physics, nuclear radiation and nuclear energy. Related laboratory and demonstrations.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: PHYS 118; not open to students with credit for PHYS 177, 178 or 179 Lab fee: $10.00

PHYS 177 General Physics I (A, W, SP, SU, DL) 5 credits
This is a course in the fundamental principles of mechanics for physics majors and engineers. Topics treated include vectors, equilibrium, kinematics and dynamics of a particle, energy, momentum, rotation, elasticity, simple harmonic motion and the behavior of fluids. Related laboratory and demonstrations. This course and PHYS 178 provide a two-quarter sequence in physical science that will fulfill the elective requirement for the Associate of Science degree. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus.
Lecture: 4 hours – Lab: 3 hours
Prerequisites: MATH 151, high school physics or PHYS 100 recommended, and placement into ENGL 101 Lab fee: $11.00

PHYS 178 General Physics II (A, W, SP, SU, DL) 5 credits
PHYS 178 is a continuation of PHYS 177. Topics covered include Coulomb's law; electric fields and potentials; capacitors and dielectrics; current and resistance; DC circuits; magnetic fields and forces; electromagnetic properties of matter; and AC circuits. Related laboratory and demonstrations. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Laboratories are generally done on an every other week basis on campus.
Lecture: 4 hours – Lab: 3 hours
Prerequisites: PHYS 177 and MATH 152 Lab fee: $10.00

PHYS 179 General Physics III (A, W, SP, SU, DL) 5 credits
This course is a continuation of PHYS 178. Topics include mechanical waves, sound, electromagnetic waves, light, mirrors, lenses, interference, diffraction, polarization, relativity, photons, structure of atoms, nuclei and solids. Related laboratory and demonstrations. Students enrolled in distance versions of this course will be required to come to campus for an orientation meeting and completion of certain exams and laboratories. Related laboratory and demonstrations. Laboratories are generally done on an every other week basis on campus.
Lecture: 4 hours – Lab: 3 hours
Prerequisite: PHYS 178 Lab fee: $10.00.

PHYS 181 Technical Physics (Mechanics) (A, W, SP, SU) 4 credits
This course presents the basic principles of mechanics. Major topics include equilibrium or rigid bodies, particle motion, Newton’s laws of motion, work and energy, conservation principles and rotational motion. Related laboratory and demonstrations.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: MATH 111 or MATH 148 or equivalent and placement into ENGL 100. Not open to students with credit for PHYS 117 or 177.
Lab fee: $10.00

PHYS 183 Technical Physics (Properties of Matter) (W, SU) 4 credits
A course in the basic principles associated with the mechanical and thermal properties of matter. Major topics include elasticity, fluid mechanics, heat and temperature, energy transformations, heat transfer, ideal and real gases, thermodynamics, vibrations and wave motion. Related laboratory and demonstrations.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: MATH 111 or MATH 148 or equivalent and placement into ENGL 100. Not open to students with credit for PHYS 117 or 177.
Lab fee: $10.00

PHYS 185 Technical Physics (Heat, Light, Sound) (A, W, SP, SU) 4 credits
A course in the basic principles associated with heat, light, and acoustic phenomena. Major topics include temperature and heat, heat transfer, wave and particle nature of light, atomic theory, solid-state theory, electronics and acoustics. Related laboratory and demonstrations.
Lecture: 3 hours – Lab: 3 hours
Prerequisites: MATH 112 or equivalent and placement into ENGL 100. Not open to students with credit for PHYS 117 or 177.
Lab fee: $12.00

PHYS 290 Capstone Experience in Physics (On Demand) 3 credits
This is an integrated science course blending elements of chemistry, physics and biology. Topics include the historical development of the sciences, ethical issues in science and how they affect the advancement of scientific thought, and the scientific method as it relates to experimental design and interpretation of scientific results. The laboratory utilizes an investigative approach taking students through the process of identifying a research problem, conducting a literature review, writing a research proposal, collecting and analyzing data, writing a scientific paper and presenting results. This course is required for all physics majors seeking either the Associate of Arts or Associate of Science degree.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: 75 hours or more of course work completed with a minimum of 20 credit hours within the sciences. Lab fee: $18.00

PHYS 293 Independent Study in Physics (On Demand) 1–5 credits
PHYS 293 presents an opportunity for a detailed examination of selected topics of interest in physics.
Lecture: 1 to 5 hours – Lab: 0 to 6 hours
Prerequisite: Permission of instructor Lab fee: Varies

PHYS 299 Special Topics in Physics (On Demand) 1–5 credits
Students examine, in detail, selected topics of interest in physics.
Lecture: 1 to 5 hours – Lab: 0 to 6 hours
Prerequisite: Permission of the instructor Lab fee: Varies
Political Science (POLS)

Students who enroll in political science courses must have placed in ENGL 101 and are encouraged to either have completed ENGL 101 or be enrolled in that course when scheduling a political science course.

POLS 100 Comparative Politics
(A, W, SP, SU) 5 credits
This course is designed as an introductory survey class for the student interested in the field of comparative politics. The class begins with an analysis of just what comparative politics is. A theoretical framework is used to help the student understand the basic principles found within comparative politics. We will study specific countries by analyzing their history, institutions, political culture, and economy.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or 111 Lab fee: $5.00

POLS 101 Introduction to American Government
(A, W, SP, SU, DL) 5 credits
This course introduces students to the nature, purpose and structure of the American political system. Attention is given to the institutions and processes that create public policy. The strengths and weaknesses of the American political system are discussed, along with the role of citizens in a democracy. A distance-learning (DL) version of Introduction to American Government is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $5.00

POLS 165 Introduction to Politics (A, W, SP, SU, DL) 5 credits
This course introduces students to the basic concepts and issues in the study of politics. The course compares various political institutions, ideologies, and economic systems; examines political socialization and culture; explores methods of resolving international conflict; and explains the impact of modern bureaucracies on policy-making. A distance-learning (DL) version of Introduction to Politics is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for the Web-based version are administered on the Internet.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $5.00

POLS 207 State and Local Government (A, W, SP, SU) 5 credits
This course introduces the student to the nature, purpose and structure of state and local governments, especially in Ohio. Attention is given to the institutions and processes that create public policy, including fiscal policy and the court system. The strengths and weaknesses of the state and local government system are discussed along with the everyday role of citizens in a democracy—especially at these levels of government.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $5.00

POLS 250 International Relations
(A, W, SP, SU) 5 credits
This course examines the origin, nature, and development of the post-Cold War international system. It explores how individuals, Nation-States, nongovernmental and international organizations interact with one another. Basic concepts include knowledge of actors such as Nation-States, international organizations like the United Nations, transnational corporations, nongovernmental organizations (NGOs) and social movements. The course further examines theoretical frameworks for interaction such as idealism, realism, and nationalism. Students will assess issues such as national sovereignty, the meaning of nationalism, national interest, national security, and the international balance of power. The course considers aspects of foreign policy including political economy, isolationism, and interventionism. It also explores strategies for enhancing international security, conflict resolution, diplomacy, military intervention, and the role of international law.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 101 Lab fee: $5.00

POLS 290 Capstone Experience in Political Science (On Demand) 3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have special interest in continuing a baccalaureate degree program in political science. The course presents a basic introduction to political science research methodologies that students apply in researching a political science topic of interest. Course requirements include the assembly of a portfolio that covers student’s academic career at Columbus State Community College and participation in summative testing of their academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: Completion of Associate of Arts and Associate of Science core requirements and at least 75 hours toward the degree and five credit hours in political science Lab fee: $5.00

POLS 293 Independent Study in Political Science (On Demand) 1–5 credits
POLS 293 is an individual, student-structured course that examines a selected topic in political science through intensive reading or research. The independent study elective permits a student to pursue his/her interest within the context of a faculty-guided program.
Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisites: Permission of the instructor and the chairperson and one course in Political Science Lab fee: $5.00

POLS 299 Special Topics in Political Science (On Demand) 1–5 credits
POLS 299 allows students to examine, in detail, selected topics of interest in political science.
Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Varies Lab fee: $5.00

Psychology (PSY)

Students who enroll in psychology courses must have placed in ENGL 101 and are encouraged to either have completed ENGL 101 or be enrolled in that course when scheduling a psychology course.

Note: Courses taught at a distance (DL) may have a higher lab fee than traditionally taught courses.

PSY 100 Introduction to Psychology (A, W, SP, SU, DL) 5 credits
This introductory course provides an overview of the origins, growth, content and applications of psychology, including the application of the scientific method to the following topics: research methodology; beginning statistics; theories of physical, cognitive, moral and emotional development; sensation; perception; learning; motivation; intelligence; memory; personality; coping processes; abnormality; adjustment; and the individual in small groups and a pluralistic society. In addition to traditional classes, students have the option of taking a Web-based version or a video-based version (telecourse) of the course. Students taking the
Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Students who take the video-based version (telecourse) may view the one-half hour video segments of the course on the Educable channel, at the college library, or rent copies of the videotapes. Course content in distance learning (DL) courses is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101
Lab fee: $5.00 Telecourse lab fee: $25.00

**PSY 135 Psychology of Adjustment (A, W, SP, SU) 3 credits**
This course examines psychological factors that influence individual growth, development and behavior. Current theoretical approaches to understanding and achieving self-awareness, application of conditioning and motivation techniques to behavior modification, group dynamics, methods of self-help, and methods of improving interpersonal communications and relationships are investigated.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101
Lab fee: $5.00

**PSY 200 Educational Psychology (A, W, SP, SU, DL) 5 credits**
This course offers students interested in becoming teachers an opportunity to consider practical, education-related applications of basic introductory psychology concepts. Teaching and learning topics include effective teaching skills; classroom management; the cognitive, social, and emotional development of learners; learner diversity; teacher- and student-centered instructional approaches; assessment of student learning; learning theories; creating optimal learning environments; student motivation; and the technology revolution in education. Methods may include interactive small group work, team presentations, educator communication skill building exercises, and computer lab experiences, including beginning training to use educational databases and Microsoft PowerPoint software. A distance-learning (DL) version of Educational Psychology is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lab fee: $5.00

**PSY 201 Field Based Experience in Educational Psychology (On Demand) 1–3 credits**
PSY 201 is an independent study course that offers teaching aides and other employed, screened, and insured individuals who work in the schools an opportunity to reflect in writing and discussion on the learning and teaching theories and practices studied in Educational Psychology 200. Twelve hours of observation/work in the schools are required each week for 10 weeks for each hour of credit earned. Only students who have successfully completed Educational Psychology 200 or who are currently enrolled in PSY 200 may take PSY 201. Each student meets face-to-face with his or her course instructor a minimum of four times per quarter.

Lecture: 0 hours – Lab: 0 hours – Field Experience: 12 hours per credit hour
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Corequisite: PSY 200
Lab fee: $5.00

**PSY 220 Psychology of Personality (On Demand) 5 credits**
Psychology of Personality is an exploration of major personality theories (trait, biological, psychodynamic, humanistic, socio-cultural, behavioralist, social learning, and cognitive) and current research on related psychological processes. It will include examination of the structure, dynamics, development, and assessment of personality using research and clinical evidence.

Lecture: 5 hours – Lab 0 hours
Prerequisites: PSY 100
Lab fee: $7.00

**PSY 230 Abnormal Psychology (A, W, SP, SU, DL) 5 credits**
Abnormal Psychology presents the basic concepts of abnormalities as defined by the American Psychiatric Association’s Diagnostic and Statistical Manual of Mental Disorders (DSM-IV). The course focuses on classification schemes of diagnoses and looks at descriptive terms and symptoms. Research, major perspectives and myths in the field of mental health are examined. A distance-learning (DL) version of Abnormal Psychology is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lab fee: $5.00

**PSY 240 Human Growth and Development through the Life Span (A, W, SP, SU, DL) 4 credits**
This course surveys developmental change from conception to death. The following stages of human growth and development are covered: conception and prenatal growth, infancy, childhood, adolescence, young adulthood, middle age, old age, and death. This course focuses on physical, social, emotional and cognitive development. A distance-learning (DL) version of Human Growth and Development through the Life Span is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail account, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 4 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lab fee: $5.00

**PSY 245 Children with Exceptionalities (A, SP) 5 credits**
This course is an introductory course that offers teachers, teaching assistants and students interested in becoming teachers an opportunity to study both the characteristics of children with special needs and the educational practices and programs that work to meet these learners’ needs in inclusive settings. Course topics include causes, prevalence and assessment of specific exceptionalities; historic and current theories, issues, trends, legal rights and responsibilities in special education; student placement and service options; teaching strategies, modifications and accommodations; classroom organization and management; and professional and home-school collaboration for lifelong learning.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lab fee: $5.00

**PSY 251 Adolescent Psychology (A, W, SP, SU, DL) 5 credits**
This course examines human development from puberty to young adulthood from a variety of perspectives. The course emphasizes the physical, cognitive, moral, identity and career development of adolescents in contemporary society. Although the emphasis is on major theories of development and the normal development sequence, problems arising at this stage, and means of dealing with these problems, will be addressed. Topics to be covered include education, academic performance and cognitive development; variations in physical and sexual maturation; social, emotional and moral development; parent-child relationships; identity and self-image; work and leisure behavior; and transition to adulthood and independence. A distance-learning (DL) version of Adolescent Psychology is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail account, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101
Lab fee: $5.00
PSY 261 Child Development (A, W, SP, SU, DL) 5 credits
This course examines the nature, nurture and development of children from conception through middle childhood. The traditional child development approach is used with emphasis upon physical, cognitive, social, emotional, and language development. Observation of children is an integral part of the course. A distance-learning (DL) version of Introduction to Child Development is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101 Lab fee: $5.00

PSY 267 Social Psychology (A, W, SP, SU) 5 credits
This course provides an overview of the origins, growth, content and interaction of individuals in social settings, including the application of the scientific method and cultural influence to the following topics: attitudes and attitude change, attribution, social identity (self and gender), social perception (understanding others), social cognition (thinking about others and their social environment), prejudice and discrimination, nonverbal communication, obedience to authority, conformity, aggression, prosocial behavior, interpersonal attraction and behavior in groups.
Lecture: 5 hours – Lab: 0 hours
Prerequisites: Grade of “C” or better in PSY 100 and placement into ENGL 101 Lab fee: $5.00

PSY 290 Capstone Experience in Psychology (On Demand) 3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have a special interest in continuing a baccalaureate degree program in psychology. The course presents a basic introduction to psychology research that students apply in researching a social science topic of interest. Course requirements include the assembly of a portfolio that covers student’s academic career at Columbus State Community College and participation in summative testing of academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: Completion of Associate of Arts or Associate of Science core requirements, at least 75 hours toward the degree, and five credit hours in psychology Lab fee: $5.00

PSY 293 Independent Study in Psychology (On Demand) 1–5 credits
PSY 293 is an individual, student-structured course that examines a selected topic in psychology through intensive reading or research. The independent study elective permits a student to pursue his/her interests within the context of a faculty-guided program.
Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisites: Permission of the instructor and the chairperson and one course in psychology Lab fee: $5.00

PSY 299 Special Topics in Psychology (On Demand) 1–5 credits
PSY 299 allows students to examine, in detail, selected topics of interest in psychology.
Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Varies Lab fee: $5.00

Quality Assurance Technology (QUAL)

QUAL 150 Quality Transformation (A, SU) 4 credits
This course focuses on teamwork and the applications of Total Quality Transformation “tools.” Teams of students and employees from business and industry solve existing quality problems in their organization with careful direction.
Lecture: 3 hours – Lab: 2 hours

QUAL 240 Total Quality Management (A, W) 3 credits
This course is a study and practice of the major elements and concepts of total quality management, including principles and styles of quality management, systems thinking, continuous improvement, management by data, and historic influences of leaders in quality management.
Lecture: 2 hours – Lab: 2 hours

QUAL 250 Metrology (SP) 3 credits
Making precise measurements is an important part of producing quality products for the customer. This introductory course covers the correct procedures for the linear and angular measures of features or attributes on machine components. Traceability to standards is also presented and instrument capability discussed. Students use a variety of instruments and systems to make precision measurements.
Lecture: 2 hours – Lab: 2 hours Lab fee: $10.00

QUAL 251 Value Engineering (W) 3 credits
Value engineering is the systematic application of recognized techniques which identify the function of a product or service, establish a monetary value for that function, and provide the necessary function reliably at lower overall cost. Students will be introduced to value engineering concepts and applications for the practitioner.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: MECH 244

QUAL 260 Reliability and Systems Maintainability (SP) 3 credits
This course is an examination of the basic methods that companies use to ensure the reliability of their products. Students learn statistical methods employed to determine reliability, the effectiveness of data analysis, use of simulations, and ways to improve system performance.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: MECH 244

Radiography (RAD)

RAD 111 Introduction to Radiologic Technology (SU) 3 credits
This is an introduction to radiologic principles and clinical radiography. Areas of emphasis include fundamentals of radiobiologic concepts, medical ethics, body mechanics, patient care skills, and clinical observation. This course is a prerequisite for all other radiologic technology courses.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: Completed health record and acceptance into program Lab fee: $30.00

RAD 113 Radiologic Science (W) 5 credits
The course begins with a review of basic concepts of electricity, electromagnetism, and electrical circuits. The student is then introduced to the theory of x-ray production, x-ray emissions, and x-ray interactions. Appli-
cations of equipment are discussed to include special x-ray equipment such as tomography, stereoradiography, mammography, and fluoroscopy.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: RAD 111  Lab fee: $5.00

RAD 118 Radiographic Exposure and Processing (SP)  5 credits
This course consists of a study of film processing through analysis of radiographic film characteristics, film processing, film storage and handling, and silver recovery methods. Photographic and geometric properties necessary to the production of a quality radiograph are discussed, as well as technical conversions necessary to maintain film density.
Lecture: 4 hours – Lab: 2 hours
Prerequisite: RAD 113  Lab fee: $14.00

RAD 123 Advanced Exposure and Processing (W)  4 credits
This advanced course analyzes factors which affect the diagnostic quality of the radiograph. Technique charts are developed. The importance of a quality assurance program is emphasized and quality control testing is presented. Students are required to conduct quality control testing and troubleshooting of radiographic equipment.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: RAD 118  Lab fee: $14.00

RAD 126 Radiation Biology and Protection (A)  3 credits
This advanced science course examines human responses to ionizing radiation. Early and late effects of radiation exposure are discussed, as well as an in-depth analysis of radiation protection standards and practices.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: RAD 111  Lab fee: $10.00

RAD 141 Radiographic Procedures I (SU)  4 credits
The student is introduced to radiologic terms specific to imaging, equipment operation, and patient positioning. Specific areas of study include physician assisting, and radiographic anatomy to include gastrointestinal system, upper and lower extremities, chest, abdomen, and basic urography. Lab provides the opportunity for practice and demonstration of proficiency.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: Acceptance into the program  Lab fee: $35.00

RAD 141A Intro to Radiography Equipment and Patient Care
(On Demand) 0.5 credit
This module of 141 introduces the student to radiography equipment and patient care.
Prerequisites: RAD 190
Lab: 0.2 hour
Lecture: 0.6 hour  Lab fee: $20.00

RAD 141B Radiographic Positioning of the Upper Extremities
(On Demand) 0.75 credit
This module of 141 introduces the student to radiographic positioning of the upper extremities.
Prerequisites: RAD 141A
Lecture: 0.3 hour
Lab: .9 hour  Lab Fee: $3.00

RAD 141C Radiographic Positioning of the Lower Extremities
(On Demand) 0.75 credit
This module of 141 introduces the student to radiographic positioning of the lower extremities
Prerequisites: RAD141A
Lecture: 0.3 hour
Lab: .9 hour  Lab Fee: $3.00

RAD 142 Radiographic Procedures II (A)  4 credits
This course serves as a continuation of RAD 141, with progression through the positioning categories and radiographic anatomy. Course topics include basic fluoroscopic procedures, the vertebral column, bony thorax, specialized biliary and urographic studies, and tomography.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: RAD 141  Lab fee: $35.00

RAD 142A Radiographic Positioning of the Chest and Abdomen
(On Demand) 0.75 credit
This module of RAD 142 introduces the student to radiographic positioning of the chest and abdomen.
Prerequisite: RAD 141A
Lecture: 0.3 hour
Lab: 9 hour  Lab Fee: $3.00

RAD 142B Radiographic Positioning of the Spine and Skull
(On Demand) 0.75 credit
This module of RAD 142 introduces the student to radiographic positioning of the spine and skull.
Prerequisite: RAD141A
Lecture: 0.3 hour
Lab: 9 hour  Lab Fee: $3.00

RAD 143 Radiographic Procedures III (W)  4 credits
This course serves as the final of a series of three, with progression through the remaining categories of positioning and radiographic anatomy. Course topics include specialized fluoroscopic and radiographic studies, skull and facial bones, operative radiography, and trauma radiography.
Lecture: 3 hours – Lab: 3 hours
Prerequisite: RAD 142  Lab fee: $35.00

RAD 148 Special Radiographic Procedures (SP)  4 credits
This course provides a detailed examination of cardiovascular, neurologic, interventional radiologic studies and common specialized procedures. The course begins with discussion of specialized equipment and materials. Emphasis is placed on pertinent anatomy, diagnostic value and/or therapeutic value of each examination.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: RAD 143  Lab fee: $5.00

RAD 190 Radiation Protection for General Machine Operators
(A, W, SP, SU) 2 credits
This course is designed to prepare nonradiographers with a specific background in radiation protection and radiation biology necessary to be eligible to apply for the State of Ohio, Radiology Technology Division, General Operator Examination. Areas of instruction include radiation physics, radiographic technique, darkroom processing and film handling, radiation health, safety and protection and radiation biology. Basic radiographic positioning skills and terminology are also presented.
Lecture: 2 hours – Lab: 0 hours  Lab fee: $3.00

RAD 212 Sectional Anatomy (A)  3 credits
Sectional anatomy is introduced, with an emphasis on head, chest, abdomen and pelvis. Students will be required to give a presentation demonstrating correlations between different sectional imaging modalities.
Lecture: 3 hours – Lab: 0 hours  Prerequisite: RAD 143  Lab fee: $5.00

RAD 222 Computerized Imaging (A)  1 credit
This course presents a survey of computerized modalities related to radiography to include an introduction to computers in medical imaging, digital radiography, computed tomography, magnetic resonance imaging, positron emission tomography and Picture Archival and Communication Systems (PACS).
Lecture: 1 hour – Lab: 0 hours
Prerequisite: RAD 113  Lab fee: $5.00

RAD 231 Radiographic Pathology (W)  3 credits
The course begins with a review of common terms relating to pathology. Using a survey approach, this course continues with a study of various...
real estate law includes all of the areas of law of common concern to the typical real estate practitioner and investor-consumer. Among topics covered are the law of agency as applied to real estate brokers and during film reading and dictation. Film critique and case presentations are continued.
Lab: 24 hours
Prerequisite: RAD 263
Corequisite: RAD 254 Lab fee: $23.00

RAD 265 Clinical V (A) 3 credits
This directed practice in the clinical area is a continuation of Clinical IV. Clinical V provides the practical experience necessary to function as a radiographer and is designed to enhance and complement didactic studies. Experience is gained in the general radiographic and fluoroscopic areas, emergency department, operating room, portable radiography, tomography, computed tomography, cardiovascular and interventional radiology, digital imaging and special area (one day) rotations in nuclear medicine, radiation oncology, diagnostic medical sonography, cardiac catheterization laboratory, and extra-corporeal shock wave lithotripsy. Film critique and case presentations are continued.
Lab: 24 hours
Prerequisite: RAD 264
Corequisite: RAD 255 Lab fee: $23.00

RAD 266 Clinical VI (W) 3 credits
This directed practice in the clinical area is a continuation of Clinical V. Clinical VI provides the practical experience necessary to function as a radiographer. Experience is obtained in general radiographic and fluoroscopic areas, the emergency room, the operating room, tomography, mammography, portable radiography, digital imaging, computed tomography, and magnetic resonance imaging. Film critique and case presentations are continued.
Lab: 24 hours
Prerequisite: RAD 265
Corequisite: RAD 256 Lab fee: $23.00

RAD 267 Clinical VII (SP) 3 credits
This directed practice in the clinical area is a continuation of Clinical VI. Students are required to complete the Final Competency Examination during this quarter. Clinical rotations are scheduled in the general radiographic and fluoroscopic areas, the operating room, the emergency room, mammography, and computed tomography. Once the Final Competency Examination has been satisfactorily completed, the student may custom design individual specific clinical rotations. Critique and case presentations are continued.
Lab: 24 hours
Prerequisite: RAD 266 Lab fee: $23.00

Real Estate (REAL)

REAL 101 Real Estate Principles and Practices (A, W, SP, SU) 4 credits
This course presents an introduction to the language of real estate, the economics of the real estate business, and the general practices performed in the listing and selling of real estate. REAL 101 provides a basic knowledge of the real estate business. Course covers the physical, legal, locational, and economic characteristics of real estate, real estate markets, regional and local economic influences on real estate values, evaluation, financing, licensing, and professional ethics. This course meets all state requirements for licensing.
Lecture: 4 hours – Lab: 0 hours Lab fee: $3.00

REAL 102 Real Estate Law (A, W, SP, SU) 4 credits
Real estate law includes all of the areas of law of common concern to the typical real estate practitioner and investor-consumer. Among topics covered are the law of agency as applied to real estate brokers and
salespersons, law of fixtures, freehold and leasehold, estates, conveyance of real estate, real estate managers, licensure laws of Ohio, zoning, cooperatives and condominiums. This course meets state requirements for licensing.
Lecture: 4 hours – Lab: 0 hours   Lab fee: $3.00

REAL 111 Real Estate Finance (A, W, SP, SU) 2 credits
REAL 111 covers four major concerns of real estate financing: financing instruments and creative financing techniques; in-depth mortgage payment patterns and concepts, economic characteristics and standards, and financing of single and income-producing properties; sources and availability of mortgage money and credit and the impact of various factors on the mortgage market; and special government activities having an impact on real estate financing. Class meets requirements for licensing.
Lecture: 2 hours – Lab: 0 hours   Lab fee: $3.00

REAL 112 Real Estate Appraisal (A, W, SP, SU) 2 credits
REAL 112 stresses the methodology of appraising the single-family residential property and the theory underlying appraisal techniques. Course covers the three basic techniques of appraising: market comparison, penalized cost of replacement, and income approach (GMRM). A term appraisal project is assigned to give the student practical experience in applying these techniques. Course meets state requirements for licensing.
Lecture: 2 hours – Lab: 0 hours   Lab fee: $3.00

REAL 121 Residential Sales Practices (SP) 3 credits
This is a “how to” course providing a step-by-step approach for success as a real estate professional based on sound principles and acceptable techniques. Course sets forth basic fundamentals which must be mastered by real estate practitioners, regardless of their specialization or type of property involved. Underlying theme is communication. See advisor to find out if course may meet continuing education requirement.
Lecture: 3 hours – Lab: 0 hours
Prerequisites: REAL 101 and REAL 102 or Real Estate License.
Lab fee: $3.00

REAL 201 RE Etiquette and Professional Standards (A, W, SP, SU) 3 Credits
To educate real estate licensees and potential licensees on the importance of etiquette and professionalism as it pertains to the real estate practitioner. Course covers not only etiquette between agents and clients, but also etiquette and professionalism with foreign-born clients and their customs. Students will learn basic customs and traditions in the real estate industry and will learn the appropriate conduct in a variety of settings that they will experience in the real estate field.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: REAL 101 or REAL 102 or real estate license or instructor permission.   Lab fee: $3.00

REAL 221 Professional Property Management (A, SP) 3 credits
A course studying decision-making as it affects management of residential, commercial and industrial property. The emphasis shall be on the practical application of theory to actual management problems. Specific topics include Ohio Tenant Landlord Act, forcible entry and detainer, typical leases, office management, hiring, merchandising, advertising, collection problems, taxes, insurance and maintenance. See advisor to find out if course may meet continuing education requirement.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: REAL 101 Lab fee: $3.00

REAL 250 Commercial Real Estate (A, SP) 3 Credits
This course is an introduction to commercial real estate practice which provides students with the basic vocabulary, various types of forms to comply with, state law and regulations, tools, and training to proceed with commercial listing or sales activity with confidence. Students will learn to establish market value and return for investments in office buildings, industrial properties, apartments, shopping centers and retail stores. Students will also study a broad selection of financing options for commercial real estate.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: REAL 101 or real estate license or instructor permission.   Lab fee: $3.00

REAL 270 Real Estate Investing (A, W, SP) 3 credits
This course offers a practical approach to understanding the steps necessary to purchase real property as part of an investment portfolio. Student will use case studies to develop investment plans that achieve financial wealth through real property investment. Investment property will include single family, multi-family, and small commercial ventures. It is recommended that the student be familiar with Excel spreadsheets or similar software.
Lecture: 3 hours – Lab: 0 hours   Lab fee: $3.00

REAL 275 Repair, Restore, Remodel (A, W) 3 credits
This course is based on proven techniques used to repair, restore or remodel property that is functionally obsolete. Course is structured to teach basic hand tool and power tool use and safety. Several labs will be conducted with hands-on activities. Part of the course will help students understand the basic techniques in restoration of historical properties. These techniques will involve a beginning study of architectural style and design based upon a property’s age. The final part of the course will analyze what type of remodeling is economically feasible versus projects that are not feasible.
Lecture: 3 hours – Lab: 0 hours   Lab fee: $3.00

REAL 296 Real Estate Practicum/Seminar (A, W, SP, SU) 2 Credits
This course introduces students to the real estate profession and daily activities of a real estate agent. Course will provide a foundation of the real estate process and an opportunity for students to apply classroom information, theories, and skills in a real estate office environment. Students will participate in an actual real estate office environment.
Seminars: 1 hour – Practicum: 7 hours   Lab fee: $3.00

Respiratory Care (RESP)

RESP 100 Introduction to Respiratory Care (A) 5 credits
This course presents an integrated introduction to the care of pulmonary patients. Course content focuses on the skills required and the methods used to manage cardiopulmonary problems.
Lecture: 3 hours – Lab: 4 hours
Prerequisite: Acceptance into the program
Corequisite: RESP 160 Lab fee: $65.00

RESP 102 Respiratory Assistant (A, W, SP) 3 credits
This course is a prerequisite for admission to the Respiratory Care program. This course deals with cleaning, sterilization, assembly and making respiratory care equipment patient-ready. The content covered in this course would improve a student’s opportunity for hospital employment as a respiratory care assistant.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: Placement into ENGL 101 and completion of MATH 102 with a “C” or better Lab fee: $7.00

RESP 114 Introduction to Pulmonary Disease (W) 4 credits
This course provides an integrated approach to the anatomy, physiology and pathology of the cardiopulmonary system. Normal and abnormal
function will be compared.
Lecture: 3 hours – Lab: 2 hours
Prerequisite: RESP 100 or permission of instructor
Corequisite: RESP 150 and RESP 170

RESP 130 Patient Assessment I (SP) 2 credits
This course presents a holistic approach to the assessment of adult and pediatric patients in the subacute/homecare and acute care settings. Special emphasis will be placed on assessment of the cardiopulmonary function.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: RESP 114, RESP 150 or permission of instructor
Corequisites: RESP 152 and RESP 196

RESP 132 Patient Assessment II (SU) 2 credits
This course presents a holistic approach to assessment of adult and pediatric patients in the acute care setting. Special emphasis will be placed on assessment of the cardiopulmonary system.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: RESP 130
Corequisites: RESP 154 and RESP 198

RESP 150 Introduction to Pharmacology (W) 2 credits
This course provides an introduction to the basic principles of therapeutic drug administration. Classification of drugs will be included. Special emphasis will be directed to safety issues, sources of drug information, and application to respiratory care practice.
Lecture: 2 hours
Prerequisite: RESP 100 or permission of instructor
Corequisite: RESP 114 and RESP 170  Lab fee: $55.00

RESP 152 Case Management I (SP) 2 credits
This course presents a holistic approach to the management of adult and pediatric patients in the subacute and acute care settings. Special emphasis will be placed on the management of the cardiopulmonary problems.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: RESP 114, RESP 150 or permission of instructor
Corequisite: RESP 130 and RESP 196

RESP 154 Case Management II (SU) 2 credits
This course presents a holistic approach to the management of adult and pediatric patients in the acute care setting. Special emphasis will be placed on the management of the cardiopulmonary problems.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: RESP 152 or permission of instructor
Corequisites: RESP 132 and RESP 198

RESP 160 Introduction to Respiratory Equipment (A) 1 credit
This course is an introduction to basic respiratory care equipment.
Lecture: 0 hours – Lab: 3 hours
Prerequisite: Acceptance into the program
Corequisite: RESP 100  Lab fee: $25.00

RESP 170 Mechanical Ventilators (W) 1 credit
Students will learn operational characteristics of critical care, home care, transport and neonatal ventilators.
Lecture: 0 hours – Lab: 3 hours
Prerequisite: RESP 160 or permission of instructor
Corequisite: RESP 114 and RESP 150  Lab fee: $67.00

RESP 196 Clinical Practice/Therapeutic Procedures I (SP) 8 credits
This course is focused on conducting respiratory care procedures in the acute care and long-term acute care settings.
Lecture: 2 hours – Lab: 3 hours – Clinical: 10 hours
Prerequisites: RESP 100 and BIO 262 or permission of instructor
Corequisites: RESP 130 and RESP 152  Lab fee: $44.00

RESP 198 Clinical Practice/Therapeutic Procedures II (SU) 8 credits
This course is focused on conducting respiratory care procedures in the acute care setting.
Lecture: 2 hours – Lab: 3 hours – Clinical: 10 hours
Prerequisite: RESP 196 or permission of instructor
Corequisites: RESP 132 and RESP 154  Lab fee: $90.00

RESP 221 Introduction to Sleep Problems (A, DL) 2 credits
This introductory course will provide an overview of the physiology and architecture of sleep, common sleep disorders, their prevalence in the population, causes and treatment, the factors related to risk and risk management for shift workers, and the role of the polysomnography laboratory in monitoring and recording physiologic data during sleep.
Prerequisite: Placement into ENGL 101, Completion of MATH 102, BIO 100 and CHEM 100.
Lecture: 2 hours

RESP 223 Level I Polysomnography Technician (W, DL) 2 credits
This course will prepare the student for performing Level I polysomnographic technician responsibilities in the clinical area and will provide an introduction to polysomnography.
Lecture: 2 hours
Prerequisite: RESP 221 or permission of RESP program coordinator
Corequisites: RESP 223

RESP 224 Level I Polysomnography Technician Clinical (W) 2 credits
This course will prepare the student for performing Level I polysomnographic technician responsibilities in the clinical area. The student will complete a supervised clinical experience in a sleep lab under the guidance of a clinical preceptor. The course focuses on preparing the equipment and instrumentation used in the sleep lab, as well as on patient preparation.
Lecture: 0 hours – Clinical: 4 hours
Prerequisite: RESP 221 and completed health record, drug screen and background check or permission of RESP program coordinator
Lab fee: $20.00

RESP 225 Level II Polysomnography Technician (SP, DL) 2 credits
The Level II Technician course is designed for nurses, respiratory therapists, paramedics and other health care practitioners who are interested in polysomnography. This course focuses on scoring of polysomnography tracings, applying and titrating CPAP/Bi-Level therapy and patient education.
Lecture: 2 hours
Prerequisite: RESP 223 or permission of RESP program coordinator

RESP 226 Level II Polysomnography Technician Clinical (SP) 2 credits
The Level II Technician clinical course is designed to provide clinical practice for skills covered in the RESP 225.
Lecture: 0 hours – Clinical: 4 hours
Prerequisite: RESP 223, RESP 224 and completed health record, drug screen and background check or permission of RESP program coordinator
Corequisite: RESP 225  Lab fee: $20.00

RESP 228 Polysomnography Current Topics (On Demand) 2 credits
This course will examine current changes in the field of polysomnography. Changes may include new techniques in instrumentation or diagnosis, and new approaches to sleep disorders or assessment.
Lecture: 2 hours
Prerequisite: RESP 225 or permission of RESP program coordinator
Lab fee: $85.00

RESP 230 Patient Assessment III (A) 2 credits
This course presents a holistic approach to the assessment of adult and pediatric patient in the critical care setting. Special emphasis will be placed
on assessment of the cardiopulmonary system.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: RESP 132 or permission of instructor
Corequisites: RESP 256 and RESP 290

RESP 232 Neonatal and Pediatric Respiratory Care (W) 3 credits
This course offers a study of the management and treatment of neonatal and pediatric respiratory diseases. Special emphasis is placed on the therapeutic procedures of respiratory care which are associated with pediatric and neonatal patients.
Lecture: 3 hours
Prerequisite: RESP 230

RESP 238 Pulmonary Function (On Demand) 3 credits
A study of the equipment and the techniques utilized in pulmonary function testing and blood gas analysis. This course examines the types of analyzers used in performing lung volume tests, lung flow tests, and gas analysis test with a discussion of the advantages and disadvantages of such systems. Procedures used in each test are discussed including patient instruction and calculation of the data.
Lecture: 3 hours
Prerequisite: RESP 230

RESP 251 Respiratory Rehabilitation Home Care Techniques (On Demand) 3 credits
This course provides the student with the appropriate adaptations of skills and concepts traditionally used in the hospital to alternate care settings in order to educate the patient and caregiver to maintain the highest possible functional capacity. Included are medication regimens, smoking cessation, breathing retraining, bronchial hygiene, and other self-care techniques. Other topics include monitoring the patient’s disease and servicing the equipment needs of the patient.
Lecture: 3 hours
Prerequisite: Permission of instructor Lab fee: $15.00

RESP 252 Patient Management in Respiratory Rehabilitation (On Demand) 3 credits
This course focuses on the study of the patient’s adaptation to chronic pulmonary disease. Emphasis will be placed on problem identification, appropriate interventions, and referral to community resources using a multidisciplinary approach in coordinating the various systems of care.
Lecture: 3 hours
Prerequisite: RN, LPN, RRT, CRT or permission of instructor

RESP 253 Respiratory Rehabilitation Home Care Administration (On Demand) 4 credits
This course concentrates on the management of a respiratory rehabilitation or home care organization. Topics include the development of policies and procedures for respiratory rehab home care services, the preparation of the certificate of medical necessity, and the documentation necessary for reimbursement, accreditation, regulatory requirements and quality assurance. Other topics include marketing strategies and community health promotion.
Lecture: 4 hours
Prerequisite: RN, LPN, RRT, CRT or permission of instructor

RESP 256 Case Management III (A) 2 credits
This course presents a holistic approach to the management of adult and pediatric patients in the critical care setting. Special emphasis will be placed on the management of the cardiopulmonary problems.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: RESP 154 or permission of instructor
Corequisites: RESP 230 and RESP 290

RESP 270 Current Issues in Respiratory Care (A, W, SP, SU) 2 credits
This course is intended to be focused on current trends in the care of patients with cardiopulmonary problems. Course content will change as current issues change.
Lecture: 2 hours
Prerequisite: RESP 256 or permission of instructor

RESP 280 Respiratory Care Seminar 2 (W) 2 credits
This course deals with special topics in respiratory care.
Lecture: 2 hours
Prerequisite: RESP 290
Corequisite: RESP 292 Lab fee: $100.00

RESP 290 Clinical Practice/Therapeutic Procedures III (A) 8 credits
This course focuses on conducting respiratory care procedures in the critical care setting.
Lecture: 2 hours – Lab: 3 hours – Clinical: 10 hours
Prerequisite: RESP 198 or permission of instructor
Corequisites: RESP 230 and RESP 256 Lab fee: $67.00

RESP 292 Clinical Practice/Therapeutic Procedures IV (W) 8 credits
Clinical Practice IV is a continuation of respiratory care in the critical care units including the adult, pediatric and neonatal patient population.
Lecture: 2 hours – Lab: 3 hours – Clinical: 10 hours
Prerequisite: RESP 290 or permission of instructor
Corequisite: RESP 270 Lab fee: $63.00

RESP 295 Clinical Experience (SP) 4 credits
In the clinical practicum, students apply skills that they have learned in the previous four quarters. Students spend 24 hours per week practicing respiratory care with a clinical affiliate.
Lecture: 1 hour – Clinical: 24 hours
Prerequisite: RESP 292 or permission of instructor Lab fee: $100.00

Social Sciences (SSCI)

Students who enroll in interdisciplinary social science courses must have placed in ENGL 101 and are encouraged to either have completed ENGL 101 or be enrolled in that course when scheduling an interdisciplinary social science course.

SSCI 100 Globalization: A Social Science Perspective (A, W, SP, SU, DL) 5 credits
This course will survey the process of globalization through the social science disciplines. The impacts of the social, cultural, economic and political contexts on society and organizations will be considered. Strategies for becoming effective negotiators and managers within a global economy will be explored. Students, working in teams, will research a particular organization of their choice and present a case study on the organization at the end of the quarter. This is a general education core course. A section with project/study time in Cuernavaca, Mexico, may be offered winter quarter. A distance learning (DL) version is also available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Group projects are maintained via virtual meetings and distance-learning students are required to take a proctored final examination at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101 Lab fee: $5.00

SSCI 101 Cultural Diversity (A, W, SP, SU, DL) 5 credits
SSCI 101 is an interdisciplinary course that focuses on the cultural, psychological, sociological, political, geographic and economic diversity among various groups. Topics include the ways individual beliefs, social values,
and political and economic systems affect our perspectives and lifestyles. Through the use of team projects, students participate in interactive group work to explore the effects of social inequity on groups within society. The course emphasizes the development of critical thinking skills as applied to social science research and diversity issues that students may encounter in their lives. This is a general education core course. A distance learning (DL) version of Cultural Diversity is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Group projects are maintained via virtual meetings and distance learning students are required to take a proctored final examination at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $5.00

SSCI 101 Cultural Diversity: The Southwest Experience (SU)  5 credits
This is the same course as listed above; however, students will study diversity within the context of 5 different Indian tribes on reservations in New Mexico and Arizona. This course includes a 15-day intensive travel experience in Mexico City and Cuernavaca, Mexico. Travel typically takes place during the break between autumn and winter quarters.

Prerequisite: Placement into ENGL 101 and permission of the instructor
Lab fee: $5.00 (additional costs for travel, housing, etc.)

SSCI 101 Cultural Diversity: The Mexico Experience (W)  5 credits
This course covers the same material as the traditional version of SSCI 101; however, diversity is studied within the context of Mexican culture. This course includes a 10-day intensive travel experience in Mexico City and Cuernavaca, Mexico. Travel typically takes place between the two-week break prior to the beginning of summer quarter.

Prerequisite: Placement into ENGL 101 and permission of the instructor
Lab fee: $5.00 (additional costs for travel, housing, etc.)

SSCI 102 Popular Culture (A, W, SP, SU)  5 credits
SSCI 102 is an interdisciplinary general education core course that examines the relationship between society and popular culture in the United States through topics including advertising, television, music, movies, art, sports and the Internet. The course analyzes these components of American popular culture and their connections to social, political, economic and cultural influences from the latter half of the 20th century to the present. Students will explore these changes in U.S. society through selected readings, written assignments and group projects. This is a general education core course. A distance learning (DL) version of Popular Culture is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $5.00

SSCI 104 World Economic Geography (A, W, SP, SU, DL)  5 credits
SSCI 104 is an interdisciplinary, general education core course that provides a geographical examination of the world economy. Students research the factors affecting a country’s socioeconomic development and present findings from a policy maker’s perspective. Factors to be covered include location, demographic trends, resource availability and use patterns, industrialization, political and cultural forces, and global interdependence. A section with project/study time in Cuernavaca, Mexico may be offered winter quarter. A distance-learning (DL) version of World Economic Geography is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $5.00

SSCI 105 Law and Society (A, W, SP, SU)  5 credits
SSCI 105 is an interdisciplinary, general education core course that examines the interrelationships between law and other social structures and processes. The structure of the law, the origin of laws, the organization and function of the legal system, the impact of the law, and the relationship between law and social change will be examined.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $5.00

SSCI 287 Social Science Research Methods (A, W, SP, SU)  5 credits
This course is designed to provide students with an introduction to the major research techniques that are employed by social science researchers. The first half of the course focuses on the logic of research and research design and the procedures used for research design. The second half of the course deals more specifically with a variety of particular techniques used for gathering data. Students will be expected to apply each of the techniques covered in the course through a series of small exercises throughout the quarter. Students will write a research paper based on some of their findings.

Lecture: 3 hours – Lab 2 hours
Prerequisites: ENG 102 or ENG 111; MATH 104 or MATH 135; 10 hours of credit in the social sciences  Lab fee: $5.00

SSCI 289 Capstone Experience in Social Sciences (On Demand)  3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have a special interest in continuing in a baccalaureate degree program in the social sciences. The course presents a basic introduction to social science research methodologies that students apply in researching a social science topic of interest. Course requirements include the assembly of a portfolio that covers student’s academic career at Columbus State Community College and participation in summative testing of academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.

Lecture: 2 hours – Lab: 2 hours
Prerequisites: Completion of Associate of Arts or Associate of Science core requirements and at least 75 hours toward the degree
Lab fee: $5.00

SSCI 293 Independent Study in the Social Sciences (On Demand)  1 - 5 credits
SSCI 293 is an individual, student-structured course that examines a selected topic in the social sciences through intensive reading or research. The independent study elective permits a student to pursue his/her interests within the context of a faculty-guided program.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisites: Permission of the instructor and chairperson and one course in the Social Sciences  Lab fee: $5.00

SSCI 299 Special Topics in the Social Sciences (On Demand)  1 - 5 credits
SSCI 299 allows students to examine, in detail, selected topics of interest in the social sciences.

Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Varies  Lab fee: $5.00
Sociology (SOC)

Students who enroll in sociology courses must have placed in ENGL 101 and are encouraged to either have completed ENGL 101 or be enrolled in that course when scheduling a sociology course.

SOC 101 Introduction to Sociology (A, W, SP, SU, DL) 5 credits
This course introduces the basic concepts, methods and findings of sociology as a scientific discipline. The sociological perspective, emphasizing social interaction and structure, is used to explore the following topics: culture; socialization; social groups, including organizations; deviance; various types of social inequality; major social institutions; collective behavior, social movement and social change. A distance-learning (DL) version of Introduction to Sociology is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101    Lab fee: $5.00

SOC 202 Social Problems (A, W, SP, SU, DL) 5 credits
This course examines how various conditions within society come to be defined as social problems. Individual, social, cultural, economic and political causes and consequences of such problems are analyzed with contemporary social science research (i.e., studies in the fields of anthropology, economics, geography, political science, psychology, and sociology). Possible intervention strategies are also assessed. Problems covered include health and well being; social and interpersonal violence; conformity and deviance; social and economic inequality associated with poverty, minority status, aging and sex roles; institutional change; and future issues and trends. A distance-learning (DL) version of Social Problems is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101; completion of SOC 101 is recommended, but not required.    Lab fee: $5.00

SOC 208 Sociological Approaches to Criminology (A, W, SP, SU, DL) 5 credits
This course is an introduction to the sociological study of criminology and examines fundamental issues of the discipline such as the nature and social distribution of crime, the criminal law, and theories of crime. The primary focus of the course is on understanding theories surrounding the causes and correlates of criminal behavior and developing a critical perspective from which social policies on crime can better be understood.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101    Lab fee: $5.00

SOC 209 Sociology of The Criminal Justice System (A, W, SP, SU, DL) 5 credits
This course is an introduction to the criminal justice system as a social institution in society. Topics covered include an overview of the historical development and functions of the criminal justice system in the United States, theories of justice and punishment, the emergence and development of the modern police and court systems, and the structure and function of the correctional system. The social roles of personal in the criminal justice system, including police, lawyers, judges, correctional officers, and parole officers will also be examined.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101    Lab fee: $5.00

SOC 210 Sociology of Deviance (A, W, SP, SU, DL) 5 credits
This course explores the major sociological perspectives and theories of deviance. This introductory course includes the study of the definition, identification, treatment and management of types of deviance, such as crime, mental illness, alcoholism and other pathologies. A distance-learning (DL) version of Sociology of Deviance is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance-learning courses are administered at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101; completion of SOC 101 is recommended, but not required.    Lab fee: $5.00

SOC 230 Marriage and Family Relations (A, W, SP, SU, DL) 5 credits
This course examines the impact of modern society upon the family as it relates to courtship, size of family, member relationships, economic problems and marital stability. This course compares alternative life styles and marriage and family relations throughout the life span.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101; completion of SOC 101 is recommended, but not required.    Lab fee: $5.00

SOC 280 American Race and Ethnic Relations (A, W, SP, SU, DL) 5 credits
This course explores racial and ethnic relations in the United States. The current and past experiences of selected American racial and ethnic groups are examined with respect to theories and patterns of intergroup relations and issues of prejudice and discrimination (both individual and institutional). Possible future trends in American intergroup relationships are addressed. A distance-learning (DL) version of American Race and Ethnic Relations is available. Students taking the Web-based version of the course must be familiar with computers, have an e-mail address, and access to the Internet. Course content is identical to that presented in a traditional classroom setting. Examinations for distance learning courses are administered at the Testing Center.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101; completion of SOC 101 is recommended, but not required.    Lab fee: $5.00

SOC 290 Capstone Experience in Sociology (On Demand) 3 credits
This course is for students completing the two-year Associate of Arts or Associate of Science degree who have a special interest in continuing in a baccalaureate degree program in sociology. The course presents a basic introduction to sociology research methodologies that students apply in researching a social science topic of interest. Course requirements include the assembly of a portfolio that covers student’s academic career at Columbus State Community College and participation in summative testing of academic skills. Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters.
Lecture: 2 hours – Lab: 2 hours
Prerequisites: Completion of Associate of Arts or Associate of Science core requirements, at least 75 hours toward the degree, and five credit hours in sociology    Lab fee: $5.00

SOC 293 Independent Study in Sociology (On Demand) 1–5 credits
This is an individual, student-structured course that examines a selected topic in sociology through intensive reading or research. The independent study elective permits a student to pursue his/her interests within the context of a faculty-guided program.
Lecture: 1 to 5 hours – Lab: 0 hours
Prerequisite: Permission of the instructor and the chairperson and one course in sociology    Lab fee: $5.00

SOC 299 Special Topics in Sociology (On Demand) 1–5 credits
SOC 299 allows students to examine, in detail, selected topics of interest in sociology.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Varies    Lab fee: $5.00
Spanish (SPAN)

SPAN 100 Spanish for the Professions (A, W, SP, SU)  3 credits
In this course, students learn basic Spanish phrases and the questions necessary to carry out specific protocols in a specific profession. Discussions also cover cross-cultural issues pertinent to relationships between non-Hispanic professionals and members of the Hispanic community. This course is useful for students interested in pursuing a career in a specific profession that has frequent contact with the Hispanic population.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $3.00

SPAN 101 Elementary Spanish I (A, W, SP, SU, DL)  5 credits
SPAN 101 is an introduction to the fundamentals of the Spanish language with practice in listening, reading, speaking and writing. Course includes selected studies in Hispanic culture. SPAN 101 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $6.00

SPAN 102 Elementary Spanish II (A, W, SP, SU, DL)  5 credits
This course is a continuation of SPAN 101, with further development of listening, reading, speaking and writing skills and further study of Hispanic culture. SPAN 102 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $6.00

SPAN 103 Intermediate Spanish I (A, W, SP, SU, DL)  5 credits
SPAN 103 offers continued study of the Spanish language and development of listening, reading, speaking and writing skills. It also includes readings from contemporary Hispanic culture and literature. SPAN 103 meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $6.00

SPAN 104 Intermediate Spanish II (A, W, SP, SU, DL)  5 credits
SPAN 104 focuses on the reading and discussion of Spanish and Latin American short stories, novels, plays, newspapers, and magazines, emphasizing literary appreciation and the development of Hispanic culture. It meets elective requirements in the Associate of Arts degree program and transfer requirements in foreign languages and literature.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: Placement into ENGL 101  Lab fee: $6.00

SPAN 105 Spanish Conversation and Composition (A, W, SP, SU)  1 credit
This is a conversation/composition course designed to provide students completing the 104-level with an opportunity to continue practicing the language. Students discuss current events and personal experiences in the target language. Readings are taken from literary texts, journals, magazines and newspapers. The course is repeatable for a total of 5 hours of credit.
Lecture: 1 hour – Lab: 0 hours
Prerequisite: Completion of SPAN 104 or permission of instructor  Lab fee: $4.00.

SPAN 290 Capstone Experience in Spanish (On Demand)  3 credits
This is a capstone course focusing on Spanish. Paradigms and their underlying assumptions will be explored. Students will work on developing research techniques and methodologies. Students will apply these techniques to a project of their own design, complete a personal portfolio covering their studies at Columbus State, and participate in summative testing of their academic skills.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Open only to Associate of Arts or Associate of Science students preparing to graduate within two academic quarters  Lab fee: $5.00

SPAN 299 Special Topics in Spanish (On Demand)  1–5 credits
SPAN 299 offers students the opportunity for a detailed examination of special topics in Spanish.
Prerequisite: Varies  Lab fee: $2.00

Speech and Hearing Science (SHS)

SHS 230 Introduction to Communications Disorders (On Demand)  5 credits
This course provides a survey of the topics, methodologies, and applications of speech and hearing science in normal and disordered hearing, speech, and language. This includes an introduction to the components of normal communication, including anatomy and physiology of speech and hearing mechanisms and physical components of sound and language. Major emphasis is on specific communication disorders, including fluency disorders, stuttering, swallowing disorders, aphasia, reading disorders, and different types of hearing loss. Course material will also address the Speech Pathology and Audiology professions and communication therapies.
Prerequisite: ENGL 101  Lab fee: $5.00

Sport and Exercise Studies (SES)

SES 100 Personal Fitness Concepts (A, W, SP, SU, DL)  3 credits
This course of study focuses on fitness issues which affect Americans today and in the future. Emphasis is placed on establishing a basis for positive fitness through consideration of the various factors which influence fitness. Personal fitness concepts will focus attention on the need for each person to arrive at informed conclusions about how to take responsibility for his or her personal fitness.
Lecture: 3 hours – Lab: 0 hours  Lab fee: $10.00

SES 101 Introduction to Sport and Exercise Studies (W, SU)  3 credits
A survey of the health and fitness arena both private and public, to include the study of facilities, recreational options for the client, client profiles, daily operations, legal aspects, personnel issues, and program administration.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: Acceptance into the program  Lab fee: $2.00

SES 102 Total Body Conditioning (A, W, SP)  1 credit
This course involves participation in a resistance/aerobic fitness program to include cardio-respiratory fitness, strength training, and flexibility activities.
Lecture: 0 hours – Lab: 2 hours  Lab fee: $10.00

SES 104 Beginning Yoga (A, W, SP)  1 credit
This course provides instruction in the fundamentals of yoga such as
sun salutations, bandha (core) strength, and flexibility.

Lecture: 0 hours – Lab: 2 hours

SES 105 Introduction to Resistance Training (A, W, SP) 1 credit
SES 105 is an introduction to weight room use for the individual exerciser, including various types of resistance exercise devices, proper techniques and programs, and weight room safety. An introduction to basic anatomical and exercise concepts and their application in the use of resistance exercise modalities as a part of a total conditioning and exercise program is covered.
Lab: 2 hours Lab fee: $10.00

SES 106 Beginning Golf (A, SP, SU) 1 credit
This course provides an introduction to playing the game of golf. Laboratory experiences to include introduction to the golf swing, club selection, driving range experience, and game/course experience.
Lecture: 0 hours – Lab: 2 hours Lab fee: $100.00

SES 108 Women’s Self Defense (A, W) 1 credit
SES 108 instructs students in the ideas of self-defense with special emphasis on the self-defense needs of women. Course will include self-defense techniques at the beginning level.
Lab: 2 hours
Prerequisite: None

SES 109 Beginning Bowling (A, W, SP, SU) 1 credit
Course provides students with a thorough understanding of the scoring, techniques, skills, and fundamentals of bowling so that they can both participate and instruct others. This class allows students to participate in an individual sport and experience success in an independent environment.
Lab: 2 hours Lab fee: $50.00

SES 113 Aquatics Management (SP) 2 credits
Course offers a survey of the recreational aquatics environment. Students receive hands-on training in filtration systems and their operation, along with an understanding of federal and state guidelines for licensure for pool operation and maintenance. Legal aspects of the aquatic area are covered, as are staffing requirements and training of aquatics personnel for indoor/outdoor facilities. Students also will complete the American Red Cross Lifeguarding Certification as a part of this course.
Lecture: 1 hour – Lab: 2 hours Lab fee: $15.00

SES 114 Aerobic and Group Fitness (A) 2 credits
This course offers an introduction into the methods of teaching participation in a fitness program, including a thorough understanding of the techniques involved in various aerobic and fitness activities. Students will be able to demonstrate the basic techniques of a fitness program including safety, motivation, goal setting, and variations of aerobic and group fitness. Also covered are the history and value of dance for the client, basic dance movements, and interpretation of music and language for dance and aerobic conditioning.
Lecture: 1 hour – Lab: 2 hours Lab fee: $10.00

SES 115 Intermediate Resistance Training (SP) 2 credits
This course presents an analysis of the resistance training field to include types of resistance equipment used, resistance-training methods for the client, proper lifting and spotting techniques for the various equipment, and assessment of clients. Also covered is goal setting for clients based on assessment findings and the use of periodization techniques in planning resistance training activities. Risk management aspects of the weight area and proper care and maintenance of equipment is explained.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: SES 105 or permission of instructor Lab fee: $20.00

SES 116 Golf Management (A) 2 credits
SES 116 offers an in-depth analysis of the game of golf. Subject matter includes the history of the game, the rules of play, and a look at the growth and increasing significance of the game, both inside and outside of the industry. Students will also learn about managing a golf facility, turf and environmental issues, employment options and teaching the game.
Lecture: 1 hour – Lab: 2 hours Lab fee: $100.00

SES 117 Introduction to Tae Kwon Do (SP) 2 credits
This course provides and introduction to coaching and participating in the activity, including a thorough understanding of the rules and sport strategy. Also covered are the history of the art form, self-defense strategies, and concepts of tournament sparring and tournament implementation.
Lecture: 1 hour – Lab: 2 hours

SES 190 SES Freshman Seminar (A, W, SP) 1 credit
This seminar offers a survey of the sport and exercise studies profession and academic discipline. Class prepares students for navigating the SES curriculum and applicable academic technologies and learning tools.
The course will introduce students to campus resources available for their research and writing assignments, update them on the technology skills required for graduation, familiarize them with industry trends, and introduce them to personal development skills that they can adapt for subsequent use. This course must be taken in either the first or second quarter of enrollment in the Sport and Exercise Studies program.
Lecture: 1 hour
Prerequisite: Admission to the SES program Lab fee: $10.00

SES 205 Activities Programming for the Elderly in Long-Term Care (On Demand) 9 credits
This course demonstrates how management of an activity department promotes the psychosocial, physical, emotional, creative and intellectual well being of residents. SES 205 provides students with a practical and theoretical framework from which to develop and manage a comprehensive program of activities within long-term care settings. This course uses the NAAP/NCCAP curriculum known as the mapcourse. Students are awarded a certificate of completion (accepted by the Ohio Department of Health) when the course is completed with a grade of “C” or higher. This certificate also qualifies the student to apply for National Certification.
Lecture: 9 hours Lab fee: $10.00

SES 213 Aquatic Programming for Individuals with Disabilities (On Demand) 3 credits
This course focuses on adaptive aquatic content which utilizes specialized instructional technology to maximize learning and participation of individuals with disabilities. The inclusive or community setting will be emphasized since acquisition of skills and water safety knowledge should occur in a normalized manner as possible. Practicum opportunities with diverse populations will highlight the learning experiences.
Lecture: 2 hours – Lab: 2 hours Lab fee: $20.00

SES 214 Advanced Dance Exercise (On Demand) 2 credits
This course offers students a thorough understanding of the skills and fundamental techniques of fitness instruction, allowing them to both participate in and teach group fitness activities. The value of dance as exercise and its variations for the client, the movements and techniques of dance exercise, and the principles and legalities that guide fitness instructors are presented.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: SES 114 Lab fee: $10.00

SES 215 Advanced Resistance Training (A) 3 credits
This class studies systems of physical conditioning and includes discussion of progressive resistance exercise through super sets, pyramiding, split routines, plyometrics and isokinetics. Students will learn about program development involving interval, continuous, and circuit training. Nontraditional training is explored, too, including partner resistance training. Other topics covered are the advantages and disadvantages of commercial exercise equipment in developing cardiorespiratory fitness and muscular strength. Musculoskeletal risk factor identification and programming for post-injury rehabilitative fitness will also be included.
Lecture: 2 hours – Lab: 2 hours

Prerequisite: SES 115 Lab fee: $20.00
SES 217 Advanced Tae Kwon Do (On Demand) 2 credits
This course features instruction in the teaching methods and practice of advanced Tae Kwon Do. Instruction will include a thorough understanding of the fundamentals, techniques, and skills of the sport. Course also includes marketing Tae Kwon Do, advanced self-defense strategies, weaponry, and concepts of Olympic competition events.
Lecture: 1 hour – Lab: 2 hours
Prerequisite: SES 117 or permission of the instructor

SES 222 Tennis (SP) 2 credits
This course instructs students in coaching and participation in tennis. Students receive a thorough understanding of the history, rules and strategy of the sport. They also learn coaching techniques for clients and tournament set up/implementation for the facility.
Lecture: 1 hour – Lab: 2 hours Lab fee: $20.00

SES 223 Racquetball (W) 2 credits
Course includes instruction in coaching and participation in the sport. Students gain a thorough understanding of the history, rules and strategy of the game. They also learn coaching techniques for clients and tournament set up/implementation for the facility.
Lecture: 1 hour – Lab: 2 hours Lab fee: $20.00

SES 224 Sport Management Foundations (W, SU, DL) 5 credits
This course presents an advanced study of the facilities required for the recreational environment, including an analysis of indoor and outdoor designs and utilization. It also presents an overview of the personnel process, staffing requirements, and staff development procedures. SES 224 also offers a study of activity programming for the club environment, to include class structure, tournament procedures, proper selection of activities, and equipment needed as well as its proper care and storage.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: SES 101 Lab fee: $10.00

SES 225 Athlete Intervention (SP, DL) 3 credits
This course is designed to train sport managers to help athletes avoid or deal with the challenges of alcohol, drugs, and illegal drug use. The program allows sport managers to develop rules and expectations about drug and alcohol use, communication with parents and guardians, and behavior monitoring skills. Lessons on development of policies related to athlete usage and consequence and/or infraction guidelines.
Lecture: 3 hour – Lab: 0 hours Lab fee: $5.00

SES 226 Care and Prevention of Athletic Injuries (W, SU) 3 credits
This course covers the recognition, treatment, management, and prevention of basic injuries sustained by individuals while participating in athletic activities. It includes basic taping and treatment procedures introduced and applied in the athletic environment.
Lecture: 2 hours – Lab: 2 hours
Prerequisite: SES 100 or permission of instructor Lab fee: $10.00

SES 230 Fitness Concepts for Special Populations (A, SP, DL) 3 credits
Course offers a survey of the response of children, seniors, and physically challenged persons to exercise. Emphasis is placed upon choosing appropriate and challenging activities that will result in a positive physiological response while accommodating the social, developmental and physical needs of potential clients.
Lecture: 3 hour – Lab: 0 hours Lab fee: $3.00

SES 231 Exercise Physiology (A, SU, DL) 3 credits
SES 231 offers instruction in the testing processes used for individual evaluation, to include proper techniques used for body fat, analysis, aerobic and anaerobic capabilities, muscle mass, flexibility, and program development for the athlete.
Lecture: 3 hours
Prerequisite: BIO 121 or 261 with a “C” or better Lab fee: $15.00

SES 233 Outdoor Community Recreation (A) 3 credits
This course offers a survey of the outdoor recreational market and its application through corporate America. SES 233 presents a review of outdoor recreational opportunities, basic activities, skills, and necessary equipment. Course also covers present safety, liability, and associated programming issues, and examines the business, career, and recreational applications of this specialized market.
Lecture: 2 hours – Lab: 2 hours Lab fee: $50.00

SES 234 Sport Marketing (A, SP, DL) 5 credits
SES 234 is an advanced study of internal and external sports marketing strategies for the club. Class presents promotional guidelines and a discussion of the many concepts involved in promoting an activity. Also studied is the budgetary process, differentiation of budget styles, and implementation of the budgetary process in both the private and public sector.
Lecture: 5 hours – Lab: 0 hours
Prerequisite: SES 101 and 224 Lab fee: $3.00

SES 235 Sport Law (A, W, SP, SU, DL) 3 credits
This course presents a survey of the legal framework of the athletic environment. It includes study of the nature of the legal system and the law pertaining to sports, tort law, contractual agreements, and civil law.
Lecture: 3 hours – Lab: 0 hours Lab fee: $2.00

SES 236 Exercise Physiology Laboratory (A, SU) 2 credits
This course is a corequisite with SES 231. Emphasis will be placed upon psychomotor skill and decision-making improvement in assessing fitness components in the apparently healthy. Skills will include assessment techniques of vital signs, muscular flexibility, muscular strength and endurance, body composition, anaerobic capacity, and cardiorespiratory fitness.
Lab: 4 hours
Corequisite: SES 231 Lab fee: $15.00

SES 237 Corporate Health (SP, DL) 3 credits
This course presents an assessment and analysis of current health and wellness issues related to the work environment. Course work will emphasize the major wellness components of fitness, nutrition, safety, and behavior modification and how these components can be introduced into the worksite. This course will also focus on the financial and administrative issues associated with worksite health promotion.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: SES 101 or permission of instructor Lab fee: $3.00

SES 238 Aging Fitness and Exercise (SU, DL) 3 credits
Physical activity can significantly improve the quality of one’s life at all ages, although the type and intensity of activity may change. This course will present the essential information needed to provide older adults with safe and effective fitness programming. The physiology of aging, the techniques and tools for motivating older adults, personal fitness, pre-exercise screening, and fitness assessment are presented.
Lecture: 2 hours – Lab: 2 hours Lab fee: $10.00

SES 239 Quantitative Methods in Exercise Science (AU, SU) 3 credits
This course focuses on methods of quantifying metabolic demand, identifying risk factors, determining appropriate assessment protocol, and developing proper fitness programs for clients who are apparently healthy, at increased risk, or with known disease. Course work will emphasize calculating and estimating metabolic demand of exercise, normal physiological response to exercise, and the abnormal physiological response to exercise. This course will also focus on the appropriate selection of fitness protocols for those clients who suffer from compromised health.
Lecture: 3 hours
Prerequisite: SES 231 and 236

SES 241 Kinesiology (W, DL) 5 credits
This course introduces the fundamentals of kinesiology and biomechanics with a discussion of both anatomical and mechanical principles. These
concepts will be applied in the analysis of a wide variety of basic motor skills, exercise and sport activities.

Lecture: 3 hours – Lab: 4 hours
Prerequisites: BIO 121 or 261 with grade of “C” or higher and SES 231 and 236 or permission of instructor Lab fee: $15.00

SES 242 Exercise Prescription (W, SU) 3 credits
This course provides the art and science of using fitness-related data to make informed individual exercise prescriptions. Emphasis will be placed on the use of objective measures of fitness assessments to drive goal and time dependent decision-making. Measures include using prescriptive principles on behavior modification to support exercise adherence, risk stratification, fitness-related technology, cardiorespiratory activities, musculoskeletal flexibility, and muscular strength and endurance.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: SES 231 and 236

SES 280 History of Sport in the United States: 1840–Present (SP, DL) 3 credits
This course is an in-depth analysis of the history of sport, athletics, and recreation in the United States of America. Lecture and related activities will explore the role of sport in the lives of Americans since 1840 and assess the economic, political, social, and psychological impact sport has played as part of the larger historical framework of the nation.

Lecture: 3 hours – Lab: 0 hours Lab fee: $3.00

SES 292 Practicum I (A, SP) 3 credits
This course presents an opportunity for practical training in the sport profession to include activity preparation, personnel evaluation, and budget analysis. This course also includes an on-campus seminar which will discuss issues relating to the profession. Summative assessment will include a combination of objective tests, performance checklists, and evaluation by the on-site supervisor.

Lecture: 1 hour – Lab: 14 hours
Prerequisite: Permission of instructor Lab fee: $3.00

SES 294 Practicum II (W, SU) 3 credits
This course is a continuation of SES 292. Students will work in conjunction with a current sport manager to gain insight on budgetary implementation, program and facility operation and to assist in the daily operation of a fitness facility. This course also includes an on-campus seminar to discuss issues relating to the profession. Summative assessment will include a combination of objective tests, performance checklists, and evaluations by the on-site supervisor.

Lecture: 1 hour – Lab: 14 hours
Prerequisite: SES 292 Lab fee: $3.00

SES 298 Special Topics in Sport (On Demand, DL) 3 credits
This course brings together concepts discussed in previous program courses. Topics revolve around exercise prescription for special populations, some disease states, or social aspects of sport such as homophobia in sport. Also explored will be the development and modification of institutional programming based on individual and group needs as well as resources, content and delivery of health promotion programs.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: SES 292 Lab fee: $3.00

SES 299A Active Living I (A, W, SP, SU, DL) 1 credit
Active Living Every Day is the first course of a two-quarter sequence that focuses on helping sedentary people become and stay physically active for a lifetime. This evidence-based course uses established behavior change models, such as the stages of readiness to change, to empower people to overcome barriers to physical activity. Participants find ways to fit physical activity into their daily lives and maintain active lifestyles even when difficult life situations arise.

Lecture/Discussion: 1 hour – Lab: 0 hours
Prerequisite: Permission of instructor

SES 299B Active Living II (A, W, SP, SU, DL) 1 credit
This course continues Active Living I.

Lecture/Discussion: 1 hour – Lab: 0 hours
Prerequisite: Permission of instructor

SES 299C Healthy Eating I (A, W, SP, SU, DL) 1 credit
Healthy Eating Every Day is the first course of a two-quarter sequence that helps people establish a balanced and healthy approach to eating. This course presents a sensible, realistic way of eating that is in line with, and complements, the new USDA Nutrition Guidelines. Healthy Eating Every Day uses an evidence-based, cognitive behavioral approach to help people change their diets. Participants learn to identify the reasons for their poor eating choices and to acquire the lifestyle-management skills they need to improve eating habits permanently.

Lecture/Discussion: 1 hour – Lab: 0 hours
Prerequisite: Permission of instructor

SES 299D Healthy Eating II (A, W, SP, SU, DL) 1 credit
This course continues Healthy Eating I.

Lecture/Discussion: 1 hour – Lab: 0 hours
Prerequisite: Permission of instructor

Supply Chain Management (LOGI)

LOGI 100 Principles of Logistics (A, W, SP, SU, DL) 5 credits
This course is a study of the basic concepts in the field of supply chain management with particular emphasis on the economic significance of distribution to business and the U.S. economy. The interrelationship between logistics and other areas of business will be covered noting how logistics can significantly impact customer loyalty by adding value. Knowledge of basic algebraic concepts is strongly recommended.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: None Lab fee: $5.00

LOGI 110 Transportation and Traffic Management (W, DL) 4 credits
Course provides an introduction to traffic management functions including mode and carrier selection.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: LOGI 100 Lab fee: $5.00

LOGI 151 Information Technology in Logistics (On Demand) 4 credits
This course introduces students to the IT Systems Operations and Applications of supply chain management. The purpose is to provide greater understanding of Information Systems and Information Technology (IS/IT) and its contribution to the business enterprise and the importance of IS/IT in embracing the complex and time saving processes in supporting the logistics operational processes.

Lecture: 4 hours Lab fee: $5.00

LOGI 151 Foundations of Strategic Procurement I (A, SP, DL) 3 credits
This course is designed to teach the basics of purchasing management to the newly appointed buyer or to nonpurchasing personnel looking to broaden their business knowledge. Topics covered include the challenge of purchasing and materials management, objectives and organization, function, specification, quality control and inspection, computerization, and quality considerations.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: None Lab fee: $5.00
This course is a continuation of Strategic Procurement I and focuses on how the basics of good buying can be used effectively to meet the challenges and responsibilities of the constantly changing business climate. Topics include forward buying, international purchasing, buying capital assets and purchasing transportation services.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: LOGI 151 Lab fee: $5.00

LOGI 205 Freight Claims (W, DL) 3 credits
This course provides a study of freight loss, damage claims, and adjustment of claims in various modes of transportation including carrier and shipper liability, transportation documentation, and claim filing procedures.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: LOGI 100 Lab fee: $5.00

LOGI 210 Warehouse Management (A, SP, DL) 4 credits
This course is an analysis of warehouse functions and management. Topics covered include facility location and operation, labor relations, financial analysis and productivity improvement and measurement.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: LOGI 100 Lab fee: $5.00

LOGI 211 Inventory Management (W) 4 credits
This course offers a study of inventory control problems and methods. Topics covered include demand forecasting, independent demand inventory systems, inventory models and aggregate planning.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: LOGI 151 and LOGI 210, or permission of instructor Lab fee: $5.00

LOGI 219 International Business (A, SP, DL) 3 credits
This course focuses on the economic, social and cultural considerations in doing business overseas. The globalization of markets and the growth of overseas business ventures are explored. The need to develop varied techniques for managing people from other cultural backgrounds, the means of minimizing risks in financial transactions, and development of systems for coordinating and controlling operations is stressed. Techniques to overcome international business barriers are examined.

Lecture: 3 hours - Lab: 0 hours
Prerequisite: None Lab fee: $5.00

LOGI 225 International Shipping (SP, DL) 4 credits
This course is a study of global supply chain management with emphasis on the requirements for importing and exporting. Laws, regulations, paperwork and international billing terms will be discussed.

Lecture: 4 hours – Lab: 0 hours
Prerequisite: LOGI 100 Lab fee: $5.00

LOGI 226 Introduction to Export Administration Regulations (A, DL) 4 credits
LOGI 226 offers a detailed examination of the Export Administration Regulations (EAR) covering the information exporters need to know to understand and comply with U.S. export control requirements on commercial goods. The course focuses on what items and activities are subject to the EAR; steps to take to determine the export licensing for an item; how to determine an export control classification number (ECCN); when an item can be exported or re-exported without applying for a license; export clearance procedures; recordkeeping requirements; Export Management System (EMS) concepts; and “real life” examples in applying this information.

Lecture: 2 hours – Lab: 4 hours
Prerequisites: LOGI 100 Lab fee: $5.00

LOGI 227 Electronic Import/Export Documentation (W, DL) 2 credits
This course provides students with the tools to electronically prepare export/import documentation, manage e-business and marketing functions related to global commerce, and evaluate and control e-commerce systems. Acceptance of electronic export/import documentation by nongovernment organizations (e.g., banks, forwards, carriers, etc.) continues to increase and is rapidly replacing paper-based systems. Additionally, regulatory agencies’ requirements for electronic document submission have significantly increased post 9/11; course content subject to change in response to new or changing user requirements.

Lecture: 1 hour – Lab: 2 hours
Prerequisites: LOGI 225 Lab fee: $47.00

LOGI 228 Importing (W, DL) 4 credits
This course is an introduction to procedural compliance with import regulations of U.S. Customs and Border Protection (CBP) emphasizing the Trade Act of 2002, Advanced Electronic Information, published in the Federal Register on December 5, 2003. Additional topics discussed include antidumping and countervailing duties, informed compliance, commercial enforcement, the regulatory audit program, quotas, and customs broker management. Note that procedures and regulations are in a current state of flux and course content may be revised in response to changes.

Lecture: 4 hours – Lab: 0 hours
Prerequisites: LOGI 225 Lab fee: $5.00

LOGI 229 International Transportation Regulatory Compliance (W, DL) 4 credits
This course is an examination of the laws that apply to domestic motor carrier and rail and international air, ocean, and multi-modal transportation. Covers the evolution of various transportation laws, e.g., the Carriage of Goods by Sea Act (COGSA); the Warsaw Convention; the Montreal Protocol; the International Multi-modal Convention; cabotage law, freight claims, and cross-border trucking under the North American Free Trade Agreement (NAFTA); course content subject to vary as laws are revised and created.

Lecture: 4 hours – Lab: 0 hours
Prerequisites: LOGI 100 Lab fee: $5.00

LOGI 230 International Management (A, SP) 4 credits
This course focuses on the concepts and skills needed to achieve organizational goals and strategic initiatives in a multicultural environment as affected by political, legal, economic and technological issues. Strategic use of cultural and language diversity is stressed as a competitive advantage in achieving global organizational goals. The student will be introduced to a global business vocabulary to aid them in doing business overseas. Concepts are applied not only to those who go to another country to manage local citizens but also to those in this country who manage people from other countries. Emphasis is placed on the changing nature of the international management challenge and on developing and managing various types of strategic alliances and human resources, as well as on conflict resolution and negotiation techniques.

Lecture: 3 hours – Lab: 2 hours
Prerequisite: BMGT 111 or LOGI 219 Lab fee: $5.00

LOGI 241 Supply Chain Logistics Practicum I (A, W, SP, DL) 4 credits
This course presents an opportunity for supervised, on-the-job application of knowledge and skills acquired in the classroom. Open to Supply Chain Management Technology students only. Internship applications must be filed with the department at least 2 months prior to the internship start date.

Lecture: 0 hours – Lab: 28 hours
Prerequisite: Advisor approval required Corequisite: LOGI 242 Lab fee: $5.00
LOGI 242 Logistics Seminar (A, W, SP, DL) 1 credit
This seminar course focuses on the application of logistics knowledge to specific areas of on-the-job experience. Open to Supply Chain Management Technology students only. Internship applications must be filed with the department at least 2 months prior to the internship start date.
Seminar: 1 hour
Prerequisite: Advisor approval required
Corequisite: LOGI 241 Lab fee: $5.00

LOGI 245 Transportation Rates and Pricing (W, DL) 2 credits
This course presents a study of transportation rates and pricing, including carrier cost structures and industry economics. Emphasis will be on negotiation of favorable rates from carriers and proper preparation for same.
Lecture: 2 hours
Prerequisites: LOG 100 Lab Fees: $5.00

LOGI 246 Procurement Negotiation (SP, DL) 3 credits
This course focuses on the skills required to prepare for and conduct purchasing negotiations.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LOGI 151 or permission of instructor Lab fee: $5.00

LOGI 250 Transportation of Hazardous Materials (SP, DL) 3 credits
LOGI 250 studies the transportation of hazardous materials within the U.S. and the regulations and compliance issues resulting from these regulations. The course delves into the usage of the Code of Federal Regulations Part 49 100-185, the manual used to regulate all materials deemed hazardous. Segregation of the 9 classes of HAZMAT, limitations of each shipment, and use of the manual are explored in this course. The student will develop a better understanding of HAZMAT and the rules and regulations concerning shipment of these types of materials.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LOGI 100 Lab fee: $5.00

LOGI 256 Advanced Procurement Seminar (SP, DL) 3 credits
This is a capstone course designed for the purchasing major. A comprehensive case study approach will be used to understand purchasing with other materials management activities. Topics covered include legal considerations, public purchasing, the planning process, and control functions such as inventory control, budgeting, and production.
Lecture: 3 hours – Lab: 0 hours
Prerequisite: LOGI 152 Lab fee: $5.00

LOGI 260 Performance Management for Logistics Managers (SP) 4 credits
This is a capstone course designed around the performance/communication process as it relates to recognizing, understanding, planning, implementing and evaluating performance competencies. Students will study the performance challenges in the logistics arena, how to approach them proactively, and resolve them. Other topics included: creating positive relationships and ensuring effective workplace communication.
Lecture: 4 hours – Lab: 0 hours
Prerequisite: LOGI 100, LOGI 151, LOGI 211, ACCT 106 Lab fee: $5.00

LOGI 279 Special Topics in Logistics (On Demand) 1–3 credits
LOGI 279 gives students an opportunity to examine, in detail, special topics of interest in supply chain management (logistics). Topics vary.
Lecture: 1 hour – Lab: 3 hours Lab fee: $5.00

Surgical Technology (SURG)

SURG 102 Surgical Technology I (A) 7 credits
This course will provide an in-depth introduction to the role and responsibilities of the surgical technologist as an important professional in the delivery of surgical services. Introduction to the surgical environment will include professional responsibilities, legal and ethical considerations, interpersonal relationships, communication skills, and basic surgical workplace safety. Introduction to the principles of aseptic technique to include surgical asepsis, scrubbing, gowning, gloving, sterilization, disinfection, and operating room sanitation are explored.
Direct patient care interventions to include positioning, prepping, draping techniques, and related operative procedures. Introduction to diagnostic procedures and anesthesia and pharmacological considerations for patient surgical care are investigated. The surgical use of instrumentation, sutures, needles, sponges, syringes, and hypodermic needles are investigated. Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based surgery units.
Lecture: 3 hours – Lab: 12 hours
Prerequisite: Completion of all admission criteria for the Surgical Technology program. Lab fee: $50.00

SURG 104 Surgical Technology II (W) 7 credits
Principles of asepsis and the patient care concepts of positioning, prepping, draping, and procedural techniques are directly applied to the investigation of General (GEN), Gastrointestinal (GI), Obstetrics (OB), Gynecological (GYN), and Genitourinary (GU) surgical services. The role and responsibilities of the surgical technologist as the “scrub” member and the “circulator” member of the surgical team will focus on maintaining the integrity, safety, and efficiency of the sterile and nonsterile areas throughout various surgical procedures. Investigation of instrumentation, sutures, needles, dressings, packings, drainage tubes/systems, and auto-stapling devices will continue along with a focus on endoscopy use in GEN, GI, OB, GYN, and GU surgical services.
Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based surgery units.
Lecture: 3 hours – Lab: 12 hours
Prerequisite: SURG 102 Lab fee: $50.00

SURG 202 Surgical Technology III (SP) 9 credits
The principles of asepsis and the patient care concepts of positioning, prepping, draping, and procedural techniques are directly applied to the investigation of Orthopedic (Ortho) and Neurosurgery (Neuro) surgical services. The role of the surgical technologist as the “scrub” member and the “circulator” member of the surgical team continues to focus on maintaining the integrity, safety, and efficiency of the sterile and nonsterile areas throughout various surgical procedures. Investigation of instrumentation, sutures, needles, dressings, packings, and drainage tubes/systems will continue with a focus on selected internal and external fracture stabilization devices, cast immobilization, spinal fixation implants, and neurosurgical shunts. Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based surgery units.
Lecture: 4 hours – Lab: 15 hours
Prerequisite: SURG 104 Lab fee: $50.00

SURG 204 Surgical Technology IV (SU) 9 credits
The principles of asepsis and the patient care concepts of positioning, prepping, draping, and procedural techniques are directly applied to the investigation of Plastic and Reconstructive, Otorhinolaryngology and...
Throat (ENT), Ophthalmic (OP), Thoracic, Peripheral Vascular (PV), and Cardiovascular (CV) surgical services. The role of the surgical technologist as the “scrub” member and as the “circulator” member of the surgical team continues to be explored throughout various surgical procedures. Investigation of instrumentation, sutures, needles, dressings, packings, and drainage tubes/systems will continue with a focus on ocular implants, microscopic use, skin grafting techniques, liposuction use, mammoplasty implants, inner ear shunts, and tracheotomy tubes, endoscopy use, chest tubes, cardiopulmonary bypass, vascular autografts and allografts, intra aortic balloon pumps, and vascular shunts. Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based and ambulatory surgery centers. Lecture: 4 hours – Lab: 15 hours
Prerequisite: SURG 202 Lab fee: $50.00

SURG 250 Surgical Technology V (A) 7 credits
This course will provide the Surgical Technology student with an in-depth analysis, recognition, and medical/surgical treatment for a variety of advanced surgical specialty areas. These areas include Orthopedic Total Joint Replacement, Laser Therapy, Endoscopy, Ophthalmic, Oncology, Obstetrics, Pediatrics, Cardiovascular, Ambulatory Surgery, and Organ Procurement. Additional surgical specialty areas of interest will be investigated and offered to students, alumni, and surgical health care professionals as they become available. Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based and ambulatory surgery units. Lecture: 3 hours – Lab: 12 hours
Prerequisite: Completion of the certificate tract Surgical Technology program or equivalent training Lab fee: $50.00

SURG 251 Surgical Technology VI (W) 7 credits
This course will provide the Surgical Technology student with an in-depth analysis, recognition, and medical/surgical treatment for a variety of advanced surgical specialty areas. These areas include Orthopedic Total Joint Replacement, Laser Therapy, Endoscopy, Ophthalmic, Oncology, Obstetrics, Pediatrics, Cardiovascular, Ambulatory Surgery, and Organ Procurement. Additional surgical specialty areas of interest will be investigated and offered to students, alumni, and surgical health care professionals as they become available. Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based and ambulatory surgery units. Lecture: 3 hours – Lab: 12 hours
Prerequisite: Completion of the certificate tract Surgical Technology program or equivalent training Lab fee: $50.00

Surveying (SURV)
Also see Civil Engineering Technology (CIVL)

SURV 100 Introduction to Geomatics (A) 2 credits
This is an introductory course into the field of surveying and mapping technology. Integrated topics include drafting, surveying, cartography and geographic information systems. Lecture: 1 hour – Lab: 3 hours
Prerequisite: Placement into ENGL 101

SURV 140 Surveying and GPS (A, SP, On Demand) 4 credits
SURV 140 offers a comprehensive study in the acquisition of spatial data through the use of conventional surveying equipment and Global Positioning System (GPS). The course elements include measurement theory, precision and accuracy determinations, traditional and present day measurement systems, GPS theory, acquisition of spatial data through the use of total station and electronic data collectors, self-leveling and digital levels and hand-held code phase GPS receivers. Specific tasks include traversing for purpose of property boundary location, establishing horizontal and vertical control for aerial photography and topographic mapping. Data quality comparisons from all three sources (conventional and GPS) are performed. Data manipulation includes downloading data from the various means of acquisition into a common electronic format. Data generated in the course will be used in GIS 110 Scanning, Digitizing and CAD and GIS 203 Photogrammetry and Remote Sensing. Not open to students in Architecture, Civil Engineering Technology, Construction Management, or Landscape Design/Build programs. Lecture: 2 hours – Lab: 6 hours
Prerequisite: MATH 104 or MATH 112 Lab fee: $15.00

SURV 141 Basic Surveying (A, SP, SU) 4 credits
SURV 141 offers a comprehensive study in performing measurements for the collection of data and for construction layout. The course elements include application of the English and metric (SI) measurement systems in performing angular and distance measurements by traditional methods and by total station for the purpose of traversing and location of property corners, topographic mapping and construction staking. Elements of differential leveling are used for establishing the elevations of new bench marks, topographic mapping by grid method, and cut/fill calculations to finish floor elevations of proposed structures. Data manipulation includes tape measurements, precision and accuracy determination, traverse closures, level circuit reductions, radial building staking notes and boundary line determination by inverse coordinates. Lecture: 2 hours – Lab: 6 hours
Prerequisite: MATH 104 or MATH 112 Lab fee: $15.00

SURV 241 Route Surveying (A, SP, SU) 4 credits
This course will provide the Surgical Technology student with an in-depth analysis, recognition, and medical/surgical treatment for a variety of advanced surgical specialty areas. These areas include Orthopedic Total Joint Replacement, Laser Therapy, Endoscopy, Ophthalmic, Oncology, Obstetrics, Pediatrics, Cardiovascular, Ambulatory Surgery, and Organ Procurement. Additional surgical specialty areas of interest will be investigated and offered to students, alumni, and surgical health care professionals as they become available. Students will be exposed to lecture, discussion, seminar, and recitation educational experiences all in support of direct patient care laboratory, practicum, and clinical applications in a variety of hospital-based and ambulatory surgery units. Lecture: 3 hours – Lab: 12 hours
Prerequisite: Completion of the certificate tract Surgical Technology program or equivalent training Lab fee: $50.00

SURV 242 Computer Applications in Surveying (A) 3 credits
This course involves the integrated use of word processing, spreadsheet, database management, graphic and computer assisted drafting software to solve problems associated with the surveying industry and to produce formal engineering reports using Autodesk Land desktop. The course elements include data entry, data analysis, measurement theory, precision and accuracy determinations and data presentation. Lecture: 2 hours – Lab: 3 hours
Prerequisites: ARCH 112 and SURV 140 or SURV 141 Lab fee: $7.00

SURV 243 Heavy Construction Standards (SP) 4 credits
SURV 243 covers the elements of route location, construction materials, methods and procedures. Relation of design standards to topography and prospective traffic, earthwork measurement, physical design standards, and financing explored as well. Lecture: 3 hours – Lab: 2 hours
Prerequisites: SURV 241, CMGT 121, and CMGT 105 Lab fee: $15.00

SURV 245 Survey Law (W) 3 credits
SURV 245 presents a study of statute and common law as pertains to land surveying and real property rights and the methods to describe real property. Students enrolled in the distance version of this course will be required to come to campus for exams. Lecture: 2 hours – Lab: 3 hours
Prerequisite: SURV 141 Lab fee: $15.00
SURV 247 Townsite/Urban Development (SP)  3 credits
This course covers analysis of data and related inventory methods needed to logically plan development of all land use types. Students will be introduced to the forces and actions by public agencies and private interests that create the urban form. Course also reviews methods of resolving conflicts and understanding the applicable land use regulations or standards that govern area development.
Lecture: 1 hour – Lab: 5 hours
Prerequisite: ARCH 112 and SURV 241  Lab fee: $15.00

SURV 248 Advanced Surveying Systems (SP)  4 credits
SURV 248 covers planning and execution of control surveying, cadastral surveying, network adjustment and topographic surveying using total stations and data collections, satellite positioning (Global Positioning System) and photogrammetric (aerial mapping) systems.
Lecture: 2 hours – Lab: 6 hours
Prerequisites: ARCH 112 or ARCH 115, MATH 148, SURV 141, SURV 245 and SURV 249 or corequisite.  Lab fee: $15.00

SURV 249 Land Subdivision Systems (SP)  3 credits
This course covers advanced surveying, including section and subdivision lines and residential property lines. Major topics include reestablishment of property boundaries and legal considerations for boundary descriptions, including local municipal records searching. Lecture: 2 hours – Lab: 3 hours
Prerequisites: ARCH 112, SURV 241 and SURV 245  Lab fee: $15.00

SURV 299 Special Topics in Civil Engineering Technology (On Demand)  1–5 credits
Special topics in civil engineering technology industry designed to meet specific needs.
Lecture: 1 hour – Lab: 1-15 hours
Prerequisite: Permission of Instructor  Lab fee: $10.00

Technical Communication (TCO)

TCO 101 Careers in Technical Communication (A, SP)  2 credits
In this course, students are required to interview with Technical Communication professionals, research the field of Technical Communication, and deliver an oral presentation of the findings. Discussions of career goals, including the preparation of an initial resume and employment data file will also be required. The requirements of this course must be met within the first two quarters of entering the Technical Communication degree program.
Lecture: 1 hour – Lab: 3 hours  Lab fee: $20.00

TCO 102 Tools and Techniques for Technical Communicators (On Demand)  3 credits
This course will introduce students to the software tools and basic techniques required of entry-level technical communicators. Students will learn about the various hardware and software tools technical communicators use on a daily basis. Lectures on general principles will be followed by exercises selected to simulate employer expectations. Mastery of techniques needed to complete daily technical communication tasks will be emphasized.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 101, TCO 101 or corequisite enrollment  Lab fee: $5.00

TCO 203 Introduction to Technical Communication (W, SU)  3 credits
In this course, students learn the project documentation cycle used by technical communicators in business, industry and government by selecting an authentic problem-solving project from their technical cognate fields, and writing and formatting a series of reports in support of that project. Students learn the principles of modern technical communication and time/project management and practice them individually and in small groups throughout the documentation cycle.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: CIT 101and ENGL 102 (grade of “C” or higher)  Lab fee: $5.00

TCO 204 Introduction to Technical Editing (A, SP)  3 credits
In this course, students will practice editorial skills needed for revising scientific/technical writing by checking grammar, sentence structure, clarity, and style in personal, peer, and professional writings. Students will practice hard copy and online editing and proofreading and analyze editorial style books and other technical resource materials. Various editorial approaches and the editor/author relationship will be covered.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: ENGL 102 (grade of “C” or higher) and BOA 101  Lab fee: $5.00

TCO 221 Proposal Development (On Demand)  3 credits
Students will learn how to develop proposals which offer to solve problems for a reader or groups of readers by providing specified services at a specified cost. The units involved in the learning process will include understanding the bidding process, defining the request for a proposal, planning and developing a proposal document, and practicing the methods of formatting, writing, editing and presenting a formal business proposal.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 203  Lab fee: $5.00

TCO 222 Developing Software Documentation (On Demand)  3 credits
In this course, students are prepared as software documentation specialists to work with software users and developers. Students will prepare software documentation, conduct document usability testing, and perform documentation development tasks, such as preparing user specifications, task lists, style guides, project schedules, instruction sets, and problem reports, as well as conducting interviews, reviews, and walkthroughs.
Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 203  Lab fee: $5.00

TCO 223 Advanced Technical Communication (W, SU)  3 credits
In this course, students focus on current research and theory in scientific and technical writing and apply that research to practical situations. Students produce a proposal for funding, a full-length, portfolio-quality manual or report, and various other writing assignments. They also lead
class discussions on topics such as readability theory, writing style, documentation methods, text processing, manual formatting, and integrating graphics and text.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 203 Lab fee: $5.00

TCO 224 Advanced Technical Editing (A, SP) 3 credits
In this course, students are prepared as editors to work with other publication specialists. Students will edit manuscripts, prepare style books or manuals, and perform special editorial tasks such as preparing abstracts, indexes, and bibliographies with line-by-line precision and accuracy.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 203 and TCO 204 Lab fee: $5.00

TCO 230 Technical Presentations (SP) 3 credits
In this course, students learn to prepare and present various types of information ranging from press releases, annual reports, and statistical analyses to proposals for projects, systematic evaluations, and revisions of existing documents. Various types of audiences will be targeted, and students will be required to use computer graphics, hypermedia, desktop publishing, and multimedia approaches to supplement oral presentations.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 223 Lab fee: $5.00

TCO 235 Instructional Design (SU) 2 credits
Students will study the phases of an Instructional Design Project. They will conduct a needs assessment and define the skill and knowledge requirement of a job assignment. They will learn the typical training development cycle.

Lecture: 1 hour – Lab: 3 hours
Prerequisite: TCO 230 or current enrollment Lab fee: $5.00

TCO 236 Computer-Based Training (SU) 3 credits
Students will study instructional design as it applies to developing Computer-Based Training (CBT) modules. They will learn about the typical CBT development cycle and will design CBT screens, incorporating multimedia effects and maximum interactivity.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 235 Lab fee: $8.00

TCO 237 Digital Video Production for the Workplace (On Demand) 3 credits
TCO 237 is an introduction to basic and advanced techniques for creating and using digital video in the workplace. During the course, students will storyboard and write scripts, shoot and acquire clips, edit electronically, work collaboratively, and present video segments appropriate for a workplace environment. Students will critique examples and work on individual and group projects to produce a final product. This course is intended for Technical Communication students.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: TCO 235 Lab fee: $20.00

TCO 245 HTML-Based Online Documentation (W) 5 credits
This course introduces students to all aspects of creating HTML-based online documentation without the use of an HTML authoring tool. Students will learn about the various phases of creating HTML-based online documentation: planning, designing, organizing, developing, publishing, testing and redesigning.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: TCO 214 Lab fee: $5.00

TCO 250 Capstone in Technical Communication (A, W, SP, SU) 3 credits
In this course, students will be required to demonstrate both the overall competency and quality workmanship expected of professionals in the technical communication field. Students will work individually and in collaboration to solve problems of technical writing, editing, and presentations, and on the study and implementation of projects normally assigned to entry-level technical communicators. TCO 250 can be taken only during the final quarter prior to graduation.

Lecture: 2 hours – Lab: 3 hours
Prerequisite: Permission of instructor Lab fee: $5.00

TCO 260 Career Development (A, SP) 1 credit
In this course, students prepare a professional portfolio, including a resume developed from the student’s previous academic work experience. Students are required to review their portfolios informally and through formal presentations. Students will learn how to carry out company research and apply that research to targeted resumes, letters of application and interview situations. This course must be completed within the final four quarters of the student’s program.

Lecture: 1 hour – Lab: 0 hours
Prerequisite: Permission of instructor Lab fee: $5.00

TCO 290 Industry Internship (A, W, SP, SU) 1–4 credits
In this course, students are engaged in work specifically related to the technical communication field as employees in business or industry. Students are responsible for arranging the internship and must submit a written proposal to the Technical Communication Program Coordinator for approval no later than two quarters prior to becoming an intern. During the internship, the student must keep a written record of job responsibilities and projects. A formal written report must be accompanied by a written evaluation of the student’s performance by his/her supervisor. One credit hour is equal to one hundred (100) clock hours on the job. The four credits may be spread over more than one quarter.

Prerequisites: TCO 101, TCO 203, TCO 204, permission from the TCO Program Coordinator, and a GPA of “B” or higher in TCO courses
Lab fee: $5.00

TCO 297/298/299 Special Topics in Technical Communication (On Demand) 1–5 credits
Students explore special topics in technical communication designed to meet specific needs.

Lecture: 5 hours – Lab: 0 hours Lab fee: $5.00

Theater (THEA)

(Also see Communication and English)

Note: Courses taught at a distance (DL) may have a higher lab fee than traditionally taught courses.

THEA 100 Introduction to the Theater (A, W, SP, SU, DL) 5 Credits
The course is designed to help students bring critical thinking skills into their experience as theatergoers. Students will be introduced to the theater arts: acting, directing and design. Students will survey the history of Western theater, focusing on the art as a reflection of society’s changing social and cultural values. Plays representing several genres and historical periods will be read and discussed. Writing assignments include critical reviews of plays attended.

Lecture: 5 hours – Lab: 0 hours
Prerequisite: ENGL 101 or ENGL 111 Lab fee: $5.00; $15.00 for DL

THEA 180 Theater Practicum (A, W, SP, SU) 3 credits
Course offers supervised practical experience in two or more of the following areas: acting, lighting, set, sound, costuming, house management, stage managing or directing. Enrollment is limited to students who have been cast in a theater production on campus or who have been selected
to work on technical areas of the production. With the advanced approval of
the instructor, credit can be earned by working on off-campus theater
productions. Course is repeatable to nine credits.
Lecture: 0 hours – Lab: 9 hours
Prerequisites: THEA 100 or permission of instructor  Lab fee: $7.00

THEA 205 Technical Production Practicum (A, W, SP, SU)  3 credits
Course provides experience in technical production activities for a theater
production. Students fulfill their role as a crew member by exploring a play
script and participating in one or more technical areas: lighting design;
hanging, focusing, and light board operation; sound design decisions and
implementation; stage managing; costume design; building and pulling
costumes for production; basic stagecraft; prop management and publicity.
Technical Production Practicum entails an understanding of budget and
time constraints, time management, and an appreciation for theater as a
collaborative art. Course is repeatable to 9 credits.
License: 1 hour – Lab: 4 hours
Prerequisite: THEA 100 Lab fee: $5.00

THEA 210 Technical Production Fundamentals: Stage Lighting
(SP)  3 credits
Course presents an introduction to the basic principles and functions of
stage lighting. Students receive experience in creating a lighting design,
hanging and focusing lighting instruments and executing the design with a
computer control board. Stage Lighting also gives a brief overview of the
work of other members of the production staff with whom a lighting
designer collaborates.
License: 1 hour – Lab: 4 hours
Prerequisite: THEA 100 or permission of instructor  Lab fee: $3.00

THEA 215 Fundamentals of Script Analysis (W)  3 credits
This course offers an intensive study of the play script as a basis for
production. Students learn the basic principles and challenges of script
analysis; techniques for assessing a script from the diverse perspectives
of designers, directors and performers; various modes of interpretation,
including traditional and contemporary forms; and ways to effectively
communicate critical positions, both written and orally.
License: 3 hours – Lab: 0 hours
Prerequisite: THEA 100  Lab fee: $5.00

THEA 230 Introduction to Dramatic Literature (W, SU)  5 credits
Students will study selected masterpieces of Western drama and discuss
their social, political and cultural influences. Students will write critical
analyses of the dramatic works and of plays attended.
License: 5 hours – Lab: 0 hours
Prerequisite: ENGL 102 or ENGL 111 with a grade of “C” or better
Lab fee: $1.00

THEA 231 Literature for the Theater I (W)  3 credits
Course presents a survey of selected world drama from the classical Greek
period to the 17th century. The focus is on the plays as potential theater.
License: 3 hours – Lab: 0 hours
Prerequisites: ENGL 101 or 111, THEA 100  Lab fee: $3.00

THEA 232 Literature for the Theater II (SP)  3 credits
Course surveys selected Western drama from the 17th century through the
mid-19th century. The focus is on the plays as potential theater.
License: 3 hours – Lab: 0 hours
Prerequisites: ENGL 101 or 111, THEA 100  Lab fee: $3.00

THEA 233 Literature for the Theater III (SU)  3 credits
Course surveys selected Western drama from the mid-19th century to the
present. The focus is on the plays as potential theater.
License: 3 hours – Lab: 0 hours
Prerequisites: ENGL 101 or ENGL 111, THEA 100  Lab fee: $3.00

THEA 280 Fundamentals of Acting (A, W, SP, SU)  3 credits
Course introduces the basic principles of stage acting with a focus on
practical experience. Areas of emphasis include stage movement, vocal
delivery, body language, concentration techniques, and basic script
analysis and scoring.
License: 1 hour – Lab: 4 hours Lab fee: $3.00

THEA 283 Writing Plays (SP)  5 credits
This course introduces students to the art and craft of writing plays. Em-
phasis is on the student’s own work; however, students will also be required
to study the works and writing processes of established playwrights, male
and female, traditional and nontraditional, ancient and modern, and from
diverse cultures. Students will keep a writer’s journal, respond critically
to the works of other students, create and revise a short play (or an act
or acts of a longer work). By the end of the quarter, students will present
a public reading or performance of their work. Course is repeatable to
10 credits.
License: 5 hours – Lab: 0 hours
Prerequisites: ENGL 101, ENGL 111 (or equivalent), and permission of
instructor  Lab fee: $5.00

THEA 290 Capstone Experience in Theater (SU)  3 credits
Course fulfills the capstone requirement for Associate of Arts and Associ-
ate of Science degree students at Columbus State. Students will carry out
and present a major project in theater—in performance, technical theater
or research. Students will complete a personal portfolio covering their
studies in theater and related areas.
License: 0 hours – Lab: 6 hours
Prerequisite: 75 credits toward the Associate of Arts or Associate of Sci-
degree, including at least 12 credits in THEA beyond THEA 100
Lab fee: $5.00

THEA 297/298/299 Special Topics in Theater (On Demand)  1–5 credits
Special Topics in Theater is designed to meet specific needs.
License: 1 hour – Lab: Hours vary
Prerequisite: Varies

Veterinary Technology (VET)

VET 101 Animal Nutrition (A, DL)  3 credits
This course focuses on fundamental animal nutrition for domestic species,
including caloric and nutrient requirements, and feeding techniques. The
student will learn to educate clients on the nutritional needs of various
animal species and explain the necessity and purpose of veterinary pre-
scription diets in the management of diseases.
License: 3 hours – Lab: 0 hours
Prerequisite: Admission to the program
Corequisites: VET 102, VET 114  Lab fee: $15.00

VET 102 Laboratory Animal Medicine (A)  2 credits
VET 102 is an introduction to laboratory animal medicine and manage-
ment, including basic husbandry, common diseases, and treatment proto-
cols for various laboratory animal species and pocket pets. The student will
learn the scientific names and primary use of common laboratory animals
and will practice restraint, sexing, appropriate methods of venipuncture,
administration of medications, and anesthetic techniques.
License: 1 hour – Lab: 2 hours
Prerequisite: Admission to the program
Corequisites: VET 101, VET 114  Lab Fee: $45.05

VET 114 Client Relations (A)  2 credits
This course will familiarize the student with common business procedures
used in veterinary practices, including fundamental record-keeping and
medicolegal requirements. The role of the veterinary technician as a
member of the veterinary health care team and client educator is addressed.
Veterinary practice management, methods for improved client communication, and dealing with difficult clients are explored. The student will learn basic animal training methods and how to assist clients with the resolution of common animal behavior problems.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: Admission to program
Corequisite: VET 102    Lab fee: $15.00

VET 122 Veterinary Parasitology (W, DL)  3 credits
An introduction to the common internal and external parasites of domestic animals, including scientific nomenclature, life cycles, common methods of identification, and the treatment and/or prevention of these parasites.

Lecture: 2 hours – Lab: 2 hours
Prerequisite: VET 102    Lab fee: $72.20

VET 124 Principles of Veterinary Radiology (W, SP)  2 credits
In this course, students learn the basic principles of x-ray production, radiographic positioning, x-ray machine operation, radiographic technique, and film processing. Radiation safety and proper use of protective equipment is emphasized. Special radiographic procedures and technique evaluation are thoroughly explored.

Lecture: 2 hours – Lab: 0 hours
Prerequisite: BIO 261

VET 126 Principles of Veterinary Anesthesia (W)  4 credits
An introduction to veterinary anesthesia that correlates principles of animal physiology as it pertains to anesthetic agents. Students will learn patient preanesthetic evaluation, properties and uses of preanesthetic and general anesthetic agents, pain recognition and management, principles of fluid therapy, and dosage calculations. Patient monitoring, safe anesthetic equipment utilization, and handling anesthetic emergencies will also be emphasized.

Lecture: 3 hours – Lab: 2 hours
Corequisite: BIO 262    Lab fee: $50.60

VET 131 Veterinary Anatomy and Physiology (SP)  3 credits
This course will provide a clinically relevant systems approach to the comparative anatomy and physiology of the canine, bovine, equine and feline species, including the circulatory, respiratory, digestive, muscular, skeletal, nervous, endocrine, exocrine, and urogenital systems. A brief presentation of avian anatomy and physiology is included.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: BIO 261, BIO 262    Lab fee: $8.00

VET 133 Clinical Application I (SP, SU)  3 credits
This course involves laboratory exercises for VET 138, VET 124 and VET 126. In VET 133, students learn how to perform fundamental techniques commonly used in small animal veterinary practices, including physical examination, surgical preparation, anesthesia, radiology, venipuncture, dental prophylaxis, bandaging and splint application, administration of medical treatments, and record-keeping.

Lecture: 0 hours – Lab: 6 hours
Prerequisites: VET 124 and MATH 100
Corequisite: VET 138    Lab fee: $242.25

VET 135 Veterinary Hematology (SP, SU, DL)  5 credits
This course is designed to acquaint students with the equipment and techniques required to utilize blood as a diagnostic tool. Students will perform complete blood counts on a variety of domestic animal species. Blood smears are prepared and studied for the identification of blood cells that aid in the diagnosis of anemias and various other disease states. Recognition of normal versus abnormal cell morphology will be stressed. Students who successfully complete this course should be able to perform complete blood counts in a veterinary clinical setting.

Lecture: 2 hours – Lab: 6 hours
Prerequisite: BIO 262    Lab fee: $90.00

VET 136 Animal Health and Disease I (SP, SU)  3 credits
Using a systems approach, the student will learn the more frequently encountered diseases of dogs and cats, including the disease name, etiology and pathogenesis, history and clinical signs, diagnosis and treatment, prevention, and zoonotic potential. Vaccination protocols commonly used in small animal veterinary practices will be covered.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: VET 102, VET 114 and BIO 262    Lab fee: $15.00

VET 138 Veterinary Surgical Techniques (SP, SU)  3 credits
In this course, students learn the fundamentals of routine veterinary surgical procedures, including patient preparation, identification of instruments, preparation of surgical packs, methods of sterilization, suture materials, and suture patterns. Pre-anesthetic laboratory testing, postoperative patient care, and client follow-up instructions are discussed.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: VET 102 and BIO 261    Lab fee: $10.00

VET 245 Clinical Seminar I (A, SU, DL)  2 credits
This course focuses on issues related to the students’ clinical experiences, including pet loss, client grief, euthanasia, problem solving models and change strategies. Companion animals as family members and the importance of the human-companion animal bond are explored.

Lecture: 2 hours – Lab: 0 hours
Prerequisites: All 100 level VET courses
Corequisite: VET 291

VET 262 Veterinary Pharmacology (A, W)  3 credits
This course will provide an overview of veterinary pharmacology and therapeutics, including a basic understanding of pharmacokinetics, terminology, prescription writing, drug classifications, indications for drug use, and methods of administration. Pharmacy management, controlled substance use and regulations, and ethical behavior when handling pharmaceutical agents will be stressed.

Lecture: 3 hours – Lab: 0 hours
Prerequisites: MATH 100 and VET 136    Lab fee: $20.00

VET 263 Clinical Application II (A, W, SU)  3 credits
This is a capstone course designed for students to perform technical skills commonly used in small animal veterinary practices, including medical record maintenance, physical examination, administration of fluids and medications, pre-anesthetic evaluation, general anesthetic administration and recovery, surgical preparation, splint application, dental prophylaxis, radiographic procedures, phlebotomy and laboratory techniques.

Lecture: 0 hours – Lab: 6 hours
Prerequisites: All 100 level VET courses    Lab fee: $248.50

VET 266 Animal Health and Disease II (A, W, SP, SU, DL)  3 credits
This course familiarizes the student with the most common diseases of horses, food animals, and camelid species. Husbandry, vaccination protocols, nutrition, breeding, and management for preventive health care are also covered.

Lecture: 3 hours – Lab: 0 hours
Prerequisite: VET 136    Lab fee: $10.00

VET 267 Veterinary Urinalysis and Clinical Chemistry (A, W, DL)  4 credits
This course serves as an introduction to the physical, chemical, and microscopic evaluation of urine and blood serum. Students will perform routine veterinary urinalysis and clinical chemistry procedures on a variety of animal species, and determine normal versus abnormal constituents. Students will become familiar with the general indications for performing various blood chemistries and understand the significance of elevated values in pathological specimens.

Lecture: 2 hours – Lab: 4 hours
Prerequisite: VET 135    Lab fee: $90.00
VET 269 Veterinary Microbiology (A, W, DL)  4 credits
This course is a practical introduction to the laboratory identification of microbial agents associated with diseases in various animal species. Students perform techniques necessary to isolate, identify, and evaluate the presence of clinically significant microorganisms.
Lecture: 2 hours – Lab: 4 hours
Prerequisites: VET 135 and VET 136  Lab fee: $177.43

VET 274 Clinical Seminar II (W, SP, DL)  2 credits
A continuation of VET 254, that addresses issues emanating from the students’ clinical experiences. Students are prepared for employment as veterinary technicians through simulated job interviews, resume preparation, and discussion of employment strategies. The role of the veterinary technician in the community is explored. Applications for registration with the Ohio Veterinary Medical Licensing Board are distributed and the Ohio Veterinary Practice Act pertaining to veterinary technicians is discussed.
Lecture: 2 hours – Lab: 0 hours
Prerequisites: VET 291
Corequisite: VET 293

VET 275 Seminar A (A)  1 credit
This course focuses on issues related to the students’ clinical experiences, including pet loss, client grief, euthanasia, and client assistance during pet loss. Companion animals as family members and the importance of the human-companion animal bond are explored. Special topics in veterinary medicine are discussed.
Lecture: 1 hour – Lab: 0 hours
Prerequisites: VET 133; evening program registration
Corequisite: VET 294

VET 276 Seminar B (W)  1 credit
This course is a continuation of VET 275.
Lecture: 1 hour – Lab: 0 hours
Prerequisites: VET 275; evening program registration
Corequisite: VET 295

VET 277 Seminar C (SP)  1 credit
This course addresses issues emanating from the students’ clinical experiences. Students are prepared for employment as veterinary technicians through simulated job interviews, resume preparation and discussion of employment strategies. The role of the veterinary technician in the community is explored. Applications for registration with the Ohio Veterinary Medical Licensing Board are distributed and the Ohio Veterinary Practice Act pertaining to veterinary technicians is examined.
Lecture: 1 hour – Lab: 0 hours
Prerequisites: VET 276; evening program registration
Corequisite: VET 296

VET 278 Seminar D (SU)  1 credit
This course is a continuation of VET 277.
Lecture: 1 hour – Lab: 0 hours
Prerequisites: VET 277; evening program registration
Corequisite: VET 297

VET 291 Clinical Experience I (A, SU)  6 credits
Observation and practical application of techniques used in veterinary medicine. Students are assigned to various veterinary facilities, including The Ohio State University Veterinary Teaching Hospital, private veterinary practices, veterinary emergency hospitals, research centers, diagnostic laboratories, and zoos.
Lecture: 0 hours – Lab: 30 hours
Prerequisites: All 100 level VET courses  Lab fee: $11.00

VET 293 Clinical Experience II (W, SP)  6 credits
This course is a continuation of VET 291.
Lecture: 0 hours – Lab: 30 hours
Prerequisites: All VET courses except VET 266 and VET 274
Lab fee: $11.00

Frequently Used Terms

**Ability to Benefit** test - A federally authorized test used to determine eligibility for financial aid when a student has neither a high school diploma nor a GED certificate.

**ACT/SAT** - College entrance exams recommended or required for admission to some colleges.

**ADA** - Americans with Disabilities Act.

**Alumni** - Graduates of a college or school.

**American Sign Language (ASL)** - Language for communicating with the deaf.

**Apply** - To submit a completed admission application form to a college or university such as Columbus State.

**Articulation** - A specific agreement between two schools that guarantees the transfer of a degree from one school to another; for example, Columbus State A.A. or A.S. degree to Ohio State B.A. and B.S. degree.

**Associate Degree** - The degree awarded if you successfully complete an associate degree program at Columbus State; also known as a two-year degree.

**Associate of Technical Studies (A.T.S.) Degree** - The A.T. S. degree enables a student to design an individualized program of study to fulfill a unique career goal. Student can select courses from up to four different technical programs.

**Audit** a class - Process by which a student may take and pay for a class for informational instruction only; no grade or credit is received for the course.

**Book Buybacks** - The Discovery Exchange (bookstore) buys back used books during finals week of each quarter.

**Business and Industry** - Part of the Center for Workforce Development; B and I assists local businesses with consulting services and training programs.

**Cashier’s Office** - The Cashier’s Office is the place where students can pay fees, parking fines, purchase discount tickets and other cash related functions; it is located on the second floor of Rhodes Hall.

**C.A.T.S.** - The Computer Automated Touch/Tone System allows students to register for classes using the touch-tone option.

**CET** (Computer Enrichment Training) - Computer training program offered through Business and Industry at CWD.

**Certificate** - Document testifying that one has fulfilled requirements of either a course or series of courses.

**Clawdette Cougar** - Clawdette is the mascot for Columbus State Community College. She appears at athletic contests and other campus gatherings and keeps in contact with students via a Facebook page.

**CLEP** - The College Level Exam Program that allows students to earn college credit for what they already know.

**Commencement** - The graduation ceremony held four times a year at the close of each academic quarter.

**COMPASS™ (Placement Test)** - Computerized placement testing for new students to identify the appropriate starting level for reading, writing and math courses.

**Contact Hour** - An hour of in-class time.

**Continuing Education** - Educational options available through noncredit courses and seminars designed to meet the licensing and certification needs of professionals in the community.

**Contract Training** - Providing training and consulting services to companies.

**Cooperative Education (Co-Op)** - An opportunity for students to bridge their program of study with career-related work experience.

**CougarMail/Student e-Mail** - Free e-mail program for enrolled students.

**Course Description** - A written statement that explains what will be taught in a class.
CPE - Continuing Professional Education courses offered at Columbus State Community College through noncredit coursework designed to meet licensing or certification needs

Credit - Recognition by the college that a student has successfully completed a course requirement leading to a degree or certificate

Credit Bank Hours - An agreement between an employer and the college that allows for an exchange of the use of credit hours and internship hours

Credit Hour - The unit of measurement for college work that applies to a degree or certificate

Curriculum - A series of courses that leads to a degree or certificate; same as a program of study

Distance Learning - Classes delivered online, by video, cable TV, Public Television, or by teleconference

Deferment (student loans) - Authorized period of time granted by a lender that a student does not need to make regular monthly payments toward his/her student loan

Degree Audit - Advising tool that provides a written report of courses in progress, courses completed, and courses remaining for completion of program or degree requirements

Developmental Education Courses - Courses provided to improve or refresh a student’s skills in reading, writing and mathematics

Diploma - Official record of graduation from or of a degree conferred by a school or college

DISCOVER - Computer-based assessment tool that surveys abilities, values, experiences and interests for the purpose of identifying a career direction

Dropping or Withdrawing (from a class) - Required process by which a student withdraws from a class in which he/she is enrolled. It is the student's responsibility to initiate that process with the college

Educable (Cable courses) - Cable channel that allows students to view televised classes

Elective - A course that is not required in a degree or certificate program but that is counted in total hours required

ERC - Educational Resources Center, otherwise known as the library, and located in Columbus Hall

Evening Classes - Those offered during the week and that begin at 5:00 p.m. or later

Exam Credit (Proficiency Credit) - Students who believe they possess the knowledge contained in a course may request of the academic department to take a proficiency exam.

Faculty - The college’s instructors

Fee Payment - Students’ fees may include one or all of the following: quarterly academic fees, lab fees, matriculation fee. Fees can be paid in the Cashier’s Office, over the telephone, or by mail. All fees need to be paid by posted deadlines.

Fee Refund Appeal - If a student feels that the refund he/she received is not accurate, the student may fill out a tuition refund appeal form. Form is available in Records and Registration Dept. in Madison Hall.

Fee Refund - Refund of fees sent for student-initiated withdrawals in accordance with the refund schedule for full quarter classes; the dates for refund guidelines can be found online.

Financial Aid - Funding in various forms and from a variety of sources that helps students with college expenses; federal and state grants, loans, and work-study programs are available to eligible students. Scholarships are offered through the college, organizations, foundations, and professional groups.

Fresh Start Rule - This rule can help a student who was unsuccessful in a previous academic attempt, voluntarily left the college, and has returned after a substantial period of time. If the student meets the criteria, grades may be expunged while the courses remain on the student's transcript. Fresh Start Rule can be used only one time.

Full-Time Student - A student who is taking 12 credit hours or more during a quarter

Future Scientists of Ohio Scholars Program - A joint initiative of Columbus State and Ohio State which provides full-tuition scholarships and academic support services to new Columbus State students who are interested in science or math-based studies; program is funded by grants from the Ohio Board of Regents and the National Science Foundation.

General Education - Courses that give the student an introduction to the liberal arts and can be tailored to meet the student’s interests and the requirement of specific degree programs
General Education Diploma (GED) - The GED is equivalent to a high school diploma and is accepted by most colleges and universities and by military recruiters.

Good As Gold Program - A tuition-free program for senior citizens (60 years old or older) who want to take college classes

Grade Point Average (GPA) - A mathematical way of computing academic performance by giving a value to each grade, multiplying the credit hours by the points, and dividing that total by the number of credit hours attempted.

Graduation Requirements - The courses and competencies in the program of study that you have to complete successfully in order to qualify for a degree or certificate

Grades - At the close of the quarter, and upon the completion of a course, the instructor reports a letter grade indicating the quality of a student’s work.

Grant - A type of financial aid that is available to students who meet the federal eligibility criteria

Harassment - The college strongly opposes and prohibits any offensive physical, written, spoken or nonverbal conduct as defined and prohibited by state and federal law. In cases where a student is the perpetrator, college policy defines sexual harassment and sexual assault as an example of general student misconduct, which may result in penalties, up to and including, dismissal from the college.

Health Insurance (student) - All full-time students registered for credit and attending classes at Columbus State Community College are eligible for low-cost, group accident and sickness health care coverage.

Health Record - Students in certain health-care technologies will be required to have a physician’s examination and might be required to have immunizations and laboratory blood studies completed prior to being accepted into health-related technology coursework.

HECC - The Higher Education Council of Columbus is an association of colleges and universities in central Ohio.

Honors - Formal recognition of high academic achievement

Housing - Columbus State Community College does not provide on-campus housing options for its students. Information regarding off-campus housing may be found in the Student Activities and Athletics Office in Nestor Hall 116.

Identification Cards - Cougar (student) ID cards, issued by the Department of Public Safety, are required in order to use many campus-related services or activities. The fee for the original ID is included in the matriculation fee paid by all first-quarter students. A $4.00 fee for replacement of a lost CougarID can be paid in the Cashier’s Office.

Instructional Technologies and Distance Learning - Formerly known as the TLRC, this is a training area housed in the Center for Teaching and Learning Innovation where students and faculty can experiment and be trained in methods of distance learning, teleconferencing, and more.

Internship - Approved, on-the-job training and experience in a real world setting in which student earns credit hours towards graduation

Intramural Sports - Nonintercollegiate athletic activities in which Columbus State students, faculty and staff can participate

K-12 Initiatives - Columbus State programs that work with students in Kindergarten through 12th grade

Laboratory (Lab) Hours - The time in the instructional plan that a student spends applying the theories presented in the lecture portion of a class

Library - Located in Columbus Hall, the library is usually referred to as the Educational Resources Center, or ERC.

Loan - Financial aid that must be repaid with predetermined terms

Loan Deferment - When a loan repayment is “put off” for a certain amount of time

Modular Courses - Courses that are offered in shorter, self-contained units

Noncredit Courses - Courses that do not offer college credit but meet individual interests or support career advancement

Nontraditional Credit - College credit earned through means other than traditional classroom or distance learning

Orientation - A formal or informal process to help new students become acquainted with the campus and student services at Columbus State

OTAP - Orientation to Trade and Apprenticeship Programs is an intense, 8-week, job-training program, which teaches
students the skills required to gain employment in the skilled trades and acceptance into apprenticeships or other career training programs.

Out-of-State Status - For tuition purposes, this status refers to a student whose permanent residence is outside the state of Ohio, or who has not maintained residency in Ohio for 12 months.

Parking Citation - Given for a parking violation at Columbus State; fine must be paid prior to registration each quarter and prior to graduation.

Part-Time Student - A student who is taking fewer than 12 credit hours of classes during a quarter

Payment of Fees - Fees can be paid online, in person, by mail, or by phone. There is a deadline each quarter for fee payment without a late penalty.

Peer Tutoring Program - This tutoring program offers individual or group tutoring to eligible learners through the Developmental Education Department. It is a free service, but is subject to availability of tutors.

Phi Theta Kappa - International honor society for students enrolled in a two-year college

Placement Test - A test given to students to determine their starting level in subjects such as writing, math and reading

Prerequisite - A course that must be completed successfully or a skill that must be demonstrated before a particular course can be scheduled

Prior Learning Assessment - This is college credit that can be earned for life or career experience. It is determined by testing.

Program of Study - A series of courses that leads to a degree or certificate through a specified curriculum

Proficiency Credit - College credit that is earned by testing for proficiency in a certain subject

Proficiency Test - A test for proficiency in a subject; can lead to proficiency credit being earned

PSEO - The Post-Secondary Enrollment Options program provides a way for current high school students to attend college, earning credit that satisfies both requirements.

Public Safety - The Department of Public Safety provides police/EMS, safety/security, parking oversight, and special services to the Columbus State community 24 hours a day, 7 days a week. Public Safety can be reached at 287-2525.

Quarter - There are four, 11-week, academic quarters at Columbus State: Autumn, Winter, Spring and Summer. Each quarter has a break (almost 2-weeks long) between it and the following quarter.

Records (Student) - The records kept by Columbus State for the period of enrollment, including grades, fees paid, classes taken, major declared, etc.

Refund Check - The money returned to a student if he/she has dropped or been canceled from a class

Registration - The process of selecting courses, choosing sections by day and hour, enrolling in classes, and paying tuition and fees

Remedial Course - A course taken to learn pre-college skills in various areas such as mathematics or communication skills

Residency Requirement - Requirements that must be met for an individual to be considered a resident of the state of Ohio for tuition purposes

Schedule/Scheduling - The list of classes for which student has registered for/ the process of registering for classes

Scholarship - A sum of money awarded to a student in recognition of academic achievement or other characteristic; stipend is to be used to pay fees or other college expenses and does not require repayment.

Section - The individual class meeting at a particular day and time with a specific instructor

Selective Service Registration - Registration for the Selective Service is required of all males 18-26 years old.

Speech Rehearsal Lab - The Speech Lab offers tutoring to students requiring critiques of oral presentations. SRL is located in Nestor Hall 017. Call 287-5391 for an appointment.

Spring Street - Columbus State’s literary magazine, which is published annually and highlights student work

Student Athlete - A student who is participating in varsity athletics at Columbus State, and who must maintain certain academic standards to participate
**Student Ambassador Program** - The primary objectives of this program are to provide students with basic leadership training and opportunities to work with multiple departments on campus and community service agencies off campus.

**Student for a Day** - A program for high school students which allows them to experience the college environment

**Tech Prep Program** - A program for high school students in which they enroll in certain high school courses in preparation for a college degree program and career in the same area

**Teleconference** - A meeting or class held simultaneously in more than one location via fiber optic connection of video cameras

**Transfer Credit** - College credits, earned at Columbus State or another college, which transfer as the same credits to another college or university

**Transfer Fair** - Annual event at which representatives from more than 50 colleges come to campus and distribute information about their transfer programs to Columbus State students

**Transfer Program** - A program offered by Columbus State designed to transfer credits to other colleges or universities in preparation for continuing with a higher degree such as a bachelor’s or master’s degree.

**Transcript** - A record of courses taken, grades earned, honors received, and degrees awarded at a previous educational institution, including high school or other colleges attended

**Tuition** - The money a student pays for instruction at any college; additional costs may include books and lab fees

**Tuition Reimbursement** - The money a student can receive back from a company or employer that pays for college courses taken by their employees; usually paid back after the course has been satisfactorily completed

**Tuition Refund** - The money refunded to a student after he/she withdraws from a class

**Veteran** - A person who has served in the United States military and earned benefits as a result of completion of service

**Veterans’ Benefits** - The benefits earned by veterans of the U.S. military, which may include educational benefits

**Video-Based Course** - A course offered by Columbus State on videotape, on cable television, or on public television

**Voucher** - A statement of the funds available from a grant to pay fees

**Weather-Related Closing** - Formal cancellation of classes and closing of campus forced by inclement weather; always posted on the college’s Web site (www.cscc.edu) and announced via TV and radio stations

**Web-Based Course** - Course offered online

**Work Study** - A type of financial aid that secures part-time employment for students eligible for financial assistance; this federally funded program helps students pay for a variety of college expenses.

**Writing Center** - Free, one-on-one composition assistance offered through the English Department; Writing Center is located in Franklin Hall 245.
Vision and Values

We see Columbus State Community College as a dynamic and diverse institution offering accessible, affordable, lifelong learning opportunities to meet the educational, employment, and enrichment needs of our community as it participates in the global economy.

We Value Being . . .

- An integral, respected, trusted partner in our community.
- A dynamic, evolving institution.
- An outstanding learning environment.
- An accessible educational institution.
- A diverse learning community.
- A results-oriented organization.
- Accountable.

Mission Statement

The mission of Columbus State Community College is to provide quality educational programs that meet the lifelong learning needs of its community. Through its dynamic curriculum and commitment to diverse learners, the college will serve as a catalyst for creating and fostering linkages among the community, business and educational institutions. The college will proactively respond to the changing needs of our community and its role in the global economy through the use of instructional and emerging technologies.

Institutional Goals

- To recognize, develop, and support excellence in both learning and teaching.
- To provide a learner-centered environment that provides the support services which assure that learners attain their educational goals.
- To provide relevant, thorough, state-of-the-art technical education that prepares students to prosper in the world of work.
- To provide coursework leading to an associate degree and/or lower-division preparation for college/university transfer.
- To provide educational, cultural, economic, social, recreational, or aesthetic programs and services to meet the changing needs of individuals in a multicultural community.
- To provide lifelong educational programming for personal and professional growth, cultural and recreational enrichment, and international education.
- To foster an environment that values an understanding of and appreciation for diversity.
- To develop and strengthen partnerships with industry, primary and secondary education, business, labor, community organizations, and government to enhance the economic development of our service community.
- To broaden learning opportunities through the creation of a strong community outreach program.
- To collaborate with our community to understand and satisfy its needs and expectations to provide quality educational services within available resources.

- To encourage management policies which demonstrate institutional integrity and effectiveness.
- To enhance learning opportunities for students, faculty, staff, and administrators through the effective use of technology.

Strategic Planning Goals

- Technology Support
- Access
- Global Perspective
- Community Building
- Workforce Development
- Financial Resources Development
- Marketing and College Image
- Human Capacity Development
- Board Development
- Financial Stewardship

Philosophy of Student Learning Assessment

Columbus State Community College believes that the college can influence how well and how much students learn. The opening line of the college’s mission statement declares that Columbus State is charged with providing “quality educational programs that meet the lifelong learning needs of its community.”

Consistent with the college’s institutional goal “to provide a learner-centered environment that provides the support services which assure that learners attain their educational goals,” academic assessment provides systematic, routine processes that allow the faculty and students to determine the degree that students are achieving the stated student learning outcomes. The following questions guide the assessment process:

1. How are students learning?
2. How much are students learning?
3. To what extent are students learning?

Purpose of Academic Assessment

Academic assessment is the process for ongoing improvement of student learning and success. The assessment program at Columbus State Community College has four specific and interrelated purposes:

1. To improve student learning
2. To improve teaching strategies
3. To document successes and identify opportunities for improvement
4. To provide evidence for institutional effectiveness.

Columbus State’s assessment program is mission-driven and faculty owned. It includes assessment of courses and programs in the following academic divisions:

- Arts and Sciences
- Career and Technical Programs
- Center for Workforce Development
ARTS AND SCIENCES DIVISION
