

LOGISTICS ENGINEERING TECHNOLOGY

Recommended High School Coursework

The A.A.S. Logistics Engineering Technology at Columbus State Community College is new multi-disciplinary pathway that incorporates coursework from logistics and supply chain management, engineering technologies, and information technology and computer science. This program prepares students for careers as industrial engineering technicians, operations specialists, and systems analysts in warehousing, distributions, and transportation settings.

A strong foundation of high school coursework in math and science is recommended for students. The course list below will help prepare high school students for an associate's degree in Logistics Engineering Technology.

RECOMMENDED CORE COURSES

Mathematics: (4 units)

- Algebra I
- Algebra II
- Geometry
- Pre-calculus
- Statistics

Science: (4 units)

- Biology
- Chemistry
- Earth/Physical Science
- Physics
- Intro to Engineering

Computer Science & Technology: (1-3 units)

- Intro to Computer Science
- Computer Programming
- Computer Networking
- Intro to Robotics

PREFERRED ELECTIVES

- Supply Chain Management Principles
- Customer Service
- Principles of Marketing
- Business Communications
- Excel Fundamentals
