# Creating a HUM XXXX option

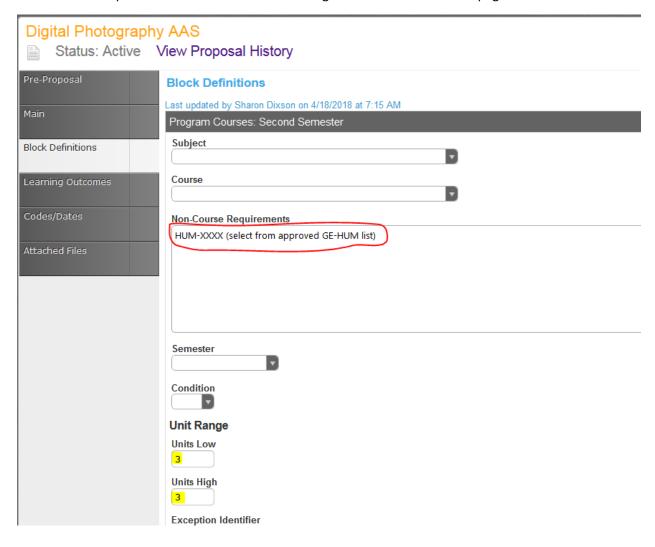

This is a 2 step process; A) create the HUM XXXX course and then B) create the HUM XXXX list of courses the student can choose from.

### A) Create the HUM XXXX course

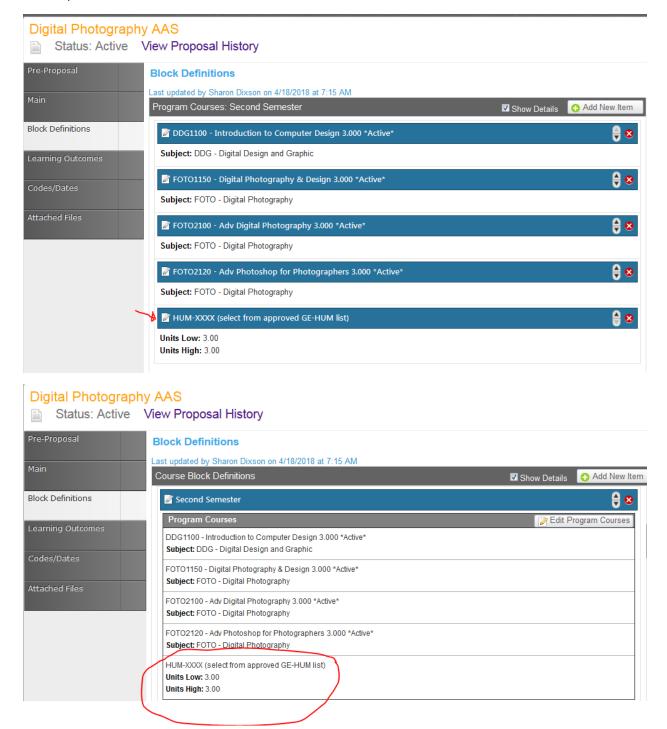

From the Block Definitions Tab, under the semester that you want to add the HUM XXXX course, click the "Add New Item" (highlighted in yellow) in the upper right corner of the Program Courses banner.

Leave the Subject and Course fields blank and in the Non-Course Requirements field enter "HUM XXXX (select from approved GE-HUM list). Make certain to enter the number of credit hours that the student will need to complete in the Units Low and Units High fields. Save out of this page.

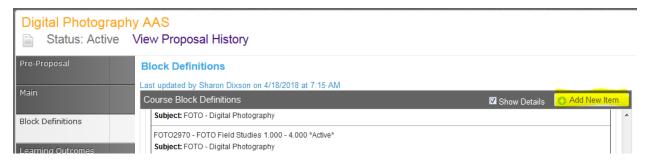

Dependent on which view you are on, you will see one of the following two screens to depict that you have set it up correctly. The requirement is now placed on the appropriate semester that you want it to be completed in.

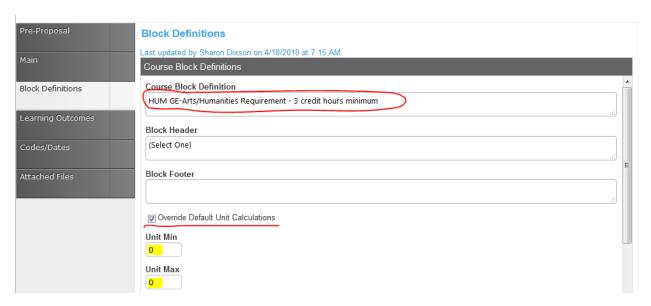

### B) Now you will need to create the HUM XXXX selection list

Click on the Course Block Definitions bar "Add New Item" (yellow highlight)

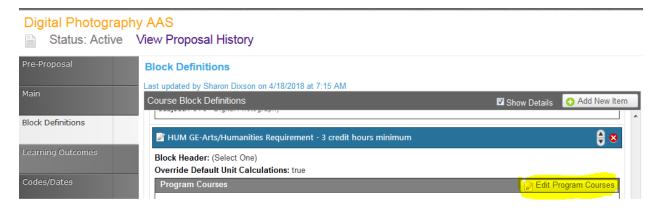

Enter the Course Block Definition field identifying what you want the section to represent (red circle). Make certain to place a check in the "Override Default Unit Calculations" box – this will keep the credits for the courses in the list from adding into your overall credit total for the program. Set the Unit Min and Unit Max to "0" and save out.

Now you can begin to add the courses that you want to be part of the list of HUM XXXX courses.

Click the "Edit Program Course" button and add courses until you get your entire list complete.

Make sure to save the list by clicking "Done" before you move on.

This is how it will display in the Catalog Search tool on the CSCC website

Second Semester	
DDG1100 - Introduction to Computer Design	3.000 🗸
FOTO1150 - Digital Photography & Design	3.000 🗸
FOTO2100 - Adv Digital Photography	3.000 🗸
FOTO2120 - Adv Photoshop for Photographers	3.000 🗸
HUM-XXXX (select from approved GE-HUM list)	3.000

# **Creating a Technical Elective Option**

This is a 2 step process; A) Create the TECH XXXX course and B) Create the list of course the student can choose from to fulfill the requirement.

The process is the same as Creating a HUM XXXX option – the labeling is different.

### A) Creating the course

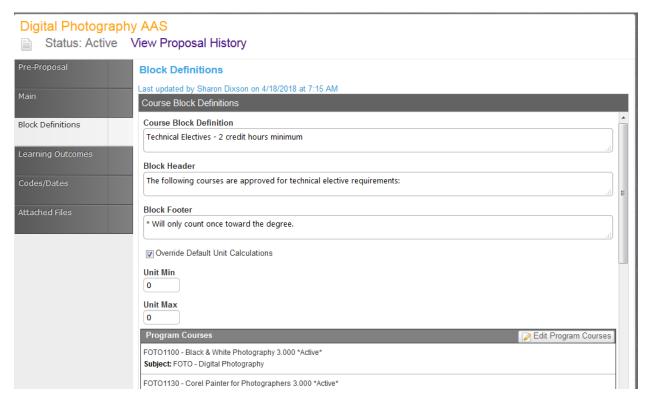

If the elective courses will all come from the same Subject area, then it can be labeled as Subject XXXX

```
FOTO-XXXX (Technical Elective)
Units Low: 2.00
Units High: 2.00
```

If the elective courses will come from different subject areas, then you should use the TECH XXXX naming convention.

B) Creating the list of courses the student may choose from

If there are instructions that are necessary for the student, you may use the Block Header and Block Footer fields for those instructions. Follow the "Edit Program Courses" process to add the courses in.

Once you have created your TECH elective option, it will display on the website search tool like this

Third Semester		
FOTO2130 - Photoshop for Retouching	3.000	~
FOTO2600 - Studio & Environmental Portraiture	3.000	~
FOTO2960 - Business Photography	2.000	~
